A NEW OCCUPATION

Modern Civilization Opens Up Strange Avenues.

"THE DINNER PAIL INDUSTRY"

essities of Child Labor Provide E ployment for Parents-A Bright Outlook.

Workingmen who have given hostages to fortune in the shape of a family, ald do well to study the quotation given below and ask themselves if this is the best that the capitalist system, which they have supported so long, can do for them. They perhaps will not derive much satisfaction from its perusal, but the assurance that this demands serious national attention" should go a long way to console those who pin their faith upon the political representatives of the class e material interests require that the little children of the workers should slave in mine and factory, while their arents either swell the ranks of the employed or secure a position in the "industry," of "toting" the dinof their offspring. This "industry" stated "is largely due to the fact that the fingers of the fathers are no longer nimble," but it seems to us that it would be more reasonable to ascribe its origin to the fact that the brains the fathers are composed of mud. Just imagine the Américan citizen who after carrying his children's dinner pail to the factory, and conscious of having his confreres, strenuously exerted nobly performed his duty, asserts the themselves to pacify the hunger stricknecessity of maintaining our "free" inor expatiates on the "crime of '73." He wants to hear nothing of o sir! It might take his from him-and it would. This quetation fairly bristles with pointers for the working class. It needs little further comment from us and we therefore present it in full for the con-mideration of the fathers of the chil-

father are no longer nimble, and there is rarely much employment in the neighborhood of a cotton factory to which he can turn lifs hand. Where industry is diversified the labor of a factory worker's children no more keeps him from working than the labor of children on the farm keeps farmers

weeps him from working than the labor of children on the farm keeps farmers from working.

Wages the children earn cannot be spent without paying for the labor of some one else. This labor, therefore, is not the embarrassment to the employment of parents it is often asserted to be. As a rule, its worst effect upon the labor of adults is by increasing the number of those seeking jobs, without increasing the number of those giving them, and thus slightly reducing the level of wages. These material considerations however, are of minor importance. The ground upon which child labor is to be prohibited is not the right of adults to be protected against competition, but the right of the child to be fitted for competition which he must meet in after life.

Workingmen, you don't have to trou ble yourselves about the "right of the child to be fitted for competition, etc., Your masters, the capitalists will see to that all right. The training nines is anapty sufficient to qualify to the Wall street stocking. them for the infamous competitive sys. and when it comes their turn to "tote" think about it, and what are you going to do about it? You can surely see | would be most strenuous in denvious masters require? Is it your duty to al- class interests in America. The capifor your own firsh and blood to be talist fron and, the proletarian lamb used as grist for the profit mill of your should he down together in peace, only siavement and destruction of your chil-

antee against want when your "finger are no longer nimble?" If you think s then the socialists are certainly after your job, and as they don't believe such an "Industry" deserves encouragemen you will do well to ignore them.

Socialism in Italy.

It is gratifying to note that in Italy, an amnesty has been granted to the po'itical prisoners who were convicted by the capitalist and reactionary clasourts, of treason and sedition during the late bread riots in Milan. The political prisoners since that time, have been chiefly those socialist deputies who, seeing that reaction must rule temporarily for the present in Italy, destroyed the voting urns and ballots in the Chamber of Deputies as a pro test against class rule. It is equally satisfactory to note that they are also included in this amnesty. It is said that the daughter of the celebrated scientist Lombroso, who has taken very active part in the propaganda of the socialist movement in Italy, has been instrumental to some extent in procuring a full amnesty for our com rades, she having made a request to that effect at a certain royal celebration which occurred lately. While the capltalist press generally look upon this occurrence as an act of generous clem ency to guilty persons, it is a matter of common knowledge that the crime of our comrades, who were sentenced concerning the Milan troubles, consisted entirely in their having tried to dissuade the famished victims of capitalism from useless and suicidal acts of violence against the class which they themselves were responsible for having placed in power. Even the witnesses of the government specifically en women, children and men, many thousands of whom were slain by th volleys of the military. Leaving the bourgeois press to its natural defence of falsthood and misrepresentation, the released revolutionlets will take up the work anex, by laying the solid foundations of a movement based upon the class-consciousness of the workers without which all attempts at sucessful revolution must necessarily be

Mr. W. Churchill Solves the Problem of Socialists Not Concerned With Actions the Unemployed in Approved Capitalist Fashion.

Good news for the unemployed: A "hero," who has jus, escaped from he clutches of the barbarous, brutal and bloodthirsty Boers, by hiding for three days in a box car under a heap of coal sacks, brings glad tidings of great joy to his civilized countrymen, or which the unemployed portion of the latter should rise up and call him blessed. From his lofty watch tower the aforesaid box car we presume) he has been spying out the land and has liscovered that it is a land, figuratively peaking, flowing with milk and honey, and that will amply repay any price neasured in blood and money that may e paid for it. And above all its acquisition will bring with it the priceless boon of "work" for 250,000 men. The 'hero" in question saith as fellows:

Between 1870 and 1880 the amount of ceaseful revolution must necessarily be forming. He wants to know what increased, in 1870 out of 5.05.00 children of these ages, 1.115.00 over wage-carners. The last census changed the classification of children so that exact comparisons are impossible. It reported alast 07,055.000 children between 10 and 14 years old but 62,000 were wage-carners. The last census changed the classification of children so that exact comparisons are impossible. It reported alast 07,055.000 children between 10 and 14 years old but 62,000 were at work and on the basis of this report Commissioner Wright claims that a great gain has been made says the Chautauquan.

This, however, is doubtful, as 14 is precisely the age at which children are most likely to leave the grammer schools and go to work. The employment of over 500,000 children under 14 in factories, shoes and mines deserves serious national attention. In the mining regions of Pennsylvania boys of 13 are taken out of school and put to work for ten hours a day at the breakers from school before they are 19 and set to work for twelves hours a day in the cotton mills that are now being scattered over the country.

The argument often made that child proposed the full of the country of the working classes who are reported to the country of the country of the working classes the work for ten hours a day at the breakers of the working classes the working classes the working classes the working classes the work for the hours a day in the country of the working classes while the years hand they are hanging back for. He indignantly predicted "seditions" is the country of the working class of the United between the working class of the United by the probably keep at it, as it is less daries of the working class to the which of course they need not continue doing if they accept the children man revolutionists of 48, that to carry but a revolution in the

Mighty Host of British Workers Overthrow of Capitalism Always the Central Object.

AN EXCELLENT OPPORTUNITY, VALUE OF CERTAIN DETAILS.

of Individual Capitalists-A Class

It is a matter of the utmost importance that the object of the socialist movement should never be lost sight of n discussions on the details and phases of capitalist exploitation. Particular examples idustrating such exploitation are often magnified and dilated upon until in a manner they seem to constltute a grievance in themselves and assume an importance which is only due them when considered as a part of the present economic system. The manner in which individual exploiters dispose of the surplus product extracted from the workers is also frequently given a fictitious value, and the same may be sald, for histance, of such questions as the percentage of their product which the working class receive; higher and lower wages, taxation, the parsimony or prodigality of individual members of There is plenty of work here for a quarter of million men, and South Africa is well worth the cost of blood and money. More irregular cavalry is ters is of the utmost value to the workwanted. Are the men of England all fox hunting? Why not an English horse brigade?

For the sake of our manhood, and cour dead soldiers, we must persevere cialist agitation, viz: the necessity entailed upon the working class of overtalled upon the working class of overtal tailed upon the working class of over-Here is a patriot calling in trumpet throwing the system of production of ones on the "men of England" to avail which they are but incidents. They are themselves of the opportunity of which illustrations whose principal value is to may not occur again, to come early and point out such necessity. Considered world the rush, so to speak. Like the as isolated facts they are almost worthfamous Artemus Ward, who was will-ing to sacrifice all his wife's relations the percentage of product which goes that the Union might be preserved, Mr. to the workers must lead up to the fact Winston Churchill (the here of our that on the whole the working class story) is also willing that 250,000 "other receive about the cost of their preducfellows" should be given a chance to tion, that this is due to and inherent shed their blood in acquiring this land in the present mode of production, and of promise. He wants to know what that no matter what statistics may be produced, the result must be ever the nantly asks if the "men of England same while that system remains in are all fox hunting". That's an every force, Lists of percentage figures have one. They're not. Some of them are no power to feed, clothe or shelter human beings, or in any way alter the material conditions of the lives of the workers. The capitalist class may perhaps use them for a while with partial uccess, to blind, flatter and delude is based, but this can only be tempo

amount of surplus product extracted, when considered as a definite object. a matter of comparative indifference. The fact that Russell Sage rents his Winston hall bedroom for \$1.50 per week or that the Bradley-Martin ball cost \$150,000 may perhaps be proper subjects for the ders of "charity" organizations to vent their wrath upon, but looked at from the socialist view-point, these

can stocks and shares, for the sake of the capitalist system of production, not the class to which the Mariboroughs because certain persons identified with (I am one of them) belong, for the sake that system are thereby enabled to indulge some particular hobby, be it lives of slaves and paupers, for the parsimony, prodigality or debauchery, but because that system denies to us the robbery, ruin and degradation of the opportunity of producing to satisfy your class, I call upon 250,000 of you our needs, dooms us to a life constantly menaced by the terror of want and un. certainty, the life of a slave mocked by the name of a free man. To deny this would be a justification of the taunt so frequently hurled at socialists that we "envy the rich."

If we can imagine for a moment that the productive capacity of man has reached its limit, or to make it plainer, asume that the year of greatest production forms a high-water-mark which cannot be passed, and that the their own use, even then it would be a trifling matter compared with the unimited possibilities of production which we know that mankind are capable of realizing if given opportunity. And as the present system denies that opportunity and limits production in order that a small class may individually appropriate the product, of the labor of others, a product whose volume must always be limited by the exigencies of the profit system, it therefore follows that every weapon which the socialist firely to the accomplishment of the central object, the overthrow of capitalist production.

Fighting upon these lines, the unasidable class struggle becomes distinct and irrefutable, the working class more quickly realize the nature and import of their mission, and the attainment of the Socialist Republic is brought per-

The ammunition of the socialist may erhaps not be altogether wasted in the continuous discussion of these details, but it is certainly questionable if it is

being used to the best possible advantage. In concluding, we cannot do better than call the attention of our so cialist readers to the clear and forcible tatement of Mark in the "Manifesto:

"In all these movements they (the cialists) bring to the front as the LEADING QUESTION in each, the PROPERTY QUESTION no matter what its degree of development at the

Class Solidarity.

e country, the world. The ideal of their patriotism is that no worker shall whoever bids it, take up arms against any other worker in the world. They ook forward to a time when French workers shall face German .workers, and Russian workers shall face British workers, and facing one another shall all throw down their arms and fraternize, and look on amusedly while the officers do the fighting. The patriotic worker is ever working for this. He knows that French or German, or English or Russian worker has no grievance against him; he knows that they are all alike slaves of the caprices. catspaws for the whims of the common nemies of all workers-the cosmopolian capitalist, the slave owners of the world, the syndicates of whom kings and presidents are the mere agents for pay. He knows this unconsciously already: education is teaching him; that is to say, is giving the consciousness of the fact. When he has learnt his alphabet on the subject, he will spell it thus-"Solidarity." And then the world, and the kings of the world, and the capitalists of the world will begin to vonder where all the "patriotism" has gone, which had served their purposes so well, and will begin to "see things"

generally, and very uncomfortably. To the worker, the class-conscious worker, the Boer agricultural laborer is a brother worker equally with the Birmingham, Belfast, or London unem. ployed lad forced to enlist to escape starvation. The worker has no anicosity to either: is glad if the former sists aggression successfully: that the propagandists of solidarity have not in the past been working so hard in the ranks of both commandoed Boer and 'listed Briton that, when they met one another, they would have recognized one another and celebrated the the kopjes to an obligate of chagrined officers generals, Chamberlains, Armageddon of capitalism will be fought, and the stone that shall cut itself from the mountain's side shall be named "Solldarity," and take the form of a Universal Soldier's Strike. No Unity Possible for the Dying Middle Class.

NOT AN ECONOMIC FACTOR.

Reformers Meet, and Exhibit Their Inability to Comprehend Economic

In the rooms of the Y. M. C. A. on Saturday, December 30th, in this city, choice collection of small middle class intellects dubbing themselves a "Union Reform League," met together in order consider measures whereby the economic progress of the world, and especially of the United States, could be directed and controlled to suit the interests of the "people," an expression by which they designated themselves. The stock-in-trade of this gathering onsisted of a liberal supply of muddled deas, and a resolution that ran-at east it didn't run-it wasn't able to-it just flopped about aimlessly in the folowing fashion:

"Resolved, That we call upon all those who believe in social reform, to work for the adoption of the initiative and referendum, and to organize in one party for that purpose, Republicans and Democrats to be excluded."

This decrepit abortion, not finding a econder, at once died a natural death, The first orator stated that in his town the water taxes were so high that several philanthropic capitalists brought the matter before the courts, and the obnoxious taxes were at once lowered, He then rather illogically deserted the water question and urged his hearers "to heap up the fire until the prairie was all set ablaze." Whilst he was in the midst of his advocacy of this seemis ingly purposeless incendiarism, the spe heartily sorry if the latter is killed cified time allowed him expired, and performing his master's commands, he accordingly subsided. Nobody ap-But all the same he sincerely regrets pecared to exactly understand what it was all about, but as the speakers "intentions" were evidently of the best, it went all right. The next "reform made a speech in which he said nothing, and then asked for an extension of time, which was of course instantly granted. He made the best of this agent of the Co-operative Circulation Australian jingoes. Thus it is that the Library company of Battle Creek, Mich., a firm that supplied literature which was guaranteed to convert a Single Taxer into a socialist, and a socialist into a Single Taxer. He could also supply volumes, nicely bound, cioth. all the Antichrists of Officerdom, Capi. backed ones, whose effect upon the talism, Caste, and Oppression shall general public was such that it would make them accept anything. juncture a voice from the audience in a tone of inquiry remarked, "Kankakee, aand the speaker collapsed amid the general laughter which followed.

The next subject was the summary of the pesults which this Social Reform outfit had hitherto accomplished, and the last speaker handled his theme in a masterly fashion. He said that "five articles" (he didn't describe the articles) had been sent out at the last meeting of the Union Reform League at hunger,
In hope we strove, and our hands Buffalo, at which place the League accomplished nothing, and he hoped the complished mothing, and he hoped the same results would be obtained here. The meeting, which was apparently satisfied that this object had been attained, was then adjourned, having first been notified that a person named Jones, who didn't believe in any po litical party and who had organized one to demonstrate that belief, would address them in another hall the same evening

It is said that there was a stray socialist amongst the audience, and judg-ing from the "Kankakee" episode we are inclined to believe that such was most probably the case.

UNITED STATES.

OUTLOOK FOR SOCIALISM. With the completion of the current year, by general consent the new centu. commences, and it will doubtless afford room for much speculation as to the nature of the changes which are universally expected to mark its progress. The nineteenth century, it is generally conceded, has witnessed a complete transformation in our industrial system, or rather it has developed, by the marvelously increased productive capacity of mankind, the industrial systern of today, whose foundations were laid in the preceding centuries. The era of machine production in its develoument has given mankind an idea of its possibilities in providing liberally and even luxuriously for the wants of the race. Enthusiasts and optimists all through the century have prophesled in beautiful pictures the unlimited possibilities of happiness which in their imagination must ensue when mankind have conquered the productive powers of nature. This period has arrived, at least the capacity of mankind to preduce abundantly the necessaries of life for all, is now unquestioned, but to the amazement and confusion of the prophets and theorists, the results of this triumph of human intelligence have not only not ushered in the "golden age" but upon the contrary baxe entailed upon the great masses of mankind a life of want, uncertainty and degradation which is now so apparent that it is forcing recognition as by fal the most important problem of the age. ose whose apparent interests are best served by the maintenance of the in the pleasing work of "reform," may bring forward all manner of fantastic es and panaceas in their attempts to avert the inevitable economic catas trophe which is now being seen more or less distinctly by the majority of utterly different proposition. Half a century ago the researches of Marx. Engles and others, laid bare the economic basis of society resting on ma tertal interests. This philosophy, strengthened and confirmed by subquent researches along the same line ought, has rapidly forced its recegnition upon the minds of millions of men, the expression of whose ideas is ced in the International Socialist evement in all lands. The present system of individual appropriation of the results of collective labor is now en to be but a transient phase gh which society is passing, a phas bich, though bringing unfold misery to the mass of mankind is still recognized as a necessary prejude to another omic system in which distribution st harmonize with production. Only through a series of class struggles has buman progress as we know it been made possible, and only through a class struggle for the control of the means of duction and distribution which must end in the overthrow of the present rul-

ing class, can the inevitable social rev

clution be accomplished. As we stand

glance at the working class movement

In all lands, note the steady and grad-

It is a time when the party which took piace some time ago, tion inheres in the facts and will not driving force are tremendous; the reemphasizes once more the absolute fu. down.

So it comes about that today there is no realm of human life into which ance, direction and assistance given to svils which are merely results of the the philosophy of socialism has not the socialist movement would be intellicurrent economic system, while at the penetrated, until it is hard to find an sent enough-socialists enough to seize same time endeavoring to maintain and audience in which there is not some one instead of blind, discordant, contradicexpand that system. The impotency of individual who will demand that the tory and weak. This is all that can be shall not be ignored in obedience to any time. It is the voluntary conscious

ment a thing of the past-the "free silver issue" an "irridescent dream" and other lands has shown such a course well launched and all proposed "reso childlike an innocent as the average American laborer. Every day it becomes more evident that no matter what subterfuge may be put forward

And today it looks as if this would be done almost IN SPITE of the organized they have expended in preparing the

They are divided into lactions and split into conteding parties. The S. L. when it ought to be pressing on to new life and strength. But more than anything else it is necessary that son plan be found of uniting the S. L. P. and the S. D. P. Were this done the result would not be simply addition but multiplication - raising to a higher power. It would be an instance of two and two equalling ten or even many more.

Such a union today would be simply the ontward expression of an existing relation. Did I think for one moment that such a union meant either a revival of the bigotry, tyranny and gag rule that once reigned in the S. L. P. or of the spirit of compromise and indefiniteness that marked the beginnings of the S. D. P., I would be first to oppose it and the last to agree to it.

But the man who today takes either of these positions, in so doing shows driven from the S. L. P.; not because of the exertions of any man or set of men in New York, Chicago or San reflected in the relitical relations had reached a point where the existence of such an element was unendurable. only possible at an early stage of the movement and could be no more reintroduced today than the tariff could be again made an issue in a presidenparty it must drop all those things of ship would today no more tolerate "Farmers' fusion, compromise or the scheme which marked its birth.

It is the height of the ridiculous today to talk of a "spirit of bigotry" or of ompromise" as dominating a party of either 2,000 or 6,000 members scattered ever three million square miles of territory. There is nothing by which to judge the spirit or character of a party save by its organic acts, its platforms, constitutions, press, speakers, writers. este.

These are the fixed standards that with the passage of time winner ing all these features on either side and can anyone say of this "It is all clear papers, articles, speakers, pamphlets there are on both sides that many wish were gone but more in each that all will wish to save.

Why then should we let pride of its name, organization intact shows as little

to which he is clinging as the barnacie ism of the mighty engines that are throbbing in the heart of the vessel.

The socialist who quibbles ove names, persons, organizations or particular forms has need to again enter the kindergarien of socialist philosoph; and learn that the revolt of labor is a movement, not a scheme, a mighty up. heaval of social forces, not a re-naming and remodeling of existing institutions

is a time when such services are most ovable obstacles to advance many. A unifed party would mean that the guidtrue interpretation of economic facts said of the efforts of the socialists at part in the movement. Are we intelligent enough -socialists neough to seize shrewd politicians of both great capi. cal situation we see the Populist move. it? Or are we going to forfeit our right possible to the one name that is worth clinging to-that of socialists-and waste energies in duplication of effort, mutual abuse and recrimination until this present opportunity shall pass by. next lew weeks will give the decision, What shall it be?

SNAP SHOTS BY THE WAYSIDE.

In this season of prosperity, the incidents going on in the Chicago Building trades are of immense educational value. The contractors have formed a combination to combat the "tyranny of the unions in their "unreasonable" demands on the matters of wages, conditions and character of work. They claim that these demands on the part of the men have hampered building operations in Chicago.

The facts as revealed in the confernces between the committees on each side, show that the wages of the men during the past year have not materially advanced. In fact, in some trades, as the bricklayers and others, the union scale has not been changed for the past eight or ten years. But the cost of building material and supplies has advanced-as much as 300 per cent in some instances. The contractors are not trying to escape from that advance, but what they are really after, is the destruction of the solidarity which exists among the workers in the building trades in Chicago.

This opens a large field for thought. The struggle in the economic field be tween the wage workers and the own ers of the tools of production, when alluded to in the public press (which is largely read by workingmen), plainly gives the impression that the demands of the men are always extortionate But there is never a kick against that class who through the ownership of the tools of production become owners of the product of labor.

Now let us illustrate. Workingmen require flour to make their bread. The mili hands may unite to demand higher wages. The public press at once de nounces this action. The mill owners raise the price of flour. The same press declare this a sign of prosperity. And again. The workers in the building trades demand higher wages and better conditions. The press condemns this as retarding the growth of the city. estate a good investment. The antagonisms evidenced by these simple truths, should be taken to heart by every workman in the building trades, (or in any other trade for that matter). and proper expression, given to such recognition at the ballot box.

And after all, many socialists think that the question as to the degree of exploitation is one of the most vital im portance. It is true that the resistance offered by the economic movement of the workers may have sometimes a staying quality. Just as a slave owner who after personally driving the slave to the extreme notices a flash in the eye of his victim, hesitates and does not insist at that time. But he sends the overseer after him, and then his will is enforced.

ist class may notice the signs of revolt in the actions of the economically organized workmen, and doubting their insist for the time being. But they will send their overseer, which in such case is represented by the improved ma chine, the greater combination, the most thorough concentration, and then the lash is laid on with renewed vigor and the desired coercion attained.

The contradictions in the capitalis press are of such a character that they frequently confuse even those whi tread carefully through their mest One day in their "news" columns, the fact of "prosperity" is proven by the for relief made upon the county agent the police stations, already exceeds that

The plane-makers' strike seems to be n its last lege. The advice of the socialists that the men should study social and economic subjects during the strike seems to have been entirely dis- barring the union of a man and regarded. The men, through their leaders, ignored every step towards the class struggle. The Chicago plano-makers were "self-reliant" and what capitalist is not overjoyed at seeing his fool workingmen exhibit that quality? are not dreams of some solitant con speakers have permeated every depart, and it will go on in America whether No wonder that Boss Geo. P. Sent gave; science, nor exattations of a proud these "self-reliant" piano-makers turkeys for Thanksgiving, as an evidence of his appreciation of their "self-reliance."

> They forgot that even as plano-makers, they represented but a part of the workers in that industry. Just the same as all the plano-makers represent but a small part of the whole working ments of the evolution of property, and class. In the trade reviews of the year We see that the planos that were made in Chicago were made in New York, Boston and Baltimore. Now tel the plane-workers of Chicago learn from this failure to unite with all the property. other plane-workers, and then let all eternal evolution will not store at colthe plano-workers unite with all other workingmen, and unitedly march to the polls for the conquest of the public this will not be because of the preferpowers by means of the socialist ballot. In such an event failure becomes im-

So the advance agent of the coming performance is already in training for In the past, the clever adto have published and circulated, accounts of their stars being robbed of interesting sketches of their divorces, were ladled out to the gaping public. The late P. T. Barnum was a past mashe has succeeded in keeping himself prominent in the public eye. He, who while opposed to the war policy of the present administration, did not refuse to don the uniform of a colonel-and draw the pay, again steps out on the stage, this time exhibiting his statesmanlike qualities by riding on the back of an ostrich. But why an ostrich? Can it by that he who attempted to ride into the White House on the backs of the people, can detect an analogy between them and his present mount? Possibly so. The resemblance between them lies in the fact that they are both famous for their capacity in swallowing anything.

BOOK REVIEWS.

L'IDEALISM SOCIAL par M. Four.

This is a title of a beautiful book by Fourniere builds up his ideal. exhausted. I am really very sorry not ideals the most decisive tendencies whirlwind of events carried us away. however our duty to constantly ming honorable, and even glorious, for our party than the persistence of setting the To struggle and to think, that forms gent, loving and good.

That a socialist like Fourniere, who wrested from the bourgeois and reactionary parties the department l'Aispe, who so nobly participated in the struggle of the Dreyfus case, who carried into the land his word and his propaganda, and who, yet recently, formulated on the parliamentary tri bune a most formidable and substan. tial accusation against the criminal industrial exploitation of society, was able, in the midst of tempest, to collect his thoughts and develop, in the few quiet hours, the future of socialism The different sections of the capital- the march of human society-the relasocial ideal; this is a mark of strength and screnity; this also is, for all those emong us who are engaged in the struggle, a high example, a call to these superior sources of light and thought, where the energy for the struggle re-

But, to tell the truth, no other party can like the socialists, so well combine, thought and action, because that is a high ideal they want to realize, and because that ideal, suggested by the movement from the reality itself, and separable from the life, action and

The whole sense of the book con deflars itself in the terminal title: Social Idealism. There is idealism because our party does not limit itself to mechanical registering of the automatical results of the social move-

true equality and a true frateroity among human beings, debarring, to ever, from the work itself, in the depth of everyday life, the capitalistic military or eternal exploitation. They also desire to ennoble and purify love. transform and idealize the family de woman on commercial basis, which dishonors the latter and makes of her a

But this idealism is "social." It does not mean any individual fancies. They mind, that could transform the world. There are only such true and, same ideals, that are suggested by the move. ment of facts themselves and which in some way or other are but continua tions of the present events.

Thus Fourniere notes with a remark. able precision all the successive me points out that this evolution of sarily ends in collectivism, A new mode of production must bring about a new form of property which cannot possibly be anything else but social But homan society in its lectivism: It will march steadly and unceasingly towards communism, and ences of mind which will give this or that form of production and of prop. erty. No, this is the social logic itself

As long as socialized production will

ciety will be obliged to economize even In the necessaries of life, it will be performers are getting ready for the compelled to require from each member rehearsal, as will be seen by the fol. of the great family, as much production as will form the equivalent of the values assigned to him; but gradually Austin Tex. Dec. 28.—Ex-Gov. John S. Hogg is determined to give Col. William Jennings Bryan a good time during his stay in Austin. The exact size at his home. These have been broken to ride and also to drive double to the family carriage. Mr. Bryan and Mr. Hogg have had much fun riding them, around a vacant lot. Now the birds is the fleeter of foot. To decide their will be an exhibition race in Congress avenue Saturday. Bryan riding one of the birds and Mr. Hogg the other. A crowd of visitors is expected here to vitness the race.

So the advance agent of the coming however will have to determin transition of collectivism into co ism, as they will determine the nange. vertisers of noted actresses were wont lectivist as well as the comfounistic able proportions, around which and as valuable jeweiry, etc., and when the tion of capitalism into collectivism. they already determine now the season of their appearance drew nigh. Thus we see, that Fourniere's idealism dresses, and particular poodle dogs, it is the reality itself, as is for seen by is based upon reality; more than that the mind and hastened by the vigor of ter of this art. And now, he of the sciousness of its proper growing, of the "cross of gold," is similarly again in law which determines the successive appearance of its leaves, its flowers and fruits and pushing its best juices towards its most beautiful fruits, add. ing, by the strength of its will, to the force of evolution all that is given to it by the warmth of the sun and rejeicing at its deep harmony with the resisting soil and the ideal of light. Such is the picture of the moving society. of the thoughts which it reflects and amplifies. Fourniere's book was written before the appearance of the practical theoretical dissentions that have agitated socialism in Germany and in France. But like all strong works, it contains an answer to the difficulties of detail, which were not even foreseen, "Le Temps" tried the other day to bring into opposition the "Idealism" of Fourniere to the "Marxism" of Guesde. One easily discerns, from the rapid ac-count of the book I made, how supern. cial and factious this opposition is. It niere. Translated from Jean Jau- is just upon the movement of the re-res in La Petite Requblique. ality, so deeply studied by Marx, that Fourniere, that was published about a the same time he recognizes the power year ago and whose first edition is just of man's action, which transforms into The property owners raise the rents, having had time to relate about it since reality, and may even add to the force. The press then declares Chicago real the first day of its appearance; the of the movement of mankind. The local Salvation Army provided a Christmas dinner for 7,000 persons this year. Most of the poor devils, halfstarved and half-naked, were "treated" toa discourse, in - Gray's Armory by Mark Hanna, who no doubt assured them that they were all prosperous, and that their interests and the interests of the plutes who donated the turkey were identical. Of course, the little army of rags felt grateful and applauded liberally. Their poverty and misery has made them too blind to see the impassable gulf between their own class and that of Mr. Hanna's class Homeless and hungry, the hypocritical phrases, the rubbish and cant, and the kind words" of the great man were music to the ears of these paupers. But there are several workingmen in Cleveland whose intellects are not not dulied by starvation, who can pene. trate the thin mask of the Hanna class, and who understand the mockery of its cannibalistic spokesman. O. the lrony of fate! Willing, honest producers forced to accept the crumbs of charity, and parasites and drones standing over them and mocking them with lying phrases! Christmas day appears to have degenerated into a season when plutocrats and paupers may pa with the accursed capitalistic system under which alone such injustice cialism.Cleveland Citizen.

Industrial Evolution.

By WM. T. BROWN.

(Continued from last week.) in the world in which I was born I did not ask to come into the world, and own. I find not only that the wage laborers are the vest majority of the people, but also that they constitute that the lines of that class distinction are growing all the while more marked. I find that their but, as a class, is not growing rapidly better. On the conit is growing worse. I hope to make that apparent in the course of this paclass a desire to better their condition. There are manifold expressions of that desire. I am aware that this phenomenon is not limited to any one class. It is as wide as humanity. , I find that large numbers of my class are not in the best possible circumstances. Some of us find it necessary to work hard opportunity for rest, in order to gain a living. Ands that living consists for some of us at least in nothing but the prospect of keeping up that dreary round to the end. There are those who would have us believe that "drudgery is blessed." We are satisfied that such a view is possible only to those who have never been hopelessly chained to drudgery. I have discovered also that there are members of the more power-ful industrial class who are subjected by their position to a more exhausting mental strain than any of us, a strain under which they not infrequently succumb almost in the prime of life. And yet statistics tell me-that the average length of life of the working class is much shorter than that of the capital-Ist class. Alfred Russell Wallace has made some computations concerning this subject with reference to Great Britain and he declares that the average difference in certain industries is twenty-five years of more. I find that in the ranks of the wage workers will be found somewhat larger families than In the ranks of the wealthy. Whatever be the explanation of that fact itis something to be reckoned among the forces of social and political and industrial evolution. It may be assumed that the members of this class have the usual human affections, that they love their wives and children and would be glad to do for them far more than they find it possible to do., It is worthy of note, also, that our common school system and all the agencies of education teday tend to foster in the minds of children ideals and desires and aspirations which their economic connot possibly fulfill. That, too, is a lated by the law of supply and demand, dition under the capitalistic system can are sometimes to be wives and mothers. has an immediate interest that they desire also that they shall have some choice in the disposal of themselves. We cannot feel that this is an unreasonable desire. Being a natural one, is transferred to the machine. And in Italy and especially in Sicily the we must believe that it has some place now a machine attended by a child does sulphur mine workers furnish a great now a machine attended by a child does sulphur mine workers furnish a great now a machine attended by a child does sulphur mine workers furnish a great now a machine attended by a child does sulphur mine workers furnish a great now a machine attended by a child does now att in the evolution of civilization. We want our sons to have a chance to be men. We want their physical development to be normal and right. We want them to have a chance to cultivate the Now, it must be evident to snyone. Now, it must be evident to snyone. best that is in them. We believe they ought to have some leisure. Perhaps some of us hold the faith of William Morris, who believed that "it is right and necessary that all men should have work to do which shall be worth doing. and be of itself pleasant to do; and which should be done under shuch conditions as would make it over-wearisome ner over-anxious." Sald William Morris of this claim: "I have looked at this claim by the light of history and my own conscience, and it seems to nes so looked at to be a most fust claim, and that resistance to it means nothing short of a denial of the hope of civili-I suppose some of the members of the working class would put it what differently. They would say: "What we want is what of right beto be guaranteed in the possession and enloyment of that value which our lapressed and whatever be the rightful hasis of it, here is this growing desire, which lies at the very spring of civilisation. And here, too, is another fact staring us in the face. For millions of us, under the existing economic system, there is no prospect of gaining the tulfillment of our desire. There is no hope cape. Now, all that may be true. And it may NOT be true. We are naturally not inclined to accept that view of the case until after the most searching investigation. We propose to find out for ourselves whether that philosophy is supported by the testimony of history. If it is, we will accept it. But we must knew the facts for ourselves whether courselves what so discovered by the testimony of history. The mill must go on grinding. h concerns our ewe fate we will

into business, independently on a small | On account of the coming elections (Continued from last week.)

I must live, as every other man must, today. EVOLUTION AND WOMEN.

Ingails Says Women Are "Willing" to Work for Less Than Men A Sens-tor's Folly.

the Jear man-fildn't know it was loaded. distinctions to the empty stomach, it will befit The Proletarian to reproduce portions of this deliverance, and wage competition. It does not rest our comment thereon. Brother John is the wageworker, man, woman or child. none other than the erratic, now and it is the penalty that rests on them, then brillant, steady by forks genius Machinery displaces the laborer. Gladwho represented Kansas in congress stone declared that 'machinery has He is now an ex, and it is well. Roberts duplicated the energy of the entire popneeded him, but the people were fickie ulation." and chose another,

He struck up his fiddle in this manner: "In the stupendous evolutionary process through which society is passing, no component is more significant and impressive than the elevation and

emancipation of woman.*

That is a good sensible statement, her socialists? It acknowledges something. An evolutionary process, NOW oing on in society, which is emancipating woman. It is not considered good form to acknowledge these things than off a woman at starvation wages. in public. John J. is off his guard, or an it be that he has been forced down into the projetariat? They say that Women are not willing to work for less when a socialist writer has symptoms —they have no option. What sort of of ability the New York Journal gathers him in. Socialist writers are us- ple that hears the astounding state. naily lacking in this world's goods. Well, it will take a long time to get the bourgeois tangles out of John's brain, and make a socialist of him.

"For so many centuries the victim the plaything or the slave of man, she has at least become his rival, his competitor and his enemy." John J. don't want woman to be "his rival his competitor or his enemy." Would he still have her "the victim, the plaything or the slave of man?" Who made her an enemy? Is it her fault? Is she not nan's enemy for the same reasons that man is her enemy; for the same rea-sons that every man is every other man's enemy? In a society whose basis is private property in the means of production and distribution of necesaries, to be aught but an enemy is to fall by the wayside and be trampled upon. He who pities, loses and is lost. He who loves, dies for his folly. The tragedy of "profits" will go on until men and women are flercer competitors, more bitter enemies We quote at length:

The statistics are complete, but it is estimated that not less than four million women in the United States are wageworkers, earning wholly or in part their own livilibood in vocations that fifty years ago were occupied exclusively by men.

'In the subterransan regions of unskilled labor the invasion of women is to the student of industrial problems, more amazing still.

'Without entering upon the open question of the labor-saving machinery, wages and employment, it is sufficient to say that its introduction has resulted in an enormous displacement of labor "The statistics are complete, but it

wages and employment, it is sufficient to say that its introduction has resulted in an enormous displacement of labor and structural changes in our industrial system. The machine for the manufacture of barrel staves does the work of 2.500 men. Every Mergenthaler machine throws five compositors out of a job. By the invention of machinery ninety out of every hundred workmen employed in the manufacture of paper were displaced; in rubberg goods, ninety-eight; in woolen fabrics, fifty; in slik winding, ninety-foor; in soap making, fifty, and so to a greater or less degree in every field of activity. It is impossible to be exact, but Gladstone declared that machinery had duplicated the energy of the entire population of the earth.

The machinery in the United States represents at least five million hore-power, and is operated by not much more than three million workmen. To perform the labor done by these machines would require not less than twenty-five million people, which would represent a population of one hundred and fifty million, or double the entire number of the inhabitants of the country.

Nearly one-third of this machinery hands to be pointed out to fall back on. Just in the parties. You make workingmen, till the da (as a profane poet observingmen, till the data (as a profane poet observingmen, till the data (as a profane poet observingmen, till the da (as a profane poet observingmen, till the data (as a profane poet the manufacture of the manufacture of the manufacture of the manufacture of them.

It does not look well hands to be pointed out to fall back on.

It does not look well hands to be pointed out to fall back on.

It does not look well hand

ITY

Nearly one-third of this machinery
is operated by women and children at
wages less than half those paid to men
for the same employment. They receive less, because they are not worth
so much and because they are willing
to work for less. They are weaker and
more helpless, and less capable of rewistance.

"The claim that woman should re-"The claim that woman should receive the same pay as men for the same work is futile. There is a vest surplin of unskilled labor. The supply is greater than the demand. The invasion of woman adds to the refundance. She lowers the entire standard of wages in every vocation she enters. Should she demand the same compensation she would cease to be employed. In the hitzer struggle for existence woman is the implacable enemy of man. And not the less so because many wives and mothers and daughters strive with uncongenial and repulsive toll to piece out the earnings of husbands and fathers that are insufficient for the comfort of the belpiess family."

Women are criticised for displacing

Women are criticised for displacing comes necessary for all earnest and well-meaning socialists of Milwaukes to organize as a section of the S. L. P. do not make this distinction. They pit we must using and every barrier to dnown are willing to stand by our constitution and our N. E. C.

Come one; come all. Do not feel dissipation of might, chance, "puil," but the welfare of the cause cannot but the welfare of the cause cannot but the welfare of the cause cannot be the composition of might, chance, "puil," but the welfare of the cause cannot be the composition of the course cannot be the course of the cause we represent to do then well as a clear field of their own? Capitalists and the cause we represent to do then well as a clear field of their own? Capitalists and the cause we represent to do then well as a clear field of their own? Capitalists and the cause we represent to do then well as a clear field of their own? Capitalists and the cause we represent to do then well as a clear field of their own? Capitalists and the cause we represent to do then well as a clear field of their own? Capitalists and the cause we represent to do then well as a clear field of their own? Capitalists and the cause we represent to do then well as a clear field of their own? Capitalists and the cause we represent to do then we must using an extension of the cause and the cause of the cause opportunity. Given a million jobs and what does it matter whether a million and a baff or a million and a quarter of angeworkees contend for them? It re-does itself to a matter of subsistences of the property of the contend for them? It re-does itself to a matter of subsistences of them.

A million of the workers get the jobs at an approximate subsistence wage. The surplus half or quarter million must bld lower, must work for less than enough to keep the body proin the New York Sunday Journal of ness. This they often do. It is legal November 12th, John J. Ingalis used a and legitimate, and customary to imquarter page to discuss woman's in-feriority to men. His cranial steward Such is the habit of capitalism. It will went a simmering, and besides sugar- not change as it grows. Let us place the responsibility for

Why, then, is not the work day short. ened? The tools, the machinery are privately owned and manipulated for private gain. Profits, profits; 'to hell with the men; they are sheep."

Ingalis says the women and children are puld less because they are not worth so much, and are willing to work for less. But they are worth more to their employers, or they would not be employed. . If an employer can make more profit off a man at high wages there is no question about which he would hire. Profits, more profits! -they have no option. What sort of punishment is meet for a civilized peoment made by Giadstone, and makes no sane move to save itself?

When the year 1900 awakes it will behold a generattion trained in the school of fratricide and drunk with the wine of selfishness.

-Henry Oscar in the Springfield Prole-

Some Tragic Truths.

Socialism is the cry of aggrieved, insulted, much abused humanity. It is human nature waking in her might from the slumber of ages, shaking from herself the dust of antiquated institutions, girding herself for the combat. and going forth conquering and to conquer. Woe unto the man, woe unto the dynasty, wee unto the party, and wee unto the policy on which shall fall the scathe of her blighting indignation

Zealous socialists often become very tired lighting the old line parties, for it is dreadfully wrenching to the arm to hit hard intellectual blows against nothing. If you don't believe this try a sparring match with one of the old line parties-yourself.

There is no sense in adding up a row of ciphers, expecting to have them amount to something. Cipher from cipher leaves nothing every time and nothing to carry, and cipher times cipher is cipher and nothing eles. You may add up cipher after cipher all day and you will have nothing but cipher to fall back on. Just so with the old workingmen, till the day of pan cakes (as a profane poet observes) and you wont get anything but a big cipher out of them.'

Workingmen, speak out. Do not hold the language of slaves. Tell the capt-talist class what you mean. Ask nothing of them as a favor. Claim your rights. Demand them. Tell the capi-talist class that you will no longer sub-

to sit down and stand up at the same time. That is why it always makes me so impatient to see a workingmen loc ing anxiously for a betterment of his condition and still shouting hurrah boys with either of the old line, parties.

It does not look well for socialists' hands to be pointed out in mockery or to be stone bruised in stoning other socialists, who are wandering alone in a world full of wolves, temptathons, starvation, and more than forky other old whelps, some of the fiercest ones so covered up with honest looking wool that the keenest spectacles are powerless for the time being to distinguish them from sheep.

· Let every mind which believes in the great, underlying truths of socialism be welcomed to our cause and there developed by the people in the work who are more perfect than he, not dwarfed and stunted. Let ever socialist, even the mercest infant in the cause, be placed in a stimulating and invigorating environment and there algrowth in this cause which should be despised. All are alike good. All so-They obtained 18,000 votes while the attend a meeting at Keiser's Hall, 4th men at lower wages. "She lowers the cialists must pass over the same road Moderates only got 8,000 and the Cleri- atreet, between State and Prairie, Tues. entire standard of wages," etc. Have and sight its milestones at the same

No comrade, at the present moment

The Silver Democrats, the Gold Democrats, and the Republicans resemble each other as much as if they were

There are two things in the American republic that I feel cold and almost haughty towards, and they are the Republican and Democratic parties, I honestly wish that they would join hands and clope the country. I'd love to see their backs as they dot out and bid them a glad farewell.

Patriotism let it be ever so ardent cannot obtain cream from well water, and I say without stretching the truth the width of a horse hair that old line politics contains no more nutrition for the laboring classes than well water

It is just about as impossible to get a stons to keep company with a turnip and make its bride as it is to get an old line politician to fall in love with henesty, and justice, and righteousness. After a man has tried to get oil and water to mix in a friendly and sociable way, after he has sat and stirred them and aweated over them for weeks and weeks, I don't know as he would be to blame if he emptied the basin for good. Workingmen, would it be a bad idea for you to try what a new party could do for you in the political line? You have fooled away enough of your time with the old ones.

Catherine A. Tierney.

LETTER BOX.

Editor of The Workers' Call; Dear Comrade:

I was in artendance at the conference Territorial socialists the 27th. Thirty-two delegates were present repementing ten of the twenty-three coun-The western counties were not represented. This was doubtless due to the expense. A permanent Territorial organization was effected, a Territorial committee elected and plans discussed for pushing township, city and county organization from now until the first Territorial nominating convention is held. It was fully decided to act independently of any national organization until some plan of union be adopted by the S. L. P. and S. D. P. When an amicable union is so effected we shall ally ourselves with the national party. While I as not so sanguine as to pros pects for immediate results here in the Territory, yet I am convinced that this is the proper move for us at the present and that we shall be able to keep pace with the movement at large and the inwas confirmed by this meeting in my belief that there was much lack of clearness in the movement here. There is much enthusiasm and a healthy millitant spirit, but a great lack of definite. ness of views. It presents a fine field for the propagation of sound socialist philosophy. During three months the "Call" has fairly revolutionized the views of those who have read it.

Fraternally, J. W. McFall, -Mrdford, Okla., Dec. 30, 1899.

Compades, here are some points I want the convention to adopt:

1. The words "and upon all other honest citizens" to be taken out of the platforn's.

2. The twenty-one "immediate demands" to be thrown out.

3. All pupers that want party recognition must be owned by one or more sections. National organizers to be abol-

tshed. Each state to take care of its own organishing and agitating. 5. Sections to be connected with

state committees only, and state com mittees to he connected with he N. E. 6. One-half of the N. E. C. income to

be used to support party papers under certain regulated ons. A list of my tions with names and

addresses of their organizers to be pub., fished every three months.

When a proposition for referendum vote is endorsed by five sections in three different states, the N. E. C. must send it out for a viste, whether they like

Trades unions to be ignored in the enstitution. Article 5 in section 4 to be stricken out.

All of section \$ to be stricken out, 11. Name it the Irm wastlonal Social.

ist Party. I will not give up the fight to have sese points adopted until voted down

by a national referendum vote. Yours truly until she working class interests dorning to the ma-

jority of society. Louis Kanselbaum.

Again the so-called social reformers are appearing to their middle class au-diences in order to bring about a change in society, but so lung as they

rated we are units of weakness, classes and point out to them their class interests, and show them that power. Agitate, educate, organize, they must make their class the rolling these are our deathless watchwords of class by voting with the Socialist Lasuccess. The fingers of the hand can bor party? The reason that they do do little alone ,but correlated into a not do so is because it would be against torsed here and there over the sportive have known Mr. Bliss for the last two waver is an emblem of imbecility, but years. He has been in California talkframe a thousand planks into a ship, ing to this same middle class element Se out the vessel, and put into it an and has accomplished nothing. > Yours for the S. L. P. Ben. Rayfield.

Our correspondent seems to have exed up pretty accurately the peculiar characteristics of the common or garden species of social reformer, and we can only wish that the working class generally, were in possession of the same knowledge. When that time comes, as it must come, it will certainly mean a more hopeful future for the latter, though how the reformer will thrive under such conditions is a rather doubtful problem. (ED.)

SEARCHES FOR FACTS.

Having Discovered Them, Kansas City Decides to Get Into Line.

And now the section here has recog nized the National Executive at 184 William street, and started to work with the earnest socialists the country over who are more anxious to spread their doctrine than to give a clique of schemers a berth for life. The situation here has been much the same as prevailed in Chicago-the section took its time, carefully weighing the evidence for each of the contending factions in New York, and has finally been forced to the conclusion that the comrades supporting the new committee were working better for the cause.

.The history of the last two months of the Section's relations with the Beekman street people is interesting.

perhaps novel. This section, like many others, refused to vote on the propositions put forth by Kuhn et al, and plainly fold them so, but it was not "suspended" as other sections were for the same offense, doubtiess because the "skunk" element thought there was a possibility of the section "coming round." Kukn street. All invited. Free discussion ontented himself with writing that the section should get out of the party, but it did not, nor did it recede from its January 6. Trusts and Socialism.

On October 28th the section reorganzed itself and assumed jurisdiction over all the county, applying to Beekman street for the county charter. About November 1st a letter came from Kuhn saying that the application had been referred to the State Committee at St. Louis, "for endorsement." (By the bye the State Committee had no legal existence, as there were only Kanlittle things like that den't worry Beek. mas street.) The regular meetings of the section are on the second and fourth Thursdays of each month. The meeting of Nevember 9th was duly held. The meeting changed the headquarters March 17. The Putus of Socialism-J. of the section, but as it turned out only about it for Howard, the organizer, failed to notify anyone and there was no quorum Nocember 23rd at the new headquarters The Secretary was excused from the secting of November-9th, and the sambusiness, of which the section knew kept him until nearly the end of No-

SHEAR THE SHEEP

Literary Decoy-ducks Get After the "Young Man."

BAIT FOR RAINBOW CHASERS.

Ambitious Would-be Shearers Must First Yield Up Their Own Flesce to

Many years ago a famous diplomatist of Europe whose name is to this day a synonym for decelt and fraudulent cunning; gave vent to the following philosophical remark, "Society," he said, "is divided into two classes, the shearers and the shorn; you should al-"young men starting out in business," and in many cases the preachers thereof, have earned a "reputation" as men of deep wisdom whose advice was based upon experience, and which if heeded was a sure guide post to "success in life" which at present signifies what Talleyrand has stated, viz., passing from the ranks of the shorn into those of the shearers. The written and printed matter upon this subject would fill a large-sized library building already, but its output shows as yet no sign of decrease. . For example we have in the Daily News of January 5th, this city, another of these "moral" produc tions from the pen of a person called Barrett, not differing in noticeable manner from thousands of its predecessors in its recommendations of punctuality, thoughtfulness, painstaking, discretion, tact, economy and the numerous other necessary qualifications which go to make up business "success." As socialists we have long learned to "beware of the bourgeois" especially when he prates of 'morality." as experience has shown us that there is always some object, other than the apparent one in these effusions of "sound" advice. But admitting the possibility of every young man strictly adhering to these teachings and practicing them throughout his whole business chreer, we fail to see how all the young men could become "successful business men" as all their virtuous striving would not only not open more opportunities but its success would actually close them to the remainder of the struggling crowd. The opportunities to become a shearer at ce, are recognized to be non-existent by this writer, therefore the apprentice wishes one day to enter the plundering class must perforce permit him-self to be shorn, and the sure road to cess lies in the quantity of fleed that he can yield to his master. This is the sum and substance of all of these sermons: Make yourself useful to the boss, more useful than the fellows who are competing with you to render him service, and your success will be proportionate to the amount of profit which your labor produces for him; if that amount falls below that which the other excellent young man who is competing with you, can produce why then so much the worse for you and the better for him, but at any rate the advice the greatest possible profit. And it is this latter that is the ruling motive for the most of these wise counsels. They are intended to spur the coming gener ation of wage slaves into harder and harder efforts for the certain benefit of the employing class, and a possible suc cess for a few individuals out of the many thousands fighting in desperat competition with their fellows for this dubious prospect. Cheap and willing slaves are wanted, and the cheaper and more willing are always preferred. Incidentally a proper respect for the be ceffcent employer, and an humble and unassuming attitude on the part of th slave is inculcated. What else does the following mean?

Take hold as you would if you were a partner and try to feel the responsibility he is obliged to assume. Work quietly. Make your work count, which is more than most people can do. Prove your capacity and somebody will be sure to hote it, employ it and reward it. Never be satisfied with yourself or your income. BUT NEVER EXPECT THE INCOME TO EQUAL YOUR EARNING CAPACITY, as to do so would show a disposition to rob the employer of the profit which he is entitled to make on your services. He is entitled to a liberal return on the capital invested in the enterprise which gives you employment. Every employer is a benefactor. He gives others something to do by which means they may gain such a livelihood as their capacity and his business can farnish.

"Never expect your income to equal your earning espacity!" It would be a monstrous outrage that any perso should have all that his labor produces, but it is perfectly natural and correct that a few favored individuals should own the results of the labor of millions of others. Recollect that the capitalist is a "benefactor" and it is for the "benefit" of the young men upon whom Barrett inflicts his sormon, that the capitalist exists and carries on his bus-iness. Thus a proper attitude of hu-mility is engendered in these who re-

selve these "benefits" and the safety of apitalist class supremacy is assured. And as a reward for this good behavior on the part of the "young man startng out in business," a bait is dangled before his eyes, that he may, by the lercest and most tireless energy in behalf of his master's interests, some time or other pass into the ranks of the shearers" himself. But as the conentration of wealth goes on these aveues close, and the very competition prescribed, helps further to close them the chance of the aforesaid "young nan" becomes comparable only with the chance, say of winning first prize in the Louisiana lottery where 150,00 persons are all out for the one reward -well what then? It looks as if the nnear future will see enormous quantities of "good sound advice" of the Barrett brand dumped on the scrap heap. The "young man" in question, in common with all other wage slaves, will dease the pursuit of this capitalist ways try to escape from the latter into the former class." And this text has ble and inexorable necessity. In conphantom, and the reality of socialism been the foundation of hundreds of clusion, there is one statement which "moral" lessons and distribes preached Barrett makes to his suppositious Barrett makes to his suppostitious young man which the latter may look into with advantage to himself. His 'guide, philosopher and friend' forms him as follows:

If you will examine carefully you will find that the majority of those employed at complainingly low wages are morely followers of thinkers.

That is in the main true enough, but still more careful examination will discover a reidue whose numbers though small at present, represent a growing power which must and will constitute itself the majority of society. They are those who think for themselves, and as a result of that thinking, they totally reject the platitudes of writers of the Barrett type. Understanding thoroughly the impossibility of attaining this "commercial paradise" n our present society, they refuse this bait so temptingly held before them, knowing that its end and object is merely the perpetuation of the ecoomic system of the present, a system which is already doomed, and even now is ushering in its successor, the Socialist Commonwealth, where there can be no incentive to the plundering of man by his fellow man, and where the 'shearing' industry has therefore no

THE ANGEL OF DISCONTENT. When the world was formed and the

morning stars
Upon their paths were sent,
The loftiest-browed of the angels was The Angel of Discontent.

And he dwelt with man in the caves of the hills. Where the crested serpent stings, And the tiger tears and the she-wolf And he told of better things.

And he led man forth to the towered And forth to the fields of corn; and told of the ampier work ahead For which his race was born.

And he whispers to men of those hills

he sees
In the blush of the misty west;
An dthey look to the heights of his
lifted eye
And they hate the name of rest. In the light of that eye does the slave behold A hope that is high and brave: And the madness of war comes into his

blood— For he knows himself a slave, The serfs of wrong by the light of that

March with victorious songs;
For the strength of the right comes into
their hearts
When they behold their wrongs,

Tis by the light of that lifted eye That error's mists are rent; A guide to the table-lands of Truth Is the Angel of Discontent.

And still he looks with his lifted eye, And his glance is far away, On a light that shines on the glimmer-ing hills Of a diviner day.

We frequently see persons in insane hospitals who were sent there in consequence of what are called religious nental disturbances. I confess that I think better of them than of many who their wits and appear to enjoy life very well outside the asylums. Any decent person ought to go mad if he really holds such opinions. It is very much to his discredit in every point of view if he does not. Anything that is brutal, cruel, heathenish; that makes life hopeless for most of mankind and perhaps for entire races; anything that assumes the necessity of exterminating instincts which were given to be regumonk or a deacon believes it, it received, ought to produce insanity in every well-regulated mind. That condition is a normal one under the cirsumstances. I am very much ashamed of some people for retaining their reason. If they were not the most stupid or the most selfish of human beings they would become non compates once.-(Dr. Oliver Wendell Hoimes.)

The South Town convention will be day, Jan. 15th, 1900 at 8 p. m.

Hereafter all IV or orders MUST be made payable to The Workers' Call, 36 North Clark street, Chicago, 511.

AS OTHERS SEE US CLASS STATE-CRAFT

ican Capitalism.

Burden of This Conquest Rests on Shoul ders of Overworked Wage

In the issue of this paper of Decemer 30th a short notice of the significant article by M. Georges Wenlersse upon columns under the title of "Cheap Commodities." Since that time the full text of the article has reached this country, and has been published in many of the capitalist daily papers, with headlines honoring the author of these flattering and agreeable predictions of capitally supremacy, and paying tribute to als sagacity and clearness in depicting the "resistless" march of "Commercial Conquest." The press also states that M. Weniersse "argues from facts alone" a statement with which we thoroughly agree. It is not often that the socialist finds himself in harmony with the out pourings of the capitalist press, and when this occurs, there is generally some attending circumstances, of whose existence one of the harmonious parties is either ignorant or deliberately pretends ignorance of, an explanation which holds good regarding the subject of this discussion. When our capitalist contemporaries declare that the onclusions of M. Wenlersse are based upon "facts alone" we hasten to corroborate their statement, and say further, that most people who hold similar economio beliefs as M. Wenlersse are also in the habit of basing their argudation. In short, M. Georges Wenlerss is not only a socialist and one of the most prominent socialists in the move ment in France, but not more than six months ago he made a lecture tour of the United States speaking under the auspices of the Socialist Labor party of this country. Our readers can judge for themselves whether the ca press was ignorant of this or deliber-ately suppressed it. However this may be, it is not difficult to discover why the fact, if known, was not mentioned, It would have been a fly in the eintment, a bitter drop in the pleasant draught which this clear-eighted writer offers to the greed of American capitalism, and might perhaps produce a degree of respect and consideration for socialist reasoning which would be in-

fore not to be alluded to. The description of the growth of capitalist production in the United States, and the causes for, and necessity of such growth, comprise the main features of this essay which the organs of our ruling class quote with so much pride. It is in reality a comment on, and a confirmation of the materialistic philosophy contained in the celebrated "Communist Manifesto" of Marx and document, which might serve the writer following the most appropriate: "The (capitalist class) over the whole surface of the globe. It must nestle everywhere, establish connections eyery- ity as a statesman.

imical to capitalist interests—and there.

This writer clearly and concisely points out how the capitalist system of production in the United States during the period in which the nations frontier limits afforded a sufficient market for the sale of its products, uncon sciously fostered the idea of expansion instinctively as it were, seeing that a materialize. He shows how the sentiment of "liberty," the racial and religlous hatreds, the outbursts of "patriotism." the idea of "the Monroe doctrine," the knownothing cry of "Amerca for the Americans," every traditionel political war cry, every fetish which the masses of the people still adsered to, was used as a means to that end by the ruling class.

During the war with Spain he exlains the real motive of the "yellow" press in its cry for blood, scouts the dea that the destruction of the "Maine" an be regarded as the cause of expan sion, and that Dewey stayed in Manlia the Spanish fleet. The certainties that and Samos, as he points out, will deermidable array of figures descriptive Buropean competitors are year by year slowly being pushed out of the markets of the world by the rising giant " " West. The energy of the servant,

MUST CONQUER ALL NATIONS. TEDDY TACKLES THE TRUST.

Remedies" and "Reforms" Buggested But Capitalist Private Property Must Be Preserved.

The governor of the state of Nev York, in his message to the legislature, takes up the same question which is at remedies which would subvert our whole is at present bothering every political tricks ster who is endeavoring to prepare a snare for votes in the coming presidential campaign. Both Democrats and Republicans have been testing public sentiment in their respective wiags of the capitalist political machine, on this subject. This was in evidence at the last campaign, when the Democrats with Bryan as their mouthpiece, apwirth Bryan as their mouthpiece and the dishonest, even though not though a pour into the full same and into the full same actually and the dishonest, even though not provide the matter. The latest news from this matter, the pro "The Conquest of the World by the present bothering every political trick-United States" was printed in these ster who is endeavoring to prepare a

On the other hand the Republicans, backed up by the great capitalists, instead of appealing to the middle class. boldly took the position that in the working class lay the power which it was necessary for them to secure. Correctly presuming on the ignorance and distress existing among the workers, they promised work to the starved and stupld proletariat, and thus wen he is going to do for the working class. that where they in their majority vote, is the only side that can obtain success, and adopt the logic of it, they can then place themselves in power, But when will that be?

To return to our subject. Roosevelt starts off as follows:

The contrast offered in the highly specialized industrial community between the rich and the poor is exceedingly distressing, and, while under normal conditions the acquirement of wealth by an individual is necessarily of great incidental benefit to the community as a whola, yet this is by no means always the case.

Probably the large majority of the

munity as a whole, yet this is by no means always the case.

Probably the large majority of the fortunes that now exist in this country have been amassed, not by injuring mankind, but as an incident to the conferring of great benefits on the community—whatever the conscious purpose of those massing them may have been. The occasional wrongs committed or injuries endured are, on the whole, far outweighed by the mass of good which has resulted. The true questions to be asked are: Has any given individual been injured by the acquisition of wealth by any man? Were the rights of that individual, if they have been violated, insufficently protected by law? If so, these rights, and all similar rights, ought to be guaranteed by additional legislation. The point to be aimed at is the protection of the individual against wrong, not the attempt to limit and hamper the acquisition and output of wealth.

There you have it. The contrast be-

There you have it. The contrast be tween the idle, wealth-appropriating rich, and the poor, wealth-producing working class, as the Governor says, and the remedy will not some until Engels, which appeared in 1847, and is "exceedingly distressing," but does private property in the instruments of which is still recognized as the basic he inquire for the reason of this conconception underlying the socialist trast? No, certainly not, that is not are replaced by social ownership esmovement, and if there is one passage his business, neither is it the interest tablished by the working class, more than another in that powerful of the class he belongs to, that any Therefore, workingmen should be a supplied to the class he belongs to the class he belo such inquiry should be set on foot, no stock in the promises of abstement as a text, we are inclined to think the He assumes that the majority of the of evils made by politicians, nor lend rich got their property by virtuous ef- an ear to the reactionary howis of the need of a constantly expanding market fort of their own industry. But does middle class who are fast fading from for its products chases the bourgeoisle he attempt to prove this? Certainly view, but who still make plenty of usenot again. And by this assumption less noise. Keep the capitalist class in without proof he demonstrates his abil. mind: realize the antagonism between

> As the next subject Teddy handles the "reformer," and through him leads out. up to the trust;

It is almost equally dangerous either to blink evils and refuse to acknowledge their existence or to strike at them in a spirit of ignorant revenge, thereby doing far more harm than is remedied. It is well to remember that many of the worst and most dangerous laws which have been put upon statute books have been put upon statute books have been put there by zealous reformers with excellent intentions. This preblem has a hundred phases. The relation of the capitalist and the wage worker makes one; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme poverty another; the proper attitude of the state toward extreme p flourishing by virtue of some solistic element.

of producer? But he must not see it-nay certainty that only upon the basis of would not be to the interests of the tagonisms be reached.

class which he represents in the excutive chair,

Then again he says that bevery new feature of this industrial revolution produces hardships on sections of the vorkers who cannot so quickly change their vocation as to enable them to escape the curse of want of employnent," but that is not what bothers the Governor. He feels, though he does not like to say so, that these phases of the industrial evolution are procursors of a coming social revolution. He re-

veals this in the following:

To say that the present system of haphazard license and lack of super-vision and regulation is the best possi-ble is absurd. The men who endeaver to prevent the remedying of real abuses or only show suffer. not only show callous disregard for the suffering of others, but also weaker those who are anxious to prevent the adoption of indiscriminate would-be remedies which would subvert our pealed to the self-interest of the dying him, either by taking away his wealth middle class, in their vain efforts to resist the more perfect organization of industry which must inevitably compel the cetablishment of the Socialist Commonwealth.

which enables the community to punish him, either by taking away his wealth or by imprisonment, should be well-ordered in dealing with great corrected in the cetablishment of the Socialist Commonwealth.

Oh! this is not then the "best of all possible systems;" a better one will have to be devised, and WE of course will attend to that at the proper time,

And right here, the socialist who un derstands the CLASS STRUGGLE. warns the workers against attributing good intentions" to any capitalist rep sentative, in his protestation of what When the workers understand The capitalists are going to do what they have always done, which is protect the interests of the class to which they belong and they are right in doing so.

Roosevelt foreshadows a species of state socialism, organized and managed by the present ruling class, which is of to value whatever to the workers.

Heip to the working class can only as from themselves, and only then by their assertion of the priority of their claims, by making themselves the ruling class.

The remedies suggested by the Governor are as absurd to any thinking man as the conditions complained of are villainous

He thinks that "publicity" will help. The entire development of capitalism rests on the expropriation of society by individuals, who by book or crook can usurp some social function. The moment someone discovers that some social factor can be advantageously controlled, the financier gets his work in, and this can only be done by concealing the fact, until such control has been obtained.

Roosevelt might just as sensibly advocate that burglars and pickpockets should be compelled to warn their victims before robbing them; It would amount to the same thing.

But the capitalization of the social factors will go on, and the billionaire will come, through the private appropriation which is at present going on production and channels of exchange,

their interests and yours, for it is with them that the battle must be fought

New Broom Sweeps Clean.

The great railroad magnates of the

ountry are said to have formed an offensive and defensive alliance" which is to begin proceedings by inaugurating "sweeping reforms," and when we see onnected therewith, the names of such men as Rockefeller, Vanderbilt, Pier-port Morgan, Jas. J. Hill, and others, t is pretty safe to guarantee that the "sweeping" process will be thorough The broom which this combination brings into action will aweep into the economic dust bin the hopes of the reactionary little business men, and clear the ground for the advance of socialism. It seems that nothing short of the precipitation of the middle class into the great body of wage workers will ever bring the former to a sense of the

hopelessness of their position. As so, middle class economic pap which they He sees a very difficult problem cialists we do not rejoice at their misbay by chance, after the destruction of ahead; so many interests to be guarded, fortunes, but are not responsible for and above all the interests of great cap- them. NOT CHEAP ENOUGH

Civilized " Japanese Workers Want Too Much.

"SUPERIORITY" OF CHINESE.

The Cheap Workmen of Far-off Japan Are Being Knocked Out by Still Cheaper Laborers.

Can that commodity called a "workngman" ever become cheap enough for his masters? There is a lesson to be of capitalism in Japan, lies in the fact that they are adopting the same political cant in dealing with matters pertaining to the working class, that our ruling classes are so fond of indulging in. The influx of Chinese labor to Japan is a "serious problem" just as

immigration is in this country. But will the growing capitalist class in Japan, of their own free will stop hinese immigration? Hardly. Just read the following reasons and see; and working men will find that this dentical reason holds good everywhere where capitalism exists;

In many points the Japanese work. In many points the Japanese worklagman is inferior to the Chinese, and
the merchants and manufacturers of
Japan are the first to realize it. The
Chinese are more sober, more susceptible to discipline, less likely to strike,
and willing to work for smaller wages,
The Japanese, on the contrary, are
more civilized, and civilization means
more needs to satisfy.

From the standpoint of the ruling class these points constitute the "su-periority" of one class of workingmen over another. First the Chinese are more sober-, and can therefore live upon less-and of course will be made to do so. They can be better d plined-which increas that the can be made more intense, and therefore more productive; they are less likely to strike, and thus the uncertainty of production is diminished. And lastly they are willing to work for smaller wages which-which-well the columns of this paper are not sufficient to contain the tenth part of the reasons why this last qualification should be looked upon as a proof of superiority by the buyers of labor power. Japanese workman is civilized, and a civilized man has more needs to satisfy, and therefore, like "Oliver Twist," wants "more," which is a most helnous and unpardonable crime in the eyes of those "benefactors" who "provide em-ployment" for him. No, in this case the "Chinese must not go," the wonderfully cheap Japanese laborer is not cheap enough. If he wishes to successfully compete he must get down lower than his competitor. cannot do, being a "civilised man" who "wants" more on account of being "civilized." But if he cannot do this we will just hint to our readers what now beginning to do-and that is, un derstand his class interests as a workingman, Socialism has already gained a firm place among the workingmen of Japan, just as the cheapening process brings the same results in every other country. But what is to be thought of a "civilization" which creates new desires, and depends for its continua upon the fact that these new desires cannot be satisfied under its conditions? It does not require the mind of a philosopher to see the finish of su The statement of the "Manifesto,"that capitalism (upon which our present "civilization" is based) not only produces its own grave-diggers, but struggle which is necessary, before the latter can proceed with the burial, is being borne out in every "civilised country on the fact of the earth.

Federated union in New York, President Seth Low of the Columbia unfyersity is said to have "astonished the labor men by his advocacy of the trusts." But to those who understand called "labor men." and know something of the nature of the muddled have been raised upon, their astonishment seems natural enough. It will men," the socialists, to astonish Seth Low and his class, by the advocacy of shall be shareholder in proportion to the social value which his service rend ers to the community:

UNITED STATES.

OH, FOR AN ISSUE!

"An issue, an issue, Anything for an issue," is the despairing cry of the Bryan Democracy. Free silver is a. corpse and anti-imperialism a "gold brick" on which no one will bite, and besides it is so mighty uncertain that perhaps it will be all over with before the campaign gets well under way, and so there is nothing left but the trusts and they are the worst sort of hot chestnuts that a poor politician ever tried to pull out of the coals.

This was most beautifully illustrated by the recent speech of W. J. Bryan while in Chicago. After a desperate effort to galvanize the currency question into life and a flerce denunciation of imperialism, he came to the trust problem. His remarks on this point that we cannot forbear to give them

I have discussed the trust question in this city so recently that it is only necessary for me to say that the Demo-cratic party will meet the issue with a plain and positive remedy. The Re-publican party is unable to emact and efficient anti-trust laws. When enforce efficient anti-trust laws. When new legislation is demanded the Republican leaders say that the present law is sufficient; when a new trust is pounded out. Republican officials say that the law does not cover the case. This adjustable view of the law reminds me of the little boy, etc., etc."

Then follows an almanac chestnut and the argument (?) is closed. The tive 'remedy" referred to, is his notorlous license scheme which was torn to has never been taken seriously by any.

socialism. Practically every possiand scalp dance interlarded, with a will be more compatible with the satistorrent of adjectives, and attract at- faction of the wants of society. And through a short campaign, he is of little value for a six month's 'discussion.

paign had at least one virtue. It made cialism is a message of hope for the the average voter think that he ought To be sure it was only an excuse for the change from despairing weakness appeinted to look after the establishthinking in the majority of cases, to a sense of hopeful and irrefistible Most voters simply took the materials strength. that the respective campaign spellbinders chose to send out and reranged them at a few points and then called them their own. But even this Teachers, Like All Other Laborers, very elementary process of reasoning made impossible the winning of campaigns by a mere hurrahing and shout-

Rearing this in mind some idea of the predicament of the Democratic leaders is seen. Does anyone think it possible for even "Coin Harvey" to write a book on Bryan's license scheme? There is a limit beyond which even the most thoroughly trained exponents of capitalism cannot go without the idiotic character of their poeltions becoming evident.

. There must be something that at least sounds reasonable somewhere in the scheme. It cannot be made entirely out of hand from whole cloth. And there is absolutely no position outside the socialist position that can be made the socialist position that can be made to stop socialist position. This is the lower in the lower in the social training for the young children whose dresses.

We wish to send out ten thousand sample copies within the next sixty days. Rush in the names and adtraining for the young children whose dresses.

dilemma with which Mr. Bryan and his friends are confronted. Truly they are in need of sympathy.

A PASSING PHASE In speaking with workingmen one

cannot fail to remark a general tendency to confess helplessness and selfdistrust, when the subject of political action upon the part of the working class is approached. The conditions under which they live tend in their every aspect to foster this feeling, and the ruling classes are also careful to instil into the minds of the workers the idea that the latter possess no initiative force in themselves, and that whatever changes may take place in the future must be the act of the rolling class, an idea which serves the double purpose of creating a Teeling of dependence in the minds of their victims. and at the same time enables the supporters of modern capitalism to pose the working class towards their emancipation must always be an uphill battis against every traditional idea held grades, where there are crowds of apby the vast majority of their fellow. Plicants for the positions. workers, who have as yet no conception of their class interests and therefore cannot realize the irresistible power early American days, when class diswhich an intelligent and united pro-tinctions, based on economic differ-based on wield. There strend through the bitter depths of to solve it. It would be interesting to New England winters." are thousands of "teachers" in this city who are almost or quite devoid of didn't know "prosperity" was here.

pedagogical sense, but they are driven No doubt when a number of respectable and intelligent jurymen sit at the inquest over the remains of this victim of "civilization" they will bring in a commodity, teaching labor, in the But there is a still deeper reason than In as jurymen at the inquest on its corpse.

idea was prominent in all public matters. Except for a few slaves and wished to do so. Great wisdom! So long as they are owners, the conditions have! of labor must be satisfactory to them. This fact in itself exposes the delusions which fool the workingmen when they imagine that a victory is gained by a strike in the economic field. At the end it is still the boss who is satisfied, not the men.

In reading a paper which at present is in bad odor with the socialist movement, one would be inclined to believe that the "Manifesto" had never been that it "Manifesto" had never been the satisfactory to them.

Others again hold that ills relations to their class of this city tended largely to build up this immense estate. Such men as "Mike McDonald" and "Jimmy de Ap" were said to be his bosom friends. But then of course "good" men cannot always escape being slandered.

Regarding the "others again hold that ills relations this class concerning its true between the freeds. As a means to this end their "propaganda of the deed" was very harmless, consisting in the founding of productive associations, socialist colonies and the 'like. The great achievement of Marx and Engels lay in their bridging over the chasm between the theoretical socialism and practical, political tabor move incent. They sought to utilize every bower of the struggling projectariat to the exertions of individuals they subthat the "Manifesto" had never been pillar of society, it is said that he was dominant in economic life. The public school was made much of and sacredly guarded as the "last bulwark of democracy." But today our rulers no

that the "Manifesto" had never been written. The policy of the German comrades, a policy which has made of time to attend races, and spent their organization and its trend, a whole seasons at summer resorts. We thought center for all those who are interested in economic and social progress, seems to disagree with this paper, Marx said plainly "that the proletariat in each country must deal with its own bourgeoisie" and who are better judges than those upon the ground?

The truth is, the men behind this sheet have no conception of Social-Democracy. Oligarchy is the end and object of their aspirations. Social progress to them means the establishment on a large scale of such proceedings as are now taking place in the island of by the capitalist press at present.

Leary tells the islanders what to do, and is possessed of force to make them comply. This is called "progress" by the bourgeois, but no socialist looks for "progress" to come in that manner The development of the masses, and their self-assertion as a consequence are the only evidences of progress that a true socialist will recognize.

It makes all the difference whose ox is gored. The injunction, which was first described by the socialists as a "gatling gun on paper" has always been lauded to the skies by the espital. ist press when used against workingmen, except perhaps when for political injunction which makes the press of Wisco ousin has just issued one in behalf of the Milwauke Electric and Railway Light company, which exposes the injunction method in a manner not

An attempt upon the part of this com pany to collect two fares from a paesenger named Bradley, at a place called Hawley's Road was resisted by the latter. He was instantly ejected from the car, and retaliated by an action for damages against the company. He was defeated, and the aforesaid injunction issued to prevent him or others pursuing the same course. It reads "the itizens must not refuse the fare, MUST NOT INSTITUTE SUITS FOR DAM AGES OR ASSAULT, and the prosecu. tion of suits already begun are also enjoined."

This injunction is issued by Court Commissioner Harper, and the paper which publishes it says that "the com missioner gives no reason for such ex-

traordinary rulings."
Why should be? He is simply faith. ful to the larger capitalist interests embodied in the company. The danger of this injunction to the capitalist class and the reason of unfavorable comment upon it in the press, lies in the fact that exposure of this injunction method, may prove disastrous to ruling class interests in the future. Those things should be kept dark to suit them.

Another terrible danger with which the "community" is threatened, is to be disposed of by the "Woman's Club" of this city. The "tenements of the poor" are new a subject of interest to them. They came, saw, and passed resolu-

away their time while men, women and children of the working class are compelled to slave at a pittance harely maintains life.

But they are up against it. They can not improve the condition of the proas the published report observes "what letariat. That is the work of the pro-"thrift" will be able to judge. This un-fortunate child it is said, deliberately the capitalist system of production is to the fact that the workers are plundered, and when the plundering system "club" derive their income from property in the shape of filthy tenement

E. J. Lebman of "The Fair" is dead.

I do not believe it is un- horer and the separation of the laborer scientific to expect that sometime in the from the means whereby he realizes the future we are to find again that near- results of his labor. That is to say, ness to the heart of Nature and that capitalistic production cannot go on uncommunion with her myriad forms of less there is an unlimited supply of labeauty and sublimity, that sense of borers. So long as the industrial popuoneness with her as our Mother, that lation of Europe was tied to the soil as freedom from disease, that grace of serfs to their feudal masters, capitalism us which was the religion of those primitive ancestors and which surely work, capital was impotent to realize may find a fitting place in the higher unfolding of the race.

But we should prove ourselves poor students of history if we did not cheerfully recognize that step that the race Gravitation has nothing to do with eth has taken has been a step upward, a necessity to the working out of something higher of which the race was capable. Just what were all the agencies which led to the next phase of civ-Hization I do not know. But one of them is very clear. In some way or other the institution of private property came into existence. I am satisfied that this institution was one of the most potent and useful factors in the progress of the race. But the form of industrial life to-which it gave birth was slavery. I think there is no differ: ence of opinion as to the fact that the second form of industrial organization was chattel slavery. There was a long period, as you know, when throughout the civilized world the manual laborer a slave. There were forms of labor then, as there have always been, which were done by free men. But the laborers, as a class, were chattel slaves. That was the case in Egypt in the time of Moses, and no doubt long before. It was true in all the so-called univerdesignate a slave. The usage has not Latin word "servus," survives in the English word "servant." breakup of the empire there gradually took place a change. The race seemed the modern system of capitalism, then to take another step forward on . Let us stop to think for a moment of its journey. Chattel slavery as a gen. the extent of this revolution. Before eral form of industrial life was left, the invention of macainery, industry is never to be returned to. To be sure, it practically in the hands of artisans. ever be sgain. Evolution has made it tools for the production of combe a chattel slave.

life of the world took was that of feu- he'd, except his fellow laborer. He is dalism. The land was possessed by a kimself, to all intents and purposes, a and the multitude, denied the "captain of industry." ability or privilege of owning the land, tically vanished by the end of the fourbecame the dependents and vassals of teenth century, leaving the great mass those who did. I am not discussing the ethics of the matter. It has none. Material evolution knows no ethics. ics. Neither has the rise of capitalism It came into existence naturally and inevitably. Given the increasing demand for commodities, the freedom of the laborer, and his separation from the tools with which he worked, and you have the essential prerequisites of capitalism. The events of the fifteenth and sixteenth and seventeenth centuries created a growing demand for commodities. The fourteenth and fifteenth centuries had set free a great multitude of laborers by the fall of feudalism and the dissolution of the guilds. It remained for the last third of the eighteenth century to furnish the third requisite. Think for a moment of the inventions that belong to the latter half paper and the support which the miliof the eighteenth century. "In 1750 the tant socialists in all countries render fly-shuttle was invented by Kaye of Burry. In 1760 improvements were made in the carding process. In 1769 tions of method and doctrines is comthe spinning frame was introduced by Arkwright, and Watt took out his patent for the first steam engine. In 1770 cision of the congress as interpreted by the spinning-jenny was patented by the General Committee. It was true in all the so-called universal the spinning-jenny was present system of sal empires down to and including the stain from all polemic, and all comlaborer was the same that was used to designate a private capital, laborer was the same that was used to director of industry with that of ownstraining the capitalist, having appropriated the director of industry with that of ownstraining the capitalist, having appropriated the wright. As to the quality of goods under capitalist or is given to the lawyer. In either case it is a part of the wealth produced by labor. I hardly think that you will claim that as an editor you grasp modern industrial conditions has the paragraph. You quote me as fol- create any great wealth. But it may "The commercial class spend be possible that the ruling class recogmost of their time in waste trying to nize your efforts in their behalf and. less you can do better for capitalism self with the subject.

In this connection you speak of my condemning bankers, lawyers, lusurince men, traveling salesmen, etc. You

competitive aystem, would be unneces sary, and the men thus engaged wou be turned into useful employment. It is indeed amusing to have one refer to these classes as producers. The trust is eliminating traveling salesmen but I have not yet heard that production has been decreased thereby. Because you See that these vocations exist today, you have erroneously concluded that those thus engaged are producers and that people are willing to pay for them, when, as a matter of fact, they are obliged to pay whether they will or no. Socialism would turn these thousands into useful production. To set up the claim that these classes are today productively employed, shows that you are hard-pushed for an argument.

The last paragraph dealing with lux. uries is based upon an inaccurate report, consequently your effusion here is net to the point. Perhaps you might be interested to know the socialist position. so I will quote what I did say: "Many laborers are engaged in producing things which only the rich can buy, which can minister only to luxury and folly, and which people living manly and corrupted lives, would not think of requiring. Such products are not wealth but waste. Laborers engaged in the production of such products are not usefully employed." Allow me to inform you, in cohelusion, that socialism does not propose to deprive people of all "pleasurable things which people can get along without." Socialism is a protest against present conditions giving these "pleasurable things" only to We want all to have an abundance of such luxuries as are good and will administer to their betterment. This does not mean, however, that the luxury of the rich is beneficial to labor as so many assume. There are mand phases of this question and many other points which I would like to consider will not ask for more space, Thanking you in advance for the fayor in publishing this reply, I am

Respectfully. Charles H. Vall.

Jersey City, New Jersey, Dec. 18th.

As Others See Us

(Continued from page 1.)

American capitalism in finding markets for the sale of the products of labor is dwelt upon, and the growing rage and despair of European communities whose trady is not only being destroyed but even their own national barriers broken down by the cheap commodities of the United States. A masterly survey of these matters and an examination of many details therein, bring the author to the conclusion so grateful to our capitalist class, that they are to become masters of the world not so much through force of arms, but in a commercial sense, through the ownership of the product of the labor of millions of the cheapest and most willing wage slaves this earth has ever known.

writer then shows the utter futility of protective tariffs by the European nations in fending off the ener-"accumulation of commodities" produced by American labor, working at an ever intensified speed, and with constantly improving machinery of production. He then in a spirit or frony advises them to imitate the exof the American ruling class, to Intensify the labor of their wage slaves, betier their machinery, consular servtechnical instruction, etc., etc., in fact to exert themselves more and more flereely in the race in which American competition threatens to completely outrun them. M. Georges Wenlersso figuratively takes the American capi-talist by the hand and leads him to the brink of the precipice, but that individual, unable to see and therefore mprehend the danger, lays all this 'flattering unction to to his soul," dreams pleasantly of the conquests which are to be his in the futue, and publishes to the world that his is a man who "argues from facts"which he undoubtedly is-only the pupil has not been able to grasp the end of First Commercial Conquest -after that -the deluge.

And now let us look upon the blind Samson upon whose shoulders the pil-lars of this magnificent temple of devilworship is to be reared, Let un ses what our critic has to say about him. He admits that were the European cap italist to attempt the intensification of the labor of his slave in anything like the custom prevalent here, danger of s revolution would be imminent, and he uses this fact to point out the further difficulty of competition from This is the sort of labore then upon whom the American capital. ist relies to confer upon his class the mercial supremacy of the world. And it is a true picture. And as the headline in the capitalist press says it

meet of American development as a negative factor?

No, the American workman earns a quarter more than the English workman, but produces a third more. Is this extra production, due to machines, as one may conclude from the fact that the workman works fewer hours? No, those who thus conclude forget the fundamental factor in the economic nower of American to the intensity of the work of the American workman.

Hard workers—that is the character—istic of the American workman.

Hard workers—that is the character—istic of the American workman.

The fever for work is as intense as the business fever. The American workshops. The fever for work is as intense as the business fever. The American workshops man meither smokes nor whistles nor

sings—he works. Otherwise he could netive, for he is paid by the piece. At the end of the first week the newly arrived European workman makes little money—his lodging if not his food is dearer. The next week he works harder. He soon catches the fever, but at the price of his pleasures repose and gayety. It is great muscular use of fatce which taxes the brain. If one measured human force in the manner, we measured human force in the manner, we measure electric force we would find at the end of his sight or nine hours the American workman has spent more of his physical and mental force than the European workman in ten or eleven hours. One only has to see the collapsed, feverished state in which American workmen leave their shops to realize this.

The superiority of the American in

ican workmen leave their shops to realize this.

The superiority of the American in the economic world is due, not only to the richness of the soil, the perfection of machines, the decision, and the audacity the labor of the directors, but also to the immense predigatity, intensity of the muscles and the brains of the workmen.

As this paper is written in the interst of the working class, we would like to know what the American workingnen think of this characteristic sketch, as a type. They cannot but admit its truth. But the main question is are they content to be used in this manner and do they consider that the "shifting of the financial center of the world from London to New York" is sufficient re ompense? Great Britain was once the workshop of the world" and during that period the most miserable profetariat the world has ever seen was to be found in that island. And yet this is the outlook over which the American workingman is supposed to, go into throes of patriotic rapture. The gladiator of history was often "butchered to make a Roman holiday," but the modern American worker is to have his life force torn from him day by day as he leaves the shop or factory in a "coltapsed feverish state," and all that s small class who theives upon this mod ern system of ennibalism and who represent the "United States" may accomplish "the commercial conquest of the world." But during the continuation of this process the American work. ers will be compelled to direct some of the "intensity" of their brain (which they now use in the interest of their exploiters) to relieving the "intensity" of the strain on their muscles, and when our capitalist classes almost have the prize in their hands they will be confronted with a projetariat for whom the idea of "commercial conquest" has lost Labor Journal, all charm, and who will insist that the product of their labor, instead of serv. ing the greed and ambition of their masters, shall be owned and controlled by themselves. The only logical finish to M. Wenlersses' picture is the era of socialism, which his flattered capitalist contemporaries are fortunately too "industrious" to perceive, but as the old proverb runs, "whom the gods wish to destroy, they first make mad."

Some Cynical Truths.

These children the Salvation Army re giving a Christmas spread in various cities (one meal a year is rather slim feed, strikes me) are the children of the useless idle, I presume. Surely the children of those who do our country's useful work have plenty and their orphans are tenderly cared for. (This is sarcasm.)

While I'm about it I may as well voice my regret that it is no longer considered the proper caper to jall the knights of the clarionet and tambourine. I do not mind their disturbing the peace, but I do mind their charity work. It may be more blessed to give than to receive, but for an outfit that makes a specialty of the working classes to go on the hypothesis that the sticking salve of charity will cure the ills of the body politic is not a builable crime in my calendar.

"The man who attempts to reform by fear or restraint acts in opposition to God's law."—Coming Age.

Socialist Labor Party of the United States. SOCIALIST BOOKS Directory of Section

PLATFORM.

The Socialist Laiser Party of the United States, in convention assembled, re-asserts the innicenable rights of all men to life, liberty and the parasit of happiness.

With the founders of the American republic we had that the purpose of government is to secure every critisen in his enjoyment of this right; but in the lights of our social conditions we had for there more, this no such right can be exercised under a system of concomic inequality, consultably destructive of life, of liberty and of happiness.

With the founders of this republic we had that the true theory of politics is that the machinery of government must be evened and controlled by the whole people; but in the light of our industrial development we hold, furtherwiver, that the true theory of concentration in the the machinery of production must likewise belong to the people in comment.

To the devicus fact that our despotic system of concentrations in that the machinery of production nust likewise belong to the respect system of concentrations in the three correspiction of politics can plantly be traced the existence of a privileged class, the correspiction of comment by that class, the eliconic of public property, public franchess and public functions to that class, and the abject dependence of the mightiest of mathous upon that class.

Again, through the perversion of democracy is the ends of plutocracy, labor is robbed of the wealth which it alone produces, is denied the means of self-employment, and, by compalsory idenosis wage stayery, is even deprived of the necessaries of life.

Homes power and natural forces are thus wanted, that the plutocracy may rule.

Ignorance and heaver, with all their concentrate critis, are perpetuated, that the people may be keep in bondage.

ignorance and misery, with all their concomitant every to be and a second and invention are diverted from their humans purpose to the endavement of women and Science and Invention are diverted from their humans purpose to the endavement of women and

Science and invention are diverted from their humane purpose to the emissioned to determine the children.

Against such a system the Socialist Lakor Party once more enters in protest. Once more it reterates its fundamental declaration that private property in the natural sources of production and in the testfruments of labor is the obvious cause of all consumic servitude and political dependence.

The time is fast coming when, in the natural course of sactial evolution, this system, through the destructive action of its failures and crises on the one hand, and the constructive tendencies of its trists and other capitalistic combinations on the other hand, shall have worked out its own downfall. We, therefore, call upon the wage workers of the United States, and upon all honest citizena to organize under the banner of the Socialist Labor Party into a class-conscious body, ware of its rights and determined to conquer them by taking possession of the public powers; so that, held together by an informitable spirit of solidarity under the most trying conditions of the present class struggle, we may put a summary end to that barborous struggle by the absistion of classes. the restoration of the land and of all the means of production, transportation and distribution to the popule as a collective body, and the substitution of the Cooperative Common wealth in which every worker shall have the free exercise and full benefit of his facelities multiplied by all the modern factors of civilization.

Immediate Demands.

Immediate Demands.

With a view to immediate improvement in the condition of labor we present the following demands:

1. Reduction of the hours of labor in proportion to the progress of production.

2. The United States shall obtain possession of the raircoals, canais, telegraphs, telephones and other means of public transportation and communication: the employee to operate the same operatively under the control of the Federal government and to elect their own superior officers, to be employee shall be discharged for political reasons.

3. The municipalities shall obtain possessions of the local railroads, ferries, water works, electric ants and all industries requiring municipal franchises; the employees to operate the same operated and industries requiring municipal franchises; the employees to operate the same one-operated under the control of the municipal affirmistration and to elect their own superior officers, but semployees shall be discharged for political reasons.

4. The public lands declared inalenable. Revecation of all land grants to corporations or indicates, the conditions of which have not been compiled with.

b. The United States to have the exclusive right to issue money.

6. Congressional legislation providing for the scientific management of forests and waterways, of prohibitions the water of the nutural resources at the country.

7. Inventions to be free to all: the inventors to be remuserated by the nation.

8. Progressive Income as and tax on inheritances; the smaller incomes to be exempt.

9. School education of all cubildress under fourties years of age to be-compulsory, gratuitous and consistence in meab, electhing, books, etc., where necessary.

10. Repeated of all pupie, ramp, conspiracy and sumptuary tess. Unabridged right of combination.

11. Prohibition of the employment of children of school age and the employment of female labor occupations defrimentation benefits and morally. Abalition of the control tabor system.

12. Integrate the part of the mutual money of the United State

15. The people to have the right to propose laws and vote upon all measures of importance, ording to the referendum principle. in. The people to have the right to propose laws and vote epon all measures of importance, according to the referendum principle.

16. Abolition of the veto power of the executive (national state and municipal) wherever it exists.

17. Abolition of the United States Senate and all upper legislative chambers.

18. Municipal self-perenment.

19. Direct vote and secret ballots in all elections. Universal and equal right of sufferage without regard to color, creed or sex. Election days to be legal holidays. The principle of proportional representation to be introduced.

20. All public officers to be subject to recall by their respective constituencies.

21. Uniform civil and criminal has throughout the United States. Administration of justice to be free of charge. Abolition of capital punishment.

have long been the instruments of oppression, but they are equally potent, in the proper hands for equity, justice and peace.-Bige Eddy in the Freemen's

ACROSS THE BORDER.

Combined Capitalist Parties, and Almost Win Out.

Our municipal campaign has been an eventful and era-making one in the news of the socialist movement in this countries of this city. The dominant and try and abroad. Articles on socialism and all-powerful Liberal and Conservative parties drupped their "mark" of "preparties dropped their "mask" of "pretended combat" under which they have always heretofore hoodwinked workers into the capitalist shambles, of Grit and Tory fakirs, and fused together in loving embrace, on the advent in the political arena of our Socialist Labor party nominees. There was thus clear. ty disclosed in this campaign what the S. L. P. has always asserted, that there was no real fight between the parties; that there were but "two classes," the capitalist class and the working class and that they are and must be hostile to each other. The capitalist nominee for mayor selected by the fused parties by a so-called citizen's committee of 400 "prominent citizens and business men" among whom (a noticeable fact), not one working man appeared, was Mr. Kimba'l, a typical manufacturer capiupheld the banner of the S. L. P., and came within 285 votes of capturing the mayoralty chair:

Mayoralty vote-Kimball 2,637 Every once in a while I iun up Mayoralty vote—Com. Darch. 2,402 against something of this kind which Mayoralty vote—Com. Darch, 1899... 65 makes me paw the air and how! Some Mayoralty vote—Com. Darch, 1899... 656 Only paper giving News of the Movement

have we that socialist officials would that differentiates scientific socialism not rell out, the same as the old party politiciana? to his master—the capitalist class, Did you ever hear of a politician sell. ing out to the laboring class? The always true to his constituency; he leave the class government intact are wes his nomination and election to the capitalist class and he never sells them pating labor from industrial servitude out. For the same reason the socialist official will be true to his constituency: he will owe his nomination and election to a class-conscious body that know what they want and how to get it. As an agent of this revolutionary body he will ever be subject to its will There is no more liability of the socialist official betraying his trust than the capitalist himself. Do the capital- if the commercial man does lose his ists think it will be an easy matter to thwart the realization of socialism by else, say a pick and shovel for instance? merely buying up the socialist represtrenuously oppose the propaganda , the capitalists realize that at last they have met a political force that can not be bribed or bulled, and they are filled with consternation, they do not know what to make of it. The first step, then, foward the r

alization of socialism, is mastery of the public powers. We must wrest the potical and economic power from the ands of the master class. When socialists are in centrol of the govern ment, they will have no difficulty reducing their ideals to practice.

New a word as to the method of

effort in singling out specific measures and treating them separately. He will devote, for instance, a whole vening to the question of direct legisation. He may succeed in convincing nany in the audience of the advisability of this measure, but he has not made socialists of them. Men may acept the principle of direct legislation and still hold to the principle of comsuch have taken a step; but how long would it take in this way to make theroughgoing socialists of them? As complished, and one must practically begin at the beginning again. Would ft not have been better to have presented clear-cut scientific socialism in the first place? Make a socialist of a hing of the necessity of direct legisla- frequently measured by the amount of tion, national ownership of railways, improved machinery and isbor-seving municipal ownership of electric light gas, etc.--all these are included. But you may convince a mar of the advisa. bility of all these and still not make

him a socialist. The method of the scientific socialist is the more effective, and what we need today is effective propaganda. form, that the users or rather the own.
The scientific socialist uses all these in. ers of these improved tools, are constances as illustrating and enforcing his demand for the collective ownership gress, and that partially for this reason of all capital, but he does not permit them to obscure the central principle. All these special instances are but parts of the whole and naturally and necessarily follow from the central demand-the social ownership of all the means of production and distribution.

Conditions are such today that it is ully as easy to make men full-fleged times happens that a new labor-saving ocialists, as to convince them of the lesirability of half-way measures The presentation of socialism from the standpoint of the scientific socialist is o logical and forcible that it carries

Losing His Grip.

The average commercial traveler fears that he will lose his grip if the trust mania isn't stopped soon.—Baff-alo News.

Well, what of it? Isn't the "jol seeking the man," as McKinley says? grip, can't he get a grip on something Average labor is in demand isn't it? No man that really wants work need remain idle, at least we have heard that remark made so often that there must be some foundation for it. What's the matter with the commercial travelle; country where a man can always soil a purchaser. If the drummer falls in this, the only suggestion we can offer him is that he get a grip on the princlples of socialism, and then the mania" won't trouble him any longer. But whatever he may think new, "to this complexion must be come at last,"

LAID ON THE SHELF

How Capitalism Circumvents the Inventor.

A TALE TOLD BY A VICTIM.

Admits It Was Bather Bough on Himbut Doesn't Think He Was Cheated.

In the popular conception, the progress of what is called civilization, is improved machinery and labor-seving devices in use by the community under discussion. Those who use tools of production that are not up to date, are generally conceded to be in a less advanced stage of development, and so as a rule this conception is true enough. But along with this, another idea takes ers of these improved tools, are consciously assisting the march of prothese improved tools are brought into action. Nothing is more false than this idea. The first and only question which arises in the mind of the capi-

talist when a invention is brought under his consideration is, "Will it pay ME; will it enable ME to make more PROFIT by its use?" That it someappliance may through peculiar circumstances, offer no such immediate inducement to the capitalist, the fol-lowing account by a disgusted inventor

state there who have no many the control of the selection of the selection

It will be noticed that the buyers of

the product of this man's brains were quite ready to recognize the merits of his invention. The question, "will it vield ME profit" could not be answered in the affirmative; but it might, nay, certainly would have yielded a profit to some rival, therefore the proper method was to buy the rights of its use, and then promptly lay it on the shelf. The inventor in telling the story, doesn't think he was cheated, which shows that he must still have an abiding faith in "business" morality. The most curious part of the parrative is invention was shelved, but it is rather extraordinary that he was not able to ee this before surrendering his product. If he will only look a little more losely into the nature of this transaction, he will understand that the inventor, as well as all other workers who possess nothing but the power of labor of brain or hands, are both equally defenseless against the capitalist explotter, Capitalism will only employ inventors when profit accrues, just as they will only employ labor power unthe inventor is in the ranks of the so cialists, where along with his exploited overthrow of their common enemy, the capitalist class. Regarding his last case, we are inclined to believe that he He is a hustler. Then let is correct. The capitalist will religiously nim get out and hustle. This is a free suppress anything that will not yield profit, and there is doubt that like the his labor-power, providing he can find dog in the manger, he will prevent his that he himself cannot use. the nature of the beast, and if this in ventor wishes to see the product of his brain become a social value, he must of individual ownership of the means of production, by which his efforts are

The Socialist Vote. UNITED STATES.

DECLINED WITH THANKS. We have received a communication

from the "Anti-Trust League," asking our attendance at its assembly in this city on February 12th next. It is necessary upon our part to decline this invi. of production in which the contradictation, as we cannot recognize our common interests with that class mentioned in the circular as being "mensced" by the trust. We are not "business men" and have no "trade" that can be "menaced," and any "influence" which we may have will be directed to furthering the interests of the working class, to which we belong. The circular informs us that "the time is ripe for organized effort on the part of all earnest citizens who desire industrial, and commercial freedom," but the "freedom" spoken of, we don't hanker after, It may mean "freedom" to those who are engaged in this hopeless struggle but to us it spells "slavery" and we want none of it. We shall neither antagonize or support the ideas mentioned In the circular-they are a matter of in. difference to us. Within the bounds of the system under which these antitrust agitators work, the fleecing of the working class is a fundamental basis, and seeing this, we have no preference to make in choosing between a few large shearers and a host of small ones. We object to the shearing process in toto, and are therefore socialists-and as socialists we shall perform our duty to our fellow workers by pointing out the utter futility and impotence of such movements as the Anti-Trust League, and giving good and sufficient reasons therefor. Furthermore we have no time to waste upon dead or dying issues, and we are not inclined to waste that of our readers in the same manner. We are not opposed to the trust, for the same reason that we are not opposed to the principle of gravitation. The trust, we gious training is a question that we do are in no ways responsible for, but we not attempt to decide. In either case, recognize that it is working out the so. lution of social economics that we hold to be inevitable, and it requires from us ed, not by consciousness of class inter-Chiefly for these reasons, and some others which space will not permit us to enumerate, we are obliged to respectfully decline this invitation,

SOCIALISM AND WAR.

The idea of a universal war in which most of the great nations of the world game rather expensive, so that he is to be involved has been growing ever more distinctly in the minds of all classes, The tremendous fleets and armies which are becoming more formidable year by year, the small wars more the desire to intervene on the part of communities not actually engaged. mmercial interests in undeveloped countries constantly backed up by demonstrations of force, the entrance of new powers like the United States and Japan which must be now considered as factors in every proposed terri. up for Hanna's issue and fight each torial change, all these things lead to the conclusion that universal war is not only possible but very probable, And ! now another threat of war which has which enabled Hanna to observe after hung over Europe for many years is beginning again to formulate itself. The antagonism between Great Britain and Russia which has many times brought both countries to the verge of hostilitles, within late years is again in evidence. The former nation in its de. Are you doing all you can to show them panerate libert abus notangue and one the path?

in a fierce struggle with an apparently SNAP SHOTS BY THE WAYSIDE. weak enemy, whose real strength has peer strangely underestimated, and the Colossus of the North after surveying Toil." the situation, at once moves a large effect of this move is not only of interest to the British ruling class, but other communities find that their material interests will be effected by its Russia, and is considering the chances of striking at her enemy before the latter becomes impregnable. In the of the ladder, corridors of the capitol at Washington, men are whispering to each other of the probable result of the downfall of struction of this bulwark of modern of social revolution acts in some sense as a deterrent and hampers decided action on the part of those nations, but cannot prevent them from ranging their forces on one side or the other in the impending conflict. Altogether the belief that the civilized world is drawing fast towards an inevitable and universal war in which no considerable well-founded, and the proposition for another "Peace Conference" only gives added weight to the opinion.

While the majority may yet attribute this condition of affairs to superficial causes, the socialist sees in the coming catastrophe the logical end of a system tion exists that while peace is necessary to its development such development must necessarily lead to war.

A new era is evidently near at hand, and although the dissoluttion of the suffering upon mankind, yet as sociallats we are impotent to guide its course It is fitting perhaps that a system based upon robbery, fraud and cunning, should culminate in one last great act of murder, but the hope of the world lies in the new society to which its last threes shall give birth. .

Or. Edward McGlynn.

Edward McGlynn died in Newburg, N. .. last Sunday afternoon. The news arouses little interest. But there was a time when Edward McGlynn was a man known, admired, and even loved by the working people throughout the United States.

He was a priest of the Roman Catho tic church and a man of great learning and eloquence and strong personality. In the later Eighties he was a prominent figure in the labor movement, especially through his activity in the memorable New York municipal campaign of 1886.

His work in this campaign was regarded by the authorities of the Roman Catholic church as "pernicious activity" and after having been summoned to Rome, and after having disregarded ons, he was ex-communicated in July, 1887. He-remained for six years outside the pale of the church. In 1893 he "modified his views" and the ban of excommunication was removed.

His return to the church, under such onditions, was generally regarded as an ignominious surrender. Whether it was prompted by a regard for his own material interests, or whether it is to be charged to the effects of early reli it is evidence at once of the reactionary power of the church and of the instability of labor leaders who are guidpeliher encouragement nor opposition, ests, but merely by humane sentiment, To Edward McGlynn, the man, we can forgive the weakness that allowed his voice to be silenced, while we remember the valiant services that he did in his better days .- The People

> Count Boni Castellane of France who is an appendage of the Gould estate, has gone into politics and finds the now temporarily short of cash. The American workmen who operate the Gould railway systems will no doubt get a quick move on themselves to help their master in his hour of need. Those among them who believe in republican institutions will be more than anxious to deliver up, when they hear that the money is being used to further royalism and smash the French republic.

> "Hanna names the issue" is the headline in a capitalist daily. Well that is what the Hanna's are for, There is no reason why he should not do so while millions of workingmen will line other over it. The reason why Hanna is permitted to name the lasue again, is because of the shrewdness of capitalism and the stupidity of the workers the last election that "the tote of the workingmen was pretty equally di-

Always remember that the main bulwark of capitalism is the ignorance of Tax the workers. They are in darkness only because they do not know the way out.

"From a life of Luxury to a life of This is the manner in which the capitalist press informs us that the host of fighting men in the direction of left the galesies of Newport to take a their monstrous demands. son of millionaire Potter Paimer has the British possessions in India. The position as bank messenger at \$6 per

What does this mean? It is published in these words, to mislead the workers, to give them the impression that when possible results. Japan uneasily a scion of a capitalist family wants to watches this movement on the part of make his way in the world, he must travel the same path as the children of the working class, and that it depends upon his own ability to reach the top

When the son of a wage worker is compelled at an early age to begin a life of toll, he doesn't have his job sethe British empire, and there are not cured through the influence of his fathwanting- those who declare that the er's steek in the shop or factory where United States must in the interests of he obtains employment. No! On the 'progress' intervens to prevent the de contrary he is often literally torn from school and play ground, endures labor which stunts his growth; is frequently capitalism. In central Europe the fear treated in a manner which utterly demoralizes him in after life, and his reward for the period of his early slavery is almost always less than six dollars, and generally speaking between one and two.

Workingmen! When you read in the capitalist press about the sons of the fullionaire going to work, remember that your masters want to bunco you into believing that you have equal opnation can remain neutral, seems to be portunities with their. They want you your children are exploited, by pretending that their own have to undergo similar (realment.

. . .

Mr. P. D. Armour is to leave Chicago. That information comes in a startling headline in the Chicago Tribune of the 11th inst. But the workers in the Stockyards have no reason for alarm, as the paper adds that he will retain his interest in the city, which means that he will continue as heretofore to extract the surplus value produced by the thousands of laborers in his packing houses. The presence of the capiold order of things may probably be a talist is not necessary for this operaprocess inflicting fearful misery and tion. Although a steer cannot be skinned by proxy, it by no means follows that this is equally true of a workingman.

> It seems strange that we socialists should be continually compelled to insist upon that old saw that "like conditions produce like effects" American sweat-shop employe underfed because underpaid was, during the late war with Spain, "unpatriotic" enough to strike for more pay for the work that was pressed upon him. And now the British workers evince the same lack of "patriotism." . Those who were employed on the Khaki uniforms for South Africa have struck for better conditions of life, to the great indignation of those bumptious middle class volunteers' who are going to the seat of war to assert the supremacy of Brit-Ish capitalism, which has been so rudely assailed by the Transvani burghers.

Louisville, Kentucky, is being threatened. Not by the bubonic plague, but by a street car strike. The street car men like their fellows in Brooklyn, Detroit and Cieveland have asked for more pay and better conditions, and the company in Louisville, like those in the clies mentioned, have said that they will not give. Being the owners they have the power to define their position, so the struggle has already commenced. Louisville, Kentucky, is being threat-The fight between the capitalist politicians, Goebel and Taylor, does not seem to have blinded the street car operatives to the fact that they are deprived of even the semblanca of a de cent living.

Now workingmen, watch this! Potroubles in Louisville, both of course in readiness at Louisville, where cani-

has become a most enthusiastic "Angle Saxon." It is said that his, donations to the British Charity War Fund, already amount to over \$70,000. But he has prohibited his son from joining th volunteers for South, Africa. money he is liberal enough, but if lives are to be risked he prefers that they shall be those of the "other fellows." Pools are plentiful, but Astors are scarce. If the supply of Astors should fall, American workingmen could not everything tending towards a relaxashow their British sympathies, by providing the funds which enable Astor to help crush the Boers.

There is a statement going the rounds of the press that the group of exploiters. known as the "Astor estate" in New York have raised the ground rents of their lots in the tenement house districts of that city from \$250 to \$750 per basis of the class struggle, out of which annum.

In readiness at Louisville, where capitalist interests seem to be most endangered. When you place the power of repression in the hands of your masters, you may be assured that they know how to apply it to the best advantage for their own interests.

Our former fellow citizen, but present British subject, Willie Waldorf Astor

S. D. P. and the anti-Delseon faction of the S. L. P.
We have the S. D. P., a promising, clear-cut socialist party, with esemparatively little personal strife among its members, and a party of a truly American stamp. Why should it jsopardize its political chances by starting on the above hazardoss experiment? And by whom is this course proposed? By the Chicago anti-Delseon section of the S. L. P., that has given but little assurance of practical, harmonious sense, after withholding from its own party due support and financial aid during a most serious crisis.

the Social-Democratic party in Germany, in opposition to Bernstein and everything tending towards a relaxation of the class struggle. The translation will be out in a few days. It discusses all phases of the question of tactics which is a question of supreme importance for socialists in America today. A few quotations from the pamphlet are given below.

"For our party and for our party tactics there is but one sound basis, the basis of the class struggle out of which the Social-Democratic party has sprung no, and out of which it alone can draw the necessary strength to bid defiance to every storm and to all its enemies. The founders of our party, Marx Engels and Lassalle impressed upon the workingmen the frecessity of the class character of our movement so deepy that down to a very recent time there workingmen the frecessity of the class character of our movement so deepy that down to a very recent time there workingmen the frecessity of the class character of our movement so deepy that down to a very recent time there workingmen the frecessity of the class character of our movement so deepy that down to a very recent time there workingmen the frecessity of the class character of our movement so deepy that down to a very recent time there workingmen the frecessity of the class character of our movement so deepy that down to a very recent time there working of the track.

True in certain party circles there exists an inclination to desert the plat-

the latter road and assist the S. D. P.

on its march to victory.

And as to those who are not yet sensible comrades, those who trifle about matters of little consequence when the most essential things need their attention—well, let them stand aside awhile and learn to know their duty.

E. Dietzgen.

-Berlin, Dec. 3, 1899,

To the members of the Carl Marx club (22nd Ward, Branch, S. L. P.) Dietzgen stated time and time again privately and in open meeting that these two parties are brother parties and with the same object in view and MUST UNITE. Several members of this club have said, "I cannot understand Dietzgen, he spoke so strongly for the unity of these two parties." He, Diesegen, time and time again showed in print and otherwis similarity of the two parties and the necessity of their being united.

Read below the clipping from the 'Neue Zeit," Kautsky's weekly, and see Dietzgen's statement to the socialists

The stand towards the S. T. & L. A. taken by the New York "Volkszelung" when the S. L. P. endersed the S. T. & L. A. and after its development, in reality caused the party quarrel and led to above action in deposing DeLeon and the N. E. C. About the means through which the past S. L. P. trio upheld its reign we will say nothing further. Enough, the split is here. It may not be expected that DeLeon's party is to melt away at once, but the may not be expected that DeLeon's party is to melt away at once, but the two-thirds membership of the S. I. P. now separated from him, gives hope for better and, as far as its leaders are concerned. A UNITED ACTION OF ALL SOCIAL DEMOCRATIC FORCES as against the common for may be the result.

Here follows the stand of Eugens V. Debs towards the S. L. P. and why, it was impossible for him to join the S. L. P. without his comrades going with him, which they refused to do on account of the indiscreet and malicious attacks upon all who would not blindly follow the dictates of DeLeon and his associates in office.

Recent developments in the S. L. P. splendidly justify the wise step of Debs comrades at the time. IT IS REALLY INDIFFERENT TO E. V. DEBS, WHETHER THE NAME OF THE PARTY IS S. L. P. OR S. D. P. AS LONG AS THE CAUSE OF MODERN SOCIALISM MARCHES ON, and the LONG AS THE CAUSE OF MODER.
SOCIALISM MARCHES ON, and the hope is declared that the movement is the United States in the near future will reach the growth of socialism Belgium and Austria.

Eugene Dietzgen.

Now is this a case of "sour grapes"" Is it because he, Distzgen, was not instrumental in assisting in bringing this union about? Or is it, according to a Biblical saying. "He didn't want his right hand to know what his left hand was doing?" That is writing one thing for Europe and another thing for

America. Strange reading for the blog.

This clipping from the "Neue Zeit"

raphers; strange reading indeed.

was written just after the trouble in the S. L. P. The words "a united action of all social democratic forces." certainly showed Com. Dietzgen that a call for unity would soon follow. But I do not read any objections on Dietzgen's part-at that time. But, however, as soon as Com. Dietzgen saw that a union was inevitable, he at once wrote his letter in the Social Democratic Herald for America. This "truly American party" idea of Com. Dietz. gen's is like another man who so had an American socialist movement idea. I thought it was "socialism in Amer-ica," "socialism in Germany," "social-"German," or an "American" socialism Com. Liebknecht in his new pamphlet which will shortly be out in English ("No Compremise: No Political Trading"), this nonsensical idea will be set. tied. Just before closing, one point in regard to a name for this united socialist party, Com. Dietzgen in the Social Democratic Heraid objects to a change of name. (See clipqing.) Now let's turn to the clipping well as the life of man are today being from the "Neue Zeit." It is really indifferent to Debs whether the name of of European comrades. As usual, one thing for American comrades and an-

THE MODERN SHEPHERD.

he parson ruse from his dewny couch at the break of the Sabbath day, is dressed himself and decked himself in the chaste aesthetic way.

Lavender scented was his garb, rings graced his fily hand. In truth he was a goodly sight—the parson of the land.

The parson drave to the temple fair where the Lord of Hosts abode.

And his carriage flew at a ratting pace on the wide and dusty road.

Tis said the Master went on foot in the days of long ago.

Nor purse nor scrip his followers here;

-but the times have altered so).

"was a sight divine—that state shrine of the Lowly and the Meek. stately

The shepherd waved his fily hand and The sheinerd waved his lily hand and raised his mellow volce.

'The Lord has been exceeding good. Rejoice my friends, rejoice.

The oil of gladness he has poured in fulness on each head,
His little lambs in pastures green, by running waters led.

"Did you ever stop to think," he sconfer fear and quake."
"whit these labor unions can step a work of the whole city if anything done to draw their displeasure? That is unust pay a drunker. o shall we win our way at last to 'corpers' in the skies."

Hammen, Charles Zerrenner, Joel Moses, John Schmidt and Gad. Mastindale, Delegates desiring any information will address Wm. Lippelt, 223 Chamber of Commerce.

Frank A. Sieverman.

A sad story of a large number of distressed and homesick Americans, who became interested in a settlement at La Gioria, in the province of Puerto Principe, was told by Robert Hail, a St. Juseph (Mo.) business man, who arrived today on the steamer Olipda from Cuba. He said that many were suffering for lack of the ordinary necessities of life. Many have not the means to purchase passage back to the United States.—Chicago Tribune.

These unfortunate people didn't know that Cuba is a land of promise only for American capitalists. They went there to work, not understanding that "pros. perity" consists in setting the other the product which his labor produces, It is no doubt a sad story as the report says but it is repeated everywhere throughout the world in the miserable lives of millions of workers, whose sufferings are due to the same lack of knowledge displayed by these would-be settlers. Knock out the capitalist system of production and there will be not enly no "lack of the peressaries of life." but what are now esteemed lux-uries will be within the reach of all.

The enormous development of capitalist production in the United States, and the appearance on the stage of in new and improved methods of modern industry which are a necessary result of this development, have in the rapid. ity of their movement created a sense of stupefaction and bewilderment amongst that portion of the commercial world who are falling behind in the competitive race. They behold in a strength of those capitalist combinations, against which they are altogether powerless, and not understanding the nature of the economic system which they still support, give vent to their feeling in denunciations of the "greed," andacity" and "aggressiveness" of

those capitalist groups, which are so rapidly cutting the ground from under their feet. This attitude is altogether a natural one, and many historical parallels may be cited which are analogous it, and which have been always based upon the same foundation, which in every case is ignorance of the laws governing the phenomena under con-sideration. In Mohammedan countries we are told that an eclipse of the moon draws voileys of musketry from the inhabitants, who thus hope to prevent Satan from devouring that satellite. this being the popular explanation of a natural astronomical fact, but we have never heard that Satan was deterred thereby. The appearance of Halley's comet in 1456 was so terrifying to the inhabitants of Europe that Calintus the Third issued a bull exercising it from the heavens, but at the predestined time to laws of which its exerciser was ignorant. The whole history of the human race teems with such instances, all tending to show that occurrences which could not be explained according to the knowledge then extant, and ose effects were supposed to be prefudicial to society, have gone through hope that thereby their progress might be stayed. And this holds good with similar phenomera to day. Across the commercial sky comes the tremendous apparition of the "Standard Oil Crowd" of the New York World in the following

and national governments.

The Standard Oil Bank is the clearth towns and countles and states

The "Standard Off crowd" and their The "Standard Oil crowd" and their vast and multiplying wealth, so aggressive necessarily in itself, so fierrely aggressive through the insatiable greed of its owners—such is the problem which has been preparing for a quarrer of a century, and which Mr. McKindey's order farming the internal revenues to the Standard Oil Bank suddenly revealed to the people.

Yes, here is the problem truly. A problem that cannot be solved by the remnants of the commercial class who are fast being expropriated by the resistless march of this colorsal combidazed manner the growing power and nation. A problem whose causes they know not, of if knowing, dare not expose. Not one word in the above article would the socialist dispute. It is true in every respect, but yet it is only a description of the progress of this seeming terror, not an enquiry into the economic causes that undertie it. And yet it affords a complete confirmation of the correctness of the socialist diagnosis of our economic system. method ofdestruction of rivals, the "rebate" system, the courts, legislators political parties, all being used by and for the interests of this combination, the new fields conquered in the gas coal, copper, railroad and steamship industries, and lastly the occupation of the financial field, which brings with it the subjection of every power of government, are well-calculated to slarm and terrify those for whom the present order of society seems a thing fixed and unalterable. But to the socialist who comprehends the march of modern capitalism, and the ultimate end to which it tends, these latter day com for astonishment por alarm. Capital. ism which has already stripped the majority of the people of all preperty or the hope of acquiring any, cannot further harm the projetariat as a class. Those who have still something to lose may cry frantically for help against the monsters of the system which they still adhere to, but no help can come. The system of private property is already doesned. The prospect which confronts them of being hurled into the ranks of the proletariat may doleful utterances upon the part of the not be a pleasant one but at least it capitalist political rulers of France, will enable them to perceive the nature Germany and Belgium, as to the rapid of the economic structure which they growth of socialism in those countries, have vainly attempted to preserve, and and the danger to existing conditions which draws forth the musketry first the furbity of threats and denuncia-which this growth involves. These of the New York world in the following tions against it. Seeing that the pres-conditions are simpler to those in this ers of government are rapidly passing country, the condition of private prop-Four years ago the largest factor in American finance was J. Plerpent Morgan. Upon the substancial foundations laid by his predecessors he built a financial stronghold that commanded American commerce and trade and finally the public treasury.

Mr. Morgan's domination rested upon strength supplemented by skill. He was strong, but he was also extremely able, and grand strategy played the mest important part in his campaigns.

Today Mr. Morgan has dwindled, and there towers about our commerce, above our public as well as our private finance, a, new stronghold—a vertiable Gibraitar. It is the fortress of the "Standard Oil crowd."

The Rockefellers began in 1882, among the least of several scares of bil, technical production, a society in which ecomay give it opportunity to herald linto the hands of this object of their erty in the means of production being

The Reckefellers began in 1852, among the least of soveral scores of oil refiners. By 1870 they had arducastly got together about \$1,000,000. They began to systematize the secret and unlawful railway rebate. At first they used it as a bludgeon to assassinate their rivals for the hoint benefit of themselves and the railways. Presently, as they grew strong, they dissolved partnership with the railways and used the hudgeon upon them also to compel them to ctime of which the "Standard Oil growd" alone reaped the benefits.

Year after year they have been working this protectly through Cuay.

They have templetely controlled and still control the boiltics of two states. Ohio directly, and Peansylvania indirectly through Cuay.

As their business has been conducted wholly through public corporations, they have reconstantly "in politics."

They have templetely controlled and still control the robilities of two states. Ohio directly, and Peansylvania indirectly through Cuay.

As their business has been conducted wholly through public corporations, they have ever constantly "in polities."

They have rempletely controlled and still control the robilities of two states. Ohio directly, and Peansylvania indirectly through Cuay.

As their business has been canducted wholly through public corporations, they have ever constantly "in polities."

They have rempletely controlled and still control the robilities of two states. Ohio directly, and Peansylvania indirectly through Cuay.

As their business has been canducted wholly through public corporations, they have ever constantly "in polities."

They rever constantly "in polities."

Their wealth has grown like a rolling snow ball. This income of each member of the little cotorie is by liself a conception of history, leading up to the class struggle forever yet an end to the complete composition. known and therefore unconsidered, proof were wanted, their advocacy by The recognition of the materialistic the astute capitalist press, forms a snow hall. The income of each member of the little coterie is by itself a fortune.

To invest their surplus they have ex. To invest their surplus they have ex. the dreams of a "New Jerusalem" or of ideal societies in which the socialist theories of the globe. And when there was no more picles to conquer for their oil they turned to participate in, to control to seek to indisposite other is. Gustries-gas, coal steel, copper traction, railroads, ocean steamships.

Curiously crough their motio in their commercial pliacy was benevolent as, similation"—surrender and we will let you live, resist and we will annihilate the present time this idea has not altogether given up the ghost, and ther people's money on these the first half of this century could be worked out, while the world gazed admiringly at the spectacle, and seeing its success, determined to follow the example, and construct a model society framed upon similar lines. Even at the present time this idea has not altogether given up the ghost, and they profer to wait until the inevitable suicide occurs.

But let us suppose that Messars Jones and Herron, instead of wasting their time, and other people's money on these similation—surrence of the swift annihilate you live, resist and we will annihilate you.

In the natural course of the swift former attempts to carry out his meaning of their capital they have been drawn into finance—into matienal banking, into contact with the United States treasury.

The Standard Oil Bank, with its al. Hed banks here in New York and Chi-cago and other cities, and with its correspondent banks, one or more in each of the larger cities of this country, reports this latest development of Standard Oil power.

Standard Oil power.

Finandard Oil Annihilate political accounts working class that united political accounts working class that united political accounts on their part, for the overthrow of capitalist supremacy, and the establishment of themselves as ruling class, is the first step to the attainment of socialism. What would then be the attained of the capitalist press towards these schemes, it is almost unnecessary to remind socialism. What would then be the attained of the capitalist press? Does the capitalist press towards the country response to the capitalist press towards the country response to the capitalist press towards the capit the larger cities of this country, represents this latest development of Standard Oil power.

Socialist Labor Party of the United States. SOCIALIST BOOKS Directory of Section

PLATFORM.

The Socialist Laner Party of the United States, in convention assembled, re-asserts the inalismable rights of all men to life, liberty and the pursuit of happiness.

With the founders of the American republic we hard that the purpose of government is to secure every climen in the enjoyment of his right; but in the light of our social conditions we hald furthermore, that no such right can be exercised under a system of econotic inequality, essentially destructive of life, for theory and of happiness.

With the founders of this republic we hold that the true theory of politics is that the machinery of government must be evene and controlled by the whole people; but in the light of our industrial development we hold, furthermore, that the true theory of economics is that the machinery of government with the life of the people in common.

To the obvious fact that our despetic system of economics is the direct opposite of our democratic system of politics can plainly be traced the existence of a privileged class, the currention of government by that class, the alientation of public property public franchises and public functions to that class, and the abject dependence of the nightness of antions upon that class.

Again, through the pervention of democracy to the ends of plutocracy, labor is robbed of the wealth which it assus produces, is denied the means of active appropriate, and by compulsory idenses in wage startery, in even deprived of the necessaries of life.

Functance and misery, with all their concomitant with, are perpetuated, that the people may be less, the order of the property of the property of the controlled of the controlled of the property of the controlled to the con

Someto and invention are diverted from their humane purpose to the enlarcement of women and inflicts.

Against such a system the Socialist Labor Party gave more enters its protest. Once more it electrics its fundamental declaration that private property in the natural sources of production and the institutional of labor is the obvious cause of all sconomic servitude and political dependence. The time is fast counting where, in the natural courses of social evolution, this system, through the extractive action of its failures and order on the one hand, and the constructive tendencies of labors and other capitalistic combinations on the other hand, shall have worked out its own downfail. We, therefore, call upon the wage workers of the United States, and upon all holess tiltness, to gain the most of the problet powers; so that, both gates and determined to conquer them by taking passession of the public powers; so that, both gates and action has been accomplished to the control of the state of the public powers; so that, both out of the public powers of the problet powers of the problet powers of the problet powers of the problet powers; so that, both out of the fail the means of production, transportation and distribution of the present class rangels, we thay put a saccommany end to that berbarous struggle by the abolition of classes, that is publicative body, and the subclitution of the Cooperative Commonwealth in which every worker shall have be production, industrial was and social disorder; a commonwealth is which every worker shall have be rest exercise and full benefit of his facilities multiplied by all the moders factors of civilization.

Immediate Demands.

With a view to immediate improvement in the condition of labor we present the following demands:

1. Reduction of the hours of labor in proportion to the progress of production.

2. The United States shall obtain pessession of the railroads, canals, telegraphs, telephones and other means of public transportation and communication; the employee to operate the same operatively under the control of the Federal government and to elect their own superior officers, it no employee shall be discharged for political reasons.

3. The municipalities shall obtain possession of the local railroads ferrice, water works, electric anise and all industries requiring manicipal franchises; the employees to operate the same co-operately under the control of the manicipal aimministration and to elect their own superior officers, but employees thall be discharged for political reasons.

4. The public inside deciated malienable. Revocation of all land grants to corporations or indicated, the conditions of which have not been complied with.

5. The United States to mave the exclusive right to issue money.

6. Congressional legislation providing for the scientific management of forests and waterways of prohibiting the waste of the natural reasoners of the country.

7. Insentions to be free to all: the inventors to be remanerated by the nation.

8. Progression tax and tax on inheritances: the smaller incomes to be exempt.

9. Progression tax and tax on inheritances, the smaller incomes to be exempt.

10. Repeal of all papers, transpondent and sampline places. Enaboraged right of combination in Prohibition of the development of children under fourteen years of age to be completely remained abore complicates destinential to health and morality. Abolition of the construct labor system.

11. Impulyment of the amplitude of the public authorities (connected right of combination in the prohibition of the context to health and morality. Abolition of the construct labor experience destined in the analysis of the problem and nations of the public

law.

15. The people to have the right to propose laws and not engined employer's instilling according to the referendum principle.

16. Abolition of the veto power of the executive (national, what and municipal) wherever it exists.

17. Abolition of the United States Senate and all upper legislative chambers.

18. Municipal self-government.

19. Direct vote and secret ballots in all elections. Universal and equal right of sufferage without regard to color, cred or sex. Election days to be legal holidars. The principle of proportional representations to be introduced.

20. All public officers to be subject to fecall by their respective constituencies.

21. Uniform civil and criminal jaw throughout the United States. Administration of justice to be free of charge. Abolition of capital punishment.

DEFECTIVE SHELLS

Gunners Carnegie and Rockefeller Bombard the "Young Man."

OUR "BLESSED HERITAGE."

Capitalists Extel Poverty and At the Same Time Tell How to Escape

On the night of January 18th the sound of heavy firing was heard in the direction of-not Ladysmith this timebut New York. The rapid fire battery Andrew Carnegie operated by that skilful gunnery expert John D. Rocke. feller, opened a tremendous fusiballe upon the unfortunate young men of the Fifth Avenue Baptist church, with the result that the latter were completely demiralized, and must have retreated We have a recollection of some mis

otwithstanding the fact that many of the shells fired at the Baptist young men were defective (like the "blow armour from the same source), it must be admitted that the bombard. ment on the whole achieved its pur-Rockefeller and Carnegie are adepts at the 'shell game' and their united efforts could not fall to start the aforesaid young men on the road to "success in business" at a 2:40 gait. The following fragments of the bom-

bardment which were picked up by, a

There are three classes of young men who start in life. First, there is the one who says he aims to acquire riches. Then there is the one whose vain ambition is to obtain a valigifious reputation. He is the young man who would step in front of a cannon to attract the attention of men. And, by the way, this shooting business is a bad business. I don't believe in taking a shot at a man, and worse going out of your own country to do't. No man could ever get me to go out of my own look it is more likely that when he has could ever get me to go out of my own country to kill a man. I believe that the only time to kill is when your na-tive land-your own home—is in danger the only time to kill is when your ha-tive land—your own home—is in danges of invasion. The third, and man who will be successful, is the man who starts out in life with self-respect and who is true to himself and his fellows There is the young man who cannot fall

At the conclusion of his address Mr Carnegie was introduced to those pres-ent by John D. Rockefeller,

Well, if that's so, we are surely a people who do not appreciate the nature of why do we hear the fellows that are not in the trust howling against it? bringing "the blessings of poverty" within their reach, that it is daily holding before them the promise that their lives shall be as "blessed" as those of the residents of the slums and tenehave it so! All that we can say is that mankind don't know what's good for them. But if poverty is a thing to be eru to "success in business" to these If they succeed won' ve to leave their "blessed herit. age" behind? It looks as if there was a hitch in this argument that wants

frew expressed the hope that nonof his hearers were burdened with riches. A society which produces Rock. efellers and Carnegies is a pretty good warrant that the young men will be re-lieved from this burden. A young man upon whom this burden is laid deserver "double credit." But Carnegle hopes that they are not so burdened. Therefore he is willing to see them deprived of this "double credit." But why? Burely "double credit" is cheap and

become ditto if they only act their part which is to look after the interests of their employer, and the capitalist class. When they have grown old in this service, like the salt of the scripture, they will have lost their savor and shall be cast out and trodden unand Carnegle for preference.

The abolition of poverty would cer tainly be a sad day for the Rockefeller and Carnegie class. Instead of working others, they might perhaps have to

From the ranks of the poor come the inventors, artists and all great men The Rockefeller class steal the product of these men's brains and hands, there. fore it is not strange that they should ry to preserve the source of their sup-

The next piece of advice is one that will surely prove disastrous to the Baptist young man if he tries to put it in practice, "Don't be afraid of the boss. When your'e right fight it out with him."Now isn't it playing it rather low down on the young man to run him up against a dead sure thing like this' guided men attempting to put this scheme into action at a place called Homestead, but it didn't pan out well. They fought the book for all they were worth, but we never heard that any of say nothing of marrying their employ-

"Don't do any crooked business, not even if your employer wants you to." (By the way, how did that "blow hole" armour plate affair pass muster?) "Stand up for your 'rights," be a man, and you will find that your employermealous reporter on the field of battle, can't do wrong, and that anything he will be subjected to analysis for the asks you to do is right, for he can decide what's what You will have ample time to reason out this matter, when mental development of civilized man

er's daughter.

man." It is. And the fellow that's got branch of the "Tree of Life" is situated his head above water stands on the throne of civilized man, and from

will be subjected to analysis for the benefit of our readers:

"As a young man I had the best education in the world with which to begin life. I was born to the blessed heritage of poverty. I hope I speak to poor young men tonight. It is my earnest hope that none of you is burdened with the care of riches. When this burden is laid on a young man and he acts his part well he deserves double credit. He is surely the sait of the earth. "In these days we hear a lot about poverty. The cry goes up to abolish poverty, but it will indeed be a said day when poverty is no longer with us. Where will your inventor, your artist, your philanthropist, your reformer—in fact, anybody of note—come from the ranks of the poar. God does not call his great men from the ranks of the poar. God does not call his great men from the ranks of the rich.

"To my mind the first thing for a young man starting out in life is to datermine to do more than his simple duty. Don't be afraid of your employer. When you know you are right, sick to it, and fight it out with your boss. The boy that can beat me in an argument is the boy that I want in my employ. He is the boy that wink your employer when you are right. He may have a pretty daughter. "Then you must never do anything wrong in business—not even if your employer wants you to. Stand up for your own rights and be a man, ""Or every \$1,000 given to charity\$555 might as well be thrown into the seal it is bad policy to aid the submerged man. Give your aid to the man who is fighting with his head above the water.

"There are three classes of young men who start in life. First, there is the water.

"There are three classes of young men who start in life. First, there is the cide what's what. You will have to be shoulders duty in the fellow that's got another job.

"It is dad policy to aid the submerged fellow will have to be shoulders of the submerged fellow will have to be shoulders of the submerged fellow will have to be shoulders of the submerged fellow will have to be shoulders of the submerged

'Tis an ill wind that blows

look it is more likely that when he has gathered to his own use sufficient labor product to attract the attention of larger rivals, that his career will be suddenly checked. As he tramps gaily along the road to success in business, he will not be aware that just round the corner somebody of the Rockefeller type is laying in wait for him armed with that excellent and up-to-date sandbag, the trust. And when he regains his senses he will find that his birthright has been restored to him. that he has been again endowed with "blessed heritage of poverty" with which he started on the road.

A Manly Minister.

It is gratifying to note that some enough to call attention to the miserable sham and hypocrisy inherent in lern society, and which every "right thinking" person is supposed to acquiesce in, Rev. J. McInnes of Oakland, California, has just kicked over the traces in this respect. After some remarks on the above subject he con-

The ministry is no place for a young man who wants his personal liberty. He must use too much hypocrisy and overlook too much hypocrisy in others.

This is decidedly refreshing, but it may have serious consequences to the courageous speaker. Most of his brethren of the cloth have learned the lessor that they are the paid wage laborers of capitalism, and must uphold it in all its fait their places. We welcome such revolt upon the part of the clergy, as it nt economic system is becoming lainer and more distinct overy day.

MARCH OF PROGRESS THE MODERN THUG

Basis of Socialism.

Socialist Movement Harmonizes With Present Economic Conditions Resp the Tendencies of Human Progress.

Man is a complex animal; and, be history is but the record of his continual struggle to satisfy these wants.

wants. At first man's wants are purehis only alm. The object of the savage ls to find the means of his life and al of his energy is devoted to that alone. But it is not so with civilized man The wants of the latter are of a twothem became partners in the firm, to fold nature. They are material and inreflectual. Civilized man has to satisfy the wants of the body and the mind. The impossibility of satisfying the cravings of the mind for knowledge is, to civilized man, just as painful as the impossibility of satisfying the simple seeds of the stomach

The difference between civilized man and savage is greater than between strangling. A long bandanna of sile follow, and at present they are laying savage and animal. What makes this was used for this purpose, and these for him, for he is not liked by his enswide difference?-the intellect! The is what makes him "lord of all creation," is what lifts him so high above all living creatures. On the highest the assassin's trade in the future, the there he commands and subjects the . These people were known by the whole of the animal kingdom to his name of "thugs." and the British gov-The submerged fellow will have to aid own needs and wants. And because of errment determined that their suppressions and if he don't he will get all the intellectual status of man, his whole slop was a necessity. After many the intellectual status of man, his whole slon was a necessity. After many life is totally different from the life of years of unibulted hanging and shoot. all other animals. To get the means of life, to satisfy the stomach, is not HIS though the thug is now extinct in India, aim in life. Civilized man has more of the material things of life than be can possibly consume. His aim a something higher-intellectual. Sex. realization, to know one's own self and to understand one's exact relation to the rest of the universe, is what inspires

civilized man But if the above is true, i. e., if the ntellectual development of man is the only characteristic difference between savage and civilized, then the status of our modern workman is far from being nivilized. For example, take the average workingman of today. His life is one of continual toll and misery. All als energy and manhood are devoted to what?--to the getting of the material means of life. His intellect is not de veloped and his intellectual wants ar ery few or none at all. He knows very little of science, art and philosophy cares very little to know of the dee mysteries of the universe and he is in. different to most social problems of vital importance to his own class. In-

"A thing that grieves not and that Stolld and stunned, a brother to the

ox.

The nineteenth century is generally spoken of as an age of civilization. This is only partially true. It is true in so far as this closing century is one of human achievements, especially, of great material progress. But it is not true in so far as our present system denies to a majority of people all the conditions of a truly civilized life. And here it is precisely wherein capitalism proves itself to be one great contradic. tion. And it is because of this contradiction that our modern society must inevitably give way to some other form of society which is more harmonious which, in the light of past history must be socialism!

Socialism will be simply the result of a harmonic adjustment of the forces of civilization. Remove the contradiction inherent in capitalism and you will have made way for the establishment of the Co-operative Commonwealth. Under socialism all men and women will be given equal opportunities to live their own individual lives. The intellectual wants of every one will be greatly multiplied and all energy of so ciety will be devoted to the satisfying of those wants. Man will be truly civilized and all buman achievements will In short, the fruits of civilization be within the reach of all and the the best advantage of all mankind.

William Edita.

In the old time a man made his plans did his work, received his product, said it was his right, and thanked his God that there was enough for all, so no on need starve. Now, an employer make

ble for the Surroundings Which Produce Him.

In the early years of this century the anse of the great complexity of his British government in India found itnature, his wants are more numerous self confronted with a serious problem than that of any other animal. Man is which called loudly for settlement. It simply a bundle of wants and man's seems that there existed in that country, a most unpleasant band of individuals, whose operations kept the in-All progress-is the result of man's habitants in a state of constant unstruggle to satisfy his ever-increasing pasiness and terror. The chief reason of their unpopularity arose from the y material. To satisfy the stomach is fact that they adhered to a peculiar creed, in which the taking of human life formed a most essential feature A candidate for membership in the band, was required to prove his fitness murder, and as a rule the sufferers were face. generally natives who were traveling from one town to the other and who ambush in lossly places for their viccalment they usually consum. mated the murder by the method of gentlemen often became very dexterous in its use through long practice. All to-date methods, being a trifle backwho passed the first initiatory test were thenceforward required to follow property found on the victims being thur. His presence is one of the "probi-

used as a means of support. ing, this object was accomplished. his name has been bequathed to a part of the community inhabiting our great American cities, and this part being had a new experience the other day quite as objectionable to society as with the Y. M. C. A. of Sing Sing, N. Y., those who have the original name, we at the Highland Avenue Methodist are now confronted with the problem, "What shall be done with the thugs?"

One of our "city fathers," with the xample of the British most probably n his mind, has proposed that \$200 shall be paid to the slayer of a thug, provided such killing is done whilst the atter is engaged in his occupation.

This proposition has given rise to a hat the extermination of the thug sould be a good thing, but this plan of corrying it out has raised many ob-

It has been put forward as an argu, ent against this method, that if this bill becomes a law, there will be a vast amount of men ready to personate farmers and other unsuspecting person in order to attract the attention of the thug and tempt him to exercise the and a sure sign that the "brotherhood of man" is within halling distance.

The Chicago thug is no doubt a most lisagreeable person. He don't play ac cording to the rules of the game, and therefore society demands his suppression-with the least possible dan-

ger to themselves. satisfied, and as he is not possessed of sufficient capital to form a trust, he pethods. Accordingly he secures what. ever means of production may be acouired in his profession, and waits for he first favorable opportunity to do business," which consists in extractthe person of his victim. It makes no difference to him how the latter obseeds in securing them.

Such proceedings are irregular, unrthodox, antiquated and filegal, Thousands of years ago these meth-

ds were quite up to date and were also ooked upon as customary and moral, out times have changed. The principle, however, yet survives

Dur present society is based upon the appropriation by individuals of values the method of such appropriation that as been changed.

The thug may therefore plead that his intentions are of the best, even faulty.

such, that the supply of thugs is guar-anteed. In all modern cities there are es set apart where the evolution of the thug is carefully watched, fostered by to see that all the local surge shall be made to harm tih his growth and education. These

and they are admirably adapted for th

called "reformers" talk loudly about th abolition of the slums and altract a good deal of attention by the noise they make. They are humored to some ex tent in this, and very often society makes a pretence of approving of theh schemes, but stops at that, knowing well enough that the abolition of the slum means the overthrow of civilian

It does seem strange that society ould so loudly demand the destruction of the thug, and at the same time care fully prepare breeding places for him. But such curious contradictions are sometimes explained away by terming them "necessary evils," and there is no doubt that the thug will in time be en

If the subject of this discussion would reform and bring his methods up to date, he might possibly escape a go

ual he were to turn his attention to dealing with a whole city, state, or community, in the orthodox busin manner, he could if successful, earn the approval of a goodly number of his neighbors, although at the same time he would still make enemies. But no for admission, by first committing a man can altogether escape from this

Out in Africa, in a town called Kimberly, there is at present a very no were easily disposed of during the jour- torious thug, (though he is not generalney. The assassins were wont to lay in ty called so), who has so far had a most presperous career. He has always tims, and suddenly springing out from done business on a targe scale, not plundering individuals, but communities. He has made enemies too, pool mirs, who in this case object to his up. ward themselves. Thus is every stage of civilization

we may see the counterpart of the lems" which confront society, bot only in Chicago but everywhere. While s ciety is solving it; the thug will, no doubt continue to do business at the old stand, with the most improved weapons if he can get them-but if no he will do the best he can.

The Reward of Truth.

The author of "Things As They Are" church in that place. He took material "Give us this day our daily beef steak" but his talk evidently didn't suit the Christian young men of Sing Sing, as the report says he was "forcibly expelled from the pulpit" by the secretary to meet with the entire approval of all arge amount of comment favorable and present. Mr. Hall is a keen observer, therwise. It is generally conceded and he will no doubt see "things as they are" in regard to the attitude of the middle class when the sight of all to have beefsteak and other good things, is brought under consideration. Y. M. C. A., we hope, have given Mr. Hall a strong push on the road to so ciallam.

thirty years we have had legislation on this subject, and yet child labor is continually increasing. Not that the laws are bad, but the interests of those who are appointed to enforce them, are diametrically opposed to the spirit that demands the enactment of these laws.

The laws covering this matter and other kindred ones such as those concerning shorter hours of labor, better sanitary conditions, abolition of unreasonable risks, etc., etc., will never be enforced until the working class, whose interests are involved in these matters take possession of the public powers for their own protection. When this is done they will free themselves from the conditions which make such laws necessary.

The public were edified this week by

The class to which the count be longs know that /work" is a blessing, and they are going to load the laborers and entralization in gainst corporate agrandizement and eentralization in general and in detail, has fathered a bill which is in flagrant definee of the principles for which he has stood so long. This bill is to confer abhorty to purchase the railroad of the units, and who never tires of preachturs, and who have trusts, and who never tires of preachturs, Senator Jones of Arkansas, who poses

We don't quite see where Jones' inconsistency comes in. 'He is yet the most "loflexible foe" to all trusts-that he, Jones, can't get into, "Corporate aggrandizement" is of course detestable -unless Jones is a part of the corporation to be aggrandized, and then the whole case is altered. The principles of Jones mean the material interests of Jones, which is as good a creed as a man can embrace, and one which fits present society like the paper on the wall. We take great pleasure in vindicating Jones from such slanderous charges, because these same papers have before now given us a fixed idea that he was a "good" man-which he is

FOREIGN NEWS.

"Le Mouvement Socialiste" Works for International Unity Ameng Socialists.

Our readers know how gealously w conscience. All militarit socialists must therefore associate their efforts in order to utrain this desired object

After one year of experience we are onserious of what is necessary to be done towards the fulfillment of that To complete unity. And now at the boem our readers that we understand duty which the new organization of the party prescribes for us. First "He Morvement Socialists" wil

remain a review of informatical We The hall endeathr to tell our readers at any time "This is how the socialist movement stands at present on national in-If we succeed in giving our comfacts

we know them

Nothing was more instructive or de sisive at the Paris Congress than the speeches of the militant peacants and workingmen, delegates of foreign countries. It is precisely this change of thoughts and wills that we wish extend. And to succeed, nothing is bet er than to constantly supply such intermation to the comrades of French Socialist Labor party.

First we want to show the infinite variety of socialist movement and ac In our "studies," "investiga lons" and "monographs," in our "So dal Chronicle," we show how such eir constances create such organizations and call forth such tactles, how the di cerally of temperaments reflects itself n the diversity of works. - We endeavo to point out that a complete socialist movement exists in reality everywhere where each can act according to his aptitudes, and that no individual can lave the right to represent such move ment exclusively.

We will also indicate the progress ocialist thought and doctrine. questions are always coming forward either concerning our party, or the dif-ferent factions of international socialsm. Socialists under the influence of facts or scientific studies, are constant ly proposing new questions to ou New solutions of probleins which are now supposed to be settled are also being presented, and astly there are sometimes proposals on isw tactics which must be taken cog nizance of. It is this unctasting work of international socialist thought which we will continue to relate in every phase of its complexity.

Again, as this is a review of inform tion, "Le Mouvement Socialiste," faithful to its past, must also be a critical review. We must bring into contact all the active and living elements of the movement, for the socialist idea is emitently cultical. We have not only to diffuse the opinion of such or such expert theoriat, but also resuscitate the criticism of other theorists, and thus stimulate intellectual debate in the party. Everyone must be able to form an opinion for himself on the actions and ideas of others. Censure must be possible and precise, so that we may all know the reasons why we reject or acsome new idea or tendency.

On the other hand it is necessary that veryone shall act upon the actions of thers, even upon the ideas of all, and o give his impulse to the movement We wish to point out to the thinking proletariat, the most remarkable modes of socialist organization, the most re cent and profound forms of socialist This we believe the prope method to establish the veritable unity This will not be the external unity

rescribed by the necessity of action out the internal unity which grow rom the conscious will and consent of all the militant proletariat, knowing at last that their activity has some value mly if combined with that of others of In fact the genera the same party. asvement of antional and internations smallsm, must be the result of these mutual actions of the individual and socialist groups, the conscience censure and criticism constituting the essential baracter of the movement. Everyon must act openly, and the reasons for he decision of the projetariat must b clearly alleged. This internal liberty is he life and strength of socialism. Only inder such conditions can the move nent manosuvre freely. When all ar equainted, and all discuss mutually and for the same reason, it is easy for veryone to find his proper place in the anks of the party.

In our opinion this is the only way o destroy the divisions which from ime to time disturb the French a ist movement. These misunderstand. ings arise from a tack of knowledge either of the aim or object under dis cussion. That there are numberless forms of socialist action we believe sesent state of Texas became part of and also that these different forms of action are connected and complete as Comrades August Kleukie and Jas. S. the economic and political activities Smith will represent Section Chicago the simplest and most common claim

He agrees with you; promises to do what he can for you And you knowing full well you don't want anyone to do anything for you without being paid for it, and also remembering that it cost Smith something to be elected, you leave with him enough to pay him for the trouble he is Centralization of the means of going to put himself to, in seeing that an extra large awning is permitted in front of your store. A check, not as a bribe. No! only to pay him for his tegument. This integument is burst trouble in seeing to it that you have asunder. The knell of capitalist pri-the awning. Nothing wrong in that is the awning. Nothing wrong in that, is there? He (Smith) spent time and money getting elected, and don't you forget, also, that about the time he ran for the place as alderman, he was of despair from the New York World, interviewed by the representatives of and see if the first part at least of this the Honest Voters' League. He promised them, over his signature in the daily papers, that he, Smith, as far as bank is:

1. Its position of sole administrator of the finances of that greatest, richest, boidest, most unscrupulous of monopological, most unscrupulous of monopological, most unscrupulous of monopological finances. lies, the Standard Oil trust.

2. Its position as the financial agent of the Morgan, the Vanderbilt, the financiary, the Coal trust and he. Smith, before taking office pledged misself, to look out for the interests of himself, to look out for the interests of himself, to look out for the interests of himself to look out for the interests of the Sugar trust.

2. Its correspondence relations with the most influential banks in the great centers of wealth and population, from San Francisco to Boston.

The power of the Standard Oil bank stituents: the City Railway Co.'s, the stituents: the City Railway Co.'s, the Gas Co.'s, the Telegraph Co.'s, etc., etc., 1. The vast sums of money deposited in the city. In the state legislature the men elected on the same plan represent a constituency there and look after elected to go there again are looking after the interests of their constituents in the way of tariff laws, subsidies, commercial treaties, rights of way grants, and numerous other laws to favor their class and the best interests of their class they represent there. And they, the Smiths, honestly and scrupulously look out for this class, of which they are representatives or members of. And that laws are passed to their best interests only, and that nothing detrimental to them shall pass and become a law. What's dishonest about that? Nothing! These are all honest men, never betraying their class interests. But, my friend, if you want it so that these privileges, grants, subsidies, make it impossible to sell them. It will be impossible to sell them only when the working class are aroused to a consciousness of their real class interesta Study socialism, vote for socialism, and usher in an era in which there will be no need of your kind of honest

Always remember that the main bu at been the expropriation of the la- wark of capitalism is the ignorance of copriation of the capitalist exploiting because they do not know the way out.

THE TRUST EXPLAINED.

The Outcome of Present Industrial Conditions What It Leads To.

What is the trust? The trust is the natural outcome of the evolution of ou industrial system. The simple handtool of former centuries was supplanted by the more complicated tool, this in turn by the machine, and even that machine, which was some years ago regarded as a wonder of productivity is rendered worthless by the modern improved machine. In the same way the individual artisan, who worked by himself with the then simple tool which he could own easily, was followed by the partnership of one or two in his shop. Then followed the partnership of two or more partnerships-the corporation, and finally the partnership of several corporations-the trust. And in not so distant a day, we will see the concentration going on still further, and the result will be a partnership of trusts. The trust is thus seen to be the highest form of collective development the tool can reach, under the system of private ownership of the machinery of reduction. "Once the tool has reached this stage, it stands transmuted into a social industrial power that emphasizes the changes which society has been undergoing since the privately owned tool first appeared, especially since the time when it entered upon its rapid development; it carries these changes further, and forces to the fore a new social problem." One of the problems that confronts

the nation already is how to furnish employment to those who have been made superfluous by this development of machinery and concentration of industries. The advocates of our present system assert that if men are displaced machinery in one industry they will find employment in another industry. and the wheels of production can be kept in motion by finding or developing new markets for the product. In the not be lost on the workers. first place, the finding of employment other industry is made almost imgarded as a new market for our product developes to morrow into an insides this, through the ever-increasing step to their emancipation. number of unemployed in the manufacturing establishments and absorption of commercial concentrations, the pur-

So the circle closes in an ever deshape itself that the common people be able, to become stockholders. That this is impossible, so long as the borers. private ownership in the means of production prevails, can be seen from the private ownership of the trust and the establishment of the concetive ownership of the means of production and distribution. In other words, by the socialist co-operative commonwealth. To that end the trust paves the way. Again, it has been asserted that socialism is impossible because the thousands of shops and factories could not be operated through a central manageth ment. If tried, how could the many to be in the interest of the class struggle total.

the trust problem in a human and peaceable way. This is the reason why I am a member of the Socialist Labor

"THE DUTY OF SOCIETY."

laying At "Socialism" With Stock Phrases and Meaningless Words for Pastime.

The Socialist Labor Party of the United States, in conservation assembled, reasserts the Indicable fights of all men to life, liberty and the purrent of happiness.

With the founders of the American regulable we hold that the purpose of government is to secure out to conceal their ignorance. They get hold of some stock phrase used by those who really feel and know of what they speak, and then think that the public who had then think that the public who not only listens to them is feeded, but as always invariably happens that part of the public which does not know but is governed rather by institute realizes the fact that no matter what they may say, their acts give evilusing the property of the public which does not know but is governed rather by institute realizes the fact that no matter what they may say, their acts give evilusing the property of the public way no conception of dence that they have no conception of Arain, though the presence of the interest of the estimates of publicance with the people in the social set in the property, people from their public ways and the abject dependence of the inquiries of nations upon that class.

Again, though the presence of a privileged class, the corruption of government and natural forces are thus wasted, that the platformacy identical the weaking with it alone produces, is desired the means of self-employment, and, by compalisory identical that the platformacy may rule.

Socialist Labor Party one more enters its protest. Once more it dence that they have no conception of the purport of the phrases they use.

Thus we meet a lot of middle class women talking of the duty of 'society" in taking cognizance of the condition of the working classs with a view to help. ing them.

Their conception of society is usually limited to the so-called "society" of the present day, that crowd of dressed-up olls who live in a doti's house, and who without an idea in their heads gabble persistently upon subjects which they lo not in the least understand, because they do not and cannot feel the importance of such subjects.

They think it sounds well to talk of improving the condition of the work-ing classs, but if the latter were to give evidence that they themselves were going to improve their condition in the only manner in which it can be improved, which is by persistently striving to unite their forces for the overthrow of the capitalist class, these same women would be found doing all in their power to encourage the tools of capitalism to suppress the efforts of

The Paris Commune gave a vivid'illustration of this and the lessens of that most important historic event will

From Milwankee,

It is lonesome being the only socialist over. The bearing of the foregoing on at your shop or in your block. If you want company spend a dollar for ten wrongs of political and revolutionary three months subscriptions to The Workers' Call and you will soon find that everybody is talking socialism.

Socialist Labor Party of the United States. SOCIALIST BOOKS Directory of Section

PLATFORM.

Science and investion are diverted from their humans purpose to the easiavement of women and children.

Against such a system the Socialist Labor Party ence more enters its protest. Once more it references its fundamental declaration that private property in the natural sources of production and in the instruments of abort is the solvious cause of all comming serviced and political dependence.

The time is fact coming when, in the natural course of social evolution, this system, through the destructive action of its infures and crises on the one hand and the constructive tendencies of its rusts and other capitalistic combinations on the other hand, shall have served out is away downlat.

We, herefore, call upon the wage workers of the United Settes, and upon all honest citizens, to organize under the banner of the Socialist Labor Party into a class-conscious body, awars of its rights and determined to emograte them by taking possession of the public powers, so that held together by an indomitable spirit of solidarity ander the most trying conditions of the present class struggles we may put a summary end to that burbarous struggles by the abolition of "Basses, the restoration of the land and of all the means of prediction, transportation and distribution to the people as a collective body, and the substitution of the Cooperative Commonwealth for the present state of plantess presention, industried wa rate assessi distorder; a commonwealth for the present state of plantess presention, industried wa rate assessi distorder; a commonwealth for the present state of plantess presention, industried wa rate assessi distorder; a commonwealth for the present state of plantess presentions.

Immediate Demands.

Figure 1 in mediate Demands.

With a view to immediate improvement so the condition of labor we present the following demands:

1. Reduction of the hours of labor in proportion to the progress of projection.

2. The United States shall obtain possession of the railroads, canals, telegraphs, telephones and all other means of public transportation and communication: the employee to operate the same co-operatively under the control of the Federal government and to elect their own superior officers, but no employee shall be discharged for political reasons.

3. The numbeliphities shall obtain possession of the local railroads, forries, water works, electric plants and all industries requiring municipal atmendations and to elect their own superior officers, but no employees shall be discharged for political reasons.

4. The public lands declared for political reasons.

5. The public lands declared in alimable. Revesation of all land grants to corporations or individuals, the conditions of which have not been complete with.

5. The United States to have the exclusive right to insect money.

6. Congressional legislation providing for the scientific management of ferests and waterways, and prolifiting the waste of the natural researches of the country.

7. Inventions to be free to all; the inventors to be returnerated by the nation.

8. Progressive income tax and tax on inheritances the smaller incomes to be exempt.

9. School education of all children under fourteen years of age to be compulsory, grantitions and accessable to all by inhibit assistance in mean ciothing books, sic. where necessary.

16. Repend of all peoper, unant, conservance of the color and the employment of fendals labor in eccupations degrinement and an employed by the public authorities (country, city, state and nation.)

12. Employment of the antemployed by the public authorities (country, city, state and nation.)

13. All wages to be paid in lawled monority. Abodition of the contract labor system.

14. Always for the protection of life and imb i

iaw.

And the people to have the right to propose laws and vote open amount compared importance, according to the referendum principle.

16. Abolition of the veto power of the executive (national, state and innuisipal) wherever it exists.

17. Abolition of the timbed States Senate and all upper legislative chambers.

18. Minicipal self-government.

19. Direct vote and secret babics in all elections. Universal and equal right of sufferage without regard to color, creed in sex. Election days to be legal holidays. The principle of proportional representation to be introduced.

20. All public offices to be subject to recall by their respective constituencies.

21. Uniform civil and commission law throughout the United States. Administration of instice to be free of charge. Abolition of capital paralelment.

Two Blacks Don't Make a White.

Don't they, my friend? Allow me to ask you whether you hold it to be a wrong, in other words, a "black" action, in affirming that he does. Is not, I would rather think it was. Then I supposing a morally black, a ruffianly sentleman of the read down and hold himself guiltless, justified, immaculate; oels the first, and presents a "white"

century which were all pretended But supposing, say I, another black Will tell you What Socialism Is; What It make a white" can we wish for than this?

already, and surely will do so still more in a short number of years.

Second—All expropriates the private owners by either buying up the larger establishments or driving the smaller ones, which it deems not worth having, into bankruptey, in that way getting fid of them without giving them an equivalent for their possessions.

In this way, long before socialism could be established, the ownership of all the means of production will reat through the trust, in the hands of a few comparatively individuals. These could easily be bough; out or otherwise could easily be bough; out or otherwise could easily be bough; out or otherwise off, through the rost of the poople, compelling millions of willing workers to become tramps of, through firelikest action of the poople, most assuredly, develop into an industrial oligarchy, destroying the democratic institutions of this country, and throwing the malion into a worse state of slavery than history ever has recorded, To avoid this the working class of this country must organize into a powerful political party, with as six who desires to work in country, and throwing the malion into a worse state of slavery than history ever has recorded, To avoid this the working class of this country must organize into the political party, with as its mightiform, the firm resolve to shouls in trust by abolishing private ownership in this means of production and to use the first ownership in the means of production and to use the first ownership in the means of production and to use their regar right at the ballot box to that and the problem in a hugan and the result of the country with a six of the propose of the sain. The myll only the working class of this country and throwing the mation into a worse state of slavery than history ever has recorded, To avoid this the working class of this country with as the political party, with as its manipulation of our fellow ways always the sain or reliably has a useril as plateform, and first the ballot box to the sain the propose of the sain. PRICE ONE CENT.

Female Domestics Surrender Their Jobs to Manly Competitors.

AN IGNOMINIOUS VICTORY.

Last Stand Against Socialism Behind s Barrier of Brooms, Dustpans, Pots and Kettles.

These practical "hardheaded" workingmen, so believed by their capitalist masters,, because of their rejection of socialist "dreams," are not yet driven to the last ditch. It may be that a propaganda amongst the kitchens and bedrooms of the employing classes will mark the final effort of socialist agitation. And all because "society" has "solved" the "domestic problem." While it cannot be said that an entirely new industry has been opened up in which workingmen can still, entrench themselves against the advances of social agitators, yet a comparatively old one, that of personal service promises to extend itself considerably in the near future. In our present capitalist society nothing is fixed and Continual improvements in methods of production mean a continuous change in the personnel of produc-ers, and often in this process contradictory phases work simultaneously, a phenomena which is inherent in our present society. For many years past women have been displacing men in industrial processes and particularly these in which the most improved machine is the main factor of production. On the other hand signs are not wanting that men are beginning to displace women in the household and domestic work, where machinery on the whole plays a minor part. Men have yielded up to women their place at the weavfig loom and other machine industries industries in which strength is not particularly required, and women in turn now surrender to men the empire of the dust pan and hand broom, over which they have so long reigned supreme. The requirements of capitalist society allow no sentimental objections on the ground of sex to intervene when cheapness and greater efficiency are to be attained. A perusal of the following extract from a daily paper will illustrate

Masculine usurpation of the offices of cook, second girl and laundress is again being advanced by exponents of household problems as the only solution of the much-vexed "domestic question"—this time practically instead of theoretically. Men have been found—and scores of them are now in service—who can make beds, cook, wash dishes and otherwise do general housework more reliably than the girls whom they supplanted. Employment agencies

ing themselves on the acquirement of their new domestic "treasures." Suppose these girls were to become plural who have ousted them from their places are those whose frenzied outcries about "sacradness of the home" drove the representative from Utah, unconstitutionally from his seat in Congress, and they would again make the welkin ring with their hypocritical protests. wives like their thousands of unfortunate sisters in all the great cities? What then? Well thenfew more "societies for the suppression of the social evil" will spring into exist-

Those who have listened to the cant of these society "women" which apnd magazines, anent the household being the proper sphere of woman and its duties well performed being the chief function of womanhood, etc., etc., will perhaps fail to understand why so principle and practice in this matter. The extract given below from the same article will explain, and the explanation holds good in every change in the personnel of the produc-

In families where masculins domes-tics have been tried they have not been found to want. This much is attested by the verdict of many: "He does the work of three girls, and he never has fainting spells, necessitating two weeks' vacation just when a houseful of guests are expected to spend a fortnight." Maybe they are thick-skinned, but William and James are not as easily affronted as their feminine predeces-

THE NEWEST WOMAN mand is addressed to the serving-maid. "Does the work of three girls," "never

has fainting spells," and isn't "thick skinned." These are accomplishments so much to be desired that no sentiment about "woman" and the "home" will be allowed to stand in the way. It "has great bearing on the case." It has. It represents the material interests of the employing class, who are always on the quest for cheaper, more efficient and more willing slaves. For this reason in the present case "the job seeks the man" and passes the woman by. If this tendency continues, and it is extremely probable that it will, the compflers of "prosperity" statistics can have an opportunity of proving that female labor is on the decrease, and that more men are being employed in industry.

When will the working class see that material interests rule the world and apply the knowledge to the furtherance of their own? How long will they listen to the intolerable humbug of those who talk so eloquently on the different spheres of activity proper to the different sexes, and fall to see that cheapness, not sex, is the basis upon which their masters use them? Will it be necessary to wait until capitalism? actually reverses the position of men and women of the working class is modern industry, before they see this truth? And will they even then accept the situation by saying as at present that things were always so and must remain so?

When the "commonsense" workingman who rejects the truths of socialism, is endowed with the housemaids' insigning of office, it is likely enough that such "common sense" will act as an impenetrable barrier against any idea of emancipation of the working class so far as he is concerned. But at the same time the female element is set free and it may be called upon to perform a part in the social revolution, which has been heretofore looked upon mainly as belonging to the other sex. It will be a sight for the gods to see the free and independent voters, after securing permission from the "mistress," thronging to the polling booths to emphasize their inalienable right to the use of such domestic tools of production as are to be found in the households of their capitalist masters. It may be, though after all that this sight will be spared us. There are a great number of socialists already in existence and "the world do move."

ONE THING WANTING. Class-consciousness Must Take the Form of Political Action to Be Effetive.

According to a local paper the conprinciples:

and of the militia are directed against them.

Arrayed against the power of capitalism and its millions stands the power of the laboring masses, self-reliant and conscious that they possess the power with which to overwhelm their antagonists. There is no power off earsh to resist the power of such a majority in regard to its rights; it will accomplish its rights and objects irresistibly. The right of nature is upon its side, the earth, together with all its wealth, belongs to mankind. The results and triumphs of civilization have been achieved through the course of thousands of years and with assistance of all nations. The organized workers will come to carry out into reality their principles and they will establish a condition of affairs under which every one will enjoy the fruits of his labor.

So far, so good. The question is, how

So far, so good. The question is, how will the organized workers carry out these principles? Can it be done in any other way than by using their political Are there not among the United Metal Workers some clearheaded socialists who can explain to their brothers of the union the next step to be taken? The ground is here prepared. Half the work is already done tion of principles and understand what it means are already class-conscious. What they do not yet realize is the power of the ballot. If they did not have the right to vote, how they would ower, as some of our comrades on the ontinent of Europe are now fighting for it. But having been given the righ to vote by the accident of birth and never having struggled for it, they right or have not known what use to make of it in their own interest. Men, class-consciousness. Add the ballot to these and you will soon be out of the wamps of starvation wages.

Marcus Hetch.

(Continued on page 4.)

THE THEORY OF "IF" NOTHING TO LEARN gree that it is impossible to distinguish the utterances of their "prominent citizens" from those of our own? People

How Contradictory Ideas Repose Clear Note of Dominant Interests Easily in One Brain.

So-called "Practical" People Blinded By Consideration of Their Individual Interests Alone.

Some of the most curious inconsisten. cies in reasoning may often be observed upon the part of those who are ready to admit that this is not the best of all possible systems. In speaking to necessarily exist between wage earners' subjective working class, with the rain large cities, we may frequently note that they sometimes denounce actions and tendencies existing among other people as the cause of the struggle for such as for instance, the following: If people would only stay in the country and not flock into the cities in such great numbers, we fellows here could two paragraphs) in the identical words get along better,", or "If men and that a socialist might use in taking a makes people discontented," etc., etc. All these objections beginning with "if," are in reality the same, being merely the expression of the so-called "individualism" of a society where ery man's hand is against his fellow and this reasoning is not at all con fined to the working classes, but is also to be found amongst those who do not identify themselves with that class. For example we heard a clergyman declare the other day, that the Centen ial Exhibition in 1876 wes responsible for giving the first impulse to rura discontent, by making the country vis itors dissatisfied with their surroundings, after seeing the great spectacle This according to him was a state of affairs that was quite avoidable "if" only the exhibition had not been held exhibition in question was primarily de-signed to excite such wants; that as the commodities exhibited were produced for profit, the very object of their exhi-bition was to find buyers, and attract the attention and stimulate the wants of those who otherwise would not have seen them, and so would have been contented to plod on in ignorance that stitution of the United Metal Workers such commodities existed. The capital. contains the following declaration of ist system of production for profit seemed all right to our reverend friend

> before he has been deprecating the very factors which made this population and wealth possible. More than this the speaker was more often than otherwise arrived in this city himself with exactly the same idea of bettering his condition, as those who at presen arrive with a similar purpose in view. Yet he sees no inconsistency in denouncing the same action in others that he has himself performed.

Another acquaintance of ours, finds in over-production a scape-goat upon which to lay the responsibility for the faults of modern society. This man is fairly intelligent and well above the average of skill in his trade (which requires some professional knowledge) and has what is known as a "steady But he has sense enough to see that the flood of young men which the universities are daily turning out, even better equipped than himself, may per- by cheaper Chinese laborers, will be as haps menace his position, and therefore "over-education" (for the other feldisapproval. He, of course cannot have enough education, and so far as he is oncerned it is a good thing for him, rifice their lives by the hundreds of but it is not at all a good thing for him that the other fellow shall have any. old saw "what is sauce for the g is sauce for the gander" doesn't enter

To make the contradiction in rea ing still more complete this man has a persistent habit of telling his unsuc-cessful acquaintances, that if they eare only to do the same as he does they would get along better, when that above all things is what he fours the

Sounded by Japan.

NO INQUIRY INTO CAUSES, HIGH CLASS POLITICAL CANT.

Developement of Capitalism Renders Missionaries Superfluous, and Makes Room for Socialism.

That material interests of the ruling of that country, has long been a trulsm amongst socialists. It is exceedingly workingmen who feel the pressure of interesting to compare the slowness of ists. fierce competition which must this truth in reaching the minds of the pidity of its perception amongst the ruling classes of those communities who have, so to speak only yesterday, inaugurated the era of modern capitalist existence of which they feel the strain, production in their midst. A Japanese official connected with the war office of his native land, expresses this truth almost (with the exception of the first two paragraphs) in the identical words women were content to live, dress and survey of the same question. Mr. K. eat as their fathers before them, they Hirata, the individual in question, in an could save more money," or "There is interview at Ottawa, Canada, gave his too much education now-a-days, which opinion, which we may reasonably suppose to be the opinion prevalent amongst the ruling classes in Japan, on the international situation, so far as Japan is concerned, in the following manner:

"Japan believes herself to have a high mission in Asia, and that England s in this her natural ally. To bring the ight of civilization to China is Japan's hope. It influences all her noblest and most periodic acceptances."

most patriotic sons.

"England, leader of the European naions in the work of human emancipaion, labous for the open door in China,
Russia, France, and Germany are seretly united in closing the door.

"The United States is working on the
same lines as Britain and Japan, and,
unfettered by European entanglements,
has already moved effectively for the
inten door, and what she has done nost patriotic sons

relically. Men have been found—and scores of them are now in service—who can make beeds, cook, wash dishes and otherwise do genera) housework more reliably than the girls whom they amplanted. Employment, agencies continue to receive calls for men capable of doing or assisting in housework. Advertisements for serving men are also of more frequent occurrence than hereforce.

This is the way that the "domestic problem" is to settled. Unfortunately for the stability of capitalist society a specified is always left over from these solutions, which in turn constitutes a "problem" in itself, It is stated that the "men are more reliable" as bed-makers, dishwashers and general household workers, than the girls they are left out of the calculation, while their former employers are busy congratuating themselves on the acquirement of the millions of the population and of the millions of the property.

The interest of the possessing class scenario and the productive possessing class and otherwise do general household workers having below to receive calls for men are more reliable" as bed-makers, dishwashers and general household workers, than the girls thought the productive power of capitalist noticity to the state that the "accrediness of the productive normal to the product of their labor only as much as a problem" in itself. It is stated that the "men are more reliable" as bed-makers, dishwashers and general household workers, than the girls they used the labor on the sculpting of the calculation, while their interest of the possessing class and the method taken to secure such the laborer such that the method taken to secure such the laborer such that the method taken to secure such the laborer of the shall that the method taken to secure such the laborer of the missing in the must maintain itself in existence or the must maintain itself in existence or hall the must maintain itself i the lessons of the dominance of class modity may be secured. Japan is the very latest arrival in the have always insisted that the laborer ties is here reproduced almost word for word. Commercial conquest in China which is the main object, comes out at first disguised as a "high mission" and its promoters are described as carrying "the light of civilization" into China. This is a "hope" which "influences" the "noblest and most patriotic" as there a political hypocrite in the Light of Great Britain that Child States or Great Britain that could do better than this? Mr. Hirata's

to where we may discern the "nigger in the wood pile." Russla German and France would close the "door," Great Britain and the United States de mand that it shall be left open.

Therefore Russia and France are th "natural enemies" of Japan, because their actions would injure the trade are also correct. First the recognition that Japan anticipates with China in the future.

Great Britain defeated in South Africa means that the economic rulers of Japan may be unable to fulfit their lutely necessary that one should wade "high mission" in China, therefore through scores of volumes on dry eco-"public opinion" in Japan is decidedly in favor of Great Britain.

The clever Japanese have already learned how to juggle with that "nose of wax" called "public opinion" tust as market place, the shop and the factory, shrewdly as their older competitors. It is possible that the workingmen

of Japan, who are now being displaced slow to see the economic foundation upon which their ruling classes depend for their power, as their fellow workingmen in other countries. It may be and probably will be that they will sacthousands to carry out the aims of their Christ was not one of the people but masters, just as the workingmen of other countries have done, and are now

But they will gradually see it, and also discover their own distinct class interests as workingmen. The growth by the growth of socialism. But what are our missionaries doing amongst such a people? In the matter of "civ llisation" what lack they yet? Why ies of modern Christianity, when they already possess its spirit to such a de-

that can prate so glibly about "high missions," "light of civilization," "hu man emancipation," "patriotism and enlightenment," don't need a tutor of any kind. They have mastered the whole gamut of capitalism, and they are going to be right there, when th exigencies of commercialism give the STAND AND FALL TOGETHER. signal that hell shall break loose

They know their own material inter ests, and those of the communities which run in the same lines as their own, and they know their enemies and the reason why they are so

Missionaries are of little value in mmunity where capitalism is so high ly developed. It is an impertinence to class in any country supply the start- send them there, where there is nothing ng point for every action upon the part to teach. Whatever missionaries Japan needs in the future she will breed her-

GOOD REASON GIVEN.

Words and Actions of Capitalists Emphasize the Class Struggle.

The J. V. Farwell company of this have, as is stated in the press, decided upon establishing a factory in some of the smaller adjacent towns. the chief reason given by one of the firm, being as follows:

Is it not strange that some people who persist in calling themselves socialists will still strenuously deny the existence of a class struggle, when has already moved effectively for the open door, and what she has done is regarded as an earnest of still more vigorous action in the time to cone.

"British defeat in South Africa means a France-Russian march through India; France and Russia are making every preparation for it.

"Russia and France are the natural enemies of Japan. Our people will never forget the injury inflicted on Japan at the close of the war between Japan and China until that shameful wrong is rectified, and it will never be rectified without war. In that war Great Britain's MATERIAL INTER. ESTs are inextricably involved. When the time comes to strike a blow at Russia, Japan will be found ready and waiting. The hour seems near."

This is certainly a rapid learning of the capitalist class? "Strikes, talks works but in the actions of members of the capitalist class? "Strikes, talks of strikes, etc., CONSTANTLY brought to the surface." What clearer recognition of the incessant hostility between the two classes could be given? It is no peace, and can be noffe, whilst this open and china until that shameful wrong is rectified without war. In that war Great Britain's MATERIAL INTER. ESTs are inextricably involved. When the time comes to strike a blow at Russia, Japan will be found ready and waiting. The hour seems near."

This is certainly a rapid learning of the capitalist class? "Strikes, talks works but in the actions of members of the words but in the actions of members of the words but in the actions of tentwords but in the actions of the words but in the actions of the two classes could be given? It is to the surface." What clearer recognition of the surface." Wh such struggle is evidenced not only in of the capitalist class? "Strikes, falks possession of wealth for consumption, is also anxious to secure more efficient This is certainly a rapid learning of labor power, and goes where such cominterests, when it is remembered that present mode of production, socialists is a commodity, and Mr. Farwell's ry cant of political capitalism which words again emphasize their correctness when he says:

could do better than this? Mr. Hirata's diplomatic training does credit to his teachers.

All this lofty sentiment leads us up to where we may discern the "nigger close to the country town. But I say again that the labor questions and unions caused us to stop and consider all these details."

Mr. Farwell's ideas on this matter are thoroughly correct. Like a wise buyer he tries to get the best possible commodity for his money, whether it labor power or a more improved maof the class struggle as the main incentive to this removal, and then the detail consequent on this, the securing of a better commodity. It is not absoidea of socialism. An observant man penings of life, on the street, on the a perpetual sermon on the truths of

Where He Belonged.

It is true that especially belongs to us, the German middle class, who, like his parents, have our struggles."

Always remember that the main butwark of capitalism is the ignorance of the workers. They are in darkness only Are you doing all you can to show them the path?

RENT AND INTEREST Private Ownership the Common

Basis of Both.

The Henry George Theory of Interest Contradicts the Conclusions of Its Author

Dear Mr. Single Taxer:

Let us suppose, as you say, that "in-terest is a subdivision of wages; that it is the reward of - ed up labor." That means that latcelving wages beyond its first payment. Now what is the bridge connecting wages of current exertion and wages of past exertion? It is clearly the device of legal ownership. If I labor producing perishable goods I shall if I am wise, exchange these perishable goods for imperishable goods. If I save up my labor in goods, I have not only the reward of my labor, but also have that wherewith my labor can keep on receiving a reward.

"While Benton Harbot has made us an offer we have not yet decided to accept," said J. Y. Farwell, Jr., today. Why do we want to locate outside of Chicago? There are a number of reamond, and the most important is the labor question. With our factory iocated in Chicago we would never be sure we would supply our trace. Each day we would have a strike hanging over our heads. If not a strike, talks of a strike, and employes cannot work when their minds are on thoughts of strikes, which are constantly being brought to the surface. In a smaller city we would escape alt of this, as we would be away from the labor center. This reason is enough for any manufacturer to seek the more harmonious small town."

The tie that binds together interest and wages is the device of legal ownership. The institution of private property is really the base on which one really is really the base on which one explication of goods gives the owner the right to exact payment for the use of those goods by anyone eise than the owner, to the producer of wealth, the enjoyment of the consumption of that wealth, than by making him sole owner city we would escape alt of this, as we would be away from the labor center. This reason is enough for any manufacturer to seek the more harmonious small town." The tie that binds together interest ing, until with the introduction of steam-driven machinery, whereby the means of production are enormously enlarged, the possession of capital, i. e., wealth used to produce more has become more important than the Interest is the fruit of capital, and

consequently the possessor of that capi-tal has power over his propertiless fel-low men which he otherwise would not have. You think that the freeing of the land would correct the great inequality

in opportunity which has arisen out of the private ownership of property, of which the ownership of land is only a part. In other words, by abolishing the private appropriation of ground rent, the private collection of interest will work no injustice.

I submit two questions on this: 1st. It was true once that private property did not include land. How did t come about then that the owners of property were gradually able to fortify proprietorship by making land also subject to private ownership?

2nd. If this was true when capital was of insignificant value, what is likely to be true when capital is of supreme importance for the production

The real economic struggle that is taking place today is not between the owners of land and the owners of capital, in other words between the takers of rent and the takers of interest. No! lat more firmly identified day by day. The real struggle is between the legal owntribution and exchange and the users of those means.

No, you cannot turn back the car of civilization half of its course and then expect it to start out on a new career of social justice. The old rut it made be more efficient (that is profit making) before will only hasten the repetition figure-If the institution of private property in the things produced by laprivate ownership of all the means of production, distribution and exchange, the experiment all over again and attempt to exempt merely land from the

Progress must be forward. The oncentration of power obtained by the linking together of capital and land needs not to be dissipated, but utilized for the common good. The common wnership of both land and capital is the next forward step. Both rent and by being commonly collected.

The idea of appropriating rent in hands is a thoroughly bourgeois con-ception and one in which proletarians have no concern. It is the revive the old quarrel that is played out, the quarrel between landlords and

Henry George explains interest as a process. The productiveness of nature in increasing the value of go lifles the taking of interest on goods not so directly subject to her ripe process. Because rivers carry logs to saw up logs and to grind wheat

The Socialist Vote. UNITED STATES.

IDEALISM AS A BASIS. That the time is now drawing close

when men must make their choice as to which side they shall stand upon in the coming social struggle, is being born out by many unmistakable symptoms that may be noted from day to day. It is becoming more difficult than ever to remain on the fence, Reformers at the present time are compelled to declare that their ideas are "socialistic" and many of them also pose as "so. cialists," recognizing in an imperfect manner that socialism is destined to become the leading issue in the future. But even this as a drawing card seems to show signs of exhaustion, as the attention of their hearers is being now given more and more as to what socialism really means. They are begin. ning to discard sentiment and idealism and are inquiring for some material basis for the movement, and in consequence the ground is even now narrowing under the feet of "reformers" with "socialistic" ideals, sentimentalists, and all those to whom the idea of a class struggle is hateful and repulsive. This perhaps will to some extent account for the disappearance of journals whose policy has been to recommend socialism from the sentimental side, who regard Edward Bellamy as the "greatest American socialist" and ad. vocate "step-at-a-time" methods, ignoring the material philosophy that have just received a copy of the "American Fablan" which announces in its columns its last issue, and attributes this to the fact that the economic pressure has been somewhat re-Heyed, and that people are now in a measures. All of which may be true enough, although we doubt that the eirculation amongst the working edly middle class people as may be gathered from the fact that the idea of a class struggle is not alluded to in its columns, Bellamy's beautiful pictures of future society serving as an ideal. An editorial in the Chicago Tribune refers to its decease as well as that of other papers of the same type, under the heading of "Killed by Prosperity." We are far from finding any satisfaction in the jeers of the capitalist press when any journal, professing to spread socialism, disappears from fiwancial failure, but the Fabian itself admits the truth of the Tribune's cantion. Why is it then that a paper whose subscribers are certainly able to support it financially, must suspend publication in this manner? Socialist papers which are kept alive by the nickels and dimes which workingmen can ill spare, do certainly fail now and then, but the cause of this is plain and palpable enough. Poverty is an excuse for such failure, that will be accepted by any reasonable man who understands the uphill struggle which the publication of a working class paper always involves, but such reason can hardly be put forward to explain the disappearance of such organs as the copy. Fabian the New Time, etc., etc. The in recognition of the distinct material interests of a class, leaves nothing but a basis of sentimentalism and idealism which the first partial wave of prosperity sweeps away. There will be no

desperate struggle on the part of its

aubscribers to still keep it alive, because

and this is the only foundation that socialism can build upon. And in this matter we know from experience of what we speak. We have seen in this struggle, workingmen, almost in the gan which they recognized as voicing their distinct class interests as workers. These men did not hold socialism merely as a theory, a beautiful ideal. attractive to all men alike, if only its beauties could be eloquently so, forth. Even though they knew that socialism meant the ultimate emancipation of mankind from the slavery imposed upon it by the present mode of production. It is the present mode of production actually say so, everything goes.

ful to consider the gymnastics that a "I am weary of your quarre's. Weary of your wars and bloodshed. Weary of yo it by the present mode of production, actually say so, everything goes. they recognized that its attainment could only be realized by an earnest atmiggle upon the part of those whose material interests were daily and hourly tion of industrial power in the hands of threatened by capitalism. They were men who understood that the wage slave class to which they belonged, for the increased surplus product which could never hope for more than a mere animal subsistence whilst those conditions remained, that they as workers were the producers of all wealth, and that it was directly to their interests to do all in their power to prepare their fellow workingmen for the change which would insure them the social value of their labor. Knowing well that they were in reality the only class which could be directly benefited by it. they recognized that this movement was a class struggle, and from this recognition came the unflinching determination which has been a feature in socialist agitation in all countries, as well as the United States. As this lass-consciousness grows, the difficulty of maintaining any intermediate position becomes increased and the oresen. tation of socialism from an idealistic basis becomes more and more impossible. As the struggle proceeds society divides itself ever more clearly into two hostile camps, and stragglers between both armies begin to find their position intolerable. Disagreeable and repulsive to some gentle souls, as the class struggle may be, it must and will be preached. Upon one side the wage worker's fighting bitterly for their

NOT "ADVOCATES OF UTOPIA."

emancipation, on the other the capital-

ist class determined to preserve their

material interests by maintaining the

present mode of production. There is

no middle ground. This is a conflict

between classes and "he that is not

with us is against ps."

In the issue of this paper of January 20th an article entitled "Advocates of Utopia" appeared, in which Samuel M. Jones of Toledo and Professor George D. Herren, were represented as being interested in the founding of an alleged "socialistic" colony in New Jersey, As both of these gentlemen have written underlies the socialist movement. We to this office a denial of any connection on their part with this scheme, and still further, state that they hold such enough to snap at it, will have their ideas to be Utopian and anti-social, we must in justice admit that an apology is due them. We regret being misled by an editorial in the capitalist press restate of contentment and resignation. garding this matter, and as The Work- ment ownership of public utilities has and therefore apathetic about reform ers' Call cannot afford to bear false witness against any individual, we must retract so much of the article as re-"Fabian" ever had any considerable lates to the connection of Messrs, Jones and Herron with the subject. While supporters were undoubt. We willingly admit that the gentlemen testing against the position in which the aforesaid article made them appear, we desire to point out to them, as well as our readers, that the main object for which the article was written was to explain the meaning of the attitude of the capitalist press regarding thes-Utopias, and not particularly to criticire the (supposed) unscientific position taken by Messrs. Jones and Herron. This however is not put forward as an excuse upon our part nor do we wish it to be so interpreted. Whatever amount of culpability may rest upon us in this matter we fully apologize for, but we venture to doubt that our capitalist contemporaries who gave birth to the falsehood will deal with equal frankness to those whom they have slandered. Mr. Jones letter of denial is published in another column as requested.

> William Liebknecht's famous pamph let-"NoCompromise, No Political Trad. ing," will shortly appear in English from the publishing house of Charles H. Kerr& Co., 56 Fifth avenue. This work should be widely read and circulated among the comrades throughout the country. No socialist should be without it. The price is 19 cents per

But when workingmen come to their senses they will be able to perceive the folly of supporting a system which results in stiffened limbs for themselves. and stiffened prices for their exploitera

The National Steel company has taken possession of the Etna Standard Iron and Steel works at Bridgeport, O., and the Bellaire Steel company's plant at Bellaire, in the same state. A full force of operatives will be put on in both plants but the office crews and traveling salesmen will become superfluous to some extent. Economy is the watchword in industrial development today, and those who suffer by it will have to join the ranks of those who are now being compelled to think for themseives. The exigencies of cheaper production mean a constant re-enforce- the dictum of current "morality" ment for socialism.

The Rocky Mountain News, of Dentorial column with a flag bearing the motto, "Government ownership of all public utilities." But in no part of the billity." paper is there anything that would even remotely indicate the motto on the flag flag and motto is a bait which carefully conceals the hook of middle class interpains and disappointment for their

There are many journals in this country that hang out a similar bait, but they are utterly meaningless. Governno significance to the working class unless it be interpreted as meaning the securing to that class of the full social value of their labor.

The farm owner for example may ernment, so that he may escape the exorbitant charges, and thereby fill his own pocket. But the same man would become indignant if his attention were alled to the fact that wheat is a public utility also. And yet everybody requires bread to eat, just the same.

In this city the frightful tragedies which capitalism brings to the surface every now and then, were again in evidence last week. A number of strikers at the work on the 39th street sewe were indicted for the murder of Roger O'Brien, a "scab" workman, and the day Edward O'Connor of the Metal Workers' union has been killed in a fight with one of the "scabs" work ing for Winslew Bros.

In this manner does capitalism set the workers one against the other in the struggle for bread, and the maintainance of a semblance of a reasonable wage. It is more than likely that both victims were unconscious of the causes which in the end resulted in their de struction. politicians is not going to enlighten his 'followers' on such matters, for in that case his "pull" would be endangered. But the socialists will continually pre sent to the working class that spirit which calls upon them to unite. .

The fact, which must be evident to all those who are not wilfully blind, that the possibilities and capacities of production, are more than sufficient to satisfy every reasonable want, makes these incidents not only barbarous but idiotic. That workingmen having one nterest in common, and suffering from the same oppression, should fight and ch other for a mere existence ware, and a life which is in reality

class-consciousness is not recognized. SNAP SHOTS BY THE WAYSIDE, nothing but slavery disguised under the forms of freedom, is sometimes dis heartening to the socialist who strives possible to unite the anti-trust and the on their part for their own interests to point out to them that united action would render such wretched scenes impossible. But such work must be done. and in the end the desired result attained. With the almost unlimited canacity of the human race for production, there is no ground for such actions except ignorance. Well may we exclaim with Longfellow in the "Song ing passages being appended. This lit-

results from greater perfection in the an illustration of their theory. In that political power, knowing well that this

An Englishman named Lord Shelfinding a new market for the surplus bourne has just given a lesson to some patriots who wanted to perfect their shooting ability in England before try-The present cold saup is a good thing ing it on the Boers. These volunteers, for the ceal dealers. The zero weather who were anticipating being sent to South Africa to help out of ill-clad and fil-sheltered working capitalist masters, requested Shelbourne for the use of some of his land Now that the mild weather has given for a rifle range. They were bluntly reway to the zero brand, the distress fused, and furthermore informed that which is chronic under capitalism if they wanted a rifle range they would

> From which may be reasonably inferred that Sheibourne hasn't got any South African stocks and shares in his possession, and doesn't consider his ma terial interests endangered by the situation in South Africa. The gratuitous information which he gave the volunteers, is on the whole quite correct. If they get on the rifle range in South Africa they will proably have to pay for it with their hides. The capitalist class lose nothing in any case, while fighting fools are plentiful.

So Roberts has been found unworthy to sit in the congress. His presence might contaminate the morals of his chaste fellow representatives, and therefore his exclusion was a necessity, Mr. Roberts doesn't yet understand garding the number of wives which is permissible. Had he been as wel versed in this matter as his modes ver, Col., ornaments the head of its ediwife and hid the others, and so have kept within the bounds of 'respecta

When the "sanctity of marriage" had which it claims as its platform. That been vindicated by this just decision, it would have been an inspiring sight to witness a number of our legislator ests, and workingmen who are silly rushing over to the Treasury and other offices, to tell their lady friends (who owe their position to "influence" Breckinridge) how the stern justice of an enraged community had dealt with the offender who had shocked society not by having, but by acknowledging three wives.

What a remarkable comment upor the "dignity of labor" it must be to know that Gompers and other labor leaders go begging to McKinley that an eight hour law for government work champlen the idea that railroads, tele- be established, for prohibition of convict labor, etc., etc. Men asking as a favor, from those whose power rests upon their lack of intelligence, that their burdens be eased a little. No hint to the workers of their own strength but an inculcation of beggarly deupon their exploiters. Yet many of these fellows are "good social." ists" according to their own accounts.

> It is reported that a "private understanding between gentlemen" has re sulted in trustifying the way of salvation. The Bible has at last fallen into the clutches of the "octopus." content with cornering the "bread that perisheth" the monster is already preparing to levy toll on all who endeavor to travel in the "straight and narrow Laying up treasures in heaven way. is no doubt a good investment, but as the trust owners have first to be consulted on the matter, it is reasonable to expect that they will take a grab at the deposit before it gets through.

If in consequence of this "salvation" is made more difficult of attainment by the working class, it would be goo policy upon their part to cease chasing keeps on the right side of the capitalist after matters belonging to an alleged other world, and endeavor to obtain salvation" in this one, by recognizing their interests as a class, and expressng such recognition at the ballot box. The other "salvation" can well afford to wait until this is accomplished. Looks as if it will have to in any case

BOOK REVIEWS.

MORALS AND SOCIALISM. By Chas H. Kerr, Pocket Library of Socialism; price 10 cents.

In calling the attention of our readers the latest addition to this. the Pocket Library of Socialism, we cannot do better than let the author speak for himself in his tle work should prove of great value to those who wish to understand the connection between the morals of any particular epoch and the mode of production then prevailing, and will clearly demonstrate that the latter is the basic factor in determining all other phases of human progress.

Unity can only be attained by understanding your distinct and common interest as members of a disinherited and plundered class. Study socialism for the students of the same to originally and space present problems in a practical way. No claim is made to originally and space present problems in a practical way. No claim is made to originally and space present proofs of the various statements made. For the facts relating to the early development of society from communism to slavery the reader is referred to Prot. Achille to turn their attention to Germany as an illustration of their theory. In that country, according to recent cable-grams, the Kaiser has given orders for the discharge of all socialists at prestent employed on the government owned railroads of Germany. If this is a "step," it must have been made with a peg-leg. German socialists are not to be fooled on this question: they are pressing onward to the capture of the political power, knowing well that this the concluding pages under the fittle.

The concluding pages under the fittle of those who with those who that part of the students of the students of those who takes who can the students of the studen

Within the last twenty-five years the general acceptance of the evolution theory has weakened the popular faith in heaven and hell, and the shrewder minds of the capitalist class long ago perceived that some more efficient means must be employed to keep the workers in subjection. With their usual test and promotores they redoubled means must be employed. With their us-workers in subjection. With their us-ial tact and promptness they redoubled their activity in molding for their own objects one of the strongest of all forces objects one of the stro --PUBLIC OPINION.

Here let us stop and try, in the light of what we have gone over, to get at the real meaning of the words "moral" and "right." The dictionaries will not help us. They define "moral" and "right," "right" as "moral," and both of them as "according to the will of God." Now I believe that the more we examine the facts the more fully we shall be convinced of the truth of the following definition:

In any state of society the commonly accepted idea of moral or right conduct is such conduct as tends to increase the happiness and well-being of the RULING class.

Now let us take the United States in the closing years of nineteenth century. The ruling class consists of the owners of the most wonderful wealth-producing machinery the world has ever seen. The subject class consists of the people who operate this machinery without owning it, and who receive for their labor a small fraction of the without owning it, and who receive for their labor a small fraction of the wealth which they produce. Here and now a good member of the ruling class is one who refrains from any unusually oppressive acts against his workmen that would incite them to revoit, and who gives his surplus wealth freely to charitable societies that keep the distress caused by the wage system from becoming dangerously acute, and to educational institutions that teach the righteousness of capitalism. A bad capitalist is one who foolishly treats his laborers in a way to make them rebel, or who makes a vulgar display of his wealth such as might excite dishis wealth such as might excite dis-content among those who would like to do the same thing, but cannot.

A good workingman in America today A good workingman in America today is one who puts the most intense energy into his work for his employer's benefit, refrains from the use of beverages that make his labor less efficient, begets and cares for enough children to keep up the supply of future laborers, but not enough to make part of their maintenance fall on the taxpayers, and, last, but not least, always votes for the political party of his employer. A had workingman is one who shows any marked interest in higher wages or shorter hours; a "walking delegate," who alms to unite his fellows in a demand for better conditions, is only another name for a dangerous criminal:

the capitalist system, is, in the eyes of our ruling class and their dupes, a vil-opticast, the only for the gallows or the Garling are

Gating gun.

The means employed by the capitalists to impose false moral ideals on the people are the same in all countries—the church, the sehools, the personal induces of capitalists and their professional hirelings, and especially books and newspapers. But in America they have the immense advantage of a peopular prejudice based on what a hundred years ago was a fact—a prejudice to the effect that in America, unlike Europe, there are no social classes, but that the poorest boy has an equal chance with the richest. The absurdity of this prejudice and the stupidity or bad faith of those who try to keep it

of society from communism to slavery;

the reader is referred to Prof. Achilles, the reader is referred to Prof. Achilles, the control of the classes in the United States are taken from the Socialist Almanac, for 1898. The subject of sexual morally has been omitted from the condition of the classes in the United States are taken from the Socialist Almanac, for 1898. The subject of sexual morally has been omitted from the condition of the classes in state of the classes in the United States are taken from the Socialist Almanac, for 1898. The subject of sexual morally included the condition of the classes of the socialism of the sexual moral place of the classes of the socialism and personal condition of the sexual moral placements on people or setting. The orthodox Catholic has a ready answer and the sexual properties of the sexual moral place of the condition of t

felt, the process of capitalist development absolutely forcing it upon the minds of men. It is perhaps a disagreeable medicine to idealists and "experimenters" but nevertheless it must be accepted:

You have done wisely in opening the You have done wisely in opening the columns of your paper to a discussion of the fundamental doctrine of the class struggle, and its place in our so-cialist propaganda. It was not very long ago that I held identically the same views as the Coming Nation on this subject, yet today the idea of the class struggle seems to me the basic idea of socialism. What was it that caused this great change in my mind, and is daily causing change in the minds of hundreds of other socialists? and is daily causing change in the minds of hundreds of other socialists. It was simply this: that I came to see It was simply this: that I came to see the impregnable truth, so persistantly preached by Marx, that the evolution of society is shaped, not by individual ideals or appeals to sentiment, but by economic interest.

We may advocate socialism from now till doomsday to the majority of the wealthy classes, yet we shall make no perceptible impression upon them because socialism attacks their ill-gotten property.

on the other hand, the poor man propertiless—the proletarian— is recep-tive to socialist doctrines because it will

lift him from the slough of poverty.

The impregnable strength of focialism lies in the fact that the ever-growism lies in the fact that the ever-grow-ing working class has both an economic and an ethical motive in striving to realize the Co-operative Common-wealth.

When ethics and economics, idealism and self-interest, unite to produce a desired result, the combined force is irresistible.

The industrial evolution of our age is marshalling the men of the world is

The industrial evolution of our age is marshaling the men of the world in two great classes—the capitalist class and the wage earning class. The capitalist class ever tends to grow smaller and smaller, the working class greater and greater. Between these two classes, with interests diametrically opposed, there is and there will be unceasing struggle. The capitalist class however moral its individual members may chance to be, is yet, from notives of self-preservation, literally compelled to oppose every step of the working class toward liberty and socialism. The working class, on the other hand, suffering from brutal exploitation on the one hand, inspired by magnificen moral ideals on the other, is ever ever sourred on toward its final goaithe collective ownership of all the means of production and distribution. New York, Jan. 16, 1999.

You have never bad is marshaling the men of the

Thus the idea of col- has trebled in five years. ective ownership will, notwithstanding their conservatism, be brought to their

> The second item which was deliber ated upon was the establishing of cooperative societies, the so-called "socialist islands" in the farming districts. The socialist co-operative society at Brussels, "Maison de People," for instance, numbers 12,000 families, who regularly take their house supplies from the warehouses of that society. There are great masses of agricultural products, such as eggs, bacon, hams, potatoes, vegetables, etc., consumed by this society. Well then! The socialist farmers who live dispersed in the reactionary provinces of Luxenburg, Flanders, etc., establish among themselves an office for sale and purchase of their products. Individual socialists as well as the socialist co-operative socleties will give their preference to th products of the party members, thus making them independent in and from their surroundings. The field of their agitative activity will thus be enlarged and, they gain an influence upon farmers and country workers. The "socialist islands" enlarge themselves, new points of support will be created, and when in two or thee years, new reports of great progress of socialism among the agricultural population will reach us, it will be in no small degree due to life be crushed and dwarfed and life be crushed and dwarfed and life. For each individual already at life. which has been undoubtedly preparing the victory of socialism among farmers. Upon the suggestion of the Central Committee the trade commis sion, has summoned an extraordinary trade union congress. It will be very useful to know in what practical the deliberations were prepared. The commission is composed of the delegates of all the different trades. Its office is to select the most urgent quest tions and to prepare them. It has drawn into the work specialists well versed in the different trades that are to be deliberated upon at the congress, and secured all the necessary material Thus every delegate was obliged to present all the material before his particular group, so that all the branch organizations have shared in the investi. gations and studies of the different questions. After all this the commission has again taken this under dis-The results of 4t, in the form cussion. of resolutions and proposals were set before the congress. To demand a human existence, instead tion of socialism to science, and the of that of a beast of burden." merit of Karl Marx' work, Professor ian theory is not only not contradictory as some people think to socialism but tion," he demonstrates that socialism Let us follow his reasoning more closely:

In the first chapter of the first book (Virchow and Haeckel on the Political Significance of Darwinism) Professor was 25,000, which means that this vote | Perri tells us how the contention of the relation of Darwinism to socialism originated. In the year 1877 at the congress of German naturalists at Munich, after an apology for the Darwinian theory by the well-known blologist Haeckel, Professor Virchow made a speech which culminated in the sentence "Darwinism leads directly to socialism."

> The two German Darwinists Haeckel and Oscar Schmidt, eagerly protested with the reigning religious philosophical and biological opinion, might be proclaimed as heretical in the politicocial field.

> Haeckel especially in his polemic dissertation "Freedom of Science and Teaching," tried to prove that no teachings are more contradictory to social-ism than the theories of the "descent of man," "struggle for life, "natural-selection." Socialism preaches

OUR DAILY BREAG.

War On the Small Baker in Rochester N. Y., By Concentrated Capital in Baking Industry.

In the rapid development of combina. tions supplanting individualism in proaction for supremacy in the industrial field, a war in the bread industry has just broken out in this city from which small manufacturer begins to see his doom as a factor, and which oncoming the grounded socialist has long

As briefly stated by one who has been employed in the baking industry for seventeen years, the culmination of the present struggle commenced the latter part of July in Deininnger Bros.' factory, the largest establishment in the city. A demand was made by the union workmen for an increase of wages, shorter hours, and the union label to be placed on the bread. The increase of By Rev. C. H. Vail. placed on the bread. The increase of wages and shorter hours were granted, but the placing of the union label was but the placing of the union label was refused by the firm, consequently a Kautsky—The Proletariat. Kautsky—The Collabs. boycott was placed on Deininger Bros.' Kautsky—The Class Struggle. Kautsky—The Co-operative Common-

At once all the small manufacturers joined the union, placing the union la-bels on their bread. This involved the cut in the price of bread from four cents to threee, the wholesale price adopted by the National Baking Co., and Deininger Bros., although Deininger Bros.' factory is not in the trust.

About this time the plant of the National Baking Co, was burned down necessitating their bread supply to be shipped from Buffalo and placing them disadvantage in bucking the combination of small manufacturers who had joined the union, However, the National Baking Co. and Deininger Bros. wholesaled their bread for three cents per loaf, all members of the union being pledged to uphold the retail price of the union manufacturers' bread at five cents per loaf as against four cents for

In the meanwhile the National Baking Co. was rebuilding its plant on a larger scale, having four large, modern, tile ovens completed about six weeks During this time, about four months, the grocers were making two cents profit on each loaf of the National Baking Co. and Delninger Bros,' bread, sixty-five per cent profit on a dollar.

But lo and behold, in the twinkle of an eye, these sixty-five per cent profit mongers unsheath the sword of antagonism at their competitor's throat, these books go as second class outside at one, two, three, four and five cents per loaf, and at the first stroke in the all be pre-paid at third class rates. conflict the union combination of the small manufacturer goes to pieces. like a rotten sail in a hurricane.

The small manufacturer begins to realize for the first time that the war which the capitalist newspapers have been trying hard to attract their at tention and interest them in, is not far off in Africa or the Philippine Islands, but right here on their own dung hill, That war of conflicting material interests which will never cease so long as the tools of production and distribution are the private property of the

The plan as outlined by the trust, is

local millers will be seriously affected,

the small manufacturers have suddenly a faint realization of what the class from New York: struggle really means. For they are the capitalist class which owns eightythree per cent of the national wealth and centrols the political powers.

The wall that comes from the small manufacturers is a loud one for sympathy and help from the working class to save them from being slaughtered by the trust combination

This manifestation indicates a conbetween them and the wage slaves is not far off, when they will be forced en into the wage ranks to sell the only commodity which they possess namely: their labor power in competiagainst labor-saving machinery, and the millions of hungry, supplanted wage slaves who are not needed in pro. duction in our present industrial system of capitalism.

reached where the fleeced will join hands in the class struggle, and through their political solidarity overthrow th common enemy, capitalism, capture the political powers, and upon the basis of justice establish the "Co-operative justice establish Commonwealth."

DOOM OF "PROSPERITY."

Triumph of Bryan and "Humanity" Is Forcasted by the Oracle of the Pigs' Tails.

Let the adherents of 18 to 1 take heart once more. The eause of "humanity" is not yet lost. Its eloquent champion of four years ago shall yet occupy the presidential chair-please the pigs. In to place bread on the market at cost the mighty metropolis of Manumuskin, of production, which will give the small N. J., the oracle has at length spoken, manufacturer the first object lesson in and the interpretation thereof will socialism goods made for use instead of carry terror and despair into the ranks of the gold bugs and pluteerats, while With the downfall of the small manu- the friends of humanity and its chamfacturer in the baking industry, the pion, inspired by the infallible tokens of victory, shall again gird up their as they supply the small bakers with loins and go forth to do battle for the flour and usually hold mortgages covering about all their earthly possess- fied on a crown of gold or a cross of ons.
This muddled predicament into which the small manufacturers have suddenly imperialism, the gold standard and the been thrown may probably give them trusts, in the following wonderful "tail"

struggle really means. For they are the class that are to be cleaned out of the bread making business, as a factor not longer needed by the class on top, the capitalist class which owns eighty, the capitalist class which owns eighty. The subject is Josiah F. Emerson, a farmer. He voted for McKinley in 1896, but a litter of young pigs has turned him around. Their tails curled into the Initials W. J. B. There were seven pigs in the litter. One was named "McKinley." It died. Then three others died and the remaining three were weaklings until their tails curled in representation of the Nebraska man's initials. Farmer Emerson says this is a sign that Bryan surely will be the next president.

There can be no possible doubt of the truth of the above revelation. It will Max Faller, 68 N. Clark St. not do to say like them of old time "Can any good thing come out of Man-umuskin?" Has not our fearless and Quiney—Al. S. Buttery, SN Broadway, truthful press which is "the polladium Rock Island—F. Singleman, 1016 5th Ave. 'Can any good thing come out of Mantruthful press which is "the palladium of our liberties" set its seal upon this of our liberties" set its seal upon this revelation in spreading the good news by "special" telegram? As the fate of Belshazzar of old was foretold by the handwriting on the wall, so our modern "money kings" may read their destiny in the curis and crooks of the tails of Farmer Emerson's pigs.

Atlanta, Ga.—S. M. White, 439 E. Fair St. Brocklyn, N. Y.—S. Berlin, 244 Penn. St. Chelzes, Mass.—A. I. Winneck, 53 Suffolk Davenport, Iowa.—S. Pakns, 404 W. St. Granitville, Y.—Timothy Ives, Jr. Malden, Mass.—C. Claos, I Lombard St. Minnespolls, Minn.—C. Raberye, The Wess. N. London, Conn.—Adam Marx. Box 412. New Orleans, Ia.—W. Kern, 2685. N. Rampe Fair delphila, Pa.—Chas Drees, 1816 S. 18th. Farmer Emerson's pigs.

It is rather strange that the conversion of the farmer should be referred to as "singular." It would be stranger still if his political beliefs remained unchanged by, this wonderful portent San Francisco, Cal -G. R. Benham, 117 Turk The message of the pigs' talls should certainly carry conviction even where "Coin's Financial School" might fall. Why not utilize these prophetic pigs in the next presidential campaign? Let the most vigorous advocates of free sliver be accompained by one of these wonderful animals, and conversions a la Emerson will roll up by millions. There is no good reason why the dim

museum idea should not be used in poli. tics. There are multitudes of people whose political convictions are mostly in a nebulous state, and who are al ways looking for some new thing. If Emerson's pigs can aid the cause of 'humanity" by capturing these floaters, they should be made use of immediately. It is said that geese once saved the capital at Rome, and it is not beyend the bounds of bellet that the

Socialist Labor Party of the United States. SOCIALIST BOOKS Directory of Section

PLATFORM.

The Socialist Labor Party of the United States, in convention assembled, re-asserts the inalienable rights of all men to life, liberty and the pursuit of happiness.

With the founders of the American republic we hold that the purpose of government is to secure every citizen in the enjoyment of this right; but in the light of our social conditions we hold further more, that no such right can be exercised under a system of sconomic inequality, essentially destract three of life, of liberty and of happiness.

With the founders of this republic we hold that the true theory of politics is that the smachinery of government must be owned and controlled by the whole people; but in the light of our industrial deviapment we hold, furthermore, that the true theory of committee is that the smachinery of production must likewise belong to the people in common.

To the obvious fact that our desporie system of eccentmics is the direct opposite of our democratic system of politics can planny be traced the existence of a privileged class, the corruption of government by that class, the alternation of public property, public franchises and public functions to that class, and intrough the percentage of the mightless of mathematics and public functions to that class, and intrough the percentage of the mightless of mathematics and public functions to that class, and intrough the percentage of the mightless of mathematical platformary, labor is robbed of the walls which it alone preduces, a desired the means of sect-employment, and, by compalsory idlenses in the state of the property of platformary and, by compalsory idlenses in the state of the property of the scale of the property of the platformary and their concomitant crifts, are perpetuated, that the people may be kept in bondage.

Science and invention are diverted from their humane purpose to the anslavement of women and children.

Against such a system the Sociallat Labor Party once more enters its protest. Once more it

7. Wage-Labor and Capital. By Carl

septe in bondage.

Science and invention are diverted from their humane purpose to the enalayement of women and children.

Against such a system the Socialist Labor Party once more enters its protest. Once more it reflectates its fundamental declaration that private property in the natural sources of production and in the instruments of labor is the obvious cause of all economic servicude and political depositions.

The time is fast coming when, in the natural course of social evolution, this system through the destructive action of fis failures and crises on the one hand, and the constructive indencies of its trusts and other capitalistic combinations on the other hand, shall have worked out its own downfall. We, therefore, call upon the wage workers of the United States, and upon a honest citizens to organize under the banner of the Socialist Labor Party into a class-conscious body, sware of its rights and determined to conquer them by taking possession of the public powers, so that, hold together by an indomitable spirit of solidarity under the most trying conditions of the present class struggle, we may put a summary end to that harbarous struggle by he abolition of classes the restoration of the land and of all the means of production, transportation and distribution to the people as a collective body, and the substitution of the Co-speciality frommanwealth for the present state of plantess production, industrial war and social disorder; a commonwealth in which every worker shall have the free exercise and full benefit of his faculties multiplied by all the modern factors of civilization.

Immediate Demands.

With a view to immediate improvement in the condition of labor we present the following demands:

1. Heduretion of the hours of labor in proportion to the progress of production.

2. The United States shall obtain possession of the Failroads, canals, telegraphs, telephones and all other means of public transportation and communication; the employes to operate the same co-operatively under the control of the Federal government and to elect their own superior officers, but no employee shall be discharged for political reasons.

3. The municipalities shall obtain possession of the local railroads, ferries, water works, electric plants and all industries requiring municipal franchises: the employees to operate the same co-opratively under the control of the municipalities and ministration and to elect their own superior officers, but no employees shall be discharged for political reasons.

4. The public hands declared indicable. Revocation of all land grants to corporations or individuals, the conditions of which have not been compled with.

5. The United States to have the exchained with.

6. Congressional legislation providing for the scientific management of forests and waterways, and prohibiting the waste of the natural resources of the country.

7. Inventions to be free to all, the inventors to be remanerated by the pation.

8. Pragressive isonems tax and tax on inferitances; the smaller incomes to be exempt.

9. School education of all children under fourteen years of age to be compulsory, grautions and accessible to all by public assistance in means cothing books; etc., where necessary.

10. Repeal of all pauper, tramp, conspiracy and samptoury laws. Unabridged right of combination.

11. Prohibition of the employment of the public and horizing country city, state and nation).

12. Employment of the unemployed by the public authorities (country, city, state and nation).

13. Laws for the procession of life and limb in all occupations, and an efficient employer's liability law.

14. Laws for the procession of

15. The people to have the right to propose laws and vote upon all measures of importance, ording to the referendum principle.

according to the referendum principle.

16. Abrition of the veto power of the executive (national, state and all ministry) wherever it exists.

17. Abrition of the Vatice States Senate and all upper legislative chambers.

18. Municipal self-government.

19. Direct vote and secret ballots in all elections. Universal and equal right of sufferage without regard to color, creed, or sex. Election days to be legal holidays. The principle of proportional representation to be introduced.

20. All public efficient to be subject to recall by their respective constituencies.

21. Uniform civil and criminal law throughout the United States. Administration of justice to be free of charge. Abolition of capital punishment.

safety of our "institutions", may be as sured by a judicious use of pigs. No doubt there will always remain a con fingent of incredulous, impracticable No books other than those upon this scoffers like the socialists, who through list can be sent as premiums. No printimes will be MAILED in Chicago. The reason for this is that many of these books go as second class outside the count just now—their day is not yet these books go as second class outside the count just now—their day is not yet come. "Humanity" will most probably and down goes the retail price of bread of Chicago and so can be sent at pound triumph, unless the advocates of "prosrates. Inside the city limits they must perity" are prepared to furnish a still greater wonder to offset these ominou igns at Manumuskin, N. J. Their only subscriber through until the municipal salvation lies now in employing the campaigns and now is the time to begin same truthful correspondent who dis-

The following clipping from a capi talist paper regarding the convention in Rechester may be of interest to our comrades and fellow workers. The capitals are ours:

Kinley

Rochester, N. Y., Jan. 27.—A national convention of Socialist Labor party representatives is in session here. Sixty-one delegates from various parts of the United States are present. Temporary organization was effected by the election of Frank A. Sliverman of this city as chairman and Richard Kitchelt of Buffalo as secretary. The conventions will last about as week. THIS IS NOT THE BRANCH OF THE SOCIALIST EAROR PARTY WHICH WAS RECOGNIZED BY THE SUPREME COURT.

MESSAGE OF S. D. P.

Socialist Labor party, in convention assembled:

Comrades:—The National Executive Board of the Social-Democratic party sends fraternal greetings. The Board has learned of the divisions which have arisen within the ranks of the Socialist Labor party, and recognizing the desirability of concerted action of all class-conscious socialists in this country, hereby extends a hearty invitation to your convention, as well as to as members of your party, to join the Social-Democratic party in the struggle to emancipate humanity from class rule and the slavery of capitalism by the establishment of the Co-operative Commonwealth. With an earnest desire for the success of the cause, we remain fraternally yours.

Jesse Cox.

to draft a reply. THE TRADE UNION QUESTION.

The Committee on Resolutions pre sented the following resolution on the trade union policy of the party:

bor party, in national convention assembled, fully recognizing that the exploitation of labor will cease only when,
society takes possession of the means
of production, nevertheless declare it
the duty of all socialists to participate
in all struggles of organized labor to
improve its conditions under the present system;

Resolved, That we hereby recall any
and all previous resolutions expressing
preference for one body of organized labor over another;

Resolved, That we reaffirm the resolution of the Socialist Labor party
adopted in 1893 and re-adopted in 1896,
recommending to all members of the
party to join the organizations of the
trades to which they respectively be-

trades to which they respectively be

In the discussion of this resolution

Delegate Stone read a paper prepared by him, covering the relations between the political movement of the working in a proper socialist spirit on a proper class and the trade unions in America. lished in The People, Comrade Stone emphasized the importance of the trade into the relations of the S. L. P. to the trade unions during the last ten years. ists in the A. F. of L., beginning in 1890, showing how the socialist vote can maintain a separate existence, it is steadily increased until 1804. He then re lewed De Leon's career in the K. of Le, which ended in his withdrawat from that body and the organization of the S. T. & L. A. Amid expressions of profound surprise, he revealed the ma- We have not invited a comparison of chinations of the overthrown bosses and showed how the Alflance scheme was sprung upon the party in a night party press and even without any notice in The People that it was to be started. He recalled to the minds of the delegates the events of the last napointed out under what false pretenses the endorsement of the Alliance was

relation to the old trade unions. Then he gave his reasons for thinking that

an organization like the Alliance could not succeed, even if it had better leaders. He pointed out the new tendencles in the trade union movement of Amrica today which are favorable for socialist work. After quoting from Karl Marx and the proceedings of the ast International Congress, he concluded with an appeal to all socialists to do their duty as workingmen and

socialists in the trude unions, and to Capitalist Reviewers of Socialist Works help the working class of America to hasten the day of its emancipation by combining the economic and political movements into one harmonious whole The paper was listened to with the losest attention throughout, and was

greeted with hearty applause. The convention then adjourned at 1 p. m. No afternoon session was held

SOCIALIST UNITY.

In the afternoon session the question of the relations of the S. L. P. to other socialist forces was taken up. The discussion was opened by Delegate Hillquit of New, York, as chairman of the Committee on Resolutions, who said in effects

"Before submitting to you the resolution on the question of socialist unity permit me to lay before you the considerations which animated your committee in drafting the same.

"When the Socialist Labor party had on July 10, disavowed the odious tacmitee on Resolution, with instructions ties and narrow policy of the forme party administrattion, and repudiated the shameful practice of sowing discord within the ranks of the labor movement the cry of union of all true socialis, elements in the United States was raised spontaneously, by the m of the S. L. P. and the S. D. P. alike It at once became evident that a com plete amalgamation of both parties had become a matter of necessity, in order to lend to the socialist propaganda the character of harmony so essential for its success, in order to awaken the enthuslasm of the great number of our sympathizers who have held back from active work on account of the dissensions in our ranks, and in order to presenting two or perhaps three socialist

"The Socialist Labor party has adhered to these views ever since, and now proclaims them with as much candor and conviction as ever. The rank and file of the Social-Democratic party, I am confident, also continue to adhere to these views. But unfortunately some adopted a very discouraging and rathe unwarranted tone in the discussion of the assumption that our party is in a state of anarchy, without a name, or ganization or cohesion. They apparently believe we will be forced to apply to them individually or collectively for sition to conduct negotiations for union as two self-respecting parties, find petty pretexts for discord, and invite our better elements to join them to. union in our tactics, and went fully dividually. How woefully mistaken our friends are in their estimate of our party, this splendld convention, if noth. ing else shows you

"If any one of three socialist parties ours. In point of membership training number of party organs, and other fac party, ours is, without exaggeration superior to the other parties combined. strength, but if one is requested we are ready to stand it.

"I do not believe that those leader of the S. D. P. have the approval of the rank and file of their membership I believe the union of socialist force will be decreed over the heads of the diplomatizing leaders, as it is a dictate

"I reiterate, we are for union, fully sincerely, and unreservedly; but for a union on a strictly honorable basis, not

LEFT-HANDED COMPLIMENTS.

Not Required to Read or Understand the Subject Reviewed.

effect, that a book, to be reviewed must first be read; It is supposed at important ideas and statements in the work under consideration, and either in the whole range of socialist literature exposes their falacy, emphasizes their truth, or points out their bearing or non-bearing on the subject proposed. But it seems as if this idea of the duty of a reviewer, is fast becoming out of date. We are now in the last year of the nineteenth century, and our methods are so much improved over s supposed to dissect. He merely "reviews it."

ions. The resolution was discussed at Chronicle of January 29th, and which occupied almost a column in that paper Delegate Sieverman of Rochester Our attention was directed to this mat ter only on account of the subject criticized, which happened to be Kautsky's must say that the only effect which its and effrontery of the writer.

A long acquaintance with capitalls methods of presenting socialism to the public has left us indifferent about de elding, whether this particular gem is the result of astounding ignorance, wil. ful dishonesty, or a mixture of both We expect such from our opponents knowing that most of them, instinctively at least, recognize the strugg! between the classes which the subjecof socialism involves, and have always a keen perception of the necessity of catering to the master class upon whom they depend for bread.

The possession and exercise of eithe of the above two qualifications in this particular educator, is not nearly se interesting as the patronizing aftitude the work. What the effect of this upon those outside the socialist movemen nay be, we cannot say, as we are no well able to see from that standpoint but in a socialist, this production is well calculated to produce a curious feeling of disgust, contempt and amuse

We are not here worshippers, " No so lalist is. Engels, like all other men was liable to error. But it is certainly ludicrous sight to see an ignoran and concelted dwarf bearing testimony o the mental ability of an intellectua iant, and at the same time posing as vise and enlightened judge. The great intellectual ability of Ep

rels is recognized,, and the attitude of he outside world in considering such men as "unbalanced dreamers," "im-practical," "shallow-minded," "little "Httle perter than criminals," etc., etc., is nildly reproved, with such an air of judicial wisdom that the reader canil he looks over what follows, and disovers that Engels is "to be damned with faint praise." We socialists as a ule do not go out fishing for compliuents, as we expect none from ou nemies, and are suspicious of any endency in that direction. But i would be an abject socialist, who would egard the reviewer's tribute to Engels in the light of a compilment. We have neard of a live ass kicking a dead lion but this writer reverses the process and it is difficult to decide which perared animal raising a mournful bray wer the dead monarch of the forest may perhaps outclass the other in the matter of "good intentions," but it is cone the less an asinine proceeding.

After this ceremony is concluded th o work in demolishing socialism. Afer some preliminary twaddle he delivers the first kick. "Engels," he says. talism which the socialists today call topian with a happy unconsciousnes. erves the epithet."

After glancing over this production ve leave it to our readers as to whether we are justified in making the above mparison. One of Shakspeare's clown haracters; bewalled the fact that there ormed that favor for himself, with the charges the socialist with, regarding

If he can make good this charge, if he can find the scientific socialist who is "happily unconscious" of the Utop-lanism of his ideas, if he can find one

socialism of today, if he can produce the socialist, who will not scout the idea that the modern working class movement is a detailed preconceived "system," or can in the least substantlate the charge that medern socialism "richly deserves the same epithet," we are willing to admit that we ourselves bear more resemblance to the anima with which we have compared him.

It is wearisome work threshing over ld straw. The literature of socialism sovering all the above points, is so imense, that it is impossible for anyon wishing to understand the subject, to escape its contact. Those men who written anti-socialist work worthy of consideration (and there are many such), would entertain about the this reviewer, as we ourselves hold.

As if to make this whole production

ven more ridiculous, the truth is that and action, no man has been more conspicuous than Engels in fighting thos Utopian ideas with which he is charged a most emphatic proof of this. If the reviewer can overthrow the thesis laid socialist movement, if he can show that there is the faintest trace of a "preefft Society, greeting the convention seem necessary that a modern reviewer conceived" system in it, he can make and expressing the general interest in must understand the subject which he his point. The fact is this, to speak plainly, the reviewer has never read or if so, was as incapable of grasping their import as a six-year-old child. ognizant of the existence of such a nan, was when the pamphlet under then he did not read it, or if so didn't understand it. We do not intend to inflict upon our readers any more perusal had upon us, was to fill us this production. The review proceeds by harping on the same string, about the impossibility of "pre-arranged sys tems," and a whole avalanche of platitudes, truisms, stale sayings, rant abou 'political institutions," "liberty," "frui of experience," "building up rigid cas ron systems," etc., etc., which have n seaning to the writer, or for that mat ter to anyone else-but they are admira dy adapted for the purpose of filling out the column, which after all, is mo mportant from the standpoint of th ritic's material interests.

After wading through this slush t the bottom of the column we at ras frop upon one statement which is abs utely true, and we feel rewarded to he patience and suffering undergon n the perusal of the article. Our criti says that the book is worth reading, statement with which we cordiall igree, and this taken by itself, is about he only thing of value in the criticism and we take the opportunity of allowin nim all possible credit for the produc tion of this grain of wheat amongst s consistent throughout, and doubt i ast upon this single find, which wi egarding it be carried out. The book ays our reviewer, is worth reading be read "rightly." If by "rightly," I meant that it will produce the same mpressions as the reviewer has given us, then we must warn our readers But the people who know the value of such works as this differ con siderably in their mental make-up from the reviewers in capitalist organ -in that they are possessed of beain

To give our readers some idea of the evelopment of socialism among our lerman comrades, we give the lates! numeration of the socialist organs in Sermany alone:

Central organs, "Voerwarts;" weekly cientific magazine, "Die Neue Zeit: to daily papers in 45 cities: 12 three times 15 week: 6 twice per week: 9 week!s 5 monthly: 2 comic papers, and family Chetrated papers.

Besides these, which are purely politcal organs of the whole party, there ere papers representing the interests of cialist party, as follows:

One three times per week: 28 weekly; three times per month; 21 twice a onth, and 5 monthly.

The German socialist press is asmrediy a most powerful weapon.

KENTUCKY

Reasons Underlying the Goebel-Taylor Quarrel.

WHY TAYLOR IS DENOUNCED.

Capitalism In Washington Not Concerned About Kentucky Republicans While "Property" Is Secure.

A merry war is now going on in Kentucky. And while it seems to be a triffing and ridiculous quarrel among the local politicians, many curious lessons may be learned from it, by work-ingmen who are observant enough to search for the motives underlying capitalist conflicts, and in what manner changing conditions affect the conduct of those who label themselves Republi. cans or Democrats. In this quarrel the Republican party through its mouthpiece Hanna-McKinley, gives evidence of its complete capitalist character and if any of the "old" Republicans imagine that this party today bears any relation to the Republican party between the years '54 and '68, a study of the action of the President in this matter is calculated to disabuse their minds

During the war of the Rebellion, the eastern and mountainous portion of Kentucky was loyal to the Union, and opposed the slave-holders' rebellion to These people are now the utmost. about 100 years behind, industrially and socially, and with the change in the Republican party since the Civil war, they have been thrown overboard, like the negro voters in the South. great Republican capitalist party, being assured that PROPERTY RIGHTS would be protected, were perfectly willing that the "moral principles" part of heir program (which included the enfranchisement of the negro) should go by default. For years the people of astern Kentucky have been voted out er counted out in every election by the dd Confederate element, and the Resublican administration, despite their ligh-sounding pledges, gave no heed to

A quarrel broke out among the Demerats, on the money issue, and in con-sequence of this, a Republican governor Bradley), was elected four years ago. gain, and the last legislature passed he "Goebel" law, which as every reader knows, was condemned by almost every outside Kentucky. nanded the nomination as a reward for raming the infamous measure which of men and mice, gang aft a-gley" as he poet says. An opposition grew up gainst Goebel and he was defeated at the polls by Taylor. Then the famous "Goebel" law was set in operation. Never mind the "voice of the people." The "legal" definition of that same "Goebel" law had for its object the nullification of that "voice." Somebody shot Goebel, and then Taylor adourned the legislature, by which action according to the "respectable" press. Taylor has forfeited the "sympathy of the public." The following editorial exract from the Chicago Dally News defines the exact capitalist position on

this matter:

The whole case is very simple, once the subject is looked at aside from partisan and selfsh interests. There seems to be but little doubt that Taylor was duly elected governor of Kentucky. As to the throwing of the contest into the legislature by the disreputable means employed by the Goobelites, there is also scarcely room for difference of quision by cool-headed observers outside of Kentucky. Even had not some one of Gov. Taylor's partisans attempted assassination and had not the governor himself, following that act, resorted to illegal and despotic measures, general sympathy and opination would have been in his favor. He has chosen to act differently and has thus become in the eyes of the law an even greater offender against the peace and laws of Kentucky than Goebel himself. himself.

Here we have a valuable lesson for workingmen. These mountaineers of eastern Kentucky succeeded in electing governor, who would have had the publicass and Democra's outside of the state, of Kentucky, had he consented hands by a majority of the voters of that state. The capitalist classes have no "respect or sympathy" for the man who creates a disturbance while he is being robbed. Just as the strikers forfeit public "respect and sympathy" when they have the hardihood to resist their capitalist oppressors. Some day places, elect representatives of their dightest doubt, but that they will also forfeit the "respect and sympathy" of the capitalist classes, when they insist upon carrying out the mandate by which used to prevent socialist representatives from entering the legislatures. As the Roberts case now plainly shows, and whatever odium the capitalist press is shie to throw upon them will be util-

CONVENTION NEWS.

We have much pleasure in laying be. fore our readers a full account of the proceedings of the National Convention of the Socialist Labor party now being held at Rochester, N. Y., up to and including Tuesday, 30th ult, and we believe its perusal will be satisfactory reading to the many thousands of com. rades who have been expectantly wait. ing for the results which it is hoped this convention will bring forth.

So far the actions and spirit which animate our comrades who were elected as delegates, gives every promise that these hopes will be realized, that the individualism and self-seeking which has been such a fruitful source of discord in the past, will be minimized as much as possible, and the ground cleared of all obstacles that might impeds the progress of a united classconscious socialist movement. This can only be done by merging the individua) in the class, by frank acknowledge. ment and recognition of errors and false measures in the past and by profiting to the utmost from the lessons learned thereby. The great economic change of which the socialists are today the heralds, requires that the demands of the social revolution take precedence to all else. The powerful class. conscious armies of the European proletarist which at present exist, were only possible because of the perception of this basic fact. What we are now learning was many years ago clearly perceived by the keen-sighted Mark, who thus outlined the progress of the great working clas movement. "Proletarian revolutions criticize themselves constantly; constantly interrupt them. selves in their own course; come back to what seems to have been accomplished, in order to start over anew; scorn with cruel thoroughness the halfmeasures, weaknesses and meannesses

There is every reason to believe that a new epoch in the labor movement will result from the deliberations of this convention, that harmony instead of dissension shall mark the future course of socialism in this land, and that the opening years of the coming century may see a united and powerful working class steadily pushing forward to the conquest of that political supremacy, which is the essential condition of eco. namic freedom

THE COMING LOCAL CONFLICT.

Apparently we are nearing another of those periods in which the antagonistic interests constantly existing between the classes, break out into open and undisguised hostility. The workers in the building trades see before them the prospect of a battle with their masters, which, whatever be the uitimate result, must bring with it, suffering and privation to themselves and their wives and families. As socialists we do not deprecate these struggles, and waste no time denouncing those who engage in them, knowing that under present conditions this antagonism can never cease, but always smouldering, must at certain periods break out from time to time. Denunciations are absolutely useless upon either side, as we recognize that both parties to the struggle are engaged in furthering their apparent material interests, so far as they are able to see them. The employing class is out for profit, and their appetite in this respect can never be for insertion in our columns.

spectable" member of the community,
satisfied, and it is fruitless to expect. Are you still hustling for subscribers? This wonderful good link he another petite in this respect can never be

that it should, under present conditions, If the system of capitalist production is legal and therefore right, according to current ethics, it is mere waste of breath to denounce them as greedy and avaricions as their very existence depends upon the expansion of their business, and expansion of business depends always on increased profits. Equally useless is it to condemn the workmen for demanding an increase in for this in turn affects the profit which their masters are constantly endeavoring to increase. Besides from careful inquiry and personal experience, we know that the average worker in the building trades really secures no surplus above the ordinary standard of living of the average of the working class. Somewhere about nine dollars per week for the year is the figure which the skilled laborer in these trades receive in wages. That these wages are sometimes at the rate of between three and five dollars per day is, offset by the fact that by far the greater major. six months in the year. On the whole, the capitalist parties. they get about the cost of their production and it is a matter of vital inist that wages constantly tend to the can be measured in ordinary average human labor, and tends always to coinclde with it, is borne out completely. the same position, as his skilled fellowworkman, who earns double wages for

half the period. Organized labor, fighting in the economic field is at a terrible disadvantage in the struggle. Their masters are in the possession of the whole powers of state-the executive terislative and judicial the army, militia, police and law courts, and use these weapons against those who have placed them in their hands. It may be that many fruitless attempts upon the part of economically organized workingmen, for substantially better conditions, will yet have to be made, before they realize the folly of arming the en. emy by endowing him year after year, with the political power which it is an absolute necessity to themselves in the struggle. But this lesson must be, and will be learned, and there are not wanting signs to that effect. Already some groups of oganized workmen, in their platforms and constitutions, recognize the nature of the struggle between the capitalist and working classes, but curiously enough, fail to draw from this, the only logical deduction, that political action upon their part as members of a class having one interest in common, is a vital necessity, if their preambles and constitutions are to have any meaning whatever. But every outbreak of hostilities, such as the one that now threatens in the building trades, will drive this lesson home with Grove Avenue Police station, a number irresistible force. Win or lose, the workers who fight in the coming local struggle, will not be just the same men in their modes of thought as at present. Here and there some of the more perceptive and reasoning among them, will begin to see what we have been trying to explain, and its effect upon a close political alliance between the the minds and habits of thought of their fellows, will also help the recognition of the real issue and arm the workers with the only weapon by which their emancipation can be accomplished. We earnestly urge upon all class-conscious workingmen who belong to the trades unions which will be involved in the local struggle, to use all their endeavors at this time, to lay before their fellow unionists, the only possible way in which they can win complete and lasting victory, by uniting together at the ballot box, and assuming to themselves that political power, which is highly organized. Many concealed in the hands of their masters, has ever been disastrous to the cause of labor. Armed with this weapon, they can secure to themselves, the full social product of their labor, emancipate their class from the exploitation that is inherent in the wage system, and forever put an end to the miserable, indecisive conflicts which result on the whole in nothing. We recognize though, that to all over the land, when the Bible trustithe working class belongs the future, and while we are ranged on their side, in every struggle with their (and our) economic masters, our duty as socialists demands that we shall not cease

pirations can be realized, Trades union papers and journals are ers' Call, and comrades who are subscribers to such organs, will render the ing to this office any matter in such papers that they may consider valuable for insertion in our columns.

Transvaal war, speaking of which

he said:
"It has thrown me into an indescribable state. I passionately desire a Boer victory. The war is the greatest folly of modern times. Such butchery following The Hague peace conference is a sign of the passion for gain which now dominates the world.

The above is good evidence that Tolstoi and his ideas have very little in common with the world-wide working class movement, which some people try to identify him with. That any man who carnestly and inteligently desires the true enfranchisement of labor, should be "thrown into an indescribable state" so as to become the partisan of tory. state" so as to become the partisan of either side in a capitalist struggle,

be enjoying, has made arrangements to distribute among 1,000 families (whose worthiness must be attested by investigation), 500 tons of coal at the rate of half a ton per family. In the news item following this, "prosperity" is again following this, . "prosperity" is again emphasized by the report that during the month of January 3,253 homeless men slept on the floor of the Cottage which exceeds any previous record of that station by 1,000.

The pending strike or lock-out, which is expected amongst the building trades workmen in this city, would certainly take on a more hopeful aspect for the furtherance of the interests of the workmen involved, were there not such leaders of the council and the city administration. It looks as if the rights of the men are in danger of being sac. rificed to the political interests of the city hall politicians. Thoroughly organized as the men are, they have great advantage in the coming struggle. But this may be rendered valueless by the one fatal disadvantage-the close touch of their leaders with the Republican and Democratic machine politi-

The excellence of any commodity of thing is best brought to public notice, when the production and distribution of that particular commodity or thing virtues then come to light. A remarkable example of this can be seen in the fact, that no sooner had the Bible publishing houses trustified and con dated the production of the "Word," with desirable results, which the not very fertile imaginations of its heretofore individual producers, never dreamt of. A clever advertisement, disguised as a story, was printed in many papers fication had been completed,

We cannot give this wonderful relation word for word but this is the substance; "A burglar, who professes to be 'reformed,' ascribes his reformation to mind to go to Klondike. By stealing requested to exchange with The Work- rides on box cars, he made part of his way, and after many adventure reached the gold fields, all the while closely studying the Bible. The result is that he has just returned, after accumulating \$200,000, and is now a "re-

Cross-counters From "Bige." Some people are so used to splitting hairs that a real live issue would scare them into a fit.

The ubiquitous tramp is to the fore again. A reform paper extols the plan of giving them a chance to work for board and lodging. Tell me, my dear sir, what are they to do for clothes?

The agents of plutocracy look down

job at any price, for they are "bears" in the labor market who imagine their interests are a drop in the wage scale which wil disgust some worker and both give them a show.

> But the unemployed who are such for the avowed purpose of raising wages, who have organization and money back of them, are an entirely different proposition.

And they don't like the boycott, these fellows, though its twin brother, the black-list, is dear to their plutocratic gizzards. To drive a man from his job and make him a wanderer on the face of the earth is a worthy example of corporate wisdom and righteousness; but for labor to avail itself of its undoubted right to refuse to do business with a black-leg is a foul conspiracy.

The laborer in politics is the bulwark of the nation, as may be easily proven from speakers and writers of both old men, who are interested, are earn- parties. But it is only when he bends the flexible knee to the dictates of the "boss," and cracks his voice cheering for the "issues" raised by his employers. But the class-conscious laborer in politics of his own, indifferent to the Art Prestituted By Capitalism Cannot blank cartridges and Chinese "stink pots" with which professional politicians wage their sham battles for place The Beacon, Boston, January 13th, and power, the real labor politician armed with the Krag-Jorgensen of truth, entrenched behind the breastworks of economic justice, is anything but a gentleman. If he essays to lead he is a demagogue, if content to follow he is a damphool.

So thoroughly convinced am I of the fact that present conditions preclude the possibility of peace between labor and capital that I can tell a man's posi tion by his standing in the capitalist press, though I never heard him utter a word or saw a line of his writing. If "Art, sweet art, new radiance broke

Economics and Socialism.

BY LAURA WILLARD TAFT.

(Continued from last week.)

It may be said that the article in the Chautaquan practically epitomizes all of the objections to socialism commonly low degree. In short, they cover the expressed and so rarely examined; and what we see now we shall always see the equally old self-interest argument,

To go back for a moment to Professor Laughlin's numbered clauses relating to the factors of production, it may be suggested—without pausing at this time

And it may be doubted whether there
on the curious conception of the nature
exists a human being who that never of "the state" under socialism, or to inquire about the menning of "an economic court of final socialistic resort." and raising, for the present, a discussion of the accuracy of the term "capi-tal" under a socialist order of society that the considerations given as governing an increase in capital and in the efficiency of labor, are considerations which apply, as before, to the donomic rewards" which "always acts as a stimulus to keep as at a high point of energy and activity," he is using time between waking and sleepingenergy and sellitry described argument from how they do it is a myst "human nature"—or rather the relativity of human motives—regarding garding social questions. which, at the best, the economist has no inside information denied to the rest Laughlin's own "remedies" for the of mankind. As this argument forms the stock objection to socialism on the part of the non-socialist day-laborer, as well as of the millionaire, it is interesting to notice that Professor Laughlin returns to it with special affection again and again, His refutation deserves more space than can now be given, but it will be discussed at more said in-passing that the positions assumed in the paragraphs just quoted are contradicted by the most common facts of every-day life, and this contradiction is made especially glaring by than the clever and the gifted? On the developments following from the expansion of trusts. Again, as in reviewing some statements of a Harvard economist, one is impressed by the hermit-like remoteness from presentday realities which characterizes many of our university scholars.

One statement of this essay cannot One statement of this essay cannot witted" be punished? Surely no in-well be passed over: "What causes the trinsic justice can punish inborn traits good deal a matter of temperament and acquired from without, society has itpreconceptions." Undoubtedly. But self to blame, and cannot rightly pun-our author goes on: "It is very difficult, lish by "apportioning less reward." But

the argument? It is the implication that socialists are pre-eminently such by "temperament and preconceptions," that they "have never read anything but socialistic literature" and that this reading, rather than life's experience, greated anything that they that they have never read anything that they contained by the contained other hand, the contrast assumes that non-socialists are persons of noble disgrim realities, and are forced by "reason and experience" to realize the "economic impossibility" of socialist dreams. In other words: "You socialists brood over unreal visions and fanciful wrongs created by the imaginations of other socialists who write, while we practical men of affairs face the battle of life and learn the truth as it

Now the actual process which goes forward is the very reverse of all this, Whoever heard of a socialist who was such by "temperament and preconceptions?"Does one think of Marx or Engels or Liebknecht or Bebel or Lom-broso or Jean Jaures or Keir Hardie? Their preconceptions were all in favor of the existing system.

When, in the late elections in Massa. chusetts, the workingmen of Haverhill and Brockton chose socialist mayors and elected eight socialists as city legis. lators, while two socialist representatives were sent to the state legislature, that party upon the subject. This was -were these all socialists by tempera- adopted. ment and preconceptions?

By temperament and preconceptions everyone of us is a conservative. The child at whose home the family physi. Social-Democratic party: fidence in the bellef that all doctors are Not only children, but grown en women arrayed in skirts and men as invariably clad in trousers, hold this

We are all born conservatives. We are all prone to fancy that old "human nature" argument, so often what is now has always been, and that -at least, that ir will not change 'for oftener not expressed, and sfit less of- a hundred years." Only a contact with hard reality or the slow teachings of reason and experience produce a change of conviction. Netoriously is this true of the workingman.

read anything but socialistic literature." There are many human beings whose economic reading has been absolutely confined to the "orthodox" economists, and there are some who feel obliged to complie an expurgated edition of even John Stuart Mill for their classes, lest his social sympathies should seem to interfere with his economic teachings. But socialists do not main of philosophy, and not of political confine their reading to secialism. Many economy. When Professor Laughlin of them have received a degree in pospeaks of "an individual estimate of a litical economy from the older universifuture gain over the present induities. And there are socialists in Chi-gence," or the fear of a loss of "ecocago who work twelve hours a day and seven days a week in wage service under the existing system and still find how they do it is a mystery!--to learn what the "orthodox" have to say re-

I had hoved to speak of Professor present state of things, and of his own conception of an ideal society. hans, however, his statement of intrinjustice is its own best indictment; "Under the competitive system, each man must of himself meet all the craft. iness of those who would take advantage of him , and meet the world as he finds it; he who does all length in a future paper. It may be this most skillfully . . wins greater rewards. But some men are guileless and slow-witted. They fall of their rewards. Is it injustice that the stupid and incapable should get les what principle of justice is the universafounded, if men of unequal powers be given equal rewards?"

Truly; on what principle! Was there ever a more clear-cut exaltation of cunning deceit? And on what principle of justice shall "the guileless and slowwide difference of opinion between the by depriving their owner of the means advocates of socialism and those who for his best development. And if this oppose it," we are told, "is probably a lack of intellectual brilliancy has been

to grasp the exact import of the invi-tation extended by you to this Conven-tion as well as to all members of our party "to join the Social-Democratic party "to join the Social-Democratic party in the struggle to emancipate humanity from class rule and the slavery of capitalism by the establishment of the Co-operative Commonwealth." If it is a call for friendly and harmonious action by both parties in our common cause, we welcome it and heartly reciprocate the invitation. If it is an invitation for us to disband fit is an invitation for us to disband and on the Social-Democratic party, and join the Social-Democratic party, and heartily reciprocate the invitation. If it is an invitation for us to dishand and join the Social-Democratic party, collectively or individually, we hope for the honor and good sense of the means of production. We therefore charge that in this country the Democratic Russia which do not stand for the capitalist system of production are alike the tools of the capitalist of a national convention of another self-respecting socialist party. Our Convention will communicate its views on the relation of our respective parties to the National Convention of the Social-Democratic party.

After a very animated discussion, After a very animated discussion, therefore, call upon the wage that in this country the Democratic party of the system of production. We therefore the respective pour party in addressing such a highly peculiar request to a national convention of another capitalist class.

The working class can not however. The hours were very long at this place on ordinary occasions the men worked to all parties formed by the propertied to all parties formed by the propertied

The Socialist Labor party of the United States in National Convention assembled, sends fraternal greetings to the Social-Democratic party of the United States:

Whereas, The course of development of the socialist movement in the United States during the last few years has obliterated all difference of principle and views between the S. L. P. and the S. D. P., and both parties are now practiced.

ics and methods; Whereas, Harmonious and concerted

tics and methods;

Whereas, Harmonious and concerted action of all socialist elements of the United States is expedient for a successful campaign against the combined forces of capitalism:

Resolved, That it is the sense of this Convention that the interests of socialism will be best subserved by a speedy union of the S. L. P. and the S. D. P. into one strong, harmonious, and united socialist party.

Resolved, That we call upon the earnest and intelligent socialists of this country in the ranks of both parties to discard all petry ambitions and petry prejudices in the face of this great purpose, and to conduct the negotialisms for the unity of both parties, not in the sense of two hostile camps, each negotiating for peace with a view of securing the greatest advantages to itself, but in the sense of equal parties, hitherto working separately for a common cause, and now sincerely seeking to provide a proper basis for honorable and lasting union for the benefit of that cause.

Resolved, That for the purpose of cf-

decting union between the two parties on the basis outlined, this Convention to appoint a committee of hims to act as a permanent Committee on Socialist Prion, until the question is definitely disposed of

parties

The discussion of this resolution ocupled the rest of the day. At 6:36 p. the resolution as reported was adopted by a vote of 55 tost, three delegates not voting." The four who did not support the resolution were delegates Avery of Massachusetts, Berlin of New York, Gessner of Pennsylvania, and Spelman of Massachusetts.

The convention then adjourned for the-day.

TURSDAY'S SESSION.

On Tuesday the convention opened at nois and Eschenbach of Massachusetts presiding.

Following is the platform as adopted by the convention:

Wars are fomented between nations

Resolved. That any treaty of union demonstrating on May Day. But this evolved by the joint committee on union, including the question of party name, platform and constitution, be fitted to the Austran empire. The submitted to a general vote of both "Freshest" of Tenditz was confiscated feenuse it referred to King Alexander of Servia as the "sworthy" son of a "worthy" father. The curious point is m, a vote was taken by roll call, and that in the next number of the paper this decree had to be inserted, thus alowing everybody to see the incriminated article.

Arrangements are being made to establish a daily Polish newspaper at Cracow and a fortnightly paper published in Ruthenian at Lemberg.

GERMANY.

"Vorwarts" quotes a case of sweating in which the Court tailor is concerned: a. m., with Delegates Klenkie of Illi. This person gives his work out, so that when the workman gets it he does no get the full price. In this case, for working at the Kaiser's overcoat, the tailor only got 16 marks when, accord-

tallor only got is marks when, according to the convention:

The Socialist Labor party of the United States, in Convention assembled, reaffirms its allegiance to the revolutionary principles of international socialism and declares the supreme political issue in América today to be the contest between the working class and the capitalist class for the possession of the power of government. We affirm our steadfast purpose to use those powers, once achieved, to destroy wage slavery, abolish the institution of private property in the means of production and distribution, and to establish the Co-operative Commonwealth.

In the United States, as in all other civilized countries, the natural order of economic development has separated society into two antagenistic classes—the quotialists a comparatively small class, the possessors of all the modern means of production and distribution, (and, miles, machinery and means of transportation) and the large and evertification of the united approach to the administration of justice in the empire, especially in Saxony, and have drawn attention to the unfair way in which the socialists are treated. Stadthagen, the found of the internation of the unfair way in which the socialists are treated. Stadthagen, the socialist deputy, in the debate quoted some admirable words, of the Prussian King, Frederick the Great, who wrote to one of his ministers as follows: Justice must make no distinction between men; the beggar is for her the king's equil. She must judge rightly, Before a count of justice that the production and the large and evertification of the marks. Another instance, as "Vor."

that sanitary regulations, etc., were often disregarded. The minister, Count von Posadowsky, admitted that the onditions of employment were not sat stactory, but that reforms should be istrodudeed with great caution. . So

In the German Reichstag the Socialis: Stadthagen called attention to deaths and accidents to workmen. In 1898 no less than 7.984 workmen were killed and 90,039 injured. He well said that it

After a very animated discussion, the reply was amended by striking out all but the first and last sentences. The reply, as amended, reciprocates the fraction of color, race or sex, and upon all citizens in sympathy with the first and last sentences. The distinction of color, race or sex, and upon all citizens in sympathy with the first and party, and promises a communication to the National convention of that party upon the subject. This was adopted.

Delegate Hillquit then introduced on behalf of the Committee on Resolutions, the following resolution, to be transmitted to the Convention of the Social-Democratic party:

Belief and the first and last sentences. The workers of the United States:

After a very animated discussion, the reply was amended, reciprocates the fraction to the social-Democratic party of the United States:

After a very animated discussion, the reply states formed by the propertied to all party work and work a day in factories. Sanilary precantions were also neglected, and the men were fined for the sightest infringement of regulations. At first many men were imprisoned, but the working class until the sight state in fringement of regulations. At first many men were fined for the socialist party to representing the interests of the toiling masses and uncompromisingly wasting the accomplishment of this system of wage slavery shall be abolished.

Proling the accomplishment of this our ultimate purpose, we pledge every effort of the Socialist Labor party for the United States:

"Workingmen of all countries, unite! Swedish Socialist party has suffered a great loss in the death of Freddition of labor, and also for the securing of the promocratic party of the United States:

Whereas, The course of development of the United States:

MARX AND DARWIN.

The Great Italian Scientist Ferri, On Darwinism and Socialism As Related Truths.

(Continued from last week)

The scientific and positive socialism mental equality of all ment on the con-trary it maintains in accordance with vidua's will be improved, the number Darwinism, that inequality in both di- of motives for so-called misdemeanors rections is based upon nature, and will will decrease, and when the born crimitherefore never cease, but it sees in the nat is dealt with properly, there can be future socialist state that this very in- no doubt that the number of crimes equality will form the basis upon which will be vastly diminished. This also must rest, the division of social labor. everyone will be conscious of having his sanitary conditions for each individual Vienna have been blaming the govern. existence secured, and will be able to have improved, their number will also Resolved. That the said committee he and now the sediers have been firing attend according to capacity and natural on the work of the next national convition of the S. D. P., in order to convey this resolution to said party, and its invite the said party to appoint a similar committee; and demonstrating on May Day. But this his own use, work will not be evaded of individuals of the same species, and vigorous poursy may entail consequences by any, because a normal healthy and final to the Austrian empire. The well-fed human being has a natural inclination for work and avoids idleness, The whole difficulty lies in the ques-

tion-in what way are the products of labor to be divided? Collectivism answers, "to each according to his labor, while Communism declares 'to each according to his reasonable wants. No one today is able to solve in a practical manner the details of the question, One thing may be said, and this is recognized by Marx himself, that the Communistic formula represents rather a later stage of development Which must be preceded by that of Collectivism. It would be erroneous to suppose that with the introduction of collectivism all further development and aspirapresent a semewhat different postulate: quality of development and ability of victims will also diminish rapidly. individuals it proposes to make the

men. every individual is to successfully overcome in the struggle for life, while ac-

rooms for example) multiply with extreme rapidity but live only a short time, while palm trees have few seeds. but their lives extends to several hun dred years. In the animal world, fishes produce many thousands of eggs, while an elephant or chimpanzee have but a small progeny, but their life, however is very long. A similar process is going on in the human world. The uncivilized semi-barbarous peoples multiply rapidly but their offspring are short-lived, while civilized peoples in crease slowly but live much longer. clusion, that the higher the develop ment of the species, the more the struggle for existence weakens, and smaller becomes the number of victims required.

It is therefore a mistake to reproach the struggle for existence, and impute to it the supposition that the future of but in striving for a higher and more which all will have better conditions the struggle for life will grow milder and the number of victims smaller. The law of struggle for existence reign. also among men, but we see that the higher the degree of civilization reached by humanity, the milder it becomes, and the more different aims and forms

At first in the primitive hums cieties it is a brutal struggle for food, for the possession of the women, etc., carried on by the strength of the fist and muscles; soon however it changes into a social and political struggle Dis money to advance the cause of where mind becomes of greater import-alism. He may be said to have ance than physical force. In the an-cically started the party in West clent world, continues Professor Ferri, they assert that as only the bad sur-

Sweden, and he founded a newspaper it is a struggle for civic equality, in the middle ages it becomes a struggle for cligious equality, in the eighteenth thoughts of his grateful comrades, and century a struggle for political equality, and the struggle for economic equality appears today. Its process changes more and more, being carried on more mildly and with less brutality, or so to speak more spiritually.

Similarly, to the non-disappearance of the competition for equality, in the conomic and social conditions, the future organization of society will not do away with such pathological phenomena, as crimes, diseases, etc., which denarbors no dreams of the physical and mand so many victims. When, howholds good in regard to diseases, when misery, and want have disappeared and

But there is, according to the Darwinlan theory, another law of evoluion which should not be ignored, and which manifests itself everywhere in nature, and therefore also in human soiety, namely, the law of the solidarity ven a solidarity of different species, and which manifests itself in the socalled "Simblosis." Though the importance of this law is sometimes exaggerated, yet is an exaggeration also to say that the struggle for ex-istence alone directs the world. In the animal world we already se mutual assistance given in the struggle igainst enemies and nature, as in human societies according to the degree of development, the struggle for ex-istence grows milder and is carried on for higher aims and with more humans veapons.

The warrior type which prevails in the primitive societies, disappears with its developement and the improvement of the conditions of existence, and tion after new ideals will cease. Mn in- changes into the plowman and craftsdividual as well as a society who would man type. On the whole the conscious. not always aspire to higher and nobler ness of interests and solidarity begins ideas would be condemned to perish, to gain ground over competition and The demands of communism, as ideals struggle for existence. the social seasoning or experience of the point of the struction of the struction of the social seasoning or social efficiency than the sothat rewards—an the long run and in
product product the product of the struction of the struction of the struction of the social seasoning or experience of the point of the social seasoning or experience of the point of the struction of the struc survival of the "best" should not be spoken of, because this is teleology,

which may be seen from numerous signs foretelling the coming epoch of civilization-the socialistic. Therefore, in the evolution of civili-

zation, though on the while it marches to an ever higher ideal, we may notice very marked moments of dissolution. In such moments the social selection takes on a character which is the reverse of that in nature. Individuals survive in the struggle who are most fitted to the given conditions and the historical epoch, consequently in the moments of social decomposition, not the best, but the worst, individuals survive. Indeed, continues Professor Ferri, this happens today, proving that the present society and the civilization upon which it is based have outlived themselves. For example, at the present time, as a result of the celibacy socialism with a misapprehension of forced upon soldiers, during the period of their service, marital relations are entered upon rather by the weaker human society must be without sacri-dividuals who are free from military fices. Socialism does not assert this, serivce, than the stronger ones, which serivce, than the stronger ones, which tends to the degeneracy of the race, perfect organization of humanity, in As a result of capitalistic monopolies and an assured comfortable existence, for existence, it may boldly assert that the rich weaklings live longer than the strong and healthy poor, who are exsanitary conditions. To this might be ing throughout the whole world, rules added the moral degeneration; because capitalism in its struggle with the proletariat, saves rather the base and cringing, than the men of character who cannot and will not bear its yoke,

From the above facts, revealed and pointed out by socialism, the conclusion that Darwinism and socialism fre contradictory is not admissible. On acknowledges the law of natural selection, that in the struggle for existence,

vive there must be something corrupt in these conditions. Socialism aim therefore to change these conditions. reinstate selection corresponding to na ture, that is, the surviving of the best

The argument that the survivial of the "best" will cause the formation of an aristocracy is answered thus by Professor Ferri: "Hereglity reigns all over nature and will soon level the dif-Everything that rises too high over the average type, trangresse the law of nature, according to which the enjoyments of life are to be equallyaccessible to all. Therefore whenever individuals or whole families either through their intellectual standing or fortune grew by far above the average type in society-in each historical epoch different ones-and elevated themselve too high, their progeny soon stepped

AN IMPOSSIBLE TASK.

Revolutions Cannot Be Accounted for By the Actions of Certain Individuals. -Marx Comments Thereon.

The first act of the revolutionary drama on the continent of Europe has closed. The "powers that were" be-fore the hurricane of 1848 are again the "powers that be," and the more or less popular rulers of a day, provisional governors, triumvirs, dictators, with their tall of representatives, civil commissioners, military commissioners, prefects, judges, generals, officers, and soldiers, are thrown upon foreign shores, and "transported beyond the seas' to England or America, there to form new governments "in partibus in fidelium," European committees, and to announce their advent with proclamations quite as solemn of those of any less imaginary potentates.

A more signal defeat than that un-

dergone by the continental revolutionary party-or rather parties-upon all points of the line of battle, cannot be imagined. But what of that Haa not the struggle of the British middle classes for their social and political supremacy embraced forty-eight, that of the French middle class forty, years of unexampled struggles? And was their triumph ever nearer than at the very moment when restored monarchy thought itself more firmly settled than ever? The times of that superstition which attributed revolutions to the ill-will of a few agitators have long passed away. Everyone knows nowadays that wherever there is fice, by the voters-which is grandilobe some social want in the background, is generally supposed to be final. The which is prevented, by outworn institutions, from satisfying itself. The want may not yet be felt as strongly, as generally, as might ensure immediate success; but every attempt at forcible expression will only bring it forth stronger and stronger, until it bursts its protest by an opponent claiming irregfetters. If, then, we have been beaten, we have nothing else to do but to begin again from the beginning. And fortunately, the probably very short intergives us time for a very necessary talents, faults, errors, or treacheries of social state and conditions of existence the sudden movements of February and March, 1848, were not the work of single individuals, but spontaneous, irresistible manifestations of national wants and necessities, more or less clearly understood, but very distinctly felt by numerous classes in every country, is a fact recognized everywhere; but when you inquire into the causes of the counter-revolutionary successes, there you are met on every hand with the ready reply that it was Mr. This or according to circumstances, but under circumstances does it explain anything-not even show how it came to pass that the "people" allowed themselves to be thus betrayed. And what whose entire stock-in-trade consists in knowledge of the solitary fact that Citizen So-and-so is not to be trusted.

The inquiry into, and the exposition of, the causes, both of the revolutionary convulsion and its suppression, are, besides, of paramount importance from a historical point of view. All these petty, personal quarrels and recrimina. dons all these contradictory asser-Rollin, or Louis Blane, or any other member of the Provisional Government or the whole of them, that steered the Revolution amidst the rocks upon which it foundered-of what interest can they be, what light can they atford, to the American or Englishman who observed all these various move ments from a distance too great to allow of his distinguishing any of the details of operations? No man in his affairs, without consent of the state of-senses will ever believe that eleven men, ficials, have asked for time to consider mostly of very indifferent capacity the demands.) either for good or evil, were able in three months to ruin a nation of thirty. in France was unseated by the central six millions, unless those thirty-six authority in Paris. At the new election millions saw as little of their way be. called he was again re-elected by social. fore them as the eleven did. But how ist votes.) It came to pass that thirty-six million were at once called upon to decide for try, in a capitalist society, under capithemselves which way to go, although partly groping in dim twilight, and how then they got lost and their old leaders ling class having a government agreeing were for a moment allowed to return leadership, that is just the question.-From "Revolution and Coun-

ter-Revolution," by Karl Mark.

RULE FOR FUTURE USE.

Precedent in the Roberts Case May De bar Future Socialist Repre-sentatives.

"The voters of a sovereign state elected me to the National Congress," said he, "and I believe they will not quietly submit to such treatment as we have received. Am I surprised at the vote for expulsion? Not in the least. I fully expected it."

To Congress and the people at the resent time a question of importance s being discussed. The "expulsion and unseating of Roberts of Utah," as Congressman from that district. Appar ently to the general public the reason given for his exclusion or expulsion is stated to be "immorality." Viewing his case as a socialist without taking ssue on the question, it has a side or phase not yet discussed, and, in truth do not think that our capitalist jour nals whose morality has suddenly beuss it. Roberts was elected to serve a constituency in a certain congressional district of Utah. Under the constitution of the United States these voters choose him to serve their laterest at Washington. The election clerk in that district, after the expression of the "will of these people," gave to Roberts a certificate of election, thus entitling him . Roberts, to a sent, representing a constituency at Washington. On presentation of these credentials Roberts was refused his seat—on what grounds 'Immorality."

The question of capitalist morality loes not concern us as socialists, but this being a mere plea in the case, the grounds upon which was based the evi-

dent desire to unseat Roberts. The presentation of petitions opposing his being seated by a number of church organizations, women's clubs, etc., etc. n which prominent members with Helen Gould as chief spokeswoman of certain of these organizations it is almost useless to go over-all pleading for his. Roberts, rejection as a congressman. This is too well known to be disussed here.

"Immorality." We are not concerned in this, I repeat. Those, you will notice to a great extent who signed this petition did not protest against the fact of the debauchery and licentiousness of certain senators and congressmen which are known facts-but to the main question; the unscating of Roberts.

In a country as "free" as we are supposed to live in the returning to of. revolutionary convulsion, there must quently discussed as "sovereign rights," will of the people. The rule of the majority, according to the constitution.

The unseating of this man could only take place if a protest concerning the regularity, or rather correctness of his certificate of election should arise, or a ularity, which would be settled by a committee of the official body to which he was elected.

No protest of either kind has been val of rest which is allowed us between filed. The correctness of his certificate the close of the first and the beginning of election has not been questioned, of the second act of the movement. Simply this the grounds upon which he has, or will, according to latest reports, piece of work: the study of the causes be excluded, is "immorality," thus step-that necessitated both the late outbreak ping outside of the constitution entirely, and its defeat; causes that are not to be It having been proven by scores of with sought for in the accidental efforts, nesses that these charges of immorality were not sustained by those called by some of the leaders, but in the general the prosecution, we must look to other sources for the cause of his exclusion. of each of the convlused nations. That This "other source" we will now dis-

The passing of some laws in this as well as all countries sometimes give opportunity for the entirely different use of the laws passed. Thus we find the use of failroads for the transports tion of mails, give opportunity for Fed. eral interference by use of troops if sciously becomes evident. The possiworkmen dissatisfied with conditions bility of going outside of constitutions attempt. If refused an advance in limits to send the militia into states for wager—to better their condition by a certain putposes will lead, and did lead 25 cents for six months; 50 cents a year. strike, which endangers the capitalists' to the establishing of a custom. Which reply may be very true or not, ence with United States mails' could be stitutional law bearing on the case esused as a "reason why" the Federal tablishes a precedent proving the sotroops should be used to "keep the cialist contention, that the making of mails moving." trains BREAK THE STRIKE, and defeat the laborers in their demand for and, that as long as the capitalist class a poor chance stands a political party better conditions. The A. R. U. strike shall be able to do so laws and customs in '94 is a living proof of this assertion.

PLATFORM.

The Socialist Labor Party of the United States, in convention assembled, re-asserts the inalienable rights of all men to life, liberty and the pursuit of happineses.

With the founders of the American republic we hold that the purpose of government is to secure every cilircu in the enjoyment of this right; but in the light of our social conditions we hold furthermore that no such right can be exercised under a system of conomic inequality, essentially desired tive of life, of liberty and of happiness.

With the founders of this republic we hold that the true theory of politics is that the machinery of government must be owned and controlled by the whole people; but in the light of our industrial development we hold, furthermore, that the true theory of conomics is that the machinery of production must likewise belong to the people in common.

To the obvious fact that our despote system of economics is the direct opposite of our democratic system of politics can plainly be traced the existence of a privileged class, the corruption of government by that class, the alienation of public property, public franchiese and public functions to that class, and the abject dependence of the mightlest of mathematical producers, is decided the means of self-employment, and, by compulsory idieness in wage shavery, is even deprived of the necessaries of life.

Busing power and natural forces are thus wasted, that the plutocracy may rule.

Ignorance and invention are diverted from their humane purpose to the ensiavement of women and children.

Again, there is a section the Socialist Labor Parry once more enters its protest. Once more it

Science and invention are directed from their humane purpose to the ensurements of women schildren.

Against such a system the Socialist Labor Party once more enters its protest. Once more it relierates its fundamental declaration that private property in the hasteral sources of production and in the instruments of labor is the obvious cause of all economic servitude and political depundence. The time is fast coming when, in the natural course of social evolution, this system, through the destructive action of its failures and crises on the one hand, and the constructive tendencies of low trues and other explicitablet combinations on the other hand, shall have workedout its own downfait.

We, therefore, call upon the wage workers of the United states, and upon all honest citizens, to organize under the hanner of the Socialita Labor Party into a class-conscious body, aware of its rights and determined to conquer them by taking possession of the public powers so that, held together by an indomitable spirit of solidarity under the most trying conditions of the present class strongle, we may put a summary end to that nerbarous struggle by the solution of classes. the restored into of the land and of all-the means of producting, transportation and distribution to the people as a collective body, and the substitution of the Cooperative Commonwealth for the present state of planses production, industrial war and social described. Promentally in which every worker shall have the free exercise and full benefit of his faculties multiplied by all the modern factors of civilization.

Immediate Demands.

With a view to immediate improvement in the condition of isbor we present the following demands:

1. Reduction of the hours of labor in proportion to the progress of production.

2. The United States shall obtain possession of the railroads, canais, telegraphs, telephones and lother means of public transportation and communication; the employes to operate the same operatively under the control of the Federal government and to clock their own superior officers, it no employee shall be discharged for political reasons.

3. The manifelphilities shall obtain possession of the local railroads, ferries, water works, electric arise and all industries requiring numerical franchises; the employees to operate the same co-opracely under the control of the numerical administration and to elect their own superior officers, but simploves shall be discharged for redition Revealed on and to elect their own superior officers, but simploves shall be discharged for redition Revealed on all land grants to corporations or indicated the control of which have not been compiled with.

5. The United States to there the vacinative right to issue money.

6. Progressional legislation providing for the selectific management of forests and waterways, of peabliding the waste of the natural resources of the country.

6. Inventions to be free to all, the inventors to be remunerated by the nation.

7. Progressive income tax and tax on inheritances; the smaller insumes to be exempt.

8. Progressive income tax and tax on inheritances; the smaller insumes to be exempt.

9. School education of all children under fourteen years of age to be complisory, gratutious and constitute and only approximate the smaller insumes to the exempt.

9. School education of all children independently was Unabridged right of combination.

11. Lave and the supplementation of the contract labor system.

12. Importment of the unemployed by the public suthurities (county, etc., state and nation.)

13. All wases to be paid in lawful moneys of the United States. Equalizatio

15. The people to have the right to propose laws and vote upon all measures of importance, ording to the referendum principle.

accerting to the referredum principle.

16. Abolition of the veto power of the executive (national, state and municipal) wherever it exists.

17. Abolition of the United States Senate and all upper legislative chambers.

18. Municipal self-government.

19. Direct vote and secret ballois in all elections. Universal and equal right of sufferage without regard to color, creed or sex. Election days to be legal holidays. The principle of proportional representation to be farreduced.

20. All public officers to be subject to recall by their respective constituencies.

21. Uniform Civil and criminal law throughout the United States. Administration of justice to be free of charge. Abolition of capital publishment.

TENTH NATIONAL CON-VENTION OF THE S. L. P

Job Harriman of California for President and Max S. Hayes of Ohio for Vice-President.

Nominations Made amid Great Enthusiasm-Sketches of Candidates-Revised Platform Adopted-New Plan of Organization for the National Executive Committee-Increased Provisions for the Party Press and for Socialist Literature Notes and Sketches of the Convention.

PARTY PRESS AND LITERATURE.

Press. The committee was of the opinion that the party press and literature had been altogether too much neglected. We need more socialist literature—papers, leaflets, pamphlets, and books, The party organs have a most important mission and they ought to be supported by every member of the party. But other literature should be given careful consideration. Various recommendations were made, of which the following were adopted;

There shall be created in New York a Literature Committee of seven members, chosen by the N. E. C.

The regular dues shall be increased shall go to the Literature Committee and 3 cents to a fund for the support and advancement of the party press,

THE SUN LOCKOUT.

At this point, the following resolu tions, bearing upon the struggle of the printers in New York with the New York Sun, were introduced by Delegate Long of Pennsylvania and Neben of New Jersey. They were adopted unanimously by a rising vote:

whereas, An industrial conflict now rages between Typographical Union No. 6, of New York, and the New York Sun newspaper, as a result of a lockout of the Sun compositors; and
Whereas, The facts in the case show conclusively that this lockout was to be the first battle in a war between organized capital in the newspaper trade and the International Typographical Union, and that the purpose of this war was the extermination of a powerful and bona-fide organization of labor; and Whereas, The infamous injunction of Judge Bookstaver against the officers and members of No. 6 is but one more proof that the capitalist class is in complete control of the Judicial, executive and legislative powers, and never falls to call into use every force at its command: therefore be it
Resolved, That this Convention congratulates the members of Big Six on the splendid fight they have so far made for the integrity of the union; and be it further.
Resolved, That we call their attention

world between the working and capi-

world between the working and capitalist chasses.

Resolved, That we call upon the members of 'Big Six' tto take up and use in this fight their most powerful weapon—the class-conscious ballot of revolutionary socialism.

Resolved, That we call upon the socialists of the United States to immediately extend every aid to the New York printers in their war upon the New York Sun and all its supporters.

Resolved, That a copy of these resolutions be transmitted to the officers and members of Typographical Union No. 5 and the socialist press and labor papers of the country.

The convention then adjourned to

THURSDAY'S SESSION.

The convention met Thursday morn ing with Long of Pennsylvania and Berlin of New York presiding. A com-Educational Association of New York was received with applause.

The consideration of the report of the Committee on Press was then resumed The People was again declared the official organ of the party. It was decided to create a Press Committee of seven members, chosen by the N. E. C., which shall have immediate supervision of the

THE CONSTITUTION.

The constitution of the party was then taken up, on the basis of the re- and may adopt binding resolutions. which was presented by Delegate Har. riman of California.

The first portion taken up was that concerning the National Executive Committee. A strong feeling against manifested during the debate. Many legates had come instructed 'against the present system of an executive York. This feeling gradually gave way,

The senate is a good deal of a joke itself. The "sacred cause of liberty" may be taken seriously by the crowd outside, but the average senator evidently knows its real value.

> Blessed are the peace makers for they shall be-well liked in Washington. It will be noticed in reading the extract given below (Chicago Tribune, Feb. 5), that this particular peace maker doesn't travel officially, the situation in Kentucky not being the outcome of a difference between the capitalist and working classest

GOES TO RESTORE PEACE IN KENTUCKY.

mpanying Senator Blackburn to appropriate to his own use the whole social value of his product, while capt, the muddled Kentucky situation was called will only allow the cost of the that state. "Little Phil." as he is often that state. "Little Phil," as he is often styled, was once a congressman, but for a good many years has claimed New York City as his residence. He has a record as a fighter, and is recognized as a man of desperate courage. In 1874, in the town of Harrodsburg, Thompson, his father, and two brothers epgaged in a shooting affray in the engaged in a shooting affray in the courthouse with five antagonists, of whom the Thompsons killed three on escaping themselves with

slight wounds.

Subsequently Phil Thompson killed a man for interfering with his domestic relations, for which he was tried and acquitted. He spends much of his time in Washington and is well liked.

This is a typical example of the capitallst "peace-maker," and there is no doubt that the individual in question is well qualified not only to "straighten is the use of the fellow who goads on out 'difficulties, but also the gentlemen the contractor by giving the job to the who make them, if we are to judge by lowest bidder? That fellow is the capi. his-previous record. Many of those who have encountered Mr. Thompson in his would not only be harmless, but actual- professional capacity as "peace-maker," have been peaceful ever since. Sheriff twenty men in the back, in the interests would have him fighting by your side of "law and order" has also been appreinstead of as at present, against you, clated in Washington, Mr. Thompson should be given an opportunity to exerclass, and you will have to fight them cise his prowess on the striking workingmen, and it is not impossible that he might secure an equally distinguished position as is now occupied by the Marquis de Gallifet in France.

From Milwaukee.

workingmen who are beginning to think. Mr. Franklin McVeagh, a "prominent citizen" of Chicago, has lately been airing his views about the "idle rich" who are described as a menace to the community. This sort of thing is absolute nonsense. The idle rich! One might as well talk about non-destructive potato bugs.

It is not the idle rich who actively appropriate the surplus product of la-

"Whereas, Our national convention has declared in favor of union of all has declared in favor of union of all socialist forces; therefore, "Resolved, That we make no nominations for the spring campaign, as the Socia-Democratic party at present represents the majority of the class-conscious voters of Milwaukee."

As the city convention of the Sociat-Democratic party was to be held Mon-day, February 12th, the section decided to send three delegates to the conven-tion, for the purpose of ensuring har-money in the coming local campaign, —Milwaukee, Wis., Feb. 11th.

of the S. L. P.

declaring for socialism, which met with from Section San Juan:

present the delegates are elected by congressional districts, in proportion to the S. L. P. vote. In future, every section shall be entitled to one delegate, and to one additional delegate for

It was decided that in future ,the party shall strictly forbid any member to accept any appointive office, except such as the party, as such, may be enfitled to by the election laws of the states.

the seat of the National Board of Appeals. and Philadelphia declined the honor. The Committee on Resolutions recadopted.

to fight on the economic field, but also adopted unanimously.

THE IDAHO AFFAIR.

troduced a resolution bearing upon the Idaho outrages. This resolution recited the facts that the class war between the workers and the capitalists had taken on such a form in Idaho that the lives and liberties of the workers and the safety of all citizens were more than usually endangered; that the regularly elected officials of Shoshone county had been deposed and officials not chosen by the people put in their places, a secret spy system established, the military placed in full power, wholesale arrests made, workers, sympathizers, and even strangers being allke deprived of their liberties, workingmen confined in a stockade prison pen for many months, a few tried and hundreds at last discharged without even being charged with any crime, through an iniquitous judicial procedure; while the general purpose of the arrests and abuse of workingmen had not been to seek the aims of justice, but had only been acts of vengeance workingmen of their liberty and tak-ing on the form of persecution and by the fine Spanish hand that guides it. ing on the form of persecution and usurpation of the civil powers by men not chosen by the people, all have a tendency to further degrade the laborer and emphasize the class struggle in the industrial world. The resolut. tion then proceeded to denounce this military rule as unnecessary and brutal, to protest against the introduction of military rule in this country and in particular against the use of the United States army to terrorize and further degrade the working class, and called upon the workers to resist such encroachments.

CAMPAIGN FUND.

campaign fund, so that the coming pire Theater, in which Max Hayes, campaign may be pushed with vigor. Mrs. Avery and Job Harriman spoke campaign may be pushed with vigor. Section Rochester for the most hospit. chairman incidentally pointed out that able reception which it had extended to the S. L. P., whose convention was be the delegates, the convention adjourned ing held in Rochester, had, among with rousing cheers for international other things, accomplished what none socialism. The delegates separated in of the other parties had been able to great satisfaction at the happy comple. do, that is, to turn their corrupt bosses tion of their labors, which, they feel out of doors at one stroke, a fre-confident, will meet the general ap. mendous storm of applause swept

tion, but, unfortunately, their representatives, Comrades Santiago Iglesias, editor of the socialist organ "el Parvenir Social," and Eduardo Conde, arrived on last Friday, as their steamer met with an accident. They bore the placing the trade unions on record as, following letter of a German comrade

declaring for socialism, which met with failure, after a whole day's discussion. In 1899 he was again elected delegate to the A. F. of L. convention, which met in Detroit, and, after two unsuccessful attempts, finally secured the adoption of a resolution whereby the convention called upon the trade union, lists and workingmen generally "to study the development of trusts and monopolies with a view to nationalizing the same."

He is an enthusiastic advocate of amalgamation of socialist forces upon a fair and honorable basis, and numbers friends by the hundred in the Socialist Labor party, Roth are lobe, a fair and honorable basis, and numbers friends by the hundred in the Socialist Labor party, the Social-Demogratic party and the trade union movement.

FRIDAY'S SESSION.

The convention held its last session on Friday, February 2, adjourning sine die at noon of that day. Delegates Steverman of Rochester and Schwartz of Syracuse presided.

It was decided that, if the legal situation should necessitate such action, the N. E. C. should have the power to change the name of the party.

THE CONSTITUTION.

The consideration of the party constitution was then resumed. Several changes and additions were made. Among the most important were the following: National conventions shall be held every alternate year. The basis of representation was changed. At present the delegates are elected by congressional districts, in proportion to the S. L. P. vote. In future, every books of the same such action, the S. L. P. vote. In future, every books of well and the said "People." Implementations are of dwellings. Commades keep below to the S. L. P. vote. In future, every books of dwellings. Commades keep below to the S. L. P. vote. In future, every books of dwellings. Commades keep below to the St. L. P. vote. In future, every books of dwellings. Commades keep below to the St. L. P. vote. In future, every books of dwellings. Commades keep below to the structure of the said "People." Implementation of the party conditions the said "Peo

proletarians are out of work, and live in the direst want in most unhealthy holes of dwellings. Comrades, keep away from Puerto Rico!

With social greeting.
Alwin Hascher.

SKETCHES OF THE CONVENTION.

The following particulars concerning the doings of the convention will be interesting to the reader. The debate on the admission of Comrade Avery turned essentially on the following points: The Massachusetts delegattion raised Chicago was unanimously chosen as the objection first, that the credential of the National Board of Ap-of Comrade Avery was defective, since Cleveland, Boston, Rochester, in that part of Boston which, with Section Dedham, belongs to the Eleventh congressional district, no meeting was ommended that a delegate be sent to held for the election of a delegate. the International Socialist and Trade Further, the comrade had supported Union Congress, to be held in Paris the De Leonite clique until a split took this year. The recommendation was place in it, on which occasion she remained in the minority. Comrade The same committee recommended Avery admitted a slight formal irreguthat an address to all trade unions be larity about her credential, but based issued, calling upon them, not merely her claim to a seat and a vote on the ground that invitations to this convenalso to use political action as a means tion had been issued to all sections of to the emancipation of labor. This was the S. L. P., whatever stand they had formerly taken. At the debate the Massachusetts and New Jersey dele-Delegates Benham and Harriman in- gations were particularly opposed. As reported, the comrade was admitted by 30 votes to 21.

The debate on the question of unity was very interesting. It was shown how changed the attitude of individual leaders of the S. D. P. had latterly become, particularly since the great success of that party in Massachusetts, which attitude up to that time had been very antagonistic, and the intenplause of the members of the S. D. P present as spectators) that any attempt on the part of the leading element of the S. D. P. to frustrate unity under honorable conditions would cause the membership of the S. D. P. practically to bring it about over the heads of the leaders.

The De Leonites had the harmless pleasure of protesting against the convention of the S. L. P., through a "press committee" of their Rochester section' which, of course, did not prevent the Rochester newspapers from getting It goes without saying that this "press In one of these publications, it was recounted among other things, to the good Rochesterians, that in 1898 the Democratic candidate in the 16th, As sembly District would have certainly been beaten by Dan, had not 700 Republican votes gone to his help. well known that the exact contrary of this was the case, since 700 Republican voters most undoubtedly voted for Dan at the order of the "machine, Our Rochester comrades did magni-

ficently. On Sunday afternoon an teresting discussion meeting took place in the Labor Lyceum, which, in spite of the snowstorm, was filled, from 300 It was decided to raise a national to 400 persons being present. The Em-After a hearty vote of thanks to in the evening was crowded. As the through the house.-The People.

Citisens of Benton Harbor will have a jublice in a few days to celebrate the successful ending of their efforts.

It is rather difficult to figure out how the capitalist is at the mercy of those who hold "access to natural opportunities," in Benton Harbor at least it would seem after all, that the owners of capital, when they actually hold a jublice to celebrate the fact that they persuaded the lates to fact that they persuaded the lates to accept their "monopoly" on such favorable terms.

MARX AND DARWIN.

The Great Italian Scientist Ferri, On Darwinism and Socialism As Related Truths.

(Continued from last week.)

Having thus shown conclusively that socialism is not contradictory to Darwinism in any of the points raised by Hacckel, Professor Ferri proceeds further to prove that in all other main points, socialism and Darwinism are in agreement

Thus, at first in regard to its relation to religion. (Chapter V. Socialism and Religious Bellef.) Darwinism is agnostic, on this subject, as every positive science must be antagonistic to supernatural creeds and religious, and lessen their sphere of influence. God is a hypothesis which as Laplace said, posittive science does not need, and at the most, according to Hergen, he is an unknown quantity, like the Elgebraic X. and that x, says Professor Ferri does not lie beyond the knowledge as Duhols. Reymond and Spencer would have it, but comprises all that science has not yet penetrated, and is therefore a changeable quantity; as the scope of our knowledge increases, in the same measure this x decreases. And social. ism occupies the same position, first be cause it is based upon positive science and secondly, because, holding the possibility of realizing heaven on this earth, it regards another beyond it, as sary and superfluous. Though

he Marxists have declared at the Er furt Congress (1891) that socialism has no concern with religion, leaving it to the individual conscience, and that it even combats religious intolerance everywhere, yet this it does only on account of the certainty of its ultimate victory. Moreover socialism considers religion as a heritage from primitive times, which must eventually disappear, but also comprehends that the rolling classes use it as a valuable narcotic to maintain their rule over the lower classes. Therefore the combatting of religious beliefs is one of the main tasks of socialism, and one of the most important means of propagands. Socialism looks without fear upon what is known as "Christian socialism," It dees not oppose the action of the latter, especially in rural districts where religious traditions are still powerful because it recognizes that the fruits of such action cannot be reaped by its promoters, knowing that when the principles of "Christian socialism" are once accepted by any particular group or community, it will be an easy work for ocialists proper to win them over to themselves. - As in government, the necessary evolution leads from the absolute to the constitutional monarchy, and from that to the republic, which moreover differs from the former only by the eligibility of its head, so social. ism knows that this process must develope by itself, and has therefore no interest in and refuses to share in the republican propaganda. The position forms of government are similar.

Another point in which socialism and sor Ferri, is their attitude toward the dividual and Species.")

At the end of the last century there vidual. Society was considered to originate in the voluntary agreement of individuals, and to exist only for their benefit. This exaggerted indi-Darwinism, that the individual considered separately, is nothing, while parts; as is the animal so is the as is man so is human society. The cells which compose living beings, and even the parts of those cells, as neucli and protoplasm, are also formed by atoms and molecules. The higher the grade of the species, the more compilcated and multifarious becomes the aggregate, that in itself is a composite of

Airendy in the mammals we meet aggregate of the communities, districts, in humanity itself, which is a federation of didfferent nations. Each country, each, province, The individual, however, niways exists for society. Already of the two fundamental impulses of life, thing is relative. viz., hunger and love, the latter neces istence of each aggregate depends on the life of individuals, who therefore should not be sacrificed to society as some of the Utopian and communistic teachings would seem to indicate.

The third point of agreement between Darwinism and Socialism is the conceptition of the struggle for existence (Chap. VII., "Struggle for Existence and the Class Struggle.)

Through his law of the social struggle between the social classes, Marx has transferred the teachings of Darwinism on the prevalence of the strug gle for existence all over nature, into the field of social economy. Not until this law, was known, could the history of mankind, in its evolution from savagery to civilization be comprehended. History ceases to be a series of individ-

uniform mass, a sum of more or less numerous individuals, but an organization composed of multifarious parts of individual characteristics These are the social classes, which may be either distinctly separated from each other, like the "castes" in India, "rank" in the middle ages, or they may be less distinct like those in America, and the European societies of the great Fench revolution. The basis of the social evoution of societies is always a material marches forward. This contradiction and economic one; and concerning this basis and its monopolization, the strugoing on. This is a necessary result of the given state of things in the midst of which human society fives, and is a crty, but this circumstance means for instance as the employment of all necessary condition of its further evolution.

the consciousness of the importance of economic existence, the struggle mot rights and liberties, such as religious ne class over another, against the individual owenership of capital.

Marx, for having proven that private organizations of society, the power at we encourage and support. In this way the struggle is that private property in realty (real are still the immediate interests of the nomic structure, and further social evo- who upheld this idea in his principles lution, just as the struggle for exist- of sociology as well as in his later ence, causes in nature the transformation of lower species into higher.

In the second part of this work, entitled, "The Theory of Evolution and Anti this for two reasons; first, because Socialism," Ferri demonstrates the the present owners are not the deconsistency of socialism with the general theory of evolution.

And thus in chapter VIII (Social Economy and Socialism in the Light of the Theory of Evolution), he proves the improvements and investments that socialism is only an application of made, and such remuneration would the evolution theory, to social economy. While the older so-called "classic po-ilitical economy," accepted everlasting replies: As to the first, he insists that and immutable laws of nature, while it supposes the present capitalistic sys- individual rights of whatever nature tem is a necessary result of those laws, and relation of socialism to religion and it must therefore always remain the same. Socialism has proven that the believes that the remuneration need not laws which Adam Smith laid down for be a complete one. Already today the Darwinism are in accord, says Profes. political economy, are relative, that they concern the present times and conquestion of the relation of the indi- ditions, but could not be applied to priated in the public interest. Society vidual to the species. (Chap. VI, "In- the pre-historic, or ancient epochs, nor will they have any application in the land, and means of production, and this future.

vidualism, which has revived to day in of thinking, known as metaphysics, anarchism, was a necessary reaction. The present positive science in all its ized by Loria in his work "The Ecoanarchism, was a necessary reaction the Breent positive science. In all its against the then existing domination of branches, teaches that everything is nomic Basts of Social Institutions."

Chapter X (Social Evolution and Incircular social classes, e.g., nobility and undergoing a constant evolution, that dividual Liberty), disproves the assertions. clergy. Today, biology teaches with changes and transformations are eternally taking place, and it supports with tion, that socialism aims at a new form proof of the ideas of Liebnitz and of tyranny, and the destruction of persociety, the aggregate is everything. Haeckel expressed in abstracto, viz.: sonal liberty, and shows that here, as Everything that lives is a composite of The present is the child of the past and othing is," but everything "becomes."

While the older metaphysics, in accord with the conceptions of Plato, could not do without fixed conceptions of morality, social organization and so cial economy were necessarily looked upon as the results of everlasting laws.

While it could not part with the abso lute and dualism, the positive contem poraneous science elevates itself to the with different forms, each of which has powerful synthesis of monism. As the its own peruliar form of movements, only reality, it recognizes matter, and and more so in societies, which are an its inherent force, the latter causing a will admit of a variety of answers. In constant change and transformation of the former, which takes on, relatively to time and space, ever new forms, the nature of socialism, and are no Morality and politics, are only conrepresents different characteristics and structions based upon economic organi. requires different administrative ar. zations, which in turn are different under every meridian and in every century. Everything is changeable, every-In Europe and Amer ica, the killing of a rather or mother sarily requires a social life. Cannibalism is still practised the life of the parts composing it, con- in some parts of the interior of Africa, sequently that of society depends on just as it once was in prehistoric Europe. The history of the human race shows that the form of the family changes with economic conditions From a complete disorder in the sexual relations, it elevates itself successively through polyandry and polygamy, to monogamy. Why then, should the private property system of our present capitalist society, be considered the only form exempt from the action of evolu-

tionary change? Just this latest consequence of the volutionary theory has been accepted by Marxian socialism, which also accepts the fundamental ideas of the said their labor. This in turn involves the heory, viz., that a constant developement and transmutation of all phecomena exists in nature. The trans-

of socialist teachings with the evolution theory.

Chapter IX (The Law of Apparent Retrogration and Private Property), repudiates the assertion that socialism in aspiring for the realization of collective property, is in reality aiming to a return to the backward arrangements is only an apparent one. It is true that socialism has for its objective collective evolution of property, started in the primitive times with just such a propan apparent one; in truth, these forms to., but today this struggle is being humanity sought at first to establish a consciously directed against the chief paradise on earth, then for a long time It may be objected that this would basis and cause of the ruling power of during its evolution, it hoped to find imply the disorganization of "business" whership, and further, that wealth on penal laws, which were at first a deciety, and today, after rejecting all the the limitations of their power, but in No accusation against this or that intermediate ideas of justice, expiation, pressing forward every local and temparticular individual, no infinical ac- free will, etc., again returns the idea of porary measure for the interest of the laboring classes, as well as attempts at today we again return to the first post, are upon no account whatever to be

ON THE OTHER SIDE.

Upholding the Interests of the Workers. Reason Why "They Do These Things Better in France."

It has often been asked, "What would you socialists do if placed in power? This question is a just one and demands an answer, and it is one which many cases those who make this inquiry have a very limited conception of able to grasp the idea, that the fact that socialists were placed in power, implies the existence of a majority of intelligent workingmen, who know exactly what they want and how to get it, men who do not consider those elected members of their own body, as occupying a "higher" themselves (which is the preyalent idea today) and therefore do not "look up" to those "higher" individuals as rsons who through benevolence, good will, socialist zeal or any other persona qualification will be graciously pleased o "do something for them."

Well then, what would socialists do if placed in power? Keeping the above in mind, we may answer, that they would do exactly as those who placed hem there demand that they shall do. What would that be? That they further in every possible manner the naterial interests of those whose servants they are, such material interests being everything which tends to secure to those workers the full product of overthrow of the system of capitalist production, and includes everything which tends to that end. It is eviden History ceases to be a series of individplantation of these ideas upon the
mi scious and endeavors, and becomes
conomic field, will always remain the
moverful and necessary drama. Sopowerful and necessary drama is not a by successed to proving the conformity. POWER, a majority of the whole popu-

lation being necessary to secure this. However, as it is certain that in the struggle for complete political supremacy on the part of the working class will at once bring about this result, we have therefore to consider the action of of primitive times, and therefore con- cities, townships, etc., where they have proud of the comparison. See a Gomp. strikers by contributions out of their tradicts the fundamental evolutionary achieved local supremacy, which carries with it a limited power only.

In such case, these representatives gle of the social classes is constant'y property, and it is equally true that the ling the direct material interests of the done under existing circumstances, such astounding difference? nothing. In nearly all the categories of unemployed citizens to their jurisdiction representative, is the united strength eigarette factories at Chiasse in the at the best possible wage; the support- of more than a million CLASS-CONprimitive forms, but this return is only ing of strikers against their masters in SCHOUS laborets, while behind your all cases, relief from the public funds "chosen" leaders there is a mighty mass if is proposed to reduce are only I franc already represent a higher and more, for such strikes, etc., etc., in short, the having any definite goal, was carried perfect stage. In the philosophy of to-on for divers particular privileges, day the scientific monism, is, in some lated to benefit the producers materially ers them powerless to demand, and sort, a renewal of the ancient Greek and intellectually, and prepare their for iberty, enfranchisement, education, philosophy; in religion, the primitive the last great struggle with their econumbe exploiters

It may be objected that this would one in heaven, and now again it re-turns to the idea of an earthly paradise answer: "That is precisely our object, It will always remain to the merit of for future generations. In the political and everything which tends to that end "Business" is a necessary prelude to the establishment of the collective owner

In such cases the actions of the so

once of theology, indissoluble, and yet derstand clearly that such palnatives confounded with the ultimate aim of socialism, that in fact they are not parreconstruction of the economic system institution of property, which must re. of it, and are only necessary because turn to the collective form, notwith, capitalist society still exists, and that while they cannot be expected to ac workers, under existing conditions.

> In many countries where the work Ing class have succeeded in capturing An incident illustrating one phase of the work of a socialist deputy in France for his constituents, we reprint from "Le Petite Republique," as an example of the attitude of the socialist compared with the representatives of capitalism, on matters concerning the

The Board having been settled, pat-

ur comrade: "For months the valiant weavers' organizations of St Eticane, La Loire and Haute Loire

have ceased working, as a consequence of the continuous reduction of their vages.

"Three brave people, doing the most valuable work, receive no higher wages than one and a half or two francs per

day.

The strike seemed to be finished, after the arbitration between the employees and employers: the latter, however having broken their word, no un-

derstanding now exists.

"The matter is this: Here are 20,000 workers, with wives and children, who have no food. It is the duty of the Chamber of Deputies to take care of them. (Applause from the extreme

them. (Appliance from the extreme Left.)

"As I was saying the manufacturers of St. Etienne agreed to refer the matter in dispute to arbitration. Just as the strike seemed about to finish, and the workers had accepted this agreement, the manufacturers reject arbitration. I call that a provocation of a populace, who are intelligent and devoted to democratic institutions. (Appleause from the extreme Left.)

"Can the Parliament remain indifferent in the presence of these 20,600 workers? M. Le President has just spoken most eloquently on liberty and hamanity. Is not this a question of humanity? (Appliance)

"The weavers did not strike for their own pleasure. After all no one among us likes to be forced to be a party to strikes."

The question now is, to assist thos the question how is, to assist mos-workingmen and their families, and for that reason I propose for their relief a credit of 303,099 francs, in the name and on the principles of humanity. This question is URGENT and I DEMAND its IMMEDIATE DISCUSSION." (Re-

its IMMEDIATE DISCUSSION. (Renewed applanse.)

M. Waldeck-Rousseau requests that
the proposition be sent back to the
Budget Committee. That 'sending
back' too often means complete dismissal, and Deputy Colliard points this out
with precision. He resumes:

"If the committe will promise to make
its report immediately, agreeing with
the government, I shall accept the return. On the contrary I shall still
maintain the urgency." (Applause from
the extreme Left.)

The general reporter at once makes
the engagement requested by the soclassist deputy.

G. C. L.

This then is an example of the ordinary procedure of socialist representatives in countries where a sufficient number of workingmen have recognized the conditions under which they live and the causes therefor. To the average workingman in this land, a similar proceeding on the part of his so-called "representatives" would appear unb lieveable, while strange to say, the usual course pursued, which consists in ordering out every force, military, police, and militia, to crush down the aspirations of striking workingmen, cems to him something quite natural and proper, and he resigns himself to the situation with a stupid fatalism, which would appear equally as amazwho have gained a recognition of the

irresistible power which can be wielded question, and is making efforts to seby their class.

no sudden coup can be effected, which those men whom you look upon as and enduring great hardships are very who are the mouthpieces of your for- workmen of other trades, both in Aussocialist representatives in states, eign brothren, you certainly cannot feel tria and Germany, are belping ers, a Sovereign, and ethers of the same lik approaching the powers of capitalism in an humble and supplicating at- discordant elements in Austria owing to would act up to the very limit of the titude, begging griding favors for the different nationalities forming the power placed in their hands, in further, groups of "organized", laborers, and empire that the whole system may fall then turn to the manly, outspoken. working class, so far as this could by | demand" of Deputy Colliard. Why this

The reason is, that behind the French compels their spokesmen to assume the crouching, stavish attitude of a cur beging for a bone. Your representaives can only be strong in your strength, and your strength in turn can only arise from your intelligence, under which you live, and the reason for the existence of such conditions. When you recognize the idlocy and humiliation entailed in begging favors from those whose power is the creation of Your apathy and stupidity (which you insist in calling the "will of the owners of capital over the laboring forms of government-the will of all the ship of the means of production and people"), you will be in a position to elect representatives who will DO because you KNOW.

The continuance of capitalist suprem acy means for you, beggary, humiliation, want, abject dependence, and moral and physical degeneration. On cherished, are to be found strewed the other hand its abolition means a ife of plenty, manliness, freedom, and pirations, noble ideals, which stimuan ever more perfect development of late men on the road are often found mind and body.

to for yourselves, using socialist repnouthpieces? Everything. There is no limit, except the limit of the power of your class, and that is amply sufficient, if exercised intelligently, to place the enemic centrol of the world in your Slavery and poverty are the fruits of ignorance, while intelligence brings freedom and plenty into being,

FOREIGN NEWS.

Glimpses of the World-wide Struggle of the Proletarian Army for Its Liberty.

A beautiful sign of the working class solidarity which; overleaping the nar-row bounds of race and creed soildarity, is now spreading over world, is to be found in the following New Year's greeting which the united trade unions of Denmark addressed to their Belgian comrades:

Copenhagen, January 1. "Dear Comrades:-Receive, on the oc. asion of the New Year, our best wishes and our very sincere thanks for the great help, which you rendered us last year, during our struggle with the power of the capitalists of our country. We regard this lockout as an engagement of out-posts in the social struggle between the workers and their exploiters, a struggle inevitable, which we must bring to a successful end before we can attain the grand aim of the modern labor movement-a fraternal society based on liberty and equality!

"In this struggle all the workers out in Denmark, we received palpable proofs that this solidarity is not a vain passed. He would eloquently describe word, but a very real fact. The help our brothers abroad, and which amongst them the Belgians. lent us, that followed, the tedious discourses on shows conclusively that the workers of dogma and doctrine, which made the all countries understand the import- children fidget, and long to be out playance of this struggle, and that they are ready to make the necessary sacrifices for our final victory!

"We hope that during the coming year, the workers will find the means f organizing still more closely, nationally and internationally, in such a manner as to become strong enough not only to repel the attacks that may be directed against us, but also to gain new victories for our great cause!

"Long live the Belgian labor organizattions!

"Long live the international labor movement! "For the united trade unions of Den-J. Knudsen."

The establishment of a daily paper is earnestly taken into consideration by our Polish comrades in Galicia. party conference at Przemys'l resolved to take all the necessary steps to transform their, as yet weekly party paper, 'Naprzed" into a daily.

The Ruthenian Social-Democracy founded its first party paper under the name of "Wola."

LET US BE JOYFUL.

A Thousand Corpses on Spion Kop, Cre-ate a "Favorable Impression" Upon "Civilized" Society.

At every step along the pathway of life the idols which men have at first around in broken fragments. High asimpracticable and in consequence What can socialist representatives abandoned. Truth and falsehood, the do for you?" Nothing. What can you ideal and the real, become indistinguishable, and most men after ridding esentatives as your servants and themselves of what they find to be mere useless incumbrances, are content after a fashion, to plod wearily onward in the narrow path which an era of commercialism dictates that they shall

Unquestioned and unquestioning, they accept things as they are, or rather as they see them, and are generally unaware or forgetful of the existence of these broken idols, which at one time seemed the incarnation of truth.

It is perhaps to be regretted that so much that is high and noble in man. should meet this fate, but it is almost needless to reiterate the truth so well known to socialists, that an evil economic environment renders impossible the realization of high ideals, upon the part of those who hold them as a mat. ter sof sentiment, and ignore the eco. nomic basis upon which they alone can rest.

Yet it is not alone, "the good the beautiful and true" that suffers in this age of contradictions. Similes and com. parisons designed to fllustrate the highest point of absurdity, sometimes take on an appearance of reason when compared with things which actually

We have in mind an American "free thought" orator of undoubted ability. and who possessed in a remarkable degree the power of exposing the absurdities of the orthodox churches and their practices, in a manner which was designed to convince many of his hearers, and often did so convince them. The late Robert Ingersoll, the gentleman we speak of, was found of throwing ought to be solid, and during the lock. ridicule upon the church under whose influence his childhood days were the long and wearisome Sunday school lessons, the equally wearlsome sermon ing in the su upon the part of the latter became un mistakuble, a respite was granted, and then, the orator used to observe, as a climax, "they took us out for a walk through the cemetery to cheer us up."

The contradiction between the means employed and the end sought after, appeared so complete that its humor hearty laughter from the audience

part of the old fashioned pillars of the church appeared to us as the highest point of absurdity that could possibly be reached.

For a long time this action upon the

For a long time this illustration served us as high class exposition of the absurd and ridiculous. That a cemetery could possibly possess any quallties calculated to excite feelings of cheerfulness and mirth in any human being, no matter how young and inexperienced, appeared to us so unworthy of consideration that we merely looked upon it in the light of a clever joke and laughed accordingly. But we have since had cause to change our opinion, and another old landmark has disappeared. another idol has been shattered by the way. The absurd, becomes the real, In face of facts as they actually are. the eloquent freethinker's climax falls flat.

This is how the distillusion took place: In glancing over the record of butchery which has marked the last attempt to relieve Ladysmith, in the South African campaign, we came across the following dispatch from London:

The report that the Boers left 1,000 dead on Spion Kopf has created a most favorable impression here, and very few are inclined to discredit ft.

The sight (figuratively speaking) of 1,000 mutilated corpses on this hill top, creates such a favorable impression Austria have had to cease working, creates such a favorable impression and this contributes to make the matfect, why may not the contemplation sidered as a scource of inexhaustible delight?

A thousand unburied corpses torn to pieces with shot and shell, hacked and things which are objectionable to work stabbed with sabres and bayonets, lying around promiscuously in all post-ures, on the rocks, in the gullies, trenches and breastworks of Spion Kop. creates a feeling of cheerfulness and satisfaction among countless adult human beings, seven thousand miles removing this system, has it, in short, away; and all this is told in such an done anything except pass resolutions artless and natural manner, as if it were a matter of general acquiescence, a cause, the effect of which is regarded as reasonable by all civilized peoples.

And yet were anyone so bold as to say that the calm and peaceful aspect of a country cemetery, where all the ghastly signs of death and destruction are carefully covered by the growth of workers? Doesn't the 'poor workman' nature, where nothing could be seen but the simple monuments erected by loving hands to the memory of departed friends, might possibly exercise a cheering effect upon the spectator, he would be regarded as most illogical and ab-But the contemplation of the other sight, as productive of satisfaction, is a statement which passes unchallenged. The recognized absurdities of "civilization" sometimes appear reasonable, when compared with what is accepted as fact.

Whether 1,000 Boers were really slain in this place is not relevant tto the subject. If 1,000 dead men "create a fav-orable impression," 2,000 would no doubt invoke great enthusiasm, while 3,000 might be expected to produce un-bounded joy and rapture. In like man-ner the spectacle of one, two, three or five thousand slaughtered Britons, ould create a similar effect upon other

"civilized" communities. Who are the people who find satisfaction in horrors like these? They are those who consciously or unconsciously support the present capitalist economic system, the existence and maintenance of which necessitates the destruction of human life throughout its every phase. The thousands slain upon the world's battlefields are only a counterpart of the relentless slaughter in the industrial world, on the railroads, in the mines, factories and workshops, where the lives of human beings are sacrificed in order that the world's economic rulers may secure the product which their slaves create.

These things are accepted with cheerful resignation by those who thrive un-der the conditions which produce them, and with a dreary fatalism by those who suffer, but do not understand the reason why.

But when war breaks out, a concentration of these horrible sights produces sense of satisfaction, especially if it

is the "enemy" that suffers.

A "favorable impression" is then created upon the holders of stocks and bonds. upon the capitalists, manufacturers, and all who are looking for com-mercial domination, by which their interests may be subserved; 'by every hypocrite who from the pulpit prays for the "success of Her Majesty's arms" and at the same time preaches the gospel of "peace on earth;" by a majority of workingmen whose "patriotism," race or religious hatred is carefully manipulated in the interests of those, whose economic and political dominance requires that the working class shall continue to supply the raw material necessary to create such "fav.

How well they have succeeded in reconciling their victims to the sight of stronger evidence still.

never fall to show the awful and rimental mouthings which are accepted "morality" today, and the terrible realities which the material interests of capitalist class rule bring forth. And it is upon the class, with which these men's interests are identified, that the glaring, infamous and ridiculous falseplace truths. Socialism is a living protest against the fraud's and falsehoods of our present society, and only in-its triumph can these contradictions dis. appear, when the economic basis which produces them gives way to that era of collective ownership of the means of production and distribution, which process of evolution unerringly points out as the next stage in human progress.

A "Deplorable" Sight.

Taylor of Kentucky has ignored the order of court regarding the election dispute in which he is engaged, and in consequence the Chicago Federation of Labor have seen fit to "denounce" him. Just what is gained by this proceeding is hard to see, but the resolution which contains the denunciation is a most striking proof of the economic ignorance of its framers. It is a confession of helplessness and blindness summed considered flawless. Indeed, some of with capitalistic combinations, instead up in the words "We deplore." This is the larger trusts—probably to gain pub. of reaffirming the old, impractical and its text in full, leaving out the prelimin. ary "whereases:"

but which he is unable to secure ex-

What is the system which permits etc.? Will "deploring" a system help the matter any? If the system permits ingmen, why do workingmen permit the system which permits, etc.? Has the Federation of Labor ever inquired what this system is, has it ever directed the attention of the workers whom it influences, to the necessity of "deploring" it? 'Who are the "pre ferred classes," who prefers them, and why are they preferred? Have these preferred classes any interest in supporting the system which permits, etc. these preferred classes benefit by, and which at the same time injures the vote for the maintenance of that system and does the Federation of Labor ever attempt to show him the folly of such action? Isn't there more "poor work-men" than members of the preferred class, and doesn't the system rest upon the votes of the workmen, and can't the votes of the workmen remove the system? If a workingman votes for a system which sends him to jail, for striving for more wages for his wife and children, does he do this because he likes to go to jail? Does he do it because he is wise, or does he do it because he is stupid? Will "deploring the system" open the jail doors to the poor workman, or close them on Taylor?

What is the use of a guarantee that can't guarantee anything; a constitu-tion which won't work? . How can a constitution which guarantees, etc., be linked with a system which won't permit the realization of the, etc., etc.? If the things desired can be se cured by "eternal vigilance," isn't it nonsense to put the blame on a system? Doesn't the first and last words of the resolution contradict each other? Why not call upon the workers to exercise more "eternal vigilance" and let the system slide? Or to let "eternal vigilance" go to the dogs, and knock out the system? What, in the name of common sense, is "aternal vigilance," anyhow; is it anything more than a "hiessed word?" Isn't it a catch phrase which has been used millions of times. because it has a good sound?

Have the Federation of Labor got any brains in their skulls? If so, has the "deploring" faculty been developed at the expense of the thinking? What is the aim, object, end, sense or use of such resolutions as this? 'What is accomplished by it? Where would society be and what changes would occur on account of such resolutions; say ten thousand years from now? None what, ever. The poor workman would still be going to jall, the Taylors would be still outside the jail, and the Federation of Labor as it is now, stuck in the mud, passing resolutions beginning with "We deplore."

Trades Union Items.

The Cleveland C. L. U. is no longer

the only city central organization that poits the way out of the chaos of capitalism. For some time the St. Louis Trades Assembly has worked in harmony with the Social-Democrats, and s couple of weeks ago the S. D.'s captured the Milwaukee central body, while about the same time the socialists car. ried the day in the Philadelphia United Labor League's election, and the social ists and progressists of Omaha were triumphant in the C. L. U. contest. It the slaughter pen, the publication of is probable too, now that the De Leon the statement we have criticised bears meddlers have been repudlated, that ample witness; that its ghastly ab. the New York Central Fedgrated Union surdity should pass unnoticed, is will make a forward move. It has already adopted a socialist preamble and Yet there are those in existence who platform, more progressive unionists recognize to the full, the significance of are taking part in the work, and the such a statement; men who constantly weekly debates are steadily becoming point out to their victimized fellow more instructive and helpful. For inorkers what this and similar expres- stance, at last Sunday's meeting the sions really mean to them; men who Rev. Dr. Rainsford, a well-known New York pulpit orator, addressed the cendiculous contrast between the senti- tral union, and during the course of his remarks declared that "in socialism is found the truth, and you cannot get away from that fact. Collective owner ship must come." . It is in the central bodies that the best thinkers and work. ers are found, because there the union task is imposed of overthrowing the lists come in contact with the stern, cold structure of a society where the most facts of labor-saving machinery and centralized capital, strikes and beycots -in other words, the class struggle Hence, all the delegates who are consciour' and masters of themselves cannot help but become socialists. We are sure that the delegates of the Cleve land C. L. U. are more than pleased to know that the central bodies in other not taken up with "shop talk," beggin, or "labor legislation" or endorsing some "good man" for office. The year 1900 is full of promise for those who hope for the speedy downfall of the wage-syssystem,-Cleveland Citizen.

The decision of Judge Kohlsant, of the United States Circuit Court at Chi. cage, that the Illinois anti-trust law is unconstitutional, came like a thurder. clap from a clear sky. The reactionist of that state are, completely desed They hardly know whether to talk about a "new law" or throw up the sponge in despair. The smashed law was enacted seven years ago, and was lic sympathy-gave notice that they would move their plants from the state. Resolved. That the Chicago Federation of Labor deplores the system which permits an individual to hold the courts of a state at defiance because he is a member of the preferred classes and at the same time sends to fail a poor workman who is striving for wages enough to feed his wife and little ones, and thus give him a glimpse of the right its lift and liberty and the pursuit of happiness, which has been graranteed him by the constitution, cleared for the Circuit Court decision, want company spend a dollar for ten The events of the last few months in three months subscriptions to The filinois will be poor comfort to the trust Workers' Call and you will soon find

The Socialist Labor party of the United States, in Convention assembled staffirms its allegiance to the revolutionary principles of international socialism and declares the supreme politic class for the supreme politic class for the possession of the power of government. We affirm our situations that the convention and sixtipution, and to histabish the Co-operative Commonwealth.

In the United States, as in all other civilized countries, the natural order of society into two antagonistic classes of the means of production and distribution, and to histabish the Co-operative Commonwealth.

OPEN LETTER

To Samuel M. Jones, Mayor of Toledo, Ohio.

DEFINITION OF A SOCIALIST.

Cannot Represent the Interests of "Al the People." While Such Interests Remain Antagonistic.

Mr. S. M. Jones, Esq., Mayor of Toledo

After reading your letter addressed to Workers' Call, correcting the impression that you were an "advocate of Utopia," and at the same time noticing other statements whose correctness I challenge-I beg leave to submit the

What you say in regard to Professo Herron and his estimate of what is socialism, it being only your idea of what Professor Herron'says or understands about socialism I cannot criticise, because it is mere a relation of what you believe to be Professor Herron's idea.

We leave this question then, and go to the paragraph in your letter where you express yourself in two sentences which alone of the whole letter give full expression to your ideas on this subject so vitally important to me, as follows: "I am a socialist who believes in all the people," and (2) "be lieves in liberty and EQUALITY for the last and lowest man and woman; (3) "I claim no privilege for myself that I am not doing my utmost to secure

No. 1. "I am a socialist," you say. Well, let us see if you are. What is a socialist? Mr. Jones, a socialist is one who believes that under certain economic conditions society has become split up into two great and distinct classes, whose interests are absolutely opposed to one another, between which there can be and will be no compromise, no quarter; victory for one class means the annihilation or assimilation of the other class.

These two great classes are struggling for political power, and as a result of political power, economic power; both see the necessity of capturing both these powers, knowing full well that with political power, economic mastery

These two great classes that today face each other in society are the capitalist class and the working class This same socialist believes, and science teaches him, that anything in nature plant, animal or human, that fails to perform some useful function in so clety must pass away; this capitalist class does nothing to add to the wealth of society, the only function they perform is to collect, rent, interest and

This same socialist knows that th labor, by brain and hand, of the work ing class produces all wealth, and that the working class as a class must take possession of the land and instruments of production and distribution and then operate them for the benefit of their class, the working class. This belief constitutes a socialist. However, Mr. Jones, I notice that you are another brand of socialist, one "who believes in all the people. Mr. Jones, the economic condition called the capitalist system made possible the class from which the socialists are drawn, thus proving that the socialist is the result of a class so clety, and must, as a member of a the possession of the land and tools of production. Thus the socialist as a result of the condition of his existence cannot be a believer but in one class. cannot represent but one class. So you see, sir, he, the socialist, is a product of e class society.

Does this socialist, Mr. Jones, contrast with you as a socialist?

Further, you say, sir, "who believes in "All the people," you all the people."

How can a product of a class society a man made by a certain economi condition, believe in "all the people? Who are all the people? A whole human race made up of different classes, different economic conditions, differen political and social conditions.

What kind of straddling must a man do to be a representative of the "cook" son, the "lord's son," the ,"son of a millionaire?" How can a single human being represent all these classes, with such absolutely different interests? Can one man do it? Let us see if he

This statement "all the people" is funny, to say the least. Let us take a

1st. The capitalist class, owners of the machinery of production, land, etc., who believe that it is to their interest to secure the greatest profits out of the amounts they invest; to buy labor in cheapest market: to sell labo product in the dearest; who believe that ciety exists only to give them fat div. dies. They are in the minority.

ciety is satisfactory to them. These tion; they are doing the best they know how to get rid of it. I agree with them, competition is dog eat dog, and I am one of the dogs. Do you represent this class, Mr. Jones?

2nd. The disappearing middle class, the small shop-keepers who believe in small industry, and competition, who believe in rent, interest and profit, so long as they are collecting them from the working class. They only object to the larger capitalist because he says that with very large industry, with great department stores "we believe in large sales and small profits;" this is death to the little shop-keepers; they can't get any more of the worker's hide; uncertain work for the laborer, he can't run a book at the little grocery store; decreased wages, he has to buy where he can buy cheapest, viz. at the department store; thus the little shopkeeper is deprived of his share of the worker's hide, so sweet with profits. They see their end, and like drowning rats, they struggle for life-which for them is conditional only upon securing profit-the surplus product of the work. ers. They want laws passed to hold down the "big fellows"-enly don't destroy the profit system-we like it, and we want some, too. Reform, anything, everything: only don't ask us to get off the workers' backs."

They are anti-trust, anti-department anti-anything, anti-everything EXCEPT ANTI-PROFIT. They besystem so long as it is possible to exploit the working classes with their little capital.

Do you represent them, Mr. Jones? 3rd. The great working class, the product of a capitalist society, stripped of every economic power. The modern system of machine production has and is fast doing away with their skill, eaving them helpless as babes. Freedom of contract is to them a mockery, social equality a lie; stripped of every right, paupers amongst the wealth they have produced; beggars in a land of

Pictured a giant, the worker, under present conditions is in reality a dwarf; called a sovereign though in truth a slave; living by the permission of his economic masters, a mendicant when a week out of work, and finally the reruiting ground for tramps.

This great class, sir, produces all wealth, makes possible all civilization; yet stands in abject helplessness and fear before a minority of nothings, whose labor consists in clipping coupons and drawing rent, interest and profits, through the stupidity of these ame workers.

This class, to save itself from destruction, will find that its only interest lies in taking possession, through political action, of the land and all the instruments of production and distribution for the benefit of its own members, the producers of all wealth, the modern working class.

This involves the overthrow, not the continuation of, present capitalist society, and the establishment of the socialist industrial society, in place of the present order-or rather disorder. It is from this class that the vast majority of socialists are recruited. (Those few who do not belong to that class, and are still socialists, must look only from this standpoint, must sink their apparent Interests, in the material interests of the great working class.)

Do you represent this class, Mr. Jones?

To recapitulate:

The first class, the capitalist class, pelieve in trusts, monopolies, combines and the private ownership of them for the benefit of their class; the continuation of the present system.

class, believe in a class struggle for little business man and little store-The second class, the small capitalist, and the continuation of the present sys. tem, and only cry out that the big fel-

> The third class say that the trusts are good things for a great society: they are an up-to-date method of producing the necessaries of life, but that their private ownership stands in the way of a proper distribution of those necessaries.

> Let them be larger; so large that each stockholder and dividend-drawer, not in proportion to the amount of money they invest, but in proportion with the abor power expended in production,

> See these three classes, Mr. Jones! Can you straddle all three of them? These three classes with opposed inter-Which do you really represent and belong to, Mr. Jones?

Mr. Jones you are opposed to the idea of parties-political parties. Well, tell us why you organized the Non-partisan pelitical party of Ohio and became its candidate for governor. Was it to demonstrate the futility of political parties? If so, so far as you are concerned

t was a failure. You close, str. with the following: "I claim no privilege for myself or for my children that I am not doing my ut. most to secure for all others on equal

You "claim" "You are doing!" Pray, tell me, Mr. Jones, what can you do? Of what importance is your personality in the great social movement of today?

O SAY WHAT MAY IT BE FROM A UNION MAN

est Economic Arrival.

NEW "SOCIALIST" SCARECROW CLASS INTERESTS EXPRESSED.

Multiply, as the Passing of Capitalism Draws Near,

It has been observed in history that at those periods of transition when an old and decaying order of society commenced to show signs of dissolution, many strange carlcatures of the tendencies which foreshadowed the coming social change, came into being. In same. Judging from the editorial tone these latter days, as the Scripture says, there shall be "miracles, signs and ly- that this letter is welcome. My former ing wonders,"-and the period we are now living in is no exception. Even ocialism is being travestied in new and strange forms and phrases, whose only it, with the means at my command. value consist in the fact that they are an omen of the approaching end of old elucidation, as it has not been undersociety, a clear proof that the minds of stood as it should be. The following, I men are in a state of unrest and uncer- believe, is more explicit and shows the tainty, dimly perceiving the drift of principle for which I contend-namely,

in the minds of most men in some manner connected with socialism, is at present recognized by a majority of the public, who having no definite conception of the nature of the movement, proceed to construct a "socialism" of their own, a "socialism as I understand | the definition of the word. What I die in trade consists of the confused reasonings of individuals, who give them expression in fantastic and obscure phrases, designed to create a "confusion worse confounded" in the minds of their hearers.

The latest of these definitions come before us under the label of "grouped, 'Social Democracy." Socialists have so long used the phrase "classconupon its importance, that the new arrival in the field, who substitutes "group" or "grouped" for "class," may ope to attract some attention from the fact that it sounds somewhat like the other familiar expression.

tle concern to socialists. Those who publican party is truly representative of understand the common interests of the the upper capitalist class. The Demo working class are not likely to waste cratic party is composed mainly of midmuch time in forming "groups," each with a "consciousness" of its own, and 'advocating loyalty to the teachings of such groups." That is a state of affairs which flourishes at present quite as vigorously as any capitalist or misleader of the working class could possi. bly desire. Class-consciousness is a definite conception of the common interests of one class as against those of another, while "grouped consciousness" if it has any possible meaning or object, is merely a definition of what at sas, John P. Reese was forbidden to present exists, each "group" blind to hold a miners' union meeting, and after their common interests, working with he violated "that injunction" by speak what strength the "group" may possess against all outside society, for the benefit of the individuals composing such Debs, "that peerless young leader of the

WONDER AND CONFUSION.

Orator Talks of Remarkable Develope ment of Classes, and Then Denies Their Reality.

Below we reprint part of an address lelivered by a "prominent citizen" at the Chicago Woman's Club in this city on February 7th. This is how the speaker regards the economic developement as it is today, and it is interesting to note the apparent astonishment and surprise which he exhibits in regard to phases which are inseparable from each other in the present social evolution, "Magical," "sudden," "remarkable," are the words used to describe phenom-ena which are merely a logical sequence of cause and effect:

The explanation of the new attitude of the public mind toward great wealth lies. I think, first, in the spectacular growth of individual family fortones, due to the enormous and a most magical developement of America on the economic side since the war; in the second place, in the equally sudden and remarkable developement of the laboring classes, like that of organized capital, and, thirdly, in the remarkable developement in the American interest in sociology.

When a'l this is boiled down and condensed it simply means a recognition of the struggle between the classes, though the words used are well calculated to deceive the average reader, and reduce him to a state of open mouthed wonder regarding these "sudden." "remarkable" and "magical" ap-

The concentration of wealth first spoken of has its complement in the gressman, is a document from expropriation of 'millions of laborers, and this in turn produces the organization of the "laboring classes" as a matclasses to secure their position as rul- bers of the ruling class. ing class, they understanding well that the development spoken of as "magical" and "sudden" carries with it a struggle in this production.

A system which carries with it so many inherent contradictions as capitalism can hardly be defended logically. It is almost impossible for a capitalist to avoid bringing into his speech or destroy others previously made, and

"SOCIETY" ALARMED

Message to Congressmen From Class-conscious Women.

ASKED NOT TO AID SOCIALISM.

Good Reasons Given for the Existence of the New "Anti-Suffrage Women's League."

"A straw best shows how the wind An "Anti-suffrage Woman's blows." League" may seem a harmless enough matter, but we would ask our working class readers to look over the following document, given out as the reason for the existence of this "League" and sea if it has any significance to them and the class they belong to:

the class they belong to:

"We wish to call attention to the fact that, while every woman suffragist is not a socialist, every socialist is a woman suffragist. The home is the great bulwark of civiligation against revolutionary socialism and woman suffrage, or, differently stated, the industrial and political equality of woman is the agency relied upon by the socialists to undermine it.

"The republic cannot afford to put a premium upon cellbacy, although this is precisely what the socialistic state proposes to do. What is needed, therefore, is not the employment for women outside the home and greater inducaments for her to continue to be the competitor of mar, but more homes to organize this excess of celibacy and make it productive to, the state, not only in the way of cilizens but of those meral and spiritual influences which flow from the home and sastain the character and progress of civilization.

"The demand upon the part of women for industrial and political equality with men throws the labor unions into a sad dilemma. The workingman's best blessing is his home, and his instincts

with men throws the labor unions into a sad dilemma. The workingman's best blessing is his home, and his instincts are keenly alive to the fact that these new demands upon the part of women militate against not only his own status in the labor field but against the best interests of the home relation. Just as in many women's clubs, while the great majority of the membership is opposed to woman suffrage, the management of the club and the disposition of its funds are in the hands of suffragists, who are determined and indefatigable who are determined and indefatigable propagandists, so in the labor unions there is a large and strong though often silent element which is dominated over by the second in the late. It needs often silent element which is dominated over by the metalistic leaders. It needs only patriotic and enlightened leadership to discriminate between the true and the false in progress and to yield allegiance to all that is best and most sacred in morals and government.

"But where shall this leadership be found?—that is the question of the hour. It is the question of the hour, it is the question upon which it may be that the stability of the republic depends. In no country is destructive socialism more active than here.

The Socialist Vote. UNITED STATES.

ONE PLATFORM, ONE PARTY.

The outlook for the unity of all revo lutionary socialist forces is decidedly encouraging at present. In face of the absolute necessity of presenting an undivided and uncompromising force to the enemies of labor, it is satisfactory to note that individual differences and petty personal interests are being laid aside, showing that the socialists of the United States are keenly alive to the necessities of the present situation, and are beginning to perceive that while unity is possible, nothing should be allowed to stand in the way of its

Nothing is more satisfactory to the capitalist classes, than to see a socialist movement torn by internal dissenthe sake of the supremacy of their respective cliques. They have not been slow to point out the absurdity of such socialists calling upon the working chains,

chains,

chains,

chains,

chains,

And thou wouldst play the master while A regiment of Scotch militia stubbornly socialists calling upon the working discord and lack of harmony prevail.

These conditions have to some extent existed in the past, and from thos conditions has been born another party which has steadily advanced in numbers and clearness until at present it may be justly considered a class-con

In the meantime the original party has also cleared itself from those disturbing elements which retarded its growth and hindered its effective prop. aganda

As a consequence there are now in the field two formally distinct socialist bodies, with platform, principles and tactics practically the same. There is retain a separate and distinct existence. ciples will ultimately make it impossible that they should continue to do so.

Socialists unite! And when you have done so, urge the working class to imitate your action.

A SIGNIFICANT ADDRESS.

In the columns of the present issue, will be found the address of Governor Andrew E. Lee of South Dakota, at the this city. Amidst a general torrent of useless weeping and wailing, denuncia. tions, futile suggestions and schemes, all lacking the necessary power to en- cently awakened, and arouse them by force them; this address stands out in sending each one a three month's subvigorous contrast. The evolution of scription to The Workers' Call. capitalism is clearly recognized, and the impotence of all schemes to retard its growth and development is plainly seats for their employes, and like law. pression that its author, is a man who arrived at the only possible conclusion, it is said, have signified their disapthe conclusion which is being reached when not serving customers, as such acby an ever increasing number of think- tion gives a slack and unbusinesslike ers, that in socialism alone can the so- air to the premises. So the law is "sat lution of the trust problem be found, upon" instead of the seats, and the em. The other proposed remedies merely show that the trust is a phase in the which cannot be entorced, and the polytically and economically as weak development of the present system of reason why. Yes, "why?"

capitalism, whose significance and ultimate tendencies have been overlooke every Saturday at 36 N. Clark St., Chi- in the pursuit of individual interests, at the postorice at Chicago, Ill., as mail by those whose material conditions are now threatened by its growth. But it is evident enough that Governor Lee has been able to look far beyond his own individual concerns, in reasoning on this question, and has dealt with it in its broadest and most comprehensive sition of advantage, from which he is able to perceive the inadequacy of the various proposed panaceas, which are more the results of fright and desperation on the part of their advocates, than a calm and dispassionate study of the subject. There is but one point, and a most important point, which is not clearly stated in this address, which otherwise covers the complete socialise position. It is the fact that in the modwhich will play the leading part in the transformation of society, for which the trust is preparing the way. With this emission which perhaps could only be expected from the revolutionary socialist who has nothing to lose, this address is extremely significant, as showing the trend of modern thought towars scientific socialism. In conclusion we would call the attention of our readers to another fact that Governor Lee has evidently overlooked. He states that the present conditions in demonstrating the necessity of a change of our whole social system, "must soon give birth to a political party organized to put it into force. We would merely remark that such a party already exists for that identical purpose-the So. cialist Labor party. The close application which Governor Lee had of necessity to give to the study of this subject, may perhaps partly explain this lack of observation on his part.

THE BOER.

If on the circling winds thy banners of liberty, the emblem and the seal of of man against man for material nerights,

To man made sacred by the patriot-Then bathe thy furrows in the tyrant's While down the ages Time will hurl

thy tale, And carve thy deed's on Fame's imperishable scroll;
But if thou claim dominion over Afric

Against this formidable array, whatcan "anti-trust" forces do? They cannot appeal effectively to the working classes, the latter being instinctively at least, cognizant of the fact that the choice of a multitude of small masters or a few large ones, is of no value to them. They themselves represent an almost bankrupt middle class who are as their opponents are strong. This

weakness is disclosed in the different emedies proposed at the last anti-trust convention, not one of which they have power to enforce. It was a fitting end to such a gathering that it should close

If you would everything to the cause of money-mak, reach him, you must exterminate the whole system of robbery. When that is done, he must go to work or become a

social extle. monopoly till doomsday, but so long as we do not deprive these institutions of their ownership of the means of production and distribution, we need en money and the means of money making tion. The remedy will be found in an monopolies are the fruit. Revolutioniz-

private for public monopoly. Crush the rule of money and establish the rule of men. Do not destroy the machines, nor blot out the details for swift and perfect handling of commodities, but make things for people to use, not to fight over, and maybe die later for the want of. Produce and distribute wealth for the enrichment of the race; for the gratification of needs and the satisfac tion of worthy aspirations; not for private profit and plunder. Such a policy can be squared with the Declaration of Independence and the Golden Rule, Such a policy will destroy public and private rascality and give birth to ; new social life of which the people are capable when they are delivered from the dread of starvation and death.

How are the details to be arranged? I do not propose to go into that. No system ever had a fixed line of unchangeable details. Fit details will be supplied as the requirements of the system dictate. Details will come fast enough when the principle has been agreed to. The details of the present have predicted fifty years ago the dotails of the present business system; no man can foretell now the details of any system fifty years hence. Details as the fathers do,-Ex, change every day, but one thing is settled: a set of details which enriches 5 per cent of the population at the exspeedily as possible. There is only one question involved: "Shall the blessings of God and the ingenuity of man be monopolized for the benefit of a constantly narrowing column of plutocrats, or shall those blessings be appropriated o the use of the whole people? that question is answered in the interest of the majority-the details of our new ife will adjust themselves to harmonize with the principle of equity upon which the system is built.

These propositions are met with the rejoinder that "this is socialism." Granted. That does not disprove, but rather confirms its truth! The trust is socialistic. It is private socialism. It is unregulated socialism-run for the ctalism, broaden it out; destroy socialized piracy and erect a system of fra ternal co-operation in its place. But dissenters do not go further than to de. clare that "this is socialism," as though that were sufficient to forever put it "You are a Christian" was once claims of Jesus' followers. It did not are an abolitionist" was once a powerful argument against the abolition of chattel slavery. The sail boat twitted the steam boat; the ox cart ridiculed the stage coach; the stage coach made fun of the locomotive, but the facts were not changed. The best will survive, as it has survived. Socialism must succeed capitalism in the natural order of progress, and if you will not recognize it now I shall not quarrel with you. Time will furnish the argu-

ment. These changes are not within the limit of an ordinary days' work. The conversion of production for private profit to production for the general welfare cannot be brought about till the Trust of Trusts-the all-absorbing, alldominating, all-owning monopolist has taken possession of the country and forced the people, in self-defense, to expel, as this monopolist has in turn expelled from commercial existence all with whom he has been at war. The people are slow to move and patient in bearing burdens, but there is evidence that they are commencing to see the hopelessness of any attempt to regenerate the middle classes of society. Public ownership, already a well-defined political issue, must soon give birth to a political party organized to

put it into force. The process of political and economic evolution through which the country must go before the crisis really comes, will be marked by brutal exhibitions of trust practices. It will be marked be the smashing of laws, the mixing of endless anti-trust nostrums swiftly followed by their judicial overthrow. The period will be red with a continued policy of foreign conquest and an attempt to substitute a political empire with its army and tinseled institutions of force, for the Republic of Jefferson

This is the logical outcome of the concentration of wealth and the diffusion of want. . An empire of money must have an empire in government to sustain its power over the people. The history of this period will be famous for the degradation of the American work. ing people to the level of our newly acquired Asiatic brethren, and for a waste of wealth by the triumphant plutocracy such as history does not equal. But in forks of the road, where one route lead's to the death of freedom and the other to liberation, the American people will rise to the call as they have risen to neet every past crists. They will exerminate the empire of capital, expel the capital lords and erect on this continent a system of life at once natural in its growth and in perfect harmony with the teachings of Christ,

Here is typical capitalist reason given a mine owner, as to why the wages of the anthracite coal miners have not een raised, with the increased price of coal. He tells us glibly that their wages were not reduced when coal was ow, adroitly concealing the fact that wages had already reached the limit of a bare existence, and that in conse quence, further reduction was impossible.

MARX AND DARWIN.

The Great Italian Scientist Ferri, On Darwinism and Socialism As Related Truths.

(Continued from last week.) The march of evolution in nature is characterized by the fact, that none of the later evolutionary phases destroys verything that made up the preceding me; but removes only the objectionsble, pathological phenomena. Such is also the evolution and social developement of mankind. No one desires to remove the good sides of the present socio-economic structure, but it should be kept in mind, that this structure, though, on the whole, more perfect than the older ones, though it represents a higher stage of civilization, it is still, in some respects, inferior to them. Theworkingman of today stands physically and mentally, higher than the ancient slave or the subject peasant of the middle ages; he enjoys personal liberties and greater rights, but this is offeet by the fact that he is forced to carry on a perpetual struggle for his daily bread, while the others had an assured material existence without fear of starva. tion, because this was necessary to the interests of their masters, .

Therefore, socialism, acknowledging the good qualities of the present bourgeols society, acknowledging its merits and gains for the development of civ-Sization, desires to remove just these bad and injurious sides of the present. structure, and wants to add to the personal liberties, and political rights, the certainty of material existence, and this, through the conveyance of capital and means of production to society.

There are some people who fear, that such a reconstruction of the socioeconomical organization, wil carry with it, the destruction of personal liberty. This is a natural result of another law of evolution, which Spencer formulated in the following thesis: "Each, already attained stage of development, becomes an obstruction to further progrees.

After having conquered one of our ideals, after having struggled for it in the course of social evolution, and at last attained it, then again, after we have grown to love, and to recognize certain institutions, it is only natural to fear, that through new reforms we might lose some of our attainments Socialism, however, does not aim at the removal of the already gained political and social rights, or freedom of thought or action, it desires only to add to them the economic freedom, which may be attained only by the introduction of collective ownership of capital and means of production. Without the economical freedom, all other liberties and rights are but illusions instead of realities. There is no thought of removing all property, because property in all the things necessary either If a railroad company kills a child its parents should be satisfied with damages of \$1. Children are a source of expense to their parents and of no percularly benefit.—Supreme Court Justice W. S. Gummere, of New Jersey.

The railroad company kills a child its food, or clothing and home utensits for food, or clothing and home utensits for single individuals and whose families will always remain; only capital, in all the things necessary either for food, or clothing and home utensits for single individuals and whose families will always remain; only capital, in all the things necessary either for food, or clothing and home utensits for single individuals and whose families will always remain; only capital, in all the things necessary either for food, or clothing and home utensits for single individuals and whose families will always remain; only capital, in all the things necessary either food, or clothing and home utensits for single individuals and whose families persecuted in the company of the production, etc., must be owned collectively by the people. Quite futlle, however, are the objections, that, when men will no longer be able to collect values, and to pile up fortunes for themselves, or for their families, and when they will have a free use of lective property and institutions, they will lose all the desire for work. though the Social Democratic party work negligently. Already today we convention at Indianapolis, beginning see collective property, like communal vate ones, and also institutions, the access to which is free to all, and we do labor organizations will seek admission, not notice, that they lessen anyone's desire for work. It is only necessary to tween the S. D. P. and the S. L. P. extend this, already existing institution which repudiated the odious De Leon- of collective property to the means of communication, land, machines, and all the means of production. mitted to union, and we are in receipt of need, however, be no fear that all will many letters from prominent party use railroads or vehicles to such an extent, that there will not be enough There is every reason why progressive suddenly introduced, and even then rangement. Although many of the public functionaries have today the they do not use them excessively. Just such would be the case, if these means desire of using it would be counter. balanced by some other egoistical meegoistic motives and impulses accommodate themselves to changed conditions. Above all, however, where everyone will have an ascertained existence and an economical markedly, and will make place for the sense of the solidarity and unity of all. Socialism aspiring to such an organi-

and autonomy of the individual; on the contrary, from the present exaggerated logical phenomena are to be rejected.

In the chapter XI (Evolution, Revolution and Overthrow, Socialism and Anarchism) Professor Ferri deals with the last argument which is commonly rought against socialism, to show its disagreement with the theory of evolu-Socialism, they say, hopes to hange the aspect of the world suddenly by means of artificially introducing arrangements, while evolution progress slowly, step by step, using means given by nature itself. Professor Ferri most energetically repudiates this insinuation and says that scientific socialism never had any desire of introducing sudde and articficial changes into society This reproach may have had so ing when made against the older Utopian socialists, who believed, as some of the most radical liberals, believe yet,

ples of a future state were given us by Utopians, but this was exceeded, in morals and government, ciety, which proclaiming the liberty of The scientific socialism,

gradually, and until the transformation bring on g catastrophe which will de-has ripened, no artificial and forcible stroy the best, the most sacred, all those in the social structure, will be success. that at present exists. We and the ful. Besides, like a biologist, who having but a germ, cannot, with any cer- things." tainty draw the picture and qualities of the individual that is to come out of it, so in like manner socialism is not able to draw in detail the picture of danger which lies in its intelligent use the future social structure, to which it by the other sex. aspires; it may only show the road along which its development will march and does not consider it worth ROAD TO POWER MORE STRAIGHT while to answer the same unscientific and foolishly repeated objections of its THE BALLOT IS THE SOLE ARBIenemies, as to the details of the future

The usual processes of social evolution are, however, evolution and revolution. By revolution Professor Ferri understands not a violent overthrow, but the last act of secial transformations, which for a long time have been preparing.

Today, according to his opinion, we are just in the epoch of such a crisis. Everywhere it may be seen and felt, that the present bourgeois society is haken and burst, from the splits that are showing themselves on its body, vapors of blood, and the groans of the miserable press through, thus showing, that inner subversions have under-mined the basis of its existence. The scientific socialism does not incite to violent actions, on the contrary,it condemns them, because it knows that the hour of an open rupture has not struck, the transformation has not matured yet and therefore, at present, it endeavors only to spread its ideas over the masses of society, and to inoculate them with the necessity of social change. The words: "Proletarians of all countries, unite," do not mean anything more than this: As soon as the masses of the proletariat become conscious of this idea, as soon as they come to understand the necessity of the transfer of all capital to society, the transformation will be an easy one, and perhaps even without any bloodshed like in the English revolution of the seventeenth century, or that in Brazil achieved by the overthrowing of Don Pedro's It may be necessary to use force-but for today, we can hardly

It is evident, Professor Ferri concludes, that scientific socialism has no thought of changing the social structure suddenly, and that it has nothing in common with anarchism, which is through and through individualistic, and hopes, by means of violence against individuals or a sudden revolt to attain a social reform. For the support of this assertion, he cites the open let. ter of the Italian Socialist Labor party, written after the assassination of Carnot, in which the party strongly condemns that insane action.

(To be continued.)

ones, bad ones, indifferent ones, all together, consciously and unconsciously, will furnish the motive power necessary to move society to the next stage. whose economic basis must be that of

One point here I nearly forgot-you "party idea." You forget that no class can act effectively for its own benefit except as a political organization; this is too plain and needs no argument to back it.

This definition of socialism; this mis. sion of the socialists, based upon the class struggle, is one that has rallied to its support millions of the working class, all the world over. Today the thrones of Europe tremble at its growth and menace, which no repression could check. At Paris, capitalist society is panic-stricken because of a funeral parade of 6,600 socialists, and you, Mr. Jones, if you wish to get a correct idea of socialists and socialism, read the works of the militant socialist writers of the world.

Respectfully. R. A. Morris.

Society Alarmed

absurd and contemptible statements. which are in common use among a class who feel that their economic su:

premacy is threatened.

Having commended the "home" to the tender mercies of capitalism, the antisuffragists then deliver themselves of a semi-religious and "moral" (tirade.

that society is a dough which may be the character and progress of civiliza formed and reformed at will, by a few tion," "discrimination between the truparagraphs of the statute. Such sam- and false in progress," "yielding allegiance to all that is best and most sacred

according to Professor Ferri, by the po. What is the meaning of these hack-litical legislation of the present so neved phrases? Only this: They are the clouds of dust with which the capiall men, entangies them in a net of talist classes hope to blind the eyes of paragraphs, court decisions and ordinsion by torrents of solemn and stupid basing upon the latest results of words Stripped of their "moral" garb, selence, knows that the evolution of they say to the working class, "If you progresses along the road of dare attempt to secure to yourselves natural development, slowly and the full product of your labor, you will efforts to bring about sudden changes things most worthy of preservation, class which we represent are those

Not only are the anti-suffragist women opposed to the franchise for

What is the meaning of this sentene "IN NO OTHER COUNTRY IS THE AND EASY THAN HERE, WHERE TER OF POLITICAL DESTINIES?"

This is a truth which socialists incessantly preach to those workingmen whose folly at the ballot box, is the security of the exploiting class. The possible fear that the ballot may be used against them leads to the discussion of the feasibility of depriving the workers of its use. And in percelving this the women of the ruling classes display a consciousness of their interests which should put workingmen to shame. If intelligence were the qualification for the franchise, these antisuffragists are clearly entitled to its use, far more so than the workers, whose indifference to their class interests leaves them an easy prey to the exploiting capitalist. But these women know well enough that while the se curity of "property rights" is guaranteed by the stupidity of the working class, there is no necessity for them to selves. They see that the only possible danger to their interests lies in socialism, and therefore every prevention of the extension of the franchise, and every curtailment of the voting power which now exists, are matters of importance to them, They understand that the "road to power is easy and direct," that the use of the ballot can place the power in the hands of a class whose interests are hostile to theirs, and naturally enough, they want this road blocked.

The "Anti-suffrage Woman's League" is founded entirely upon the recognition of the class struggle, from the capitalist point of view.

Who Are Our Rulers?

A member of the London chamber of ommerce writing on the "open door" policy in China after showing the American capitalist class that their in. terests coincide with England's in this matter, in the conclusion of his argument clearly and concisely states the end and aim for which modern govern-ment is instituted, what the ruling interests of the present day consist of, and the dominant factors in guiding and controlling that interest. He says:

I will say this, that inviting expressions of opinions and discussions on subjects like this will be of inestimable value, for it will attract the attention of leading COMMERCIAL MEN and An Open Letter (Continued from page 1.)

I had thought that, that peculiar ides of the goodness, badness or indifference of individuals having any perceptible effect upon the movement of the world, was an exploded notion.

Individuals have come and gone and the world has gone on without them. This you cannot doubt.

Mr. Jones, let me be plain with your You or no other single individual can move the society of today. Not until the great majority of society are ready will they move, and then, men, good ones, bad ones, indifferent ones all to Marx has observed that "the execu-

Marx has observed that "the executive of the modern state is but a committee for managing the common affairs of the whole capitalist class." Read the above extract again and see if it is not in every aspect a complete as given here. The socialist bases his ideas upon the observed structure of members of the capitalist class often confirm his statements to the very letter, as they do in this case.

A DOUBTFUL BAIT.

French Statesman Attempts to Divert the Attention of the Workers by Indefinite Promises.

Waldeck-Holisseau has written the preface to Boncour's book, "Economic Federalism," in which he says: "The law has placed in workingmen's hands an instrument of social evolution by the pacific accession of wage-earners to industrial and commercial property. This evolution may be brought about by the syndicated federation of labor."—Chicago Tribune.

M. Waldeck-Rousseau is a trifle obscure in this matter, but the French working class have a definite conception of what they want, which will not be disturbed by any effort on the part of Waldeck-Rousseau or any other capitalist statesman. Whatever laws can be used in the process of trans- the capitalists-that is to say people forming individual property in the who live by percentages or the labor of means of production, into collective others; instead of by fair wages of their property, will be so used; and whatever own. . . modern society, and the assertions of that class. The workingman's vote was also never intended by those who weapon against their interests. But so cial evolution cannot be stopped or stayed. All signs now point to the fact that the present ruling class in France are gradually being shorn of political power, by the rising intelligence of the producers of all wealth. It is too late now to attempt to side-track the classconscious movement of the French workers, by holding out the bait of 'acquisition of property" on the part of the wage carners, under the presen system of production. If such acquisition were possible there would be no reason for the socialist movement and the French, workers are intelligent enough to know this. M. Waldeck Rousseau and his class are evidently coking for a soft spot to fall on. It is the beginning of the end for them.

Description of the Funeral of a Famous Socialist.

TOLD BY CHICAGO COMRADES.

tetariat Strikes Terror to Parisian

Paris, France, Feb. 12, 1900. Yesterday we were a part of those es which are peculiar to the European socialist movement and more particularly characteristic of the French. Pierre Lavroff, an old Russian comrade, a member of that great body of exiles from the dominions of the Czar, after having spept a long life in the battle of the proletariat had died at the age of 77 and was to be buried under auspicies of the French socialists. Long before the hour for the funeral the socialists and revolutionists began to gather in front of the home of the blocks with those who had come to pay eloquently than they of the curse of their last respects to the old soldier of capitalism. revolution. But what struck the of police that were everywhere. Turn and white stripes that marks the Paris- of over \$00,000 copies a day, while every ian gendarme. It so chanced that as we little town has its local organ; their whom we had previously met, and who having been some little time in Ameriman, together with whole libraries in the spoke English. He carried a long the native French; the far-reaching parcel, carefully wrapped in brown paper which it was easy to guess was the old red banner of the International proletariat. We wondered at the wrappings but said nothing and later developments showed the reason for their As we approached the house there was a sudden commotion among the body of police and an officer came forward and informed our companion that no red flags went,-or at least the

ally larger. A marvelous wealth of floral offerings from the revolutionary this later. workers appeared. To simply enumerate the bodies sending these would be to exhaust the space that this letter must take. The wealth and ingenuity of the famous French florists had been me say to all who are basing either taxed to honor the bier of this despised hopes or disappointments on such ideas Russian exile. Perhaps the most in-Russian exile. Fernans the treating and suggestive was a great window of a book-store on the contiby the exiles of Siberia to their fellow

that while the plain red flag would not be allowed on the streets, a banner with inscriptions might be any color. In compliance with this condition a socialist ody had attempted to enter the line also I shall hope to have more to say with such a banner. Undeterred by at a later date. veneration due the memory of the dead living, the representatives of capitalism had pounced upon the emblem of the unity of labor and torn it from its pos-

Arriving at the burial place, a number socialists prepared to pay their respects to the comrade who had finished his fight. Bur scarcely had they begun to speak when the noise and tumult of fighting again arose. Two memorial banners in the midst of the assembly seemed to display too much of the den color, and regardess of that sancteancity of the tomb, which even the savage to some degree respects, these gouldsh representatives of the

rushed upon those who were carry their comrades assistance and then followed one of those scenes that testifies to the democracy of the French socialist movement. The tall hats of parliamentary deputies and municipal councillors were struggling side by side with the slouch hat and battered cap of the laborer, and if the truth must b told the tall hats were getting the hardest blows. At last Deputy Viviani succeeded in getting possession of the con tested banner and wrapping it around his arm told the officer in charge of the police to touch it at his peril, and prom ising to account for any results that might follow to the officer by giving his official promise to appear in court if needed and also premising that the banners would not again be displayed. So again the red flag went down and

capitalism scored another victory, but I think that everyone who saw the com bat felt that a few more such victories and the citadel of capitalism would fall. For such actions speak louder than words and although the speeches which followed, by Vaillant, Lafargue, Viviani and a number of others were full of inspiration and instruction for the suf fering workers of Paris and the world, deceased, situated in the Rue St. Jac-oues in the Latin Quarter of Paris. The rounded them and shut them out from narrow street was soon crowded for those they were addressing, spoke more

As for the French movement in gene American visitor was the vast number ral, suffice to say that it is an inspiration to an American-to be in the midst where you would you saw a mass of of it. Their wealth of periodicals; their blue capes with the peculiar blue cap dalles alone have a combined circulation were on our way to the place we fell in extensive literature, containing in transwith the secretary of the Guesdelsts, lation all that is valuable in the English language and much from the Ger and powerful organizations, and various and ingenious means of propaganda
—all fill the American socialist with a sense of mingled pride and shame, pride as a socialist that he is a part of this world-wide revolt of the oppressed. has contributed so little to the accomplishment of that revolt. Yet strange as it may appear we find that every European socialist that knows anything

cent tendency in the European move-ment to become a reform movement and to drop its revolutionary character. Let to cast them aside as soon as possible nent and who has any power to draw conclusions or to see facts, but will realize that the doctrine of so-called ded to the intensity of the situation. The Marxist socialism, with the materialispolice were massing, to the number of tic interpretation of history, the classseveral hundred at the entrance to the struggle and the proletarian revolt as when at last the procession moved on that it can no more be controverted toward the cemetery with the long line than can the facts from which it is de-of floral tributes, reaching several duced. A phenomena which is so often pointed to by American and English thusiastic socialist workers, and the reformers of the appearance of Berntones of "l'Internationale" chanted by stein and his followers, if they but knew the whole vast body rose on their air, the facts of which they talk, would be one could not help but feel that he was kept as quiet as possible. It proves too in the presence of a power before which much, it simply shows today, Marxism the capitalist tyranny of Europe did is the standard from which deviations well to shudder. As the procession are measured. It has now reached the moved on, the band of Russian socialists position that biological evolution reached some years ago when it had be tensity of the scene by chanting the so thoroughly established that there was no denying its fundamental principles and yet the orthodox sentiment of the time was against it. It was then was broken by shouts and cries. The the fashion for pseudo-biologists to tel how they differed from the doctrine of on either side of the procession rushed evolution. So it is today in Europe toward one spot. Cries of "Vive la (outside of England) with socialism. Vive la Sociale!. A bas la Every reformer or sociological worker Police" mingled with commands curses no matter what his relation to the sociand the tumult of fighting arose. The al question must begin by stating his attitude to socialism. Steps on the Road Toward Socialism-The Ballot Box Versus the Pawn Shop Route

"Charity" "business" and municipal socialism" are happily combined in the dea which was put in operation a few months ago in this city, and which resulted in the establishment of a muni-cipal pawn office. This institution, it is declared, will pay to the stockholders a dividend of 6 per cent. profit on capital invested, and so certain are many of them of its ultimate success that it is already considered a "gilt-edged security" amongst capitalists. It is a 'charity" that not only pays, but which carries with it a reputation for "philan-thropy" for those who have invested valuable asset in the business world, Stripped of the humbug of "charity" which has beeen thrown over it as a cloak, it will be seen at once that it is purely a business venture, (and the results show that it is a good one) that

In the world of "business" this venture is exactly on the same footing as all other combinations of capital. Like the department store it destroys its smaller competitors, by selling at a cheaper rate, doing a large business on small profit, rather than a small busitess at large profit.

it is no more socialistic or philanthropic than the department store, that bugbear

The individual pawnbroker whose rade is being diverted to the municipal oan office, looks upon it with much the same feelings, as the small dry good merchant looks upon the great department store, which threatens his exist-

Amidst the general howl raise against the great producing and distrib iting concerns, there has been no vo heard in denunciation of the municipal loan office. Its character as an alleged 'charitable" enterprise has enabled it to pass unchallenged, and the fact that the individual loan broker has never occupied exactly the same position in the public estimation as the ordinary "business" man, has also contributed to

its immunity from public denunciation As far as the working class are con-cerned, the existence of the municipal portance. In countries where they have been established for many years, it has never been contended that the struggle for life upon the part of the proletariat has been noticeably eased. Even in France where the "profits" are used in aiding sick paupers, the tremendous significance of the working class movement, which results from the genera condition of the proletariat, as a class shows how utterly futile to relieve the vast mass of poverty which capitalish generates, are such institutions. And yet a concern in the United States which pays 6 per cent. in dividends to its stockholders, is heralded as a sovereign remedy against poverty.

The truth is, that generally speaking, the wageearning classes are not possessed of much collateral upon which this municipal loan office would be willing to advance money. Furniture will lewelry and other portable valuables the masses of the workers are not over-

Like nearly all other schemes of mu nicipal ownership, this idea of making he state act as pawnbroker, is inthe main an effort to buttress the failing fortunes of the middle class, to mak hings tolerable for them, so that capi talism may have a somewhat longer lease of life, and to effect this it is dubbed a "step towards socialism" in the human commodity under his hamorder that its promoters may be able to mer, but the march of capitalist pro cover themselves with the mantle of charity" while extracting their six per cent., and that the working classes at state of silent and stupid admiration of the brand of "Socialism" inaugurated by their spollers, who are only too eager to "do something for them" in

"Municipal pawnbroking," charity, and six per cent profit! If these things e socialism, a definition of capitalism is badly needed.

When the little middle class for whos relief this concern has mainly been established, are no longer in possession o any valuables upon which their "unthe state, will advance cash, they pawnbroking don't hitch well together, that the pawn shop is a necessity of no longer be needed when its cause has disappeared, and that the "steps tothe ballet box instead of the pawnshop.

THE MUNICIPAL PAWN SHOP, "WANT TO KNOW, YOU KNOW,"

Applicants for Employment Must Disclose Their Private Affairs, Past and Present, for Inspection.

For a long time past the machinists at this place have been working under conditions that, according to their statements, are so rotten as to beggar description. Each machinist must, from each week's pay, leave on deposit in the hands of the company one day's wages until the sum of \$25 shall have been reached. This sum of money they say is confiscated on certain conditions. Should the little brass check with each man's number, used to register in and out, be lost, the company deducts one hour's pay—whether it be 10 cents or 3 cents. The cost of this little sheet brass check, one inch in diameter, with a number stamped on it, is less than half a cent; all to this the trouble of eplacing it, it would not reach one ent. Pretty good rake-off on brass chips.

One of the machinists informs us that

ent. Pretty good rake-off on brass hips.

One of the machinists informs us that here are no fractions of hours paid. That is, if he worked 10½ hours, or 10% ours, or 10 hours and 55 minutes he sould get paid for only 19 hours.

When a machinist applies (or, work, is handed a blank, nearly a yard long, of fill out. Among the questions asked hereon are the following:

Date of application, Position desired. Full name of applicant.

Age.
Post office address.
When and where were you born?
Are you single, married, or widower?
If married, how many children have
Oi, and are they all dependent upon

sition?

Do you use intoxicating liquors, and to what extent?

What experience have you had in the packing and provision business and with whom?

Do you receive any income besides your salary? If so, state amount and from what sources.

Are you possessed of or entitled to any independent means or private property? If so, give full particulars. Have you ever failed in business or made compromise with creditors?

If so, give name of firm, giving amount of assets and liabilities.

Give name and present address of assignee.

Has final settlement been made? If so, on what basis? Give name and address of three larg-

Give name and address of three largest creditors.

Have you ever applied for a bond to any bonding company? If so, state the name of the company and the name of the employer who required bond.

Have you ever been refused the issue or continuance of bond by any employer? If so, give particulars.

Is there any circumstance in connection with your past record that would prevent your being bonded by a fidelity company?

Give the name, occupation and post office address in full of five or more persons as references, not previous em-ployers, who are well acquainted with you and who are not related to you. Give full particulars of your occu-pations or employments during the past ten years. Give full disposition of your time for the past ten years, whether employed or not.—Machinists' Weekly Trade Reporter.

When the chattel slave mounted the nuction block, forty years ago, for the inspection of would-be purchasers, his physical history and past career were tioneer, whose duty consisted in selling gress has reversed this process, and the wage slave of today, not only sells himelf unaided, but also discovers every the same time may be reduced to a fact in his past life and physical and material condition, which might posst-

A STERN NECESSITY

Trades Unionist Advocates the Use of the Ballot.

POLITICAL ACTION BY UNHOUS.

An Economic Struggle Which Must Sooner or Later Express Itself Politically.

Labor's industrial through political action is not a new phase of the labor question. On the contrary, it is perhaps one of the first questions evolving out of the struggie between labor and capital, and has for years been discussed by the most earnest workers in the trade union movement who contend against such action.

It would be unjust to say these men are insincere. I know many who believe it would be annihilation to the trade unions to discuss politics in their meetings, to say nothing of entering the political arena as a class. Against those who hold these views we must discuss this question. It is not only in that of the health of our own minds that we should struggle to understand the succession of causes which has developed the labor question from that of a local struggle to that of a national struggle, finally culminating in the greatest international struggle of the human race. In vain call ourselves trade unionists until we comprehend these causes, for until we shall suffer ourselves to be led by selfishness, and therefore much of our energies is wasters' standpoint, and as his power to en-corce these "rotten" conditions upon his have penetrated the labor question far slaves, rests upon the action of the lat- enough to see the absurdity of an individual fighting the evils of his craft singlehanded, it requires but another this custom by taking away the power step to see the natural weakness of the which enforces it, the sooner these "rot- strongest and best organized craft which enforces it, the sooner these "rot- strongest and best organized craft ten" conditions will disappear. Go for against the powerful influences that

Previous to 1873 there was little agi-tation in fayor of the working classes Poverty was so slight that public and private benevolence sufficed to deal with it. It presented no problem for the solution of society. At this period there were few who were aware that evolv-Ing out of our ladustrial system were certain forces which were dividing society into two distinct classes. In the early development of industry in the United States, when the tools of production were adapted to individual use and each man owned and brought his own product to market, the worker could get on his dignity and demand more pay, and succeed. But this was not because his labor was worth more one day than it was another, but because he owned and knew how to use the tools of production. This was the dignified point. But things have changed. The implements of production have passed out of the hands of the workers into the hands of the capitalists. And so has the dignity of labor. It was at The "social evil" is an industrial evil. this period that the seeds of trade.

The wages of sin are death," but not unionsm began to germinate. Men be this period that the seeds of trades gan to realize that, though they still had the "declaration," few had independence, that, as they possessed neither from with your past record that would prevent your being bonded by a fidelity company?

State name, address and occupation fallen would peter out if conditions of your parents or other nearest relative.

The profit and honor of rescuing the earn a living was by selling their labor power to those who had now become the owners of the tools of production. With the unemployed increased. At this period another truth was forced upon the wage worker. Heretofore he was accustomed to look upon himself as something superior to the "pauper labor" of Europe, and largely with the chattel slave of the south. Now he sees himself their equal only, while the difference between him and the chattel slave appears as one of degree, for, while the chattel slave was ones. The supposed axiom that "the placed on the block and sold to the whole is the sum of all the parts" is an highest bidder, he has an opportunity of old fashioned fake. The whole is less seiling himself on the installment plan. The appearance of independence is kept up by a constant change of employers and by the vain delusion called "free-

division in most every line of industry which limits the ability of the employe form the links of the chain which binds the toller. Unable to secure the means to materialize his art. he simply becomes the animated part of a monstrous industrial machine and a dependent of the owner of the ma-chine for an opportunity to earn bread. The centralization of the implements of production into factories brought with it a large saving in time, cost and energy, which, in its turn, brought about a general displacement of labor power. In proportion as this evolution proceeded. the problem of the unemployed grew in the various crafts into organizations. In these days it required skill and long training to do the work, and only those engaged in a certain line of industry could endanger the positions of those engaged in that craft. But the machine has so simplified industry that today bears down on these fortunate enough

The Socialist Vote.

Last week an event was "celebrated"

all over the United States, the day in YOUR SELF-and celebrate question being observed in consequence onage in the history of this country was ushered into the world on that date. Birthdays seem to be an unavoidnecessity, and an inalienable right" which every human being can claim, and like most other "rights" of side on condition of their being able the same nature under the present system, the possession of a birthday is secured and certified to each individual probably because it cannot be used to produce surplus product for those to hom the earth "legally" belongs. Seethat this is so, we would draw the not only George Washington as well as all other human beings are entitled to a irthday, but that the creations of the and brains of men at some partiular date, take a tangible and material hape, which may be referred to as the day of their birth, and celebrated ac-

All this is merely introductory to the matter about to be alluded to. We wish to apprise our readers that with this The victory of Republican or Demo. the "Workers Call" completes the first year of its existence, and in consequence the celebration of this epoch having observed this, have determined making event is now in order.

celebrate this occurence. will 'not imitate in this respect the example of his Country" in long winded speeches. which were abominable and hateful to and against which the latter spepretended adherence is easy enough could lay down rules for the guidance keep pace with it.

by the earnest efforts of a few hundred and the workers who are seduced into determined socialist workers, men who supporting their election are in reality know, what they are struggling for, who arming their enemy with power which know that their interests will be furth- he persistently uses against them. If ered only in consequence of their fellow every individual representative in this workmen becoming cognisant of the city were exactly as the Municipal Voteconomic truths expressed in the soci- ers' League, the "Good Government"

These workers and fighters don't want sire, not the slightest change for the city to pay a minimum wage of \$2 per

ony empty thanks or flattering convoliments. They don't pose as martyrs, or call upon all men to admire and appreciate their "spirit of self sacrifice;" they don't advertise their efforts for "the cause of socialism" or expect any 'gratitude'' or particular consideration on account of those efforts. Knowing that in spreading socialism they are serving their own material interests as workers, they count all the above as nothing, and indulgence in it as a mere waste of breath and time that could be better spent.

This then is their course of action they go down into their pockets and fetch up the nickels dimes, and quart. ers, (and they are by no means overand a continual use of these plain and easily understood tactics has steadily and persistently brought socialism to same time enable this paper to exist and continue the work.

Those of our readers, who have grasped the essential necessity of spreading socialism are recommended to go and do likewise.

Celebrate the anniversarry of the Workers' Call" by sending in substriptions to increase its circulation. The amount of subscriptions will measure the magnitude of your celebration. Celebrate in this manner early and often and as long as you like. Be good to

THE "GOOD MAN" BOBS UP SERENELY. The political tools of both great capitallst parties are getting ready to line up for their periodical sham fight commonly known as the municipal elections. Victory is only possible to either to persude the voters of the beneficial results of the triumph of their respect. ive parties and as the vast majority of voters are workingmen, it is neces sary for the office seekers and political wire pullers, to ensuare as many of the lafter as possible, so that the party may ride into office upon their shoulders Extravagant promises will be made by these "friends of labor" in order to accomplish this. How have these promises materialized? It is only necessary to look back a few years to understand their worthlessness. And they are worthless only because the working class lack the necessary power to enbeginning to understand that for them there is no choice in these matters crat equally means defeat for them. The shrewd and able capitalist press on new tactics to secure the support

of those who are already wearied of the orthodox methods of the regular politicians, and now the "good man" is bethose lip-worshippers of Washington ing trotted out and put through his who extol the virtues of the "Father of paces, in order that the political laggards may be again spurred on to their stand for political courses of action progress made in this direction, much this city were there less "saloonkeepcifically warned them in the document ers" holding office. Why the saloonleft for their guidance. This however keeper" should be regarded as less precould perhaps not be adhered to, but a ferable than the "business" man, so Washington gave them the best he is a conundrum that has not yet been knew, yet it could not be expected answered. If the saloonkeeper is an that any man however far-seeing, evil, how about the "business" men who hold shares in whisky trusts, breweries of an ever-changing society, whose and distilleries? The saloonkeeper is growth implied a corresponding change merely the distributing agent for the in the laws and rules which are the ex- products from which these "business" pression of that growth, and which must | men draw their dividends, and is there fore inseparably connected with "busi-To get back to our subject. THE WORKINGMAN'S STRUGGLE.

When I see a workingman with mouths

to feed.
Up, day after day, in the dark before the dawn.
And coming home, night after night, through the dusk,
Swinging forward like some fierce silent e a man doomed to roll a huge stone

up an endless steep. He strains it onward inch by stubborn Crouched always in the shadow of the

where he crouches, twisted

see where he crouthes, twisted cramped, misshapen!

He lifts for their life:
The veins knot and darken—
Blood surges into his face.
Now he loses—now he wins—
Now he loses—now he wins—
Now he loses—loses(food of my soul)
He digs his feet into the earth—
There's a moment of terrified effort.
Will the huge stone break its hold.
And crush him as it plunges to the guil?
—Edwin Markham.

SNAP SHOTS BY THE WAYSIDE.

may seem the acme of benevolence to this "saving of the children" is meant, that the capitalists' pockets is being imparting his knowledge to the working the enforcement of which was never calculated on.

It is broadly hinted that the fees pertaining to the different cases of violation of the child labor law, net certain justices as much as \$60 per day, and in consequence many manufacturers dewhole proceedings as being only a hold-up game. If these state-ments are correct, and it is most probable that they are, it merely shows that the capitalist system is a hold-up game all round, and that even laws professpassed in the interests of the making schemes, for the benefit of those deputed to enforce them.

It is not wonderful that this law has been allowed to lie dead for the past year or two, before the scheme of extracting profit from its enforcement was discovered, which discovery accounts for its resuscitation again. In the end, no doubt the capitalist employers will carry their point, and the children will be worked without fear of Intervention, and this will last until the working classes understand that laor legislation and labor laws have absolutely no value, unless the execution the hands of the class whose interests

day to its employes. Rather strange that this "friend of labor" is able to discover only at the end of his term of

that this "riend of labor" is able to discover only at the end of his term of office, that labor should at least have to great any according to the labor should at least have to great any according to the labor should at least have to great any according to the labor should at least have to great any according to the labor should at least have the product of the labor should any according to the labor should be labor in great any according to the labor should be labor. The labor should be labor should b

The attempts now being made in Chi- versity of Berlin. Dr. Arons is a rago, to enforce the child labor law by straight socialist and his pronounced the factory inspectors appointed for views have been for a long time a thorn that purpose, have created an intense in the flesh of that capitalist figuredesire upon the part of those capitalists head known as the Emperor. The Dr. who exploit the families of the working who held the position of professor of class, to "save the children." This natural history in the university, will beautiful phrase, superficially viewed, now be free to spread the truths of soclalism amongst the German working those not versed in the strange and classes, in which he will be still more devious ways in which capitalist inter-distasteful to the powers that be. They ests are often expressed, but a close ex- may soon have reason to see that their, amination will reveal the fact, that by success in expelling him was in reality a defeat, and Dr. Arons himself will, in touched by the operation of this law, classes, in turn learn something of and through them. The principles which Dr. Arons stands for will ultimately expel those who have expelled him.

One of the strangest comments on the "prosperity" which the community is supposed to be staggering under, is to be found in the increasing number of "poverty remedies" which appear as advertisements in the daily papers "Professors." "mediums." occultists clairvoyants, and a whole host of nondescript mental quacks are pushing their "infallible systems" with great vigor in the columns of the capitalist working class can be turned into profit- press, and it is not uncommon to hear that some of the most audacious of this tribe, secure hundreds of dollars daily from their dupes. All of which goes to show that the "prosperity" of these mystical vultures, is based upon the brainless folly of those whom they consider their appointed prey, just as the "prosperity" of the "legitimate" capi talist owes its existence to the stupidity of millions of productive workers.

A scientist called Dr. McKim has just published a book, advocating the extinetion of the criminal and dependen classes, by the application of carbonic acid gas, which, the floctor suggests, will and administration of such laws are in bring about a painless death. The book the hands of the class whose interests they are supposed to protect.

It is satisfactory to note that the strike or lockout in the building trades in this city seems at present to appear favorable to organized labor. The contractors are howling loudly that they want protection, when what they really want is to deprive the workers of all protection. They want the unions smashed, so that the individual workman, helpless, without money or tools. Can be dealt with as an individual, and subdued accordingly. The unions have but to gtand firm, and when the weather becomes milder the combine of the contractors will break up and disappear arcs of the death of the victims in the weather becomes milder the combine of the contractors will break up and disappear with the disappearance of the contractors will break up and disappear with the disappearance of the contractors will break up and disappearance of the contractors are howing no organization of the creminal and destinctly and designation of caeth country.

qual parties."

In the second place, the S. D. P. to
nsist on such an attitude (which I do
ot believe possible), such insistence
could itself show a spirit opposed to
eat unity. Such a spirit opposed to would itself show a spirit opposed to real unity. Such a spirit reminds one of De Leon, and is of the "Rule or run" order. No matter how dear the words "Social Democratic" have come to be during the past two years to those who bear them, they cannot be dearer than those other words "Socialist Labor" to such as have suffered and worked for them for even ten and twenty years. And neither expression can be so precious to true socialists as the cause for which each stands.

In the third place, the name "Social Democratic party" would in itself be most inappropriate at this time to a united socialist party in the United States of America—for at least the following reasons:

owing reasons:

owing reasons.

I. "Social" in this country, and in the language of English speaking people generally, does not mean SOCIALIST. We have "Social Settlements." "Social eform movements," and "Gentlemen's Social Unions," none of which has anything socialistic about it.

2. The word "DEMOCRATIC" has a long, bourgeois history behind it in the United States, far from any socialist character. Names are signs of ideas. The idea suggested by "Democratic Party" in America is that of Jacksonan Democrats, or at present of "Bryan an Democrats, or at present of "Bryan" The idea suggested by "Democratic Party" in America is that of Jacksonan Democrats, or at present of "Bryan Democrats," as even the Social Democratic Herald would seem to admit in its editorial of February 10, entitled, "Glad We Can't Do It." I have heard it suggested by a member of the S. D. P. that the name is a good one for American socialists because it is the name of the party in Germany. Without stopping now to show that the present party name of the German socialists was itself a matter of mutual concession, growing out of the union of the Lasalleans and Elsenachers—it is evident that the name carries an intrinsic meaning in Germany which it cannot have in a nominally republican country. In Germany the thing to emphasize is democracy as opposed to monarchy. In America the political institutions are already democratic. What is necessary is to socialize economic institutions. Furthermore, the party name of German socialists in Belgium or France or Austria. A slavish following of mere nomenclature is not the highest compliment to our German countraces. As Marx has shown, such matters of detail must be left to the particular situation of each country. must be left to the particular situation

stand together at the ballot box for their own interests, by voting the socialist ricket, which alost asserts the principle of the supremay of labor. To win a strike, the workers must strike together; and to emancipate themselves from the necessity of striking, they must vote together.

cially in municipalities.

We hold that it is of paramount importance, that the people shall retain the fall powers of government themselves, and not delegate them to any individual nor set of individuals.

We denounce the provision of the city tharter which requires members of the city government to be owners of

that all acts of the council shall be subject to a referendum vote on demand of ten per cent of legal voters; and that this same percentage may also initiate propositions for general vote.

"We would established a minimum wage of two dollars and make eight hours a maximum days labor for city employees.

"We will give no more contracts for work; but the city shall employ its own labor.

"We will absolutely refuse to give any more franchises to any corporation for

more franchises to any corporation for any purposes, but will present charter amendments that will allow the city amendments that will allow the city to establish its own public conveniences, street railways, gas and electric plants, etc., and such industries as may from time to time be deemed necessary using the taxing power to pay for the cost of such establishments, pay decent wages and give reasonable hours to the employees: employ experienced men, not political favorites, as managers, and give the service at cost.

"Sufficient revenue for the city can be obtained by a just and proper assessment on the real value of property; the railroads, corporations and wealthy

sessment on the real value of property; the railroads, corporations and wealthy individuals are in most cases assessed for but a small per cent of the real value of their property, while the small property owners are assessed as high as the law allows.

"We will require every corporation holding a franchise to live up to every provision of it, on pain of forfeiture.

"We shall establish as many necessary public works as possible to provide the unemployed a chance to work and live.

the unemployed a chance to work and live.

"We will establish and maintain public lodging houses, public bath houses, and orphan's and foundling's home, a home for abandoned women, and hospitals with all modern conveniences.

"We wil enforce a rigid inspection of all factories as to the safety of machinery and sanitary conditions, and a competent system of food inspection, and enforce all ordinances for the health and cleanliness of the city.

"And we would provide books, medical attention and one meal a day to all children attending the rubble schools, and where necessary provide clothing, and make education compulsory in Kansas City.

and where necessary provide clothing, and make education compulsory in Kansas City.

"We commend these propositions as being radical and effectual remedies for much misery and many dangerous conditions, and as an advance towards the complete overthrow of the whole capitalist system of exploitation of those who produce all the wealth, the necessities and comforts of life."

The candidates are as follows:
For Mayor—Robert Fuchs.
For Mayor—Robert Fuchs.
President Upper House—W. H. Stripe, Police Judge—L. H. Lewis.
City Attorney—J. F. DeLaney.
City Treasurer—C. A. Hunt.
City Auditor—L. C. Chaney.

Members of the Upper House—
J. T. Lyle, H. L. Gaines, D. L. Tyler,
J. H. Robertson, T. F. Croal, and E. H. Petersen.
School Board—
Heinlich Jannsen, Michael Johnson, John Noonan will make the campaign for the lower house from the Ninth ward. Other ward candidates will be nominated-next week.

MARX AND DARWIN.

The Great Italian Scientist Ferri, On Darwinism and Socialism As Related Truths.

(Continued from last week.)

be harly noticed in the science of po- perior intellectual ability of Marx. litical economy.

which, previous to Darwin and Spencer, in him into theoretical anarchism.

ists) shows the position of Marx on sociology and in social sciences generally. The great merit of Marx, says Prof.

Ferri, is the drawing of conclusions from the natural sciences for the social

economy. He has performed this, especially by three master pieces of thought. The first is, the law of surplus-value, which explains how, from the present structure of society, capimust result and constantly grow. While this thesis is yet of a more techfields, and the theory of the class-strug economical phenomena are the basis and the condition of the individual and social activity, in every field of social life, that morality, law, and politics are only products of economical forces, which manifest themselves at a certain given time. This thought is in accordance with the acknowledged biolog- world and lead to a better future. teat law, that every function is condi tloned by the respective organ and that the man is but a product of the out-Such a condition of the life of the whole humanity, will explain history not as an incidental succession of great men. The Organs of Great Capitalism Sneer but as a natural result of economical circumstancs. Care should be taken however not to make a too enesided application of this idea, what ever is met with, in Marx', Ir cannot be denied that all institutions and accial phenomena are but reflections of the given economical circumstances, but it should also be kept in mind that every result may become in turn a cause, and that all the social phenomena are the results of reof a given society, as well as of the economical circumstances in which society lives. As a man who suffers from of his disease, so may the scientific inventions or a change of the electionsystem influence the economical production, or change the condition of labor, though this, as in the above example may only be achieved within the limits of a given social structure. The moral; legal and political forces, react, according to Prof. Ferri, more upon the reciprocal relations of the different socia. strata cas agriculturists, manufactur en of finance) than upon the relation of the laborer to his employer The author says, that with the omis-

sion of the theories of providence and free will, as entirely unscientific, the interpretation of the history of mankind was onesidedly based upon two theories. viz: either upon telluric determinism (Montesquieu, and Buckle) explaining everything with the influences of nature or the authropologic determinism, which draws everything from the ordifferent human races. Marx has com pleted and unified these theories by his economical determinism. According to it, the economical conditions are the results of anthropological forces and the telluric surroundings, and that they in-

classes, the chief motive of action in the ethical, legal and political fields. Each social class therefore endeavor to form laws, social arrangements, traditions, and combinations in such a way, that they may serve their material interests. They thus build up institutions, which become by means of inheritance and The relation of socialism to sociology tradition, lasting, and their economical is treated in the third and last part cause comes to be forgotten; lawyers of this book, entitled, "Socialism and and philosophers represent them as eternal truths, without thinking of their In Chapter XII (The Weak Point of material origin. If they would Living under a system of legalized only indulge in an occasional street plunder, this want sometimes become riot, smash a minister's windows or unbearable, and the workers are often pillage a few Jew shops, they would forced to submit to the terms upon give great satisfaction to their oppo- which their employers are willing to nents, who would then have an excuse receive them. Therefore in order to for demanding strong measures against make, possible their success in these the party. That is precisely what they struggles, the public powers when capwill not do. Their leaders are sensible tured by the working class, must be men, not at all disposed to allow their used in their interests, to achieve vicfollowers to play into the hands of Dr. tory in such struggles, as it is now used Lucger and Prince Alois Lichtenstein, in the same manner by the capitalist They have an ably conducted party or- classes, to coerce and overpower the gan, the Arbeiter Zeltung, which is an workers in the conflicts which are

The example of our fellow workingby that social democracy in Austria men in Europe, and especially France, on this matter, has been often pointed out in the columns of The Workers' ied political party."-Cleveland Citizen. Call and other socialist papers. Worktion with their conditions of life, and resorted to strikes to emphasize such dissatisfaction, have in this city, often felt the heavy hand of capitalism, which has never scrupled to use the police, militia, and the machinery of law as aids to enforce the submission of the strikers. In France, on the contrary, where the workers have captured the used to encourage, aid and support the striking workmen, and have made their victory more certain by supplying food, clothing and shelter during such perods, and giving adequate legal protection meanwhile.

What is possible in France is also possible in the United States.

It is to be remembered, however, that such palliatives are limited in effect proportionately to the power conferred in the representatives of the working class. The object of the socialist movement in all lands being the establishment of the Co-operative Commonwealth through the political supremacy of the working class, the above measures are submitted in accordance with the concluding paragraphs in the platform of the Socialist Labor party, as follows:

"Pending the accomplishment of this, our ultimate purpose; we pledge every effort of the Socialist Labor party for the immediate improvement of the con-dition of labor, and also for the secur-

ing of its progressive demands.
"Workingmen of all countries, unite!
You have nothing to lose but your chains, and have a world to gain!"

Section Chicago. Socialist Labor Party. February 20th, 1900.

Socialists, Attention!

the socialists are present.

All comrades should be present next Sunday at the seneral meeting of the Section, when the delegates from the Rochester Convention will report. Com. G. B. Benham will also be present. The meeting will be held at Lauderbach's hall. 55 N. Clark street at 7.50 p. m., sharp.

The Socialist Sangerbund has arranged a Grand March Festival at Brand's hall, March 11th, two-thirds of the proceeds to be applied to the Campalgn Fund, therefore every comrade should try to sell as many tickets.

Gage Tries to Bulwark Capitalism by Reciting "Old, Old Story" of "Higher Wagea."

Secretary Gage in addressing the Association of Merchants and Travelers at the Auditorium lately, brought for at the Auditorium lately, brought for- A STERN NECESSITY which has been found so valuable in defending the continued robbery and exploitation of the working class. The old, old story" of how much better labor is rewarded at present, compared with its remuneration a century ago. It can be best comprehended by taking what Gage says on the subject under the head of capital and labor which is

"Such remarkable development." Mr. Gage said, "could not have taken place without great benefit to all the people of the United States. It had resulted in an enormous increase of capital, wich, under fair circumstances, would be employed in the further development of the country's resources, giving larger

It will be seen by the above that Gage duces. depends for information upon that fastatistical juggler Carrol D. the working class than all other labor fledged lie.

It is one of the peculiar faculties of that wages have risen and prices fallen. Socialists on the whole do not dispute the fact but they challenge what is im- capitalist (as per population) in numplied in the statement. The truth is, that in proportion to the productiveness of labor, labor has not held its own since the beginning of the century.

First, labor receives a smaller pro one hundred years ago. To Illustrate, if labor produced 10 cents it received 5 one hundred years ago. To day while struggle THE STRUGGLE BETWEEN labor produces 100 cents it receives LABOR AND CAPITAL IS AN ECObarely 10 cents of its product. The pro portion speaks for itself and is proven in the enormous accumulation of capital in the hands of such men as Rocke, feller. Vanderbilt, Carnegie, Morgan,

But there is another feature in this, which Gage, like all other devotees of the great god Capital, falls to mention. That is, that a century age, the possiof production, for the average workman and mechanic, a century ago, existed then, and absolutely does not exist to-

The great railroad systems, the giant of the present; form an insurmountable struggle along these lines. Let labor barrier not to the individual workman alone but even to those who in a degree are yet favorably situated. The present form of modern industry absolutely precludes any independent action in the political machine of today is the the industrial field to those not possessed of large amount of capitalmeans of production.

endence when recognized generalsees no necessity. The great masses of to them economic advantages, and their tories, saying to the workmen "we will the economically dependent workers efforts as a class will be much more starve you into submission before we will not for ever consent to remain hew- progressive. ers of wood, and drawers of water for an existence wage, so that a non-producing class may live in wasteful luxuall lands.

In his closing remarks Gage peers into the future; with the usual bourgeois gush he speaks of the grander brotherhood of man-which capitalism will certainly evolve-but only in its own death be established, only when the classscious workers realize the parasitical character of the class whose interests Gage upholds, and destroy the means by which they fetter the workmeans of production and channels of of poverty and enforced idleness.

of science, their class is denied the ad- in Connecticut Craftsman. vantages of such progress. The spirit of revolt is being and will be still more fostered, when they comprehend that their class as the producers of all Comrade John Collins Speaks on "Social-wealth, are compelled to live in vile and ism and Trades Unions." unsanitary surroundings, to wear shodtain life on scanty and adulterated food, and when sickness strikes their families to see their loved ones suffer and perish because they are denied the opporhas made possible. These things, the unsatisfied wants of the working class, will at last open their eyes to the dog in the manger characteristics of capitalism, in spite of the flowery eloquence and soothing oratory of the whole tribe

upon which alone continued progress is crtain for he understands that the in telligence of the working class will realize the necessity of social change, and necessity compels progress.

B. Berlyn.

(Continued from page 1.)

to hold positions. Thus, we see, a new and more far-reaching danger hasovertaken the wageworker. We see the skilled mechanic displaced by the machine and the unskilled laborer by the woman, and finally the woman is dishere reprinted for the edification of the is the ever-increasing improvement of placed by the child. On the one side machinery, which, once placed on the market, compels every individual manufacturing concerns to adopt it, and on the other a constant increase of the unemployed, producing a condition which the capitalist takes advantage of to cheapen the cost of production. That

w. ich, under fair circumstances, would be employed in the further development of the country's resources, giving larger employment and Increasing rewards to labor. To show the general increase that had taken place in wages Mr.Gage quoted as follows from the, words of Carrol D. Wright, United States Commissioner of Labor:

"The condition of labor, as it now exists, is a vast improvement upon its condition at any other period. This might be proved by an exhaustive citation of wages and prices during the last 100 years were such citation necessary. It may, perhaps, be well simply to say that wages, even during the fast half century, have largees do n the whole something over 60 per cent, while the general course of prices has been downward. This is true of other couniries in which machinery performs an important part in production; but it is essentially true in America, for here, with our vast resources, our peculiar systems of education, and of government, exerting great influence upon the minds of all, wages are higher than in any country in the world."

It will be seen by the above that Gage

that had takes advantage of the the captalist takes advantage of this the captalist takes advantage of this takes advantage of this takes advantage of this takes advantage of this labor market is no longer denied. It is not the machine that cuts down the wages of the work ingman; it is he who is out of a job and who is out of a job a

The development of Industry in the United States has passed through five Wright, who has done more to mislead phases: First, man, then partnership, the working class than all other labor association, corporation and then trust. fakirs combined, seeing that half truths Each of these developments has had a are more dangerous to meet than a full natural tendency to divide society into two classes, namely, the capitalist and the wage worker. Another peculiarity capitalist orators, to harp on the fact of this development has been the growth of the wageworkers in numbers and political power, and the decrease of the bers and political power, while they have increased in economic power a thousand fold, until today 71 per cent. of the 'nation's wealth is owned by 9 per cent, of the population while the portion of its product to day than it did working class, numbering 52 per cent of the population, own but 4% per cent. Every economic struggle is a political NOMIC STRUGGLE, WHICH SOON ER OR LATER MUST EYOLVE IT SELF INTO POLITICAL ACTION. It is a waste of time and energy to continue the struggle along the old lines of pure and simple trade organization with the labor market overcrowded and with no greater economic force back of them than will keep them as a whole one week from the poorhouse. billiy of independent action in the field The capitalist class, with its 71 per cent, of the nation's wealth will always be able to heat labbr in an economi contest where labor possesses but 41/2 per cent. These figures fairly represent the fighting strength of both classes; steel works, the concentrated industries hence the absurdity of continuing the ence realize its political power; that it is through its political power-AND THIS ONLY-that they are to bring about their political emancipation; that force wielded by the capitalist to acquire economic advantages; that it is as effective a weapon today as was the This lack of independence, this state physical force of nations in the ages gone by; thas this weapon can be used ly, (and that process of recognition is as effectively by them to bring about going on now) will bring the social their own emancipation, as it is now change, for which the self-satisfied Gage being used by the capitalists to insure

"Workingmen of all countries unite! You have nothing to lose but your chains; you have a world to gain."

SECOND YEAR .- WHOLE NO. 53.

CHICAGO, ILL., MARCH, 10 1900.

PRICE TWO CENTS.

Entire Product of Labor Must Go to Those Who Produce It.

NO OTHER SOLUTION POSSIBLE

Permanent Employment of Unemployed Would Inevitably Destroy the Present Profit System.

Socialists are often reproached because they refuse to unite with reformers in progressive measures, and thus advance step by step. We are accused of wanting the whole hog or none. Let us plead guilty; we do want the whole hog. But this is not so much a matter of choice with us; it springs rather from a clear perception of the fact that no matter what we might be satisfied with, we shall get either the whole hog or nothing at all. No other course is open to us. There are no half-way measures, and there is no such thing as improving the condition of the laboring class under the present system, except in a very superficial livion. sense, altogether different from what reformers try to make us believe. This can be shown in a few words.

As long as there is any unsold laborpower on the market, whether the quantity be great or small, there can be no material increase in wages, and consequently no diminution of profits. Before wages can materially and permanently increase, all the unemployed labor-power must be taken off the market and permanently kept off, i. e., all must be insured of permanent employ-But this condition of affairs would at once bring the profit system to an end. The profit system is based not on free contract, but on the forced sale of labor-power. Wages are kept down by the constant pressure of the unemployed and by the uncertainty of steady employment in the minds of those who are employed. Remove these two factors and profits would fall and wages would rise, until the laborers would have the whole hog, i. e., their entire product.

At present the capitalist has the whole hog. He gets the entire pro-duct, less just enough to keep the labor-power in working order, the same as his other machinery. In fact he is forced by the system to take the whole hog or nothing. No middle course is possible. The perception of this fact will keep us from deceiving ourselves in expecting any great improvement through moderate reforms. A reform is something which changes the form of a thing, but leaves the substance the same. This would be the case with any reform of the profit system, which did not abolish the system itself.

If, therefore, a man claims that his particular reform would give employment to all, just point out to him the fact that if it really did that effectively and permanently, it would destroy the profit system and lead to socialism and that he might just as well be frank about it and advocate socialism directly as to advocate it indirectly. If the single tax would do what its advocates claim it would do, i. e., give permanent employment to all, it would destroy the profit system and lead to socialism

The same can be said of various schemes for government employment on public works, etc. The government could employ a large number, but it could not give work to all the unemployed permanently. If it did, it would destroy the profit system. Private em-ployers would be unable to secure help such a figure as would leave any

All of these well-meaning reformers are trying to solve this riddle-how to retain the profit system, and yet give everybody employment at wages above existence point. The problem can not be solved. The whole hog will go to the one side or the other; If it does not go to the capitalist it will go to the laborer. The state cannot divide the product between capitalist and laborer. cause the state is controlled by on or the other, and whichever is in control of the state will refuse to divide.

There are two fields of activity, the economic and the political. In the economic nothing of immediate fundamental importance to the laborer car be attained through step by step meth-Economic measures are always and hence are more attractive to the impatient laborer than political action. But the results never come. Some un foreseen cause intercepts the benefits before they reach the laborer. The industrial evolution goes on. share of the wage-earner is not greatly changed. When his turn comes it will step by step methods are in place, though they do not give immediate results. The working class cannot acquire political power suddenly. It must go through the slow process of building up a political party and getting control of one branch of government after another until it is in complete control of the entire political machinery. The industrial development to taking care of itself pretty well at the whole hog. But in the political field

WHOLE HOGORNONE present. The capitalists will attend to that. It is the political development that always lags -chind, and in Amer ca today the political development of the laboring class is far, far behind Tricks and Schemes of Capitalist "Charity," As the Safety Valve of

Of course the government will regulate the trusts. The trusts being the government, a mutual matter like that can easily be arranged.

In 1904 there will be but two parties and the Mark Hanna's will be shouting for Bryan or someone of his kind to save them from the socialists.

Socialism will come anyway, but workingmen who do not desire to spend their declining years in the poorhouse should give it a friendly shows

The party has now obtained enough prominence for the capitalist newspapers to build straw socialists for the purpose of knocking them down.

It is said that farmers will always socialism on account of their property-interests, but how about the renters who are getting to be in the

Inhabitants of China who have been prepare to make it 18. The capitalists of the world are getting ready to ridee on their backs.

Mayor Jones may yet be a useful citizen, when he recovers from the shock that came with the discovery that socialists did not regard him as bigger than their party.

Your boy might also be president

It is pretty generally agreed that the bread? One is no more of a necessity than the other. And if bread, why not

The fellow who works 16 hours a day just for a poor living, is the man that is most opposed to socialism, but he will not be just as soon as you can make a hole in his head large enough to let in a little light.

It is safe to say the government would quit printing envelopes if it came in competition with the banks or the express companies instead of the small printing offices. Someone would discover then that it was socialistic and

Socialists. Attention!

Politicians.

Coming Presidential Campaign Will Bring to the Front, New Devices to Entrap the Workers.

The growing strength of socialism, and the pessibilities of the political movement in the United States has had the effect of drawing forth new tricks from the capitalist political organiza- have generally accepted "this biessed tions, as well as "showing up" some of heritage" as brother Carnegie calls it, their old devices.

In almost every instance the schemes have been foreseen and foretold by the socialists. A warning has been voiced by the socialist press against the ig-norant efforts of the reformers, and the knavishness of the old line political or-

This presidential campaign will be full of tricks, old and new. The prohibition candidate will again demon-strate the decadence of his party. The form with "special privileges for none," and at the same time uphold the privilege of a part of the people to own the means of production by which all the human beings outside his factory door, people live. The Democratic party will demand more money, and the workingmen of less sense will support the de-mand. The Republican party, as usual, serene and confident, grabs everything in sight. Aft of these desire to be known as the particular friends of the

wage workers. But in the meantime a somewhat novel sort of warfare is going on. Some entive to work it will also do away years ago, to offset the socialist influence of the initiative and referendum plank, the Republican and Democratic parties added an initiative and referen-The infant industry that thrives lust- dum plank to their platforms in Massally on public pap, knows that an old chusetts. The carrying out of the printempted by the old line political representatives. A short time ago Carey and McCartney, S. D. P. representamunicipal governments in Massachusetts. A lively discussion took place, and when a vote was taken, 210 out of 238 of the capitalist representatives voted against the initiative.

This will be interesting to the single plank "initiative and referendum" adocates. The old parties will come on put any single plank into their platform, conveniently overlook it when put in power and repeal it absolutely when necessary.

The principle upon which the socialist novement is based allows of no centering upon the minor issues of municipal wnership, initiative, etc.

When these matters come before the industrially intelligent worker there is but one question for him to ask: will the political idea advanced check the wages system through which I am deprived of my product. There are no other questions that involve a princi-The only answer that can be given by the trickster is "no."

The worker who desires emancipation and fustice has no choice: the socialist platform is all for him; the opposition platform is all against him. He deserves the fate of slavery if he assists in the political forging of his own

As has been well expressed by Com. King of San Francisco: between the classes is the only justification of the existence of the socialist. Party ethics, morals, altruism, public ownership of utilities, retrenchment, economy, reform-all these can be under socialism and he would stand a found in capitalist parties, but a recogmuch better show than at present, for nition of the class interest of the wage he would have equal educational ad- worker, and that in direct opposition to vantages with the son of every other the interest of the capitalist class-this can only be found in the economics and political movements of socialism. No party can be a true socialist party uncity should furnish water to its inhab- less the greatest care be taken to protants at cost, and if water, why not tect the organization from influence inconsistent with this basic idea."

Those workers who follow the tricksters into the camp of the enemy, assist in the enactment and execution of laws distinctly, wholly and intentionally in imical to the true interests of the wage can never lie in forwarding schemes to continue a system which makes possible the building up of independent fortunes at the expense of the wage earning class. In neither the industrial overlook their class interests

Is there any reason why class interers, either in the workshop or in the political field?

G. B. Benham.

THE SAME OLD GAME "ALWAYS WITH YOU" good hopes of final rescue. You are all

Capitalist Society.

Different Conception of "Justice," As Seen From the Capitalist and So cialist Standpoints.

The poor, the poor, the poor! "The poor ye have always with you." Christ and rescue you, and gradually fill you didn't actually say that this was a up with good victuals, and warm and good thing, but his professed followers as something in the nature of a command, judging from the zeal they display in maintaining the system which directly creates pauperism and the

wretched, famished creatures known as could be worked in them as in you, and the "poor" are a fruitful source of they would be just as fully redeemed wealth economically and "spiritually" for their exploiters. How could the "society woman" lay up treasures in to proper treatment as you are, in spite heaven of charity, pity, etc., etc., if of your self-concelt. At any rate, havthe poor were abolished? How could ing been saved-or never having needed the profits of the respectable capitalist salvation-yourself, you might help us be increased if there were not always a hungry, ragged, famished crowd of practice.-The Class Struggle willing to take the places of those inside, who are less than one degree removed from the same condition? And how could be act the part of philanthropist and humanitarian, if his power of "giving employment" were taken taken away? It would indeed "be a sad day" to quote brother Carnegie again, for the class who thrive materially and spiritually upon its existence, if poverty were to disappear. There fore charity, charity, and still more charity is what is wanted; those who talk of "justice" are mere fools and dreamers; those who speak of social-

sm are dangerous enemies of "society. And as the numbers of those who de mand justice increase, so the necessity for more "charity" grows. It is be ginning to be recognized that it acts as a sort of safety-valve for the wealthy claims, under the system by which they "legally" appropriate the labo product of the majority of the human race. To perpetuate this system it is necessary that the exploiters give back in the shape of charity a portion of the plunder sufficient to keep their victims below the danger point, but in the evo lution of capitalism this process cannot keep pace with the production of wealth. As the ancient Roman patricians vainly tried to keep the dispos-sessed plebians in a state of contentment by the "bread and circus" method so in the end our modern capitalist class will find the "charity" dole ineffectual to maintain their supremacy.

Those who hold the means of produc ion as their private property cannot hope much longer to stem the tide of misery and want, which results from such ownership, by throwing the sop of "charity" to the disinherited masses of mankind. As the wants of the race increase, their intelligence also increases, and they begin to understand that "justice" will render "charity" superfluous.

And the "justice" which the classconscious workers are struggling for bears no resemblance to the capitalist definition of the word. Our "justice" is not theirs. We are fighting for ac ess to those means of producttion, those social values which are the work of the brains and hands of countless millions of producers, and from which we are debarred by the idea of "private property" upon which capitalist society

And this "fustice" we neither use lessly demand, or ask as a favor, knowing well that without power such pro ceedings are worthless. We struggle for the political supremacy of our class, and when that has been accomplished "fustice" shall consist in the fact that all mankind shall have free access to the means of production, and that when they have tolled and produced the product shall be theirs to use and enjoy. Capitalist conditions make "charity 'necessary. Socialist conditions destroy this necessity.

Can't Change Human Nature.

The silliest opponents of socialism are the very good Christians who come up to us with a you-can't-get-over-thisargument air and say: "You'll never succeed, for you'll never be able to change human nature." from Christians, whose only work, in which they have already spent a score of centuries, is to try to change human nature—that is, by "coming to Jesus, and "being born again," and "getting

"You can't change human nature." says the shallow thinker. The deuce we can't? Well, just give me a chance and I' I don't change it I'll change its manifestation, which is the same thing for all practical purposes of Socialism I'm lord of the winds and the waves suppose, and wreek at sea the ship you are on, and I providentially get fifty or sixty of you safely away in boats and on rafts with plenty of provisions and

ladies and gentlemen then, and behave decently to each other. But suppose keep you out of hope for a week, two three, until your last biscuit is gone, and you are mad with sickness, hunger, and thirst. Then with the composition of your blood and other bodily juices altered, you are no longer gentleme and ladies, but ugly, fil-tempered, welfish brutes, ready to draw lots for some one to be killed and eaten to save the rest. You have become cannibals! did not change human nature, did 17 No; but you might as well be wolves a human beings acting just like wolves Anyway, you are totally different chemical formulae now, and that is quite as good-or bad- as a change of nature. Then if I send a sail in sight just then nourish you back to health , why, with the return of your bodily juices to their normal former state you return to decency and gentility, don't you? Well, then, don't you think that if this great community of cannibals and vicious competitors for bread, could be properly fed, and clothed, and housed, and educated, as big a chemical change could be worked in them as in you, and morally? Depend upon it, the rest of the bad, wicked world is as amenable Socialists to put the victual cure into

NOT UP TO THE MARK

Crude Ideas in the Transvaal, As to "Keen Politicians,"

WOULDN'T PASS MUSTER HERE

Boer Statesmen's Methods Contrasted With Those of More Highly Civilized Countries.

That good old British capitalist contention that the South African repub-lics are hopelessly out of date and far behind the march of progress, is amply borne out by the following telegram, from the seat of war:

Cape Town, March 3.—The correspondent of the Cape Times, who was present at the surrender of Gen. Cronje at Pairdeberg, says that among the prisoners he recognized some of the keenest politicians of the Orange Free State and the Transvaal. A surprising percentage of the 4.300 men taken speak Engelah

If the "keenest politicians" of the two republics have no better or more modern conception of the duty of a "politician" than to expose their sacred persons to the chances of battle, murder, and sudden death, then it is undoubtedly the duty of John Bull in his capacity of missionary and torchbearer of progress, to carry the "light of civllization" to these benighted peoples.

Politicians" voluntarily encounterng rifte bullets, Maxim guns, and lyddite shells! Why the idea is so utterly preposterous, that the additional qualification of "keenest," adds nothing to its absurdity.

Keen politicians! They ought to see the individuals who answer to that description in this and other "progressive" countries, and they would quickly dis-cover that their keenness, compared to that of the modern politician. about the same relation that a ploug-share does to a razor blade.

The untutored "politicians" of the Transtaal and Free State, are actually so far in the rear of their advanced brethren in more favored lands, that they literally believe that "patrioti has a claim to their services on the field of battle. They have not yet reached that glage of civilization, where it is understood that "patriotism" is wholly and solely for the consumption of the "other fellow," and that all that they have to do with it, is to preach it to admiring audiences of dupes,

Truly the British have a herculean task before them in removing such a mass of ignorance and backwardness, as is here displayed. But the resources of capitalist civilization are unlimited for work of this nature and will no doubt succeed in the end.

And when the "village Hampdens" of South Africa have been put through this elevating process, when they have learned the dignity and proper functions of the modern "politician," they will not be found fighting alongside the valorous Cronje's and Joubert's, running the risk of being shot to pieces, or be it

Resolved. That Union No. 47 pledge itself to only support individually and cellectively such parties and men who shall work for the social development and freedom of the masses of the people of the country.

Respectfully submitted.

The Socialist Vote.

THE IRREPRESSIBLE CONFLICT.

Once more the inherent hostility beween the distinct classes under capitalism seems apparently to be on the point of breaking out into economic warfare in this city. Labor troubles rapidly multiplying, are expressing themselves in strikes and lockouts on the part of the worker and capitalist respectively. The former attempting union with their fellows on the industrial field to secure better conditions ctal values which such labor produces; the latter keenly alive to the fact that such action is an attempt to reduce what they consider their legitimate profit, have also combined to resist such demands. The elements for the coming struggle have not yet lined up distinctly upon one side or the other, 'many groups of workers and capitalists yet standing aloof, and at present the magnitude and outcome of the conflict is still a matter of conjecture. Victory or ture of things be decisive. The hostile antagonism between the material intermic classes, ceases to exist. If defeated, the workers must and will rally their forces again for another battie, if victorious, the peace can only be of a temporary nature, and the conflict will break out again upon the same issues. The value of this training, this constant wrestling, to the workers, lies not so much in the gain of immediate and partial concessions, as in the inculcation of class solidarity which is gradually acquired by repeated conflict. That sense of solidarity, that knowledge and recognition of common intereats is the educational preparation necessary for the working class in the accomplishment of their historic mission, the changing from an individual to a collective ownership of the means supremacy. It is on the economic field that the future soldiers of socialism are being drilled and made efficient. and the solidarity which they now exhibit in their trade union organizations gives promise of a like cohesion when the time arrives for the last great struggle in which the workers, convinced that the whole is better than a part, determine that the product of labor shall go to the producers alone Solidarity in the trades union will in the end find its complement expression in solidarity at the ballot box.

THROUGH STORMY SEAS.

It is no doubt the desire of every socialist that the political party representing the movement, should be free as possible from discord and dissension that warring factions and individuals should drop their jangling and that all should move unitedly and harmoniously to the goal which is professedly the common object of all the members.

The elements which compose the socialist movement being necessarily drawn from a society permeated by the Great Britain are doing noble work for ethics, customs and traditions which a what Rhodes calls the "greatest comlong period of capitalist economics has, It seems that we are not the only peoimpressed upon it, there is nothing ple who have a monopoly on flag worwonderful in the fact that the growth ship. While the "beggars" just now of a movement whose highest expres- may be "absent in mind," when the sion forms in all respects "the most war is over, their "presence of body" ideas," should in its earlier stages, be goods in an immensely increased rate strongly marked by a continual clash, for the maintenance of paupers! of individual opinions, a tendency here rings in which a sort of here wership cents each.

is to some extent inculcated, the ad ocacy of tactics which have achieved success in bourgeois politics, the wrangling over party fetishes and po litical shibboleths, and many other practices which for a time bedim the real object of the movement, and demonstrate that while capitalism undoubtedly gives birth to socialism, the elim ination of the impress of the former is a matter of gradual process and always shows more markedly in the earlier stages of the movement.

A glance over the progress of the growth of socialism in Europe will also show that in its inception as a political organization, similar lack of harmony can be observed, that as the movement spreads these differences were softened down, abandoned, and laid aside, the different factions slowly converged sider that his production bears the upon one point, as the intelligence and perception of the members became greater and clearer.

But even yet, in the most powerfu socialist political parties of Europe, this element of discord is not altogether abolished, as witness the Bernstein episode some time ago amongst the socialists of Germany. However, the movement in that country has reached a stage where it is impossible that such much less its disruption. Had the party in Germany been less clear, less classconscious, this episode would no doubt have retarded the movement somewhat. but the srength of the German party at present renders such efforts futile, although it cannot totally abolish their expression.

Judging from such experiences, which may be said to be illustrative of every country in Europe where socialism has obtained a firm footing we in this land may prepare ourselves to tread a similar path. Absolute, perfect harmony we perhaps will never attain; it is vain to hope that the course of socialism in this country will not be marked by serious discord and warring opinions, which will injure the movement proportionately to the measure of the intelligence of the rank and file compos

But as the party progresses in knowl edge, class-consciousness and a clearer vision of the importance of its object, these disturbing elements become fewer, weaker, and less able to work injury to the movement and in time ecome practically a negligeable quan tity, although they actually do not cease to exist.

ing it.

Through such a process of evolution the socialist movement in the United States must undoubtedly pass. Here and there perhaps some individual, some group, some faction, finding that their particular ideas are rejected or neglected by the majority, may come to the conclusion that the cause of social. sm is in consequence lost, but in spite of such defection the socialist caus will still push steadily forward, leaving the disheartened comrades by the wayside, to rejoin the ranks again, when convinced that their dismal prophecies show no signs of being fulfilled.

The pressure of the economic conditions which capitalism imposes upon the workers, will gradually compel them to place the demands of the soceptible, the power of the factional disturber in the ranks, becomes more feeble and less attractive, until, speaking broadly, he is practically if not literally silenced.

Unity of all socialist forces there will undoubtedly be; but this cannot be accomplished by merely saying "Go to. let us be wise, let us unite." Marx and Engels gave the word in their "Workingmen, unite!" But they also gave the reason for the necessity of union. The chains with which capitalism fetters the workers, become ever more galling, and ever greater grows the desire of the latter to be rid of them, and in turn as that desire grows, the prospect of "a world to gain" looms up ever more distinctly before their vision. This it is which forms the essential basis of unity., and with its growth and recognition, the tumult and jang- \$8,000,000 aforesaid. ling of hostile factions and individuals gradually disappears, unheard and un-

SNAP SHOTS BY THE WAYSIDE.

Well may socialism exclaim "save me rom my friends," especially "friends' of the John V. Farwell stripe, who has just broken into print with a most extraordinary farrago of meaningless cant which he calls "true socialism." It contains a letter alleged to have been eceived by a Chicago "citizen" a few days ago, and which is reproduced as an example of wild and distorted thought, to contrast we suppose, with Mr. Parwell's weighty and concise logic. On reading the whole production, however, it will be apparent to any reasonable human being, that the letter, though wild and anarchistic in tone, is a misterpiece of good sense when compared with the sancitified drivel that precedes and follows it and which is labeled "true socialism." Mr. Farwell is a keen business man, and it is impossible to believe that he can confaintest relation to socialism of any sort. He knows better. He is not so ignorant as not to know better.

The following is the definition of "true socialism" as given by Mr. Farwell and we leave it so our readers to decide whether it has any meaning, and if so what that meaning may be. It seems suspiciously like that spiritual chloroform which has for many generations been administered to the working classes in order to render them acquies cent to their own plundering, and to discordant elements can accomplish secure the plunderers in possession of even a temporary injury to the party, product of the labor of the great dumb and stupid masses. Socialism deals with material things and has nothing in common with such a canting declaration as this:

The only true socialism that begins here and lasts forever consists in seeking first a heart acquaintance with Jesus Christ, and then one's character made up of His works practically introduced into life will abolish all trusts for a simple trust in Him alone for living and marching orders. The poor seem to have decidedly the advantage in the future life, provided their heart offerings here have been inspired by Him who came to seek and save the lost.

The knowledge of the economic situa-Harbor with the avowed ob- Boers." ject of securing more tractable wage slaves than could be found in this city; by the same gentleman a few years ago in that widely heralded affair of their position in this world as secure as my" appears. possible. We are willing to admit that while Mr. Farwell may possess the "wisdom of the serpent," the "harmless haps by the fact that the great Exposs a dove" quality, is very much open altion will soon open. The British capto question.

Those who own and control the maemploy more labor power than is really front in the French capitalist press. necessary. This in turn diminishes the amount of profit that could be secured by a more economical method of production. Therefore they have sought earnestly for such and have found it. They will combine, destroy competition. and increase profits for themselves. They will by this action also confer a benefit upon their superfluous helrby starting them on the road to inquire how and why this operation affects them. The combined salmon packers will not only make profits, but will also cial revolution before aught else, and numbers of the socialists amongst their superfluous employes and ruined competitors.

> The will of the late P. D. Armour, Jr., has been probated, and H. disposer of an estate of over \$8,000,000 which, considering that the owner was scarcely more than thirty years old, and that the greater part of his "business' life were "panie years," namely, '93 to '98 is rather remarkable. And yet on thinking the matter over some factors at least may be discovered to accounfor the accumulation of this immense sum. Leaving the young man's wellknown industry, thrift, and enormous capacity for labor, out of the question, might enumerate a few of these factors such as for instance, the pos session of a very wealthy father, the "appropriated" city water free charge (our readers will remember the discovery of the tapped city main), the continuous reduction of wages, the "embalmed beef" incident, etc., etc., all of which no dobut contributed to the

> The Porto Rico tariff bill has passed the house of Congress. The inhabitants of that island are not represented in that assembly. Here again it becomes necessary to change the school text books in order to square with facts as they are at present. The principal war cry of the revolution which gave this notion birth, was, "No taxation without representation," but the exigencies of modern capitalism often deprive "eternal principles" of whatever virtues

their wishes they must publicly oppose its propaganda.

A bill before the German Reichstag. forbidding the employment of married women is being opposed by the manufacturers on the ground that the wages of the men are so low, that the labor of the women is necessary to enable the working classes to enter into the marriage state. "Which means," says Berlin Voerwarts, "that the wages of the men are too small to support their families, and the workingmen should not forget to make public this statement of their masters, when striking for an increase of wages."

Mr. Editor:—

Kindly permit me through your celumns to present to your readers some weneal to your readers some test importance—socialist unity. There is an undenlable need for a joining to gether of the progressive wings of the socialist movement in this country. We who are in the shops meet daily the taunt "why don't you fellows get together and act like men." and it hurts us too for being taunted with mortal pride. We are slow to confess the truth by saying, because we lack the manhood to take the step. We are divided into hostile camps, each refusing aid or comfort to the other. Each wearing at the other than thou expression, and each striving for public patronage like drivers of hacks or peddiers of shoe strings, with varying degrees of failure, regulated wholly by local conditions. strings, with varying degrees of fallure, regulated wholly by local conditions. Many formerly active workers are removed from the field because of the unwritten law which says "Thou shalt not talk socialism except for the S. D. P.," or vice versa. We waste our substance in hiring two halls when one would do better. We work more for party than for progress, disgust our friends and amuse our enemies. Such are the fruits of division, a plant grown and nurtured under the personal supervision of the late lamented prophet Daniel, and but recentify uprooted and cast out as unclean by the S. L. P.

vision of the late lamented prophet. Daniel, and but recently uprooted and cast out as unclean by the S. L. P.

I do not care to go into a detailed argument for a specified action but rather to adduce facts and suggest thoughts hitherto avoided or obscured in the discussion. To diagnose by negation it is well to consider the validity of the arguments of the objectors. Thus far the objections arising within the S. D. P. seem limited to dislike or distrust of individuals. That there are such objectionable individuals in the S. L. P. I acknowledge, but that all such characters are in that organization I deny—we have our quota. The S. L. P. have at least overruled their obstructionists and evinced a spirit of hohorable fraternity. If we fail to do as much we acknowledge ourselves inferior to them. The most plausible objection arising within the S. L. P. is the suggestion that we are given to hero worship, and if the signed article of E. V. Debs in the S. D. Herald of January 20th is allowed to stand as the volge of our party, our guilt is confessed. Debs in the S. D. Herald of January 20th is allowed to stand as the voice of our party, our guilt is confessed. At this juncture I wish to take issue with Mr. Debs, and assert that his article lacks the element of truth; he has conveyed to the readers of the Herald a false impression; he has at a single stroke done more to obstruct so-callst organization than De Leon has been able to do, and by similar methods. I call upon Mr. Debs to clear his skirts, to retract an unfair statement and if he believes in apologies to apologize now for the injustice which he has done both parties by the use of language unbecoming a gentleman and which the subjects of his criticism scorn to use. I am not unalterably in favor of union, though I believe in it and hope for it; if there are good reasons why it should not be, let us be honest and speak them out or, failing in that, hold our peace. I am a firm believer in diplomacy, but bear in mind that diplomacy ends where chicanery begins, and that the wisest diplomacy that we can employ is to meet half way the fraternal advances of our fellow-socialists, become parties to a conferthat we can employ is to meet half way the fraternal advances of our fellow-socialists, become parties to a conference, submit to a referendum, not only a majority report but minority reports as well, and let every socialist in the two parties vote yea or may. I shall not again rush into print upon this subject. I do not believe in forcing a growth, and if the organizations vote "no, whether moved by their own opinions or by weight of argument they will have demonstrated their unfitness and the consequent inaptitude of union. have demonstrated their unfitness and the consequent inaptitude of union. Whether we can agree upon conclusions or not, let us be honest with each other and insist upon like honesty in our servants, for as sure as we falter in our. Integrity just as surely will we invite inglorious dissolution. It has been said that "only the spirit of DeLeonism could prevent a union." The S. L. P has repudiated this spirit. Shall we not do as much?

Addison W. Barr.

Addison W. Barr. Worcester, Mass.

Editor Workers' Call:

Editor Workers' Call:

I noticed in the last issue of your paper an open letter by R. A. Morris, addressed to Samuel M. Jones, mayor of Toledo, which for unfairness and bad ogic certainly takes the cake. Brother Morris seems to take umbrage at Mr. Jones, because he calls himself a socialist; "one who believes in all the people, and who believes in liberty and quality for the last and lowest man ils day, and when we get there, we will have full revenge on you, we will pay it you all back and with interest." This being the Morris brand of socialism, and that it is, there can be no joubt, since in no other way can his antagonism to Mayor Jones' formula of equality and justice for all be explained, I must confess that to the at least it seems of a spurious kind. Any ism, be it capitalism, marchism, socialism or any other kind, that has not the best interest of all mankind for its object, has within itself the element of its own destruction. It may succeed for a time but must just as surely be superceded

kajser Wilhelm's "mailed fist" came down heavily a few weeks ago, with the result that Dr. Arons, the socialist professor in the University of Berlin, was forced to resign his position there. And now we read the following in the daily press as an example of the Emperor's success in stamping out socialism:

According to the Tageblatt, Dr. Arons, the Berlin professor of natural philipsophy who was dismissed from the university for holding socialist doctrines is to become one of the editors of a leading socialist newspaper, and also in time a candidate for the reichstag.

A little mere of this and those who have been so ready to resort tto expulsion in such matters may perhaps get a dose of their own medicine.

WANTED—Ahout ten comrades who have evenings free, to help the Organization Committee in distributing socialist literature. Call at office of this paper, 26 N. Clark street.

to hasten that auspicious day, for that is all he asks of them. Brother Morris seems to labor under a curious confusion of ideas when he first speaks of only two classes opposing each other and struggling for the mastery, and then enumerates three distinct classes, i. e. the capitalist, the middle and the working classes, the two latter struggling fercely with the former and at the same time fighting each other, and then asserts that Mr. Jones straddles and represents all three classes because he as a socialist believes in liberty and equality for all the people. Where does Mayor Jones ever assert that he even tries to represent all these classes? Are, believing in all the people and representing three distinct antagonistic classes synonymous terms brother Morris? In conclusion, he takes Mr. Jones to task for saying that he. Jones, is doing his utmost to bring about, this justice and equality for all. Does friend Morris really believe that individual efforts are of no avail in this great class struggle? Then in the name of common sense what is he making all this strabout? Why don't he sit down: fold his hands and wait pattently until the good times come along, since no effort of his can either hasten or retard them. One would think from the brother's talk that society is something distinct, altogsther independent of the individuals, and is therefore altogsther dependent on them; take away the individuals and there can be no society. Hence it is the individuals that must move. Now all history proves that the mass of individuals and nothing but individuals and there can be no society. Hence it is the individuals in any undertaking without leaders to guide and direct them are a helpless mob, therefore those leaders must set the pace if success is to crown vinials in any undertaking without leaders to guide and direct them are a helpless mob; therefore those leaders must set the pace if success is to crown the effort of any communal undertaking. That Mayor Jones is one of those conspicuous leaders his recent campaign in Toledo amply proves. I fear our socialist friend sadiy misses the mark when he considers socialism to be nothing but a class struggle to benefit itself at some other classes' expense. The very word socialism excludes that idea. Webster defines it as, the doctrine that a community of interest is the best form of society. Since then true socialism must be for the best interest of all classes of society, else it is no better than the system it tries to supercede, therefore in its true essence it must exclude all party strife. Let us be fair, brother Morris, and above all things, let us be reasonable.

A. Dodge. eaders to guide and direct them are A. Dodge.

[We have been allowed the privilege of printing the following letter, which was received by a correspondent of our acquaintance in this city. It will give was received by acquaintance in this city. It will give acquaintance in this city. It will give our readers some insight into capitalist conditions in California, and the necessity for a vigorous socialist propaganda in that state. The name of the writer is withheld for good reasons.— ED.]

Mr. Chas. H. Kerr, Chicago, Ill.

Kind Friend:—

Yours of the 16th inst., directed to me at this at Corning, Cal., reached me at this

Kind Friend:—
Yours of the 16th inst. directed to me at Corning, Cal., reached me at this place today. Your letter explains to me that you have undertaken an enterprise of great importance to the socialist movement, and asking me to send for some books, a list of which you enclosed with your letter. In reply, I will say that my whole heart and sou is with you, and the socialist movement. I have induced a number of people to send for copies of "President John Smith," and have tried to get situated so that I could handle your books, but a man with a family to support and no backing, cannot possibly get a dollar ahead. This coast is overrun by industrial slaves. It is no rare thing to see four and five men at a time tramping along the railroad with their blankets strapped to their backs, and there is no use saying that a man who will tramp day in and day out and carry 39 or 40 pounds of blankets and clothing on his back is not willing to carry 30 or 40 pounds of blankets and clothing on his back is not willing to work if he can find employment and anything like decent treatment. This work if he can find employment and anything like decent treatment. This is a saw-milling town, and will say to you that the only difference between this and an old time southern negro quarter is, that the masters here can not use the lash or auction block. Men are plentiful and are discharged for the most trifling offenses. A man who had been working in the horse barn for the company quit the barn some time ago, and was employed at the mill afterwards; was asked to return to the barn recently at the same old waggs—350 per month—and refused, saying that it was worth \$70 per month for a man to stay away from his family from 5 o'clock in the morning until \$5 o'clock at night. Their reply to him was: "The barn or nothing." So he is now out of a job, notwithstanding the fact that he has been their faithful servant for nearly two years. In the Sacramento valley, and other large ranching districts in California, men who labor are not respected half as much as the negro slave was before the war. They sleep in barns or bunk houses, work ogic certainly takes the cake. Brother dorris seems to take umbrage at Mr. Jones, because he calls himself a socialist; "one who believes in all the people, and who believes in liberty and quality for the last and lowest man and woman." If I rightly understand Grother Morris, his brand of socialist is in uncompromising partizan of the working class who believes in wresting rom the capitalist class, as he says, he land and instruments of production and distribution, and then operate them or the sole benefit of their class—the working class—to the "actusion of ourse of everyone who is not now of hat class. In other words he says to he capitalist class: "You are the uper dog now, but wait, every dog has liaday," and when we get there, we will have full revenge on you, we will have full revenge on you, we will have full revenge on you, we will again the Morris brand of socialism, and that it is, there can be no joubt, since in no other way can his and equality and justice for all be explained. I must confess that to the at least it seems of a spurious kind. Any sem, be it capitalism, anarchism, soiravel the whole year round—year in and year out—and hunt those poor down-trodden things up, and hold meetings with them, deliver lectures, etc., etc., and explain the situation to them, until they are well-informed as to what the trouble and great drawback is. It is hard to sell books to such men, or even to get them to take an interest in anything that has a tendency to further their welfare. I meant to have written you from Corning and explained to you how the promoters of that Maywood colony schems were fleecing their eastern patrons. How they catch their "suckers" by advertising through the religious journals; the Christian Herald being one of them. But fearing you would not take an interest in the matter, I declined doing so. I have written much more at leagth than I thought I would when I sat down, usuch perhaps of which will be of no interest to you. I am not ablejust now to handle any of your books, but any time that you desire to send me oirculars or any matter that you wish distributed. I will hand it to those whom I think will be interested in it, and do so with pleasure, and when I get more able will gladly send you an order for some books. Wishing you much success.

I am yours fraternally, XXX .

THE CLASS STRUGGLE.

cialist's Comment on Prof. Ferri's Criticism of Marx and Darwin.

While reading the articles recently in The Workers' Call on Marx and Darwin, the thought suggested itself to me of how much in sympathy the theories of Darwin were, with the practical teachings of scientific socialism. To all the properly understand socialism and Darwin's theories it is apparent that they go hand in hand and that all the philosophy of socialism rests on the doctrines of the struggle for existence, and the survival of the fittest, and that it is only through the theory of evolution as typified in these two doctrines. While reading the articles recently in

and as capital is that part of wealth used in producing new wealth (this is a concrete definition) it at once follows that they are also the producers of feature, although the producers of this capital, yet the working classes are not the owners of it, it being owned by the for sale, for profits. The working class vigorous campaign. in order to exist must obtain access to | M. de Pressense has been lecturing at should wish to produce only to supply in the Transvaal war. his own immediate demands he is very bluntly told, "no profits, no production," Here is where the struggle for existence comes in: the capitalists as a class wish to live through profits. The workers as a strong united party. a class, to obtain this capital as their The almanae of the party-a very own in order to produce for use, as well-compiled and interesting bookletchail prove, alone being fit to survive), will sooner or later be forced in their struggle for existence to take possession of capital, the kidnapped child of their own creation, or perish as a class.

The capitalist class although the ownsame. They are useless functionaries in society, having nothing to do but as themselves the greater part of labors' product in the shape of rent, interest and profit. They have long ago withdrawn from active participation in production and today all industry is organized from top to bottom by the not doing enough work. working class. The workers alone can and do use capital; they have a useful function to perform, to produce for the wants of all the people. This being the case, they alone are fit to survive, and as their material interests demand that all shall have access to the tools of production, the right to work, and to be guaranteed the full social value of their members of society and numerically the superior, their struggle for existence will drive them to take hold of and organize a social system based on the collective ownership of all the modern means o production and exchange, guaranteeing thereby at once the above, and at once wiping out all-class lines and distinc

Socialists clearly, point out that so ciety has reached its present stage by a series of evolutions during which various struggles between exploited and exploiting classes have taken place, in fact as the Communist Manifesto says, "All history of mankind(since the dissolution of primitive tribal society holding land in common ownership) has been a history of class struggles. In each case the struggle has been between the class on top and the one directly underneath it to see which should exploit the laboring classes. From each of these struggles, as I pointed out before, the working class have come out iger, their course of evolution being from slave to serf and from serf to freeman, they alone survived through all the struggles simply because they were fittest to survive, being the pro ducers of the actual necessities of life, while the exploiting classes have in each instance given way to the next and have practically disappeared until today we find that the struggle has narthe next step in evolution the workers will be absolutely forced to fulfill their historic mission, by once for all, freeing society from all class struggles and discomplished by raising their own class to the position of ruling class. The upon the securing to all, an opportunity to lubor and enjoy the results of such abor, a seciety in which all must work

Section Santa Ciara County is holding propaganda meetings regularly every Sunday evening at the A. O. U. W. hall, S. First street, San Jose. The meetings are well attended and the interest in socialism is increasing steadily

were received with great interest that socialism finally hopes to accomplish its end, the emancipation of the working class.

As a socialist I do not speak of individuals but of classes. Darwin spoke not, of single individuals but of species or distinct classes and so shall I in doaling with my subject, for I recognize in evolution, the individual is lost sight of in the great forward movement of a class.

In all the evolutions of the human race, through the various economic systems (slavery and feudalism for instance), the working class as a whole has survived because fittest, while the ruling or dominant classes utferly disappeared, simply because they were useless and had no further function to failt.

In dealing with the struggle for existence I would call attention to the class struggle. There are today two subdivisions of classes of seelesty between whom a great hossility and a clash of interests exist. The divisions or classes are the working class and the capitalist class. We all know that the working class through their labor power are the creators of all wealth used in producing new wealth ethis is a used in producing new watch tiths is a content of an are capital is that part of wealth used in producing new watch tiths is a content of the producing new watch tiths is a content of an are capital is that part of wealth used in producing new watch tiths is a content of the producing new watch tiths is a content of the producing new watch the principal content of the producing new desired their nonlinations are cabbing in politics and the capitalist class. "MISERY ALLEVIATED."

Kimberly Diamond Company Sets Kaffirs to Work, Directly the Siege Is Raised.

At the present time a good deal of discussion is going on anent the questiton of justice or injustice on the part of either side in the war between Briton and Boer in South Africa, and while windy orators and sentimentalists are declaiming against one or other of the combatants, as destroyers of "liberty." upholders of "tyranny," etc., etc., the very sensible gentlemen for whose ben-Coming of the "Machine" With Many efit the combat was started, are not Names, Which Parts the Working allowing their peace of mind to be disturbed by the useless imprecations hurled at them from all parts of the hine" comes into evidence now that earth. They are right on the spot to the local elections are drawing near, resume "business" as soon as possible, It might be thought that the average in order that they may continue their wage carner, whose whole time is given good work of "alleviating misery" and up to a continual struggle for the incidently make a trifling profit for

> Kimberly, that famous city which has been besieged for four months by the Boers, and which during that time formed the residence of the muchabused Cecil Rhodes, had just been relieved, and before the enemy had been properly cleared out of the district, the following telegram from Roberts. reached the British war office:

> "Methuen reports from Kimberly that food and forage are being rushed on as fast as possible. There will be coal enough to start the De Beers mined in ten days, whereby the great misery will be alleviated."

The De Beers mines exist then for the purpose of "alleviating misery" and in the wake of the relieving column the coal trains pour in so that the mines may begin their blessed work. Surely humanity" or "injustice" in the face of this fact. But let us see

Down in the depths of these De Beers mines, thousands of workingmen, native Kaffirs, from whom their country has been torn, have tolled for years, ill paid, ill fed, and living the actual lives of slaves, producing untold wealth for their benevolent masters, who are now preparing to "alleviate their misery" once again, by giving them some more of the same.

During the siege these men could not be exploited, and therefore were released from toll, although they were not allowed to leave the city. It was imperative upon their employers that they should have food, lest worse happen, and so during the four long months, they have been consuming commodities and producing none. The "misery" which they must have suffered in loading around, eating and sleeping, will be put an end to just as seon as their masters can set them to work again, and for that purpose the coal trains are being promptly rushed

At the same time that the "m The string of names tacked on to of these fortunate laborers are being each of these strange appliances, rep- attended to, the "miseries" of their esent in themselves, the different indi- phllanthropic masters, who for four long months have been denied the on cease. Capitalism is the most wonderful remedy ever invented against miscitizens" to help him "smash the ma- capital, the greatest benefactors of the human race.

don't look at the question exactly in the same light; they might even prefer to live and eat without working, but the machine be "smashed" or not then they are a stupid people who don't know that the road to happiness lies in for the "machine" or the "good man" digging and delving in the mines for who wants it "amashed." When it is their masters, a lesson which their feilow workingmen who are "civilized" have already learned.

In order that the efficacy of the De Beers mines as "alleviators of misery," existence and everything goes on much should not be impaired, the most careful precautions were taken during the siege to prevent such a deplorable occurrence, as the following report from

"Sandbag protections and underground covers were constructed near the houses, and the machinery in De Beers' mines was protected by great piles of timber. In spite of the persistent efforts of the enemy the only damage done to the De Beers property was to one machine and to one electric bell, which was cut through by the shells falling constantly around the works."

All this trouble was taken in orde that the property of these benevolent capitalists might be kept in readiness to exploit the labor-power of thousands of their fellow men at the Brat possible opportunity, and this is what they call "alleviating misery." sort of benevolence is practiced by cap-Kimberly, but it must be admitted that they are a trifle slow to exercise their

unless there is profit attached. This, however, may be nothing more than es coincidence, but is nevertheless remarkable.

Modern industry at any rate will oon be in full swing at Kimberley once The Kaffirs, digging thousands of feet below the earth will remember the slege with regret, and perhaps be disposed to contrast the "misery" from they were rescued, with the beastly toil in the mines, and long for another war that might again plunge them into a similar stage of misery, The capitalists, satisfied that legitimate profits are forthcoming once more, will continue to do business at the old stand utterly regardless of the vaporings of the shallow orators who denounce their greed and injustice in bringing on the South African war. Diamonds are material things out of which profits can be made, while "denunciation" is immaterial and unprofitable and therefore There are but two realities in modern society-capitalism-and social-

For the Underdog.

The Chicago Tribune of the 2d instant in speaking of the injurious effect of strikes upon the small retailer and landlord, calls attention to the fact that the latter are "innocent" victims of quarrels in which they are not concerned, and gives some plous advice to the striking workers requesting some consideration upon their part as to the effects of their action upon the fortunes of the little capitalist. Without taking into account the very obvious fact that working men do not strike with the avowed object of injuring the latter, but merely to improve their own material conditions, it may be in order to state that the method of the small and great capitalist so far as the working class is concerned is identicalnamely the seeking for the utmost possible amount of profit. When work is fairly steady and wages regular, the petty retailer and small property holder invariably attempt to secure still. more profit from these conditions in the increased price of commodities and

great railroad magnate - Jay Gould, once declared that his system of roads gave the public the cheapest rate of transportation that was possible. Upon being asked what that might be, he answered, "all that the traffic will bear," and this is yet the golden rule of the capitalist, be he great or small. The little ones inconsistently enough, denounce the action of the big fellows in this respect, while steadily pursuing the same object, accumulation of profits, to the utmost extent of what the "traffic will bear."

This action upon the part of the petty retailer and landlord (an action which they are compelled to take) being partially recognized by the workingmen makes them listen and see a reasonableness in the arguments advanced by the "walking delegate" and "agitator," upon whom the capitalist press regularly pours the vials of its wrath and condemnation. The fact that wages will before, and that the "innocent" property owner intends to raise rents from to 40 per cent, as noticed in the public press, tends to compel the working men to go on strike, not as the capitalist press would make it appear, to simply get more, but to prevent their standard of living from being reduced in this greatest period of capitalist

The strikes will go on no matter what their effect may be upon the small capitalist class. Win or lose, the wagewhole system of profit-mongering, small constantly recurring struggles, that the whole system of profit-mongering, small class. The object of the socialist move of the constant of the Co-sperative Commonstration of the constant of the Co-sperative Commonstration of the constant of the

done more to crush their smaller rivals out of existence, than any other factor in modern society, have always found February 20th, 1900. in the "Tribune" a valiant and unscru-pulous champion of their interests. The ruin and bankruptcy of the small capitalists cannot be laid to the charge of the striking workingmen, in spite of the crocodile tears of the great capitalist

SECTION CHICAGO, S. L. P.

Statement of Immediate Measures to Be Supported by Socialist Candidates in Coming Election.

Batported by Socialist Candidates

In view of the fact that the municipal elections in Chicago are to take place in April, the Socialist Labor party in presenting their candidates upon town and aldermante tickets, quee more affirm their allestance to the prenicipies of revolutionary socialism, as adopted at the late national convention held at Rochester, N. Y.

In calling upon the working class to raily to the support of the principles of socialism, the socialists with to emphasize the state to complete triumph of the working class to raily to the support of the principles of socialism, the socialists with to emphasize the state to complete triumph of the working class, which can only find expression in the total overthrow of the capitalist system. Be accomplished, any temporary palliatives must of necessity be partial and insufficient through the present the following immediate measures, which our candidates will enforce according to the amount of power conceived upon them, for the consideration of all workingmen who desire to achieve the enancipation of their class by means of the ballot:

In the employement of all unemployed citigens by the municipality, at the best possible wages.

2.4. That the municipality shall furnishe supported the according to the amount of power conceived the ballot:

In the employement of all unemployed citigens by the municipality, at the best possible wages.

2.5. The the municipality shall furnished proposed to the product of the supported of the product of the supported of the supported of the support o

to the fact that workingmen do not strike except to better their material conditions, and satisfy their wants. Living under a system of legalized plunder, this want sometimes become unbearable, and the workers are often forced to submit to the terms upon which their employers are willing to receive them. Therefore in order to make possible their success in these struggles, the public powers when captured by the working class, must be used in their interests, to achieve victory in such struggles, as it is now used in the same manner by the capitalist classes; to coerce and overpower the workers in the conflicts which are forced upon the latter.

The example of our fellow workingmen in Europe, and especially France. on this matter, has been often pointed out in the columns of The Workers' Call and other socialist papers. Workingmen who through their trades unions have expressed their dissatisfacresorted to strikes to emphasize such dissatisfaction, have in this city, often felt the heavy hand of capitalism, which has never scrupled to use the police, militia, and the machinery of law as not buy as much meat, fuel, etc., as aids to enforce the submission of the In France, on the contrary, where the workers have captured the local powers, such powers have been used to encourage, aid and support the striking workmen, and have made their victory more certain by supplying food, elothing and shelter during such perlods, and giving adequate legal protection meanwhile.

What is possible in France is also possible in the United States.

It is to be remembered, however, that such palliatives are limited in effect earners will gradually learn from these proportionately to the power conferred constantly recurring struggles, that the upon the representatives of the working whole system of profit-mongering, small class. The object of the socialist move-or great, is inimical to their interests ment in all lands being the establish-

ist ballot will finally solve the labor problem by making the worker the possessor of his entire product.

The pretended solicitude for the welfare of the small capitalist expressed by the "Tribune" is rather humorous when it is considered that the great capitalist combinations which have

17th. The following number of signatures is required for the different towns and wards:

Direct legislation is essential to the o-operative commonwealth. The (mis) representative system is good enough too good for the competitive chaos.

For that is what it amounts to, If

little things are more important than great, nothing is more important of all.

In the Cigar Makers' Journal of February, the organization reports a large increase in membership for the past year, and what is more satisfactory, a largely increased demand for the union label. This is gratifying as showing the growth of solidarity among the working class, and the cigar makers cannot do better than emphasize that solidarity by veting a straight socialist cicket at all elections.

weapon of the working class, by which bill, intenthe "labor problem" will be solved, labor. Davis bill, to provide for better And this accomplished, all talk of the protection for machinery, will also re"harmonious relation between labor ceive a knockout blow, as did his bill, and capital which ought to be, etc.," will become meaningless, when money. Thus capitalism rules supreme.

A Capitalist Messiah.

The present labor disturbances leads that stalwart socialist, John V. Farwell, to grasp his pen once more and distill knowledge at the only licensed distillery. We may not like his conclusions, but we cannot escape the indubitable fact that they came from no less an authority than John V. Farwell himself. Here is a sample of his logic:

"Suppose all were farmers where would be the necessity for the modern plow and the reaper factories?"

What a terrible picture is thus at case before that very indefinite umpire the "public." in order that the said "public." may be able to determine upon which side lies "right and justice." well drillers, or all barbers, or all telegraph messengers—ah, how awful; suppose we were all telegraph messengers.

To the interest of a civilization would chais. Conveneed that the list of petitions to his intent on his work of pointing te the athrone of grace to include similar occasions. Like "Tam O'Shant—the lessons of the present, conscious of the expression. "Lord gie us a guid ing the analogy, all shoemakers, or all the mission of the working class, it is conceit of oursels." It may be not often that he stops to reflect on the femarked, however, that in general it past.

The Irishman is a hard worker and a hard fighter, and his capitalist exploit-proval upon the party whom they are

should have the job, appears in this month of the proletariat.

"When the Savior said to the rich when the Savior said to the rich young man, 'Sel all thou hast and give to the poor and come and follow Me,' there was no railroads, steamships, reaper factories or thousands of other lesser factories."

and consequently the Savior could not know how much more "good" the rich end in failure, have all imparted their timent, we find for instance a dyspeptic India, China, Transvaal, Philippines or young man could do by exploiting the lessons to the working class. mistake at last and has come again in "The emancipation of the workers must

LOOKING BACKWARD

The anniversary of an event which is full of significance to the struggling proletariat of the world, will-be comorated on the 18th inst. amongst men who look upon the birth of the Commune of Paris as one of the great landmarks in the progress of the social

In spite of the irreconcilable elements the confused ideas, the fatal oversights and mistakes which attended this event from its inception, until it expired in ognized that the Commune of Paris

iterature of the movement, and at recurring anniversary of the the cause for which they fought re by the disinherited tollers of the world.

the part of the capitalist classes of France, that compound of desperate fear and fiendish crueity, which culover th'rty thousand victims, men women and children, after all resistance had ceesed. Those victims have long been at rest. It is the duty of those carrying out the ideas for which these men, women and children suffered, to learn by their experience, to recognize whatever weaknesses may exist in their own ranks, and the best method for dealing with such weaknesses; and above all to understand thoroughly the unscrupulous and relentless nature those whose class interests are bound up with the system of modern capitalism. Not in a spirit of revenge, but in the necessary desire to comprehend the magnitude and nature of every factor which may retard socialist progress, and through such acquired knowledge deal with it, with that determination which springs from intelliment conception.

Twenty-nine years have passed since the Commune was declared. Since ther the French working class has profited hy the lersons it taught. At present, the party who have received as a heritage these principles of economic and social freedom, for which their nacestors perished, are both in numbers and intelligence enormously aperior to the men of '71. Men who represent those principles now appear in ever increasing numbers in the representative chambers of France, and it is becoming daily more and more evident that upon the shoulders of the socialists rests the stability of the French government. They have learned the lessons of the Commune and will make no premature move without knowing that the ground s solid under their feet. The memories of the Commune still remain to them the pe

ments, a constant reminder of the m cessity of intelligently comprehending the nature of the class struggle, and the inevitable results of failure to under stand it.

The socialists of Paris can never for get the Commune, living as they do on the actual ground where the tremendous they demonstrate in hundreds of thouing, that effective unity of the workers can only spring from a clear and conscious knowledge of the interests of

the Commune are fully as valuable to the "better classes." the workers of this and other lands, as March, brings together in all parts of the world, men who regard the Comof social progress.

ALL FOR THE CAUSE.

Hear a word, a word in season, for the day is drawing nigh. When the Cause shall call upon us, some to live, and some to die!

He that dies shall not die lonely, many a one hath gone before. He that lives shall bear no burden heavier than the life they bore.

Nothing ancient is their story, e'en but yesterday they bled, Youngest they of earth's beloved, last of all the valiant dead.

E'en the tidings we are telling was the tale they had to tell. E'en the hopes that our hearts cherish was the hope for which they fell.

In the graves where tyrants thrust them lies their labor and their pain. But undying from their sorrow spring-eth up the hope again.

Mourn not therefore, nor lament it that the world outlives their life; Voice and vision yet they give us, mak-ing strong our hands for strife.

Some had name, and fame, and honor, learn'd they were, and wise and strong: ne were nameless, poor, unlettered, weak in all but grief and wrong.

Named and nameless all live in us; one and all they lead us yet
Every pain to count for nothing, every
sorrow to forget.

Hearken how they cry. "O happy, happy ye that ye were born in the sad alow night's departing, in the rising of the morn.

Fair the crown the Cause bath for you, . well to die or well to live; Through the battle, through the tangle, peace to gain or peace to give."

Ah, it may be! Oft meseemeth, in the days that yet shall be.
When no slave of gold abideth twixt the breadth of sea to sea.

Oft, when men and maids are merry, ere the sunlight leaves the éarth, And they bless-the day, beloved, all too short for all their mirth.

Some shall pause awhile and ponder on the bitter days of old, the toll of strife and battle over-threw the curse of gold:

Then twixt lips of loved and lover sol-emn thoughts of us shall rise; We who once were fools and dreamers, then shall be the brave and wise.

There amidst the world new-builded shall our earthly deeds abide. Though our names be all forgotten, and the tale of how we died.

Hear a word in season, for the day is drawing nigh,
When the Cause shall call upon us,
some to live and some to die:

-William Morris.

Well and Ably Managed.

The great March festival in commenibeld at Brandt's Hall, 152 North Clark street on Sunday, March 11th, and was in every sense a complete success, Over 1,500 people were present, and many hundreds were reluctantly compelled to turn away, owing to the unexpected number already in attendance. The Lasalle Turnverein gave a gymnastic exhibition which was well received, and the forits of the ladies of the same society-evoked much applause from the audience, for their splendid demonstration of physical culture. The living pictures symbolical of "Past" and "Future," delighted all present, while the dancing which followed was thoroughly enjoyed by more than three hundred couples. But on the whole the singing was the feature of the evening, and the climax was reached when the massed choirs from all the participating sangerbunds united in rendering those revolutionary hymns, those songs of Liberty and Freedom which voice the aspirations of the international proletariat, and inspire the workers of the world with that aublime energy and deturning tion in the cause of socialism, the terror and despair of the world's plunderers. Comprades Valteich and Sissman addressed the meeting, in German and English respectively, and their remarks were received with enthusiastic applause. The proceedings closed at midnight after a thoroughly enjoyable evening, and the thanks of the socialists act to the second of the world with that aublime energy and deturning the comprehensive second of the world with that aublime energy and deturn the complete success, financially so, cally and otherwise. It would be well of these pleasant social assemblages, and the thanks of the socialists cause, locally at any rate, if such functions were always placed in the hands of our German comrades, who seem to be seemed if titted to undertake and bring them to a successful eventure in the successful eventur oration of the Paris Commune, was held at Brandt's Hall, 162 North Clark H. Kerr & Co., 56 5th Ave., Chi- cago are especially due to our German comrades, who seem to be so well fitted to undertake and bring them to a successful conclusion.

LETTER BOX.

Three ward nominations were made the feature of the occurrence was, this week, one of them, that of Comrade while everyone present had lost so dates for the Lower House, from the Third and Eleventh wards respectively. So far, everything is progressing smoothly; the section is stronger than it ever was in actual workers, and previous experience in the campaigns of 1835 make the planning and execution of the work comparatively easy. It is no child's piay, however, we could use more workers and more means if we had then, but we are doing as much as we can and are confident of a healthy increase in numbers and means before the fall campaign. The Democratic platform will not be out till tomorrow; at the primaries the radical faction won, standing for "municipal ownership and competition in public service" if anyone knows what that means. The mass is expected to vote for such and such a candidate because he is "going to see that the working people have more benefit from the park system"—said system thus far naving had a decided inclination to spread itself only about the fashlonable quariers of the city, while the projected (7) parks and boulevards in the working least districts are safely hung up in the courts. It will be the endeavor of the socialists to show the people of these latter districts that parks would be considered a very cheap sop. Just Low the land-lords jest secure in the belief that the mass does not puderstand the situation, but believes that it is only the malicious work of "old fogies" who don't like parks. 'Knockers' as the local paper-call them, and that the working people don't want parks; they would much rather house understand the working people don't want parks; they would much rather house and the call them; elect a new sheriff, who will forthwish the forth working people don't have been along the fact, that thousands of our citizen have heaved their like act, that thousands of our citizen have have had exert the bein and showed them up. It may not be stranges to poul with up. And the working people in almost covered them and showed them up. It may not be stranges tout of the working people don't have a constitute of the projected delineating the social movement from the part of the working class, is not for an apparently momentarily respite in the struggle, but for the full product of their labor at all times. This demand can find expression only under the banner of International Socialism.

The cigar makers and their bosses, alike do not want the cheap product of Cuba and the Philippines to compete with the commodity they make and sell respectively. Therefore they are anticepansionlats. The anti-expansionlats, seeing that annexation is inevitable, last gives the clue for the formulating in the earlier development of production at last gives the clue for the formulating in the social movement from the mediaeval, down to the present time. The Utopian socialism of the early park would be considered a very cheap sop. Just low the land-ord, rest secure in the belief that the immature state of the proletariat during the earlier development of capitalist production presented no idea of power or initiative to the Utopians, who alike do not want the cheap product of Cuba and the Philippines to compete with the commodity they make and sell respectively. Therefore they are anti-cepansionists. The anti-expansionists are the clue for the formulating the socialism mosc does not understand the situation but believes that it is only the malletons work of "old fegles" who don't like parks. Knockers' as the local papers call them, and that the working people don't make and the Philippines to compete the unit of the Utopians, who impeted the situation but believes that it is only the malletons work of "old fegles" who don't like parks. The commodity they make and sell them, and that the working people don't want parks: they would much rather have been presented to the production at last gives the clue for the formulating the average of the prospectively. Therefore they are anti-cepansionists. The anti-expansionists are the formulating the social services of the prospectively are parks. The anti-expansionists are the formulation that the working people do

ty drive," from this fellow's neighborhood to the cenier of the city, rath than \$190,000 to make the driv, weed; than \$100,000 to make the dirty, weed; shadeless courthouse square a pleasar place for the working people who live around it. It is quite likely hat people of this kind will not rest quite so easily after the election. The park question is of course but a local issue, but is being worked for all it is worth. Before we are much older the workers will see that this, like all other questions, hinges on the economic status of society, and that once that is changed rightly, these minor issues disuppear; otherwise they are always in evidence.

Socio.

Editor Workers' Call:

It is now well on in the tourth week since the tailor bosses belonging to the Merchant Tailors' Exchange declared the boycott against their employes because of the latter's refusal to give up their birthright of free men by signing the now famous demand from the bosses that they would agree not to ask for free workshops, and promise not to go on a strike (no matter for what cause), during the next twelve months. It is a pleasure to note the cheerfulcause), during the next twelve months. It is a pleasure to note the cheerfulness and unfaltering hope for ultimate success with which the journeymen view the situation, and this not at all without good reason. The enthusiasm of the men is found in their implicit faith in one another, as although sentinels are posted at all the stores from early morning until late in the evening, there has not been found one instance where a union man seemed to desire compromise or secret conference with the bosses. On account of the severity of the weather during the past two weeks it may be conceded that the spring season and with it the rush of

Editor Workers' Call:

Dear Sir;

On February 28th there appeared in this city, a man of reputed residence in California, answering when spoken to to the name of G. B. Benham. Should you know of such a person's whereabouts, and could reach him, you would confer a great favor upon the courseless. Chicago, March 11th, 1900.

Editor of Workers Call:
Dear Comrade:

As our Festival held February 18th, 1900, was a success, we feel able to contribute the sum of \$7 for the support of The Workers Call, and hope that you will accept the same with our best wishes. Fraternaily your for the better society.

23rd Ward Branch, S. L. P.

Kansas City, Mo., March 9.

Three ward nominations were made this week, one of them, that of Comrade while everyone present had lost somethis week, one of them, that of Comrade Charles Engel for member of the Lower House from the Fifth ward, being the first time the party has nominated by convention; in this ward we have official standing and no more petitions are necessary. Petitions are being circulated for placing the names of Comrades John R. Smith and George M. Yaftes on the official ballot as candidates for the Lower House, from the Third and Eleventh wards respectively. So far, everything is progressing simpothly, the section is stronger than the very wars in actual workers, and previous experience in the campaigns of 1838 make the planning and execution is everyone present had lost something by the crime, none of them knew the first text fact and in the fact and in the first time the party in the fact, in the distribution of the fact, that thousands of our citizens have suffered losses continually for years, and have never been able to 1838 make the planning and execution is the fact, that thousands of our citizens have suffered losses continually for years, and have never been able to cate the pilferers until this Benham

STEADY AND STRONG.

Observations by Chicago Comrades, on the Working Class Movement in France.

Lille, France, Feb. 19th, 1900, Perhaps a bester impression of the socialist movement in France can be given by the relation of a few incidents them the most important.

Committee of the French socialists had a full opportunity of investigating to catch the briefest glimpses. One of This is the tody, that since the union, some features of this and shall make these glimpses was afforded by a note has had charge of the party affairs and it the subject of our next letter.

This is the tody, that since the union, some features of this and shall make these glimpses was afforded by a note in the socialist Labor.

P. Sissman and others.

The weekly meetings being held by the Thirty-fourth Ward, S. L. P., at the Social hall, corrier of 112th street and Michigan avenue, are being wel attended and much interesting discussion takes place. Comrade Mortis, who, was the speaker on Sunday, March 11th, addressed a fair-sized audience and was attentively listened to. A question was asked by a member of the audience as to the reason why he should not vote for one of the capitalist candidates for aiderman, this person being a store-keeper who had given credit to workingmen in the strike of '94. There seemed to be some idea on the part of the questioner that in voting for this candidate graftinde for past services should be the main reason for such action. The speaker showed that this particular person, like all other capitalist candidates, stood for the perpetuation of the system under which the workers were compelled to ask credit in order to like, for the same reason. ist candidates, stood for the perpetuation of the system under which the
workers were compelled to ask crediin order to live, for the same reason
that they were compelled to ask the
permission of individuals for the feaveto work. That nothing but the establishment of socialism can after those
conditions, and that to vote for such
change is the highest interest of all
workers irrespective of the "good" or
"charitable" deeds of individuals or
persons. The answer was well recived
and appeared convincing to the majority of the audience. A collection
amounting to \$2 was taken up, also
\$4.0 in subscriptions to The Workers'
Call. Comrade Klenke will be the next
speaker in the same hall on the 25th of
March, at \$2 p. m. Everybody is invited.
Discussion as usual, free.

The Chicago Association of Machin-

Emerson avenue.

The Fifth Ward club will hold a public meeting Sunday, March 18th, at 2130
Wentworth avenue, at 8 p. in: Comrade Almehadi wil speak.

The Chicago Association of Machinery manufacturers have issued a manifesto declaring that they have dropped all negotiations with the International Almehadi wil speak. Associations of Machinists and will have no further dealings with them. That all reports to the contrary are false and misleading. They wish to deal 'individually with their workmen,' which shows that they fully understand the weakness of the individual and the strength that lies in union. The capitalist class always exhibit amongst themselves those qualities and instincts which they deprecate in the workers. The machinists, it is to be hoped, will not be foolish enough to make this union.

The machinists, it is to be hoped, will not be foolish enough to make this unconditional surrender required by their economic masters. A little more of this sort of thing, and the masters will teach their slaves the use of that valuable weapon the ballot, which intelligently used will make those conditions a thing of the past.

Suppose the individual workman goes into the office of the boss to ask for the eight-hour day, he will be asked to take a chair, until his master has time to summon the patrol wagon. But such a demand from an organized body is another matter altogether and requires considerate attention. Better still, a demand from the whole working class at the ballot box, for the collective dwnership of the means of production ership of the means of production would put the "boss" and his objections completely out of court.

Felow Trades Unionists:-- I wish to tion. A word to the wise is enough.

John Collins, machinist,

THE DECIDING FACTOR,

How Self-interest Holds the Balance in Deciding Questions of "Justice and Morality."

The following notice has been exnibited in the halls and other places of the striking macminists meet to doubt, due to the fact that our morals are not independent of our material interests the property of the Association that the brothers our morals. A glance at a few historial content of the property of the prope ical events will prove, that we always use of the strikes. This also applies to low the dictates of our selfish interests, by order of the Executive Board and we have of the Executive Board, of morality as have suited our interests.

as it presented itself at that time, and we may find an answer to this question The right and sovereignity of the state was the battle cry of the slavery-ap-proving Southerner; and was denied by the liberty-loving Northerner. Now to be true to curselves, and laying aside all the phrases about the perpetuation of the union, etc., the sovereignity of the state, the principle of home rule extended, should be the cardinal principle of a people who have declared: "Government exists by the consent of the governed." To everyone who seeks the truth, regardless of consequences, motives of the Southern as well as of the Northern people, there were the dominating forces of personal interests.

With these historical facts before us and the truth they teach as our guide, let us look at the Boer-English confro versy, by observing some of those who take such prominent part, on either side (of course at a safe distance).

It is an open secret, that many of our statesmen who uphold the President in his policy of slaughtering the Philippinos into submitting to a foreign dom ination, are strongly opposed to, and denounce the greedy English who, they declare, "are attempting to destroy a sister republic for Mammon's sake." On the other hand, there are some of those who denounce in bitter terms the "murderous un-American policy" of the present administration, in the Philippine islands, yet hope that "progressive England will triumph over reactionary Transvaal." If we look at the general public feeling, we will find the same apparent inconsistency. Let us take a

few notable examples:

If the public press does to any degree of accuracy indicate public sentiment, we will find the following phenomenon: that with but few exceptions, our fellow citizens of Irish birth or descent, are outspoken in favor of the Boers, while our Jewish speaking neighbors are in sympathy with the English. We will also find, upon investigation, that the arguments of the Irish pro-Boer as well as of the Jewish pro-English, are along the line of abstract theory of right and wrong. It will hardly do to explain it, as some do, that the Irish being an oppressed people naturally sympathize with the weaker nation, without having any selfish mo. e in it; for there is hardly another people more oppressed than the Jews, who, as a rule, extend their other oppressed people. Our idealists who think this world is lead by abstract conceptions of right and wrong,

will look with amazement and a feeling

of disgust, at this apparent inconsist-

ency, and are sure to exclaim, "consist-

ency, thou art a jewel!"

But not so with him or her, who reads history in its true light, who are not satisfied with merely enemorizing historic events, but have sought the causes for them; for well they know, that our selfish interests always have been the mainspring of all our actions, and that we formed our decisions as to what is right and wrong afterwards. They will, upon investigation, find the chuse for the apparent inconsistent position of those who take issue on this question, by weapons of pen or oratory, to be the same as of those who are discussing this issue at the carnon's mouth in their material interests, real or linaginary. Those who are not blinded by prejudices, or misled by a hypocritical press, pulpit and rostrum, will see belsing the Bible quotations of Kruger, and the flag-waving of the English. birth, and money, aristocracy, the lust for wealth, the struggle for gold; and will denounce this and all other brute massacre of the masses, for the benefit of a few money lords.

However, it would be an evasion of the question, to whom shall we extend general or this one in particular? . We must recognize the fact, that we shall never be able to abolish war, by mere d, we must extend our sympathy to those who are least at fault for bringing it about, and thereby discourage, as far as possible, nations from plunging into war, through the zeal of Areopagus worshippers. Let not the cry of progressive England versus reactionary Transvaal, nor that of Monarchy versus Republic obscure the seue, and blind us to the facts that lay the blame of aggressor to the English and at their door shall we lay the terrible crime for this bloody war, at the threshold of the twentieth century. Our sympathy belongs to the Roars

Let us extend it.

STRIKE NOTES IN EUROPE.

ale Struggle Shows Same Features
As in the United States.

The strike is still on at Carmaux. No one has returned to work. The prefect of the police was here this m ing and reported everything absolutely

The strikers had a meeting at 10 o'clock and passed a resolution of thanks to Jaures, Viviani, Millerand and Gerault-Richard.

The bosses had given out that there were 1,200 miners ready to go back to work, but at a meeting held by the

that the Parls comrades were busy trying to bring the strike to an end.

By a question asked at the meeting It was given out that the strikers were to keep these men to work at starvation very quiet and gave no opportunity for

It was decided to get out a protect against the assertion of the bosses. All in the recalcitrants." This is the capi of the strikers, joined by the women talist manner of dealing with those and children marched down the street workers who protest against fines and singing the "International." At the retained wages, head of the procession they carried a light placard which read: "How faith- ingmen are forced to submit or give up

friends." There was great enthusiasme but no trouble. This manifestation occupied nearly fourteen hours.

The textile weavers of St. Etlenne nave returned to work. They began on Monday morning. Only a part of them ere at their benches,

A great deal of repairs must be done in the mills. The most of the machines need cleaning and repairing after eight eeks of inactivity.

The general committee of the workers have addressed a letter to the mill wners asking them to hasten the re nairs so as to let all the operatives get at their work as soon as possible.

It is reported, however, that in the mill of Giron the workers have been locked out.

The situation of the striking miner at Perrecy is just the same. The atdissention among the ranks of workingmen has brought them closer together, and they have decided not o go back to work until all go back at nce, and then not until they have emplete satisfaction.

Citizen Tistry, who was arrested Jannary 2, has been let out and is here now at Charolles. Citizen Laporte was cause. M. Plaindonx, the judge of in-structions in that district, ordered the citizen to be kept in jail until the strike was over, but that did not stop the strike.

The mine workers of Perreey had a general meeting at Barbier's hall Monday at 4 o'clock.

They voted unantmously to continue the strike, and closed the meeting with cries: "On with the strike!" ive the Socialist Revolution!"

The strike committee and the co mittee of socialists gave sincere thanks to the militant workers who sent papers, books, and came to address their meetings.

The tobacco workers and eigarette nakers at Lille held a meeting at which 800 were present, and decided to look into the condition caused by the partial strike that is now on, and unanimously voted as follows:

1. That in case the masters do not respond promptly tto the claims of the igarette makers that are now on strike that a general strike shall be called at

2. That a committee of the strikers shall submit the list of grievances to the capitalists and that the strike shall continue until they are agreed to.

3. That work shall cease tomorrow morning if a satisfactory answer is not

The strike of the miners at Flinesles-Roches continues. The company refused to submit to the committee on arbitration its side of the question.

At the meeting held last Monday at Dam' the delegation from the miners composed of citizens Moche, Eichell, Baudin, Malhirbe and Joseph, met the representatives of the company, who were Messrs. Lescot and Laforest.

Comrade Moche, in the name of the nelners' union, demanded that two scaba" be at once discharged, which was now their only complaint, and in their place take back the two union miners, Fichelle and Lombrech; "we wish," contlues Moche, "to submit this proposition to the committe of arbitraion. But after all if the company will take back all the workers and will not discharge anyone for what part they took in this strike we are willing to cease our demands for the discharge of the two 'scabs,"

The representatives of the company then replied that the miners had not yet given good reason why those two men should be sent away, and for that our sympathy, by condemning war in as well as other reasons the mine owners reserve the right to hire any man and send away, or rather, discharge,

condemnation of it; and that until war In the fact of the absolute refusal of the miners cordially and properly, another meeting was held and the strikers voted to stay out until they compelled the mine owners to accept their proposals. A large subscription of the striking miners was raised.

> At Carmaux in France, the chief of police came to town and declared that all miners who cared to go back to work would receive police protection. One hundred and thirty-seven scabs have in consequence gone to work. These 137 went to work between a double file of police guards facing a large crowd of miners who viewed them

> The strikers numbering 2,500 stood seing them, and sang the "Internaional' as these scabs marched to work. The strikers are as firm in their denands as ever, and will stay out until the company will agree to their de-

The strike at Martinique is still on. These few lines from a correspon to "La Petite Republique" will tell the

When the miserable country workmen are lucky enough to gain 2 france per week, after very hard work, in different enterprises; for instance at calatter it was decided to continue on nal digging, or at any other kind of strike. At a meeting at 2 o'clock, Roche sald ents plways and a particular way of treating the men contemptibly, and to nish; they contrive and scheme to retain by fines and other devilish ways.

Socialist Labor Party of the United States. SOCIALIST BOOKS Directory of Section

PLATFORM.

The Socialist Labor party of the United States, in Convention assembled, reaffirms its allegiance to the revolutionary principles of international socialism and declares the supreme political issue in America today to be the contained of the capitalist class for the possession of the capitalist class in the Co-operative Commonwealth.

In the United States, as in all other civilized countries, the natural order of economic development has separated society into two antagonistic classes—the capitalists, a comparatively small class, the possessors of all the modern means of production.

This commonwealth class the full control of the possessing no means of production.

This commonwealth class the full control of the committee of the capitalist class common cupremacy has secured to the dominant class the full control of the government, the pulpit, the schools, and the public press, thereby making them the arbitrers of the fate of the working class depending upon them. Ever larger grows the multitude of destination of the production are intensified by the recurring industrial crass, continually rendered a bitter mockery, and the exploited, the capitalists and the ware workers.

their homes and gardens. If they go to law and demand a fair trial and time to law; if they ask these capitalists to wait only until the garden of vegetables are ripe, they are refused the extension of time. Thus they are obliged to seek a pittance at the hand of their masters. And they can no longer watch their homes, and all the animals, on account of the meanness of their masters, stray from the homes of these peasant workingmen. If they appeal to the judge it needs money to get out writs, and

where shall they get money from? The bailiff or sheriff, for getting out writs demands 15 francs, and then they must reckon with the lying witnesses of the capitalist. And they have arrayed against them the citizens of law. order and "justice." I could recite here this moment over twenty of such cases, all telling the tale of terrible exploitation of these peasant workingmen.

So terrible is the condition of these workingmen. What can you expect of a half peasant, half industrial slave? A factory system half factory and half peasant. It is the acme of capitalist exploitation. The wages vary from 50 centimes to 1 franc and 25 centimes. "La Petite Remiblique"

We are always anxious to obtain the company representatives to meet Do not be afraid of sending too large a list if they are persons whom you have reason to think would be interested. A good way to do this is to send us a large list and then a week or so afterward see the people whose names are sent and ask them to subscribe. Always remember that in adding to the subscription list of party papers you are doing as good propaganda work not only for your own section but for the whole country as can be done.

The British capitalists are in a manner placed between "the devil and the deep sea." They clamor for the complete subjugation of the South African republics so that they may mercilessly exploit them with securify. But now comes the news that if the burghers are pressed too hard they will blow up and destroy as far as possible the Rand gold mines. For this reason some of the British capitalists think now that it would be good "policy" to come to terms of some sort with the republica The "heart" of the papitalist is touched only when the anticipated profit is threatened. So now in dealing with the Boers "humanity" is advecated. Will be given to anyone sending in 10 years, or 1 Bo

SECOND YEAR .- WHOLE NO. 55.

CHICAGO, ILL., MARCH, 24 1900.

PRICE TWO CENTS.

How the "Narrow" French Socialists Use Municipal Power.

DO NOT POSE AS "REFORMERS"

Chicago Comrades Describe Incidents of Socialist Progress in France and Belgium.

Brussels, Feb. 25th, 1990. In our last letter we promised some thing more concerning the work of the socialists in the municipality of Roubaix. Here is a phase of the subject that will especially interest those who are looking for "something right off" and from the time we had left America we had looked forward with more or less interest to the time when we could know exactly in what way this municipal work was regarded: - We found that It was being done by perhaps the most distinctly revolutionary party in Europe, and it is at least suggestive that while the "reform" socialists have been railing at the "narrow" Marxists because they world not take up every reform that came along, those same 'narrow" fellows have gone ahead and done more than all the reformers put together. But when we came to talk with them and asked about the different forms of work that they were carrying on, they were extremely diffident, and declared that these things had no particular relation to socialism.

But there was one peculiarity that differentiated their actions from the ordinary self-styled "municipal socialist." They did not ask to begin by "socializ-ing" the "natural monopolies." They did not dare to go before the workers and tell them that their interests were bound up in municipal railways, telephones and electric lights. What they did do was directed exclusively to the the lioration of the workers. Perhaps the most far-reaching of their actions, is the feeding and clothing of the public school children.

In the city of Lille there are 6,000 children so fed every day of the school year. We had the opportunity of visiting one of the "Cantines," as the dining kitchens are called, at the hour of meal time. There were about three hundred children in the room, all eating and talking at once, and it made a sight not soon to be forgotten. Each child was

and it is said that there is an easily perceptible difference in the size and appearance of those who have been thus fed, and the children in other cities of France, or in the same cities before the system was put into effect. THE Belgian people. LY BECAUSE THEY SAY THAT AN lifes in mourning. ILL FED AND PHYSICALLY WEAK PROLETARIAN IS NEVER A REVO-LUTIONIST, and that by this system they are enabled to rid themselves of the dead weight of the reactionary "slum proletariat." Besides there is no doubt but that there is here an actual gain to a large portion of the working class, in that they are better fed and

Indeed as the French socialists have frequently pointed out, free education without free meals is a farce, as a starving child cannot learn, and the mental development must rest upon the physical. To force a weakened, sickly nervous, rickety, child to stay all day within the close walls of a school room, and try to cram learning into him according to rule, as is done every day in the schools of our American cities is a parody on free education and an insult to common humanity.

But the socialist cities of France do not stop with providing a good meal. They recognize that to stop there would be to perpetuate the anomaly and in justice of which they complain. Each child receives, when needed, sufficient clothing to ensure warmth. THE THING WHICH STRUCK US ABOUT CLOTHING, WAS THAT IT HAD NONE OF THE "INSTITU TION" LOOK THAT MAPKS THE WORK OF AMERICAN "CHARITY" (?) A Indeed it was so much like that ordinarily worn by the children that had hafd work to determine for u which was furnished by the city and The only thing left to private charity to provide, was the shoes, and lest som our American friends might think that this was worse than all the rest, we hasten to say that a pair of wooden

"SOMETHING NOW" worn by the children, vary in cost from four to fifty cents, and are only worn luring a small portion of the year.

Nor is this the end. Through the combined action of private associations and municipal assistance, there is a covered playground provided in connection with each school, furnished with a great variety of games and amusements. These latter are in difthose for the oldest being furnished with billiard tables and other games of a similar grade.

In a previous letter something was said concerning the development of the literature of socialism in Europe, but the subject is worthy of a little further discussion. There are few things that strike the American socialist visitor nore prominently than the fact that ALL THE GREAT BOOK-STORES OF PARIS CARRY LARGE STOCKS OF SOCIALIST BOOKS. More than this,-instead of keeping them halfconcealed in some dark corner as in Chicago, they are prominently displayed in all the shop windows. Infeed in some of the great book-stores f the Latin Quarter it is safe to say that two-thirds of the works displayed in their broad windows are on some phase of socialism. More than this, all the leading economic reviews are either in the hands of the socialists, or else eckon the socialist writers among their leading contributors. In other words there is a commercial demand for socalist works, so strong, that the capitalist publishers and book-sellers are compelled to print and circulate the sodalist propagandist works. We shall reserve for our pext letter all description of the great Belgian

novement, with its "Maison du Peuple," co-operative bakerles and stores, its free university and strong parliamentary representation, and content curselves at this time with a single mapshot of an incident that took place last evening. This is the time in which the drawings take place for the mili-tary conscription, and the socialists ordemonstration against it. There was the same old red flag of the international blood brotherhood of toil. international blood brotherhood of toil. In the wake of capitalism, the politithat we had seen under such varying cal "corruption" here described invaricircumstances in the brief time we had been away from home. But there were and aver factor above given might be place, instead of a single banner, there were nearly thirty different ones, each ganization - trade-union, co-operative association, etc., but all united by the given a meal consisting of beans, pota- Following the banners, which were in toes, bread, one kind of meat or fish their turn preceded by a fine socialist This is varied somewhat according to parencies in French and Fiemish, prothe age of the children, but this is a testing against the militarism. Some fair idea of what is received by the children in the intermediate grades. For those children who are able to pay, a among anti-militarists for the conthose children who are able to pay, a charge is made in some cities of from scription, "The Lottery of Death is two to four cents per day according to still going on," "Patriotism costs the lieges and perquisites, throwing cold Many of them pretend to countenance the age of the children. BUT WHERE Rich only 1600 francs" (the price of water upon the laudable efforts of Osaki his experiment, with a twentieth cent-THIS IS DONE, THE PAYMENT IS exemption), etc. After these there was the reformer, who has most likely been ury hypocrisy which utterly outclasses ARRANGED FOR IN SUGH A WAY a long procession of socialists, making putting in the time since his bill has that of the ancient Pharisces; some of THAT NONE OF THE CHILDREN a most striking demonstration. the Vagaries of the Kansas Parson.

sas, where the Rev. Mr. Sheldon is atfollowing report from Yokohoma might possibly incite, the pioneers of civilization in other lands, to remedy the abuses published therein, by the same methods and process which the wicked inhabitants of the Transvani and the Philippine islands are now undergolns:

Put Mr. Sheldon, washed, neglect the results of ordinary religious works. If declaring that "God would think twice we generate the positive and emphatic in his strictures ity," is perhaps not so senseless as we on the society in which he found him have been led to believe.

No, there is nothing in the Sheldon opinion as to the character and factives lede. It is merely the old goods in new wrappers. "All things to all men." Philippine islands are now undergolns:

San Francisco, Cai., March 14.—Addivices from Yokohama, received today say that so corrupt are the practices of members of the House of Representatives of Japan that Osaki Yukio introduced a bill making members amensible to ordinary courts of justice for birbery and corruption. The House bill was the proper tribunal before which such cases should be brought, but the bill as the members held it was only defeated by a majority of one, 121 members voting for it.

It is stated that Koyama Kinnosuke still sits in the House, though he has openly admitted he received bribes and has brought a lawsuit to recover a claim growing out of a corrupt transaction.

In the meantime we are assured that the week's wonder will net \$80,000 profit (Mr. Sheldon may or may not get s cent of it, that is immaterial), and the contemporary sales of the erotic novel "Sapho," will run it a close race for the same glorious end. "Its an ill wind that blows nobody good."

THE SMITH AND THE KING.

Smith upon a summer's day,

A Smith upon a summer's day,
Did call upon a king!
The King exclaimed. "The Queen's
sway,
"Can I do anything?"
"I pray you can," the Smith replied:
"I want a bit of bread."
"Why?" cried the King. The fellow
sighed:
"I'm hungry, sire," he said.

'Dear me! I'll call my Chancellor, He understands such things; Your claims I cannot cancel, or Deem them fit themes for kings." "Sir Chancellor, why here's a wretch Staving like rats or mice!" The Chancellor replied, 'Til fetch The First Lord in a trice."

The First Lord came, and by his look You might have guessed he'd shirk; Said he, 'Your Majesty's mistook, This is the Chief Clerk's work." The Chief Clerk said the case was bad. The Chief Clerk said the case. But quite beyond his power, Seeing it was the Steward had

The keys of cake and flour

The Steward sobbed, "The keys I've

lost,

Alasi but in a span
fil call the Smith. Why, Holy Ghost!

Here is the very man."

"Hurrah! hurrah!" they loudly cried,

"How cleverly we've done it!

"We've solved this question, deep and wide.

Well-nigh ere we'd begun it."

Well-nigh ere we'd begun it." "O fools "Thanks!" said the Smith:

Go not upon the shelf!
"he next time I am starving, I'll
Take care to help myself." -Edward Carpenter.

The trust is the union of capital; the trades union is the trust of labor. Both are the natural outcome of our present system of competition and wage ery; so next fall when you hear the poitical fakir and the labor fakir howling to smash the trust pay no attention to him, he is only a servant of the small middle class labor skinners, the rotten means of transporting them over, fringe of capitalism who are shaking in fear of their coming doom. On the ther hand, if it were possible to smash the trust, which it is not, the very first trust to be smashed would be the could be the revenge of the trust of apitalism, and then the capitalist you might say, body and soul, every judge in the land. So, you see, it is only a waste of time and votes.-Mahinists' Monthly Journal.

Do you know anyone whom you think "coming our way?" Send him The the same charge outside the sacred pre- Workers' Call for three months for tincts, and he will run a serious risk ten cents and hasten his approach.

POINTERS

It is a small matter to call for a union cigar but it helps out.

Sheldon's paper has at least given he church some good live problems to think about.

Only one fault can be found with the trusts. They are temporarily under the wrong ownership.

Small pox and pensions are about the only thing we have to show for our great Cuban war.

True to their class interests the big dailies insist that congress is growing purer all the time.

If it is only great men who change their minds what a wender the president must be after all.

It is all right to vote for good men but it is better to vote for good principles at the same time.

America was a little slow in awakenng but the indications are that it will soon catch up with the procession

The trouble in electing "good men" o office is that there is no way of knowing how long they will stay good.

Tommy Atkins will find out how learly the capitalists love him when her omes home and begins to look for a

Capitalists who are alarmed at the

nereased sale of fire arms have more reason to fear the decreased sale of the What do capitalists care if they cannot fool all of the people all of the time

was called to order on March 6th at gates to the number of sixty-seven. representing seventeen different states were present. The space at our disposal forbids us giving a detailed ac count of the proceedings, which can be found in the Social Democratic Herald of March 17th, which appeared on that date as an eight-page newspaper, as a special convention number. The convention was in every sense a complete success, and the spirit of earnestness and socialist unity prevailing amongst the delegates left nothing to be desired. The most important part of the proedings were the nomination of Deb and Harriman for president and vicepresident, and the appointing of a comnittee of nine to meet a similar com mittee of the S. I. P. in order to find if possible a basis of amalgamation of oth parties. It will be apparent to all that the "one thing needful" at present is unity of all socialist forces for the oming presidential conflict, and taking into consideration the fact that the neessity of such union has strongly impressed itself upon the vast majority of members of both parties, we are insuperable obstacles to such union The joint committees will meet of March 25th in New York, and it is the hope of all those who have the best interests of socialism at heart, that from their deliberations, may date the birtl of a new and united socialist party We will acquaint our readers with the proceedings of this joint body as the reports reach us, which will probably e in time for next week's issue of this paper.

Hereafter all money orders MUST be made payable to The Workers' Call, 36 question. In spite of the fact that a North Clark street, Chicago, Ill.

SNAP SHOTS BY THE WAYSIDE.

There is a fly in the Democratic The disturbing element is one "Major" Sampson, and the "respectable" lead-ers of the party have made desperate efforts to spew forth the unworthy who has seenred the nomination as alderman in the Twenty-third ward, and still hangs on to it in spite of those who would loosen his grip They now threaten him with pros "Major" declares that this is persecu-

terly ignored by the committee that Nevertheless, for the past twenty years, capitalist class in this land, that is, the the Democratic party and no objections cated a contemptuous paragraph or how many of his virtuous persecutors two, to their efforts, by alluding to them would survive the test which they wish

a great strike in the industrial field, when if any one thing is needed, that thing is solidarity amongst the workers. But what do the labor fakirs care is their interest to demonstrate to their capitalistic political bosses, that they earn their thirty pieces of silver.

The rapidity with which things are marching, in spite of the ignorance dispayed by alleged leaders of the working class, can be noticed by the expressions from the pulpit. Rabbi Hirsch in his Sunday sermon for instance makes the following remark: "We are great passing from the age of capitalistic ger. individualism to that of association and co-operation." It is curious to observe in spite of the contradiction developed by the ignorance expressed in the Chirecognition of facts which compel Rabbi Hirsch to express himself as above. . . .

That the disciples of Malthus are not of President Morley of Morley Bros. Saddlery Co. This gentleman denies the right of the workers to marry, and he has good capitalist reason therefor. the moffives to such action can be found A married man will strive for wages, to only in the real or apparent material maintain what will seem an ever growinterests of the dominant portion of the ing. never satisfied demand. The married workman generally aspires to have good, comfortable and enjoyable home, in which of course the capitalist Social Democratic Convention sees a desire for luxurious indulgence The Social Democratic party has just which threatens to curtail his "legiticoncluded its first annual convention mate" profit. Unmarried men can afford to sell than those who have contracted marriage, and are therefore naturally enough preferred by this Malthusian labor skinner.

> And yet there are some who pose as the ballot box and urge others to do so. and vote the same ticket that expresses the material interests of Morley and his class. No workingman who is worthy the name but will at least by his vote register a protest against the conditions which make Morley and his utterances possible.

The Bricklayers' Union in this city have determined to put up their hall for sale. This is a wise move and a decided step forward. For organized labor to become property owners, is like tying up ammunition with which it is necessary to fight the enemy. Cash is necessary to extend relief to that pertion of their membership which is most distressed. Workingmen with property whether they be organized or unorganzed, lack that most essential and in they "have nothing but chains to lose and a world to gain."

The strike of the clgar makers in economy. To prevent any help being extended to the strikers by their fellow workmen, the associated bosses in erder to assist Kerbs Wertheim and creased upon this account. Schiffers have put their employes on half time.

But such association is loose. try and therefore some of the associ- and get to work.

ated bosses could not forego the oppor unity of making more profit, and opened their shops full time.

But the American Tobacco Co., which s just now introducing the thin end of the wedge into the cigar industry. did not put their people on half time. They discharged them, telling them that they could work for Kerbs Wertheim and Schiffers, and that they would in future have their cigars made in Richmond, Va., Baltimore, Md., and tion as a felon and criminal, but the Lancaster, Pa., where labor was much cheaper than in New York.

It is said that an American warship is to be sent to the port of Taku, China, in order to protect some American missionaries who are represented as being in danger of attack from an anti-foreign league of Chinese known as the boxers. A year or two ago Kaiser Wilhelm worked the "missionary" racket to such good effect, that the mailed fist of German capitalism closed on 2,800 square miles of Chinese territory at Kiaou-Chiaou, and hasn't let go yet. There is always a suspicious odor of "benevolent assimilation" in the air, when the missionaries of any of the great powers are reported to be in danger.

SHE SAID "SASSAGE."

A Story of Material Interests From New York.

Down on the East Side one evening League down and the document of weeking from the capitalist class and working the confusion which apparently exists in the fault is not mine. LETTER BOX.

A Lesson In Socialism

Editor Workers' Call: appeared some letter which The weeks ago criticizing the alteged so-cialism of Mayor Jones of Toledo, has it seems, drawn forth a complaint of unreasonableness and unfairness upon

my part, from a correspondent signing himself, A. Dodge.

It is rather difficult to know just how to answer an opponent whose arguments in antagonizing the socialist position, are in themselves alone, amply sufficient to show that the writer has

> Down on the East Side one evening. I sat down on the doorstep beside a little girl about ten years old, and as she looked up at me with wonder in her eyes, I asked:
>
> "Ever been out of New York?"
>
> "No." "No." "Didn't you ever take a trip on the water?"
>
> "Never."
>
> "Can you read?"
>
> ical phrase devoid of all meaning. The conception of wresting from the capitalist card and the meaning and it is the avowed object of the socialist movement everywhere. But Mr. Dodge fails to see (and here again he exposes his absolute ignorance of (he subject), that the supremacy of the workers, politically and economically, would leave no capitalist class in existence, and therefore even if the socialists wished to wreak revenge of spite after their victory, there would none upon whom to visit it. Capitalism has created economic classes. Socialism will destroy all CLASSES, when the economic system by which classes are called into "Can you read?"
>
> "No."
>
> "But you have been told things—of the green grass and the trees, and the birds, and the flowers to be seen out in the country."
>
> "Yes," she answered with a sigh.

workers, was the only logical olicide.

Work no."

"Oh, no."

"Oh, no."

"Tim mighty glad on it!"

"Gause one came along here the other day and asked me whether I'd rather have a sassage or go to heaven, and when I said sassage he got mad and when I said sassage he got mad and walked off. Any heaven about you?"

"No."

"Bully fur you! I'll go and lock mam in, and you'n me 'll go out and fill up at your expense. I was just waitin' for a feller' bout your shape to come along and all other men will share. No "partizan." Mr. Dodge, but a full-fledged member. This deference to Mr. Jones personality which Mr. Dodge shows, is merely here.worship. I do not deride the efforts wool individuals but I do say merely hero-worship. I do not deride the efforts of individuals, but I do say that the assumed greatness of Mr that the assumed greatness of Mr. Jones as a single individual amounts to nothing. The efforts of no single individual are worth taking into consideration, abstracted from the power which comes from those whose class interests are identical with his. Leaders do not make a movement on the contrary a are identical with his. Leaders do not make a movement, on the contrary a movement makes the leaders. The socialist movement makes and unmakes its "leaders." The latter operation is the confession of a mistake upon one side or the other. But socialism in this land will never make the mistake of claiming for Jones the position of a leader. We have left the kindergarten, yes and the "dictionary" also, far behind. It is very evident that Mr. Dodge knows absolutely nothing about the subject whose criticism he has undertaken. Instead of inventing brand new "socialisms," "dictionary" socialisms, "dictionary" socialisms, "dictionary" socialisms, but he is absolutely helpless in the subject whose criticism he has undertaken. Instead of inventing brand new "socialisms," dictionary socialisms, but he is absolutely helpless in the subject whose criticism he has undertaken. Instead of inventing brand new socialist will agree, for the white slaves of today have absolute themselves their own Lincoln. Individually, however, and it is in this sense the writer uses the term, no man is a slave voluntarily, but he is absolutely helpless in the denies to him the right to use the land and the tools upon which his life denies to him the right to use the land and the tools upon which his life denies to him the right to use the land and the tools upon which his life denies to him the right to use the land and the tools upon which his life denies to him the right to use the land and the tools upon which his life denies to him the right to use the land and the tools upon which his life denies to him the right to use the land and the tools upon which his life denies to him the right to use the land and the tools upon which his life denies to him the right to use the land and the tools upon which his life denies to him the right to use the land and the tools upon which his life denies to him the right to use the land and the tools upon which his life denies to him the right to use the land and the tools upon which his always.

militant socialist writers of this con try and Europe he will be able to co prehend the "class struggle upon which it is based and with which I as a socialist am in thorough accord. He will then discover that what he slindes to as the "Morris brand of Socialism" is after all, the identical basis of the movement in all rands. In conclusion, if Mr. Dodge cares to have a list of books on socialism. if Mr. Dodge cares to have a list of books on socialism, I will be very glad to send it to him. R. A. Morris.

Notes From Kansas City.

Notes From Kansas City.

G. C. Clemens of Topeka. Kansas, spoke under the auspices of the Social Democratic party at Shukert's hall this after noon. The attendance was about 200, and much enthusiasm was manifested. Mr. Clemens is a pleasing speaker, and has a way of making the right points tell. He showed the absurdity of denying the class sarugaffe by a humorous description of a capitalist insisting on paying a workingman tendollars a day—and the workingman insisting that fifty cents was enough—and they finally compromised on \$1.50; His recital of the "Cruef Fate" in store for trusts from the hands of Bryan. Cochrane and Hadley—publicity and social catracism—provoked much merriment, and his clear exposition of the socialists' attitude brought great appliause. Mr. Clemens concluded his address by saying: The socialists in Kansas City have always been liberal-minded. When I was connected with the Populist party the Socialist Labor party section had me before them on several occasions. Lately I have spoken here for the Social Democrats, and I don't know—but I believe I have occasion to speak for a united socialist party. Let the socialists of Kansas City get together; let there be but one ticket; call it fusion or anything you like, but be careful, be careful, there is none but socialists in it." The S. L. P. has already placed a ticket in the field; an effort is being made to have the S. D. branch, as a matter of good faith for future union, endorse the platform and name, while the S. L. P. section may also as a matter of good faith, place, some S. D. P. candidates in several vacancies which have occurred on their ticket. There is a very brazen attempt being made by a certain set of Democratic fakirs to thwart the purposes of the socialists, but they are well understood and will certainly fail. A full explanation will be made in the next lefter.

Socio, Kansas City, March II. Kansas City, March 11.

FOOLISH SPECULATIONS. "If the Sky Were to Fall We Could Catch Larks."

Another sociologist and three-inch logician has made his appearance. He signs himself John Habberton in the editorial columns of that malted milk, baby's food journal, the Saturday Evening Post, His theme is "Voluntary Slaves and Their Slavery." The title prepares us for what follows. It might even have been written by Elbert Hubbard himself,

"What would be the social and economic condition of the United States could another Lincols issue an Emanci-pation Proclamation which should sever the ties that bind some millions of white people to their taskmasters?"

That sounds suspiciously like the old question "What would happen if you socialists should have your way and di-vide up all the wealth?" Indeed, it appears to be the same question in a half disguise. There is the same mane distortion of a scientific conception. It would be much more in keeping with sociological facts if he had asked "What MUST be the social and economic condition BEFORE another Lincoln could issue an Emancipation Proclamation?" Then he would have asked a real question. It does not apparently help Mr. Habberton on whit that he recognizes the fact of the slavery.

"Quite as much work would remain to be done, and there would be quite as many people competent to do it, but the masters—or employers, if the term be preferred—would be at their wit's end to find workers."

whar would happen if you went up hill and then turned around and went down again, as the British did at Spion Kop? What would happen, asks Mr. Habberton, if the people were freed from their taskmasters, because (and he holds up his hands in horror) no one would then work for the taskmasters.

Why, Mr. Habberton, a Federal judge would grant an injunction, or more properly a mandamus, compelling the freed slaves to go to work again. Simric.

"Most of the workers would be incompetent to take any places but those which they had already filled and ab-horred."

Mr. Habberton may, and probably does, "abhor" his present job, but the majority of self-respecting workingmen, with whom he probably has slight acquaintance, do not dislike their work but rather love it-they abhor the conditions with which capitalism surrounds their toil, and they hate the system which robs them of what that work a produces.

This writer's conception of the effect of such an emancipation is certainly ridiculous and might be considered amusing. The first thing every new free man would do, he thinks, would be to rush off and try to get some new kind of work. If they didn't do that, they would return to slavery their old masters. So incapable is this parasitical middle class writer of grasping the true concept that masters would vanish when slavery vanished.

WHAT IS CHANGED?

nt F-A Chapter in Evolution.

partly accepted the argument of the soit is on the very fact of human nature tion of sociecty. being so unchangeable that the socialist bulids. He points out that human nations and environments have and are tem or organization of socieety. Again tion. This is manifested in the various above, was most intense between the and artificial means of production, for that when Parliament reassembles trade and in other trades and organizaevolutions through which society has ruling class and the new class which only a portion of the wealth which this after Easter a law making eight hours passed. When our early forefathers was slowly forming to overthrow it and labor power ALONE creates, and this the legal length of a work day will be self-interest, brought out by the strug-gle for existence, and cannibalism was self-interest and win out. When the grows ever nearer to a bare subsistence: ground for subsistence, they discovered following its self-interest and organizthat their captives could be made to ing the workers to follow what seemed machinery and methods will soon recultivate the same for them, than by chops. In the other stage cannibalism had finally to make way for capitalism, sarily an antagonism, a struggle, the was highly moral, now it was tabooed. But with the inauguration of the cap-result of ADVERSE interests; the capi-What had happened? Had mankind italist system the class struggle has talist class desiring to retain its prebecome more humane; had human nature changed? Not at all, the economic system simply had changed and they were simply following the old incentive self-interest. The main factors in the change, the captives, had not been consulted at all. Their captors had simply, discovered that they could come out of the struggle for existence a little better if instead of eating thir captors at once, by letting them produce for them, and so in following their self-interest cannibalism became immoral and slavery highly moral. Again when finally the system of slavery fell and made way for feudalism, the main incentive to the fall of that system was the self-interest of the slave class as strictly opposed to the possessing or ruling class, and so slavery made way for feudalism or serfdom. In the former stages cannibalism and

slavery were each in their turn highly moral, both were now highly immoral. Why? Had human nature changed or mankind become more humane? Not at all: the economic system had simply once more changed, and it was now dis covered that the self-interest, the old incentive, of the governing or possessing classes, the feudal lords, demanded that production should now be carried on in their interests by the producer being tied to the land which they owned, and so land slavery or serfdom was now highly moral and the other two highly immoral. We now come to the last change, the one which effects the workers the most; to the change from serfdom to capitalism or wage slavery. During the latter part of the middle ages a new class began to germinate. That was the trading or commercial class, the forerunners of our present capitalist class. This class which handled the products of the free workers, who existed during the period of serfdom, began to extend the existing markets, and they soon discovered that if these markets were to be filled, production must be carried on on a larger scale than it was being done; consequently they began by collecting the workers into certain districts, put up manufactories, and by hiring the workers getting them to co-operate in production, thereby putting the entering wedge intto individual production. They demanded the inauguration of the "Let alone" policy, also demanded free his product. This he cannot obtain un-Lis product. This he cannot obtain unand unrestricted competition, or as they
put it, "a free field and no favors."

Soon they began to work for the downfall of feudalism. Why? Because they

powers and legislating the socialist systerm into being and then maintaining
term into being and the production are set of the public and the production are set of the public and the production and the production are set of the public and the public an felt sorry for the serf and his conditions? Not at all; the main factor in this change, the serf, was not asked at all, the rising capitalist class was sim ply following, as its predecessors had done, its self-interest. They demanded free competition under which to carry on trade and manufacture, and they knew that in order to fill the markets and succeed in business under competition, all goods must be produced at the most economical cost, and only he could hope to succeed who could undersell his riv als. How could this be done? Only through free labor which would produce for just the cost of its production and which could be forced under competition to constantly lower said cost, and again which would not be dependent on its masters when production ceased. The supply of this kind of labor must be constant. The only way in which it could be obtained was through the abolition of the feudal system under which the laborer was attached to the soil, and following its self-interest the capitalist class bent every energy for the overthrow of that system, and finally succeeded, and in its place was ushered in the last stage of slavery for the producing or working class, the capitalist system under which that old incent- class-conscious ticket of the Soive of action self-interest of the capi- Labor party, or that you are still blindtalists versus that of the workers are by supporting the interests of your exopposed to each other in that last final uggle which must end in the interest of the class most fitted to survive (the tickets.

It is expected that Comrades Morris and Becker will address the latter meeting.

Becker will address the latter meeting.

On Friday, March 16th, a branch of the S. L. P. was organized in the Sixth ward. The new branch started with ten members, and judging from the activity and intelligence displayed by the new recruits good results may be expected for the cause of socialism in that district in the near future. Our organizer was informed that a long sime has elapsed since a socialist meeting has been held in the Sixth ward, so the ground to be broken may be said to be entirely new. The next meeting, will be held on Sunday the 25th inst. at 3 p. m., at the house of C. F. Lowrie, 1794 36th street, near Western avenue. All readers of The Workers' Call in that district are urged to attend this meeting and join the new branch to help spread socialism in that quarter of the city.

legitimate trade union doctrine, and is a good one.—Machinists' Monthly ournal.

SECTION CHICAGO, S. L. P.

atement of Immediate Measures to Be Supported by Socialist Candidates in Coming Election.

elections in Chicago are to take place in April, the Socialist Labor party in at the late national convention held at

In calling upon the working class to socialism, the socialists wish to empha- tion in Japan. size the fact so often reiterated, that until the complete triumph of the work ing class, which can only find expression in the total overthrow of the capitalist system, be accomplished, temporary palliatives must of necessity be partial and insuffcient. Therefore with this distinct understanding we present the following immediate measures, which our candidates will enforce according to the amount of power conferred upon them, for the consideration of all workingmen who desire to achieve the emancipation of their class by means of the ballot:

The employment of all unem ployed citizens by the municipality, at the best possible wages.

2d. That the municipality shall furnish support and assistance to all workmen upon strike, and aid them with every public power which can be used to help them accomplish their object.

Regarding the first point, the employment of the unemployed, we propose that those who receive the benefits of our present capitalist system, shall bear the expense of the maintenance of those men and their families, whose present destitution is a direct effect of the sysof the product of his toil.

On the second point, we call attention to the fact that workingmen do not strike except to better their material conditions, and satisfy their wants. Living under a system of legalized plunder, this want sometimes becomes unbearable, and the workers are often forced to submit to the terms upon receive them. struggles, the public powers when captured by the working class, must be used in their interests, to achieve vicin the same manner by the capitalist workers in the conflicts which are forced upon the latter,

The example of our fellow workingmen in Europe, and especially France, on this matter, has been often pointed out in the columns of The Workers' Call and other socialist papers. Workingmen who through their trades unions have expressed their dissatisfaction with their conditions of life, and resorted to strikes to emphasize such dissatisfaction, have in this city, often felt the heavy hand of capitalism, which has never scrupled to use the police, militia, and the machinery of law as aids to enforce the submission of the In France, on the contrary, where the workers have captured the local powers, such powers have been used to encourage, ald and support the striking workmen, and have made their victory more certain by supplying food, clothing and shelter during such periods, and giving adequate legal protection meanwhile.

What is possible in France is also possible in the United States.

It is to be remembered, however, that such palliatives are limited in effect proportionately to the power conferred upon the representatives of the working class. The object of the socialist move ment in all lands being the establishment of the Co-operative Commonwealth through the political supremacy of the working class, the above measures are submitted in accordance with

UP AGAINST IT.

The Little Baker Versus the Machine. Knock-out About Duc.

The theme about machine work in bakerles will not come to rest. Like the speatre of Banquo it stands behind thi old time master baker, making him act strangely without his fellows at the banquet table knowing of the cause. For quite a while little has been heard of the bread moulding machines. Nevertheless the competitive struggle between the bread factories and the small bakery owners goes on with increasing bitterness. Bread wars are multiplying. Prices in many cities have been cut in two. The small master baker winces under the galling strokes of the big manufacturer. Can it be that the death struggle between these two par-ttles is to be decided within the coming few years? From what is going on a man might judge so.

A bread factory in Syracuse, N. Y., having, a few weeks ago, reduced its bread prices by half, has made an emphatic statement that bread prices can never more rise higher. Does this flen tem by which the laborer is deprived do its work by machines, or is this but a "bluff?"

The machine has not by far spoken the last word in the bakery trade. We may live to see many more surprises in this direction. But last week the invention of a new machine was made public. It is made for cleaning and greasing pans for rolls and cakes. This machine has a number of rollers, the which their employers are willing to first of which is provided with movable Therefore in order to knives which scrape the pan passing make possible their success in these over it while the succeeding ones with brushes clean and grease it.

The peculiar thing with these machines is that usually but the large tory in such struggles, as it is now used | manufacturers can save a considerable amount of labor by them, and conseclasses, to coerce and overpower the quently they can think of reducing prices on this score. Even if a small bakery owner should have means enough to buy these machines, the part of their work for them will be so small. that they cannot think of reducing their This enormous advantage winch the big manufacturer enjoys over the small master baker compels the latter, coming from bad to worse, to fall back on the workingmen, to try and make up for it by reductions in wages. long hours of labor, unhealthy bakeshops cellar bakeries, chéap rent), etc. By this they run up against the workingmen who today, more than ever, are upon their guard for the defense of their interests. Thus they meet with friction in the public, among the consumers of bakery goods, making them a bad name, which also hurts them in business.

All this taken into consideration, the small master baker is truly placed in an exasperating situation. In many places they have shown good discernment by using the union label in this unequal struggle. However, in the large cities this has least been the case. There the master bakers' associations are exerting themselves by denouncing the bakers' unions as the most dangerous enemies of the employers. What wonder if here, in the large cities, first and without any sympathy at all, the glory of master-bakerdom will be borne to its grave before long.-Bakers' Journal.

"Pending the accomplishment of this, our ultimate purpose, we piedge every effort of the Socialist Labor party for the immediate improvement of the condition of labor, and also for the securing of its progressive demands.

"Workingmen of all countries, unite! You have nothing to lose but your chains, and have a world to gain!"

Section Chicage.

Do You know.

States had enough to est and way war and had houses to live in which they most often owned; that they could support families, had plenty of steady work to do, and didn't have "hard times" and "lay-offs" every little while? Well, since then, as you know, a great deal of labor-saving machinery has been in yented and put in which they most offen owned; that they could state they were to do, and didn't have bard times and "lay-offs" every little while? Well, since then, as you know, a great deal of clabor-saving machinery has been invented and put in use—so much that today a workman produces thirteen times as much as the workman of a hundred years ago. You would think then, that the workingmen of today ought to live thirteen times as well, or work only one hour instead of thirteen. But do they? You know that the wase sarners of today work hearly as long and really have very little more than those of a century ago. Don't you think this is queer? Doesn't it show that something must be wrong Freinags we can find what it is. A century ago the tools people worked with were small and cheer and almost everybody. They could not produce to them, but it was shough in live on fairly well, for they could self all they made and keep the full value for themselves. Then machinery was invented which could make things quicker and cheaper than people could with the odd hand tools. But the machine ost so much that only men with capital could dwn them. The rest who had only the old thand tools could no longer make a living competing agrainst the labor-saving machine, so they had to go to the capitalist who dwned the machine and work for him. He paid them wages. Then, although they produced with the enachines many times more than they used to with their hand tools concentration of wealth is seven hundred times made that he was shough to the capitalist whore fave the machines as it was even hundred times ficher, while the work and to be competitively as a should be considered to them siperated of the results plain to your. The wastenes of the results plain to your. The w

WORKERS' CALL for _____ months. Name Address

City and State they work with, they too would have all that they produced, but it would be thirteen times more than the workmen of a century ago had. Instead of being compelled to give to the capitalist the compelled to give to the capitalist the larger part because he owns the factory, and get only a small part themselves as wages, the workmen would then be able to keep it all. This is what socialism aims to bring about, and it is all that socialism means. So many false ideas have been spread about socialism that don't you think it would be worth while reading a few short papers on the subject to find out the truth. If you do, books and papers will be sent you free of any cost if you mail card to

BELGIUM'S CAPITAL

An Account of Socialist Activity in Brussels.

FAMOUS "MAISON DU PEUPLE"

Observations of Chicago Comrades on the Working Class Movement in Belgium.

One constantly feels when studying the socialist movement in Belgium as it they were examining a sort of minature sample world. Everything is not only within so limited a sphere when compared with American industrial conditions, but with socialism every thing is orked out in such an ideal form that with actual facts. In the first place there is a wonderful and beautiful symmetry to the Belgian movement It enters into every sphere of the worker's life. Its co-operative organizations feed him and amuse him, its educational institutions teach him and his family its trades unions fight his economibattles as the party itself is the instrument for his political struggles.

IT IS HARD FOR AN AMERICAN

TO IMAGINE A COUNTRY WHERE THERE NOT ONLY IS NOT NOW. BUT NEVER WAS A LABOR FAKIR OR A TRADE UNIONIST WHO WAS NOT A SOCIALIST. It is rather hard for the socialists of any other country to conceive of a land where the sociallats have never been divided as to tactics or theory into two or more parties. But this has been the case in Belgium, and when asked as to the effect of the Bernstein theories for example, the Belgian comrades simply declined to be interested. We have tried hard to find some one who thought that "there was no class struggle," or who did not believe in 'independent political action" or any of the thousand and one vexed questions that are debated in other countries, but the Belgian has settled all these long ago and is simply too busy doing things, to worry about theories. Not but that there are some able Belgian theorists who are adding to the literature of the movement, but they do not seem to think it worth their while to spend time arguing on these fundamentals, and appear to consider them in a little the same light as a mathematician would who was asked to stop in the calculation of the time of an eclipse to demonstrate that a straight line is the shortest distance between two points.

But it must always be remembered by American readers that the social conditions of Europe are very much different from those of the United States Although this is much less true of either Belgium or France than of England, still it is hard to compare even these latter with our home conditions. They have this in common—that there is practically no aristocracy, save a plutocracy, of importance in either. While both France and Belgium have a very old titled aristocracy, these confine themselves to the comparatively harmless amusement of dictating dress and society forms and spending their portion of the sum total exploited from the the nobility do not concern themselves with political power and do not constitute a buffer between the two contending classes of laborer and capitalist.

But when one comes to compare any gard to capitalism, it is difficult to find a common factor. Front the commonest articles in ordinary use, like stoves and elevators, to great industrial com binations like the trust- all European countries give evidence of the fact tha they are still in another stage of social development than that attained by the United States. There are large stores but the little shop still predominates and finds itself today being pushed out more by the competition of the co-op atives than by the capitalist organizations. Industry is concentrating but competition is still the ruling force. market is largely bounded by national lines and often by local peculiarities that confine it to a territory smaller than an American county, to say nothing of a state.

Hence it is that the wonderful development in co-operation, and organi-zation has been possible in Beigium. which could never be thought of in the United States.

Perhaps the most striking of these developments is to be found in the Maison du Peuple of Brussels. Not that this is the most important manifestation of the spirit of solicarity, or of co-operation to be found, but it is so distinctive and peculiar that it is worth more than a passing attention As almost everyone knows it is an outgrowth of the co-operative movemen of Brussels and its description should be preceded by a discussion of that movement. But as weintend to devote an entire letter to Belgian co-operation when we have a little further study of its phases we will omit it at this time

unprepared to appreciate its beauty and value. In the first place it is the largsels. On the ground floor is a cafe with accommodations for several hundred people at its tables. Here the wives and children of the workers may come with their husbands to spend the evening, all the papers being kept on file and various games provided. This room as well as the entire building is brilliantly lighted by electricity, and seems in every way the most modern building in Brussels. On this same floor there is also the first floor of the general store of the co-operatives. Although this store would fall far short of one of the great Chicago or New York department stores yet it is as large as sknost anything to be found in America ten years It occupies four large stores and ago. as nothing is carried save staple goods and no space is wasted for shoddy gimcracks, it is found that the selection of actually desirable things is much larger than might be thought by one who is accustomed to wade through the labyit is hard to believe that we are dealing rinth of useless stuff that encumbers the counters and shelves of the ordinary capitalist institution. But we must stop or we will be off on the co-operative again.

Also on this same floor but in a wholly different section are the grocery and butcher shop of the co-operatives. each having a room to themselves with plenty of space. Add to these the fact that there is a wide court about thirty by ninety feet running through the building but inclosed at the ends so that it can be used as an "overflow room" for the cafe when that is necessary, as is frequently the case, and you will begin to have a better idea of the people" than if a lot of figures were given.

On the other floors are a host of offices, for some fifty different unions, as well as co-operative societies, benefit associations, musical and educational organizations, and all the other mass of activities that the socialist workers of benefits. Here also are to be found a large number of small lecture and comblages, consultations, etc. One end of the building has been fitted up as a dispensary and here physicians come regularly to treat without charge, AND cannot face about and retrace our steps.
ALSO WITHOUT CHARITY, for it is their own building and their own physiclans, those who are in need of medi-cal attendance and are able to come to the office. For those who need it ample arrangements are also made for medical treatment in their homes in the same independent way. But there we are off again into the ever surrounding and inviting field of co-operation, and must return at once. There'ls also a quite good-sized and rapidly growing Ilbrary of socialist and labor literature on file here for the use of those interested in such matters.

On the top floor is the great assembly hall and theatre with accommodations for over two thousand people. Here the great assemblies of the party are held and the best grade of theatrical works given. Sometimes excellent pro-fessional talent is secured and again efforts. We had the pleasure of attending a performance by some of the talent of the party who showed themselves to be far superior to much of the professional performers of America. But the thing which testithe fact that the best seats in the house cost the tremendous sum of FOUR

cents. On the roof itself there is a fine promreaching almost around the building which is also utilized as a cafe on summer nights. As the building is itself at the top of almost the highest ground in Brussels and as it is itself higher than any of the surrounding buildings a most beautiful view of the city is secured from this promenade. Finally there is a large open space in front of the building in which an immense audlence can gather and be addressed from one of the numerous balconies that extend around the building.

most of the work in Brussels naturally comes to center. It is from here that the processions start out, such as the anti-military one described in our last letter. And by the way there was one extremely significant detail of that demonstration that did not come to our notice until after the letter had been sent. During the entire time that the socialists were on the streets and were parading and circulating literature. every barrack in Brussels was closed and every soldier was required to be within their walls. This striking example of petty military tyranny, it is néedless to say, coming at this opportune time served in the best way to point the moral that the socialists were trying to inculcate and was infinitely more impressive than anything they could have penned upon their banners or transparencies. Besides there was no surer way to insure that all such literature would be secured and read by the soldiers with much more attention than as if it had been thrust into his hand as he passed a procession.

The past week has been the time of the Carnival of Mardi Gras and the treets have been filled with all kinds of

A SOCIALIST'S REPLY MUST GO TO A FINISH

Municipal Voters' League.

REVOLUTION VERSUS REFORM. THE INDUSTRIAL COMMISSION

Perpetuating the Present Ecoconomic System.

Some of our aldermanic candidates have received communications from the Municipal Votels' League, requesting them to sign the League's platform. The shortest way to dispose of such a matter is to reciprocate by sending the League a copy of the platform of the S. L. P.

One of our candidates wrote the League as follows. Of course no reply

One of our candidates wrote the cague as follows. Of course no reply was received, or expected. So far as known the League has not endorsed any of our candidates:

Chicago, March 28, 1900.

Sec'y Municipal Voters' League.

In reply to your letter of March 20th

of the 14th ward, and in explanation of

that the changes in the methods of producing commodities and transacting busines which have been wrought in ! the past generation in substantially all who understands the material interests branches of industry, have now about reached their culminating point and beome incompatible with our old forms of political life. These old forms were intended and well adapted for a colonlal or primitive agricultural stage of development. Their insufficiency under present conditions has become not only strikingly apparent to every thinking nan, but, what is more important, painfully sensible to great masses of our preserved the shell of liberty and equality, but have lost the substance. We We cannot again become sovereign squatters and it were unmanly to wish it. This lies behind us. Before us lies the co-operative commonwealth. The prepare for that and make the inevitable transition to it in an orderly, peace ful and lawful manner by the use of the ballot, is the mission of the Socialist

The problem with us is not to improve and retain the profit system, but to abolish it. We are, therefore, not greatly interested in your platform. Even if you were successful in enforcng every plank of your platform, we do not see after all how the large body of wage laborers would be anything recognize the condition of the wage laborer, even at his best, as satisfactory for a human being.

You invite me to call on your commitee. Nothing would give me greater pleasure,, if I thought my present would not be embarrassing to you. But my experience with men of your class is that there is a tacit understanding to ignore socialism. It trespasses upon forbidden ground. If discussed at all, workers. Fortunately for the laborers, fied to, its Democratic character was it is at first misrepresented, and then,

of course, easily bowled over.

In view of this, I should consider myself as abusing your courteous invitation, which was of course, intended only enade from eight to twenty feet wide for those who acquiesce in the profit system, and not for those who consider the system itself unjust. We look to profit system, for our strength. But here and there an individual out of in studying industrial evolution as the fundamental cause of political change. and if there should happen to be any such on your committee. I would, if I knew it, call;

ommendation by the League. I am not naturally well fitted for the rough game now called politics. Even when played in a manner which the League would recognize as legitimate and respectable, I am unable to see in it anything but legalized robbery, or if that name it too harsh, call if by some softer name meaning the same thing. I am forced into the conflict because I see the class struggle has now reached a point where the laboring class is fighting with its back to the wall. It has Being an indispensable class, I think it will survive. I cast my lot in with it. fight within legal bounds, transfer it from the picketed factory to the balot box, and thus avoid unnecessary suffering indirectly by society at large, and directly by vast numbers it is my duty to do so.

Respectfully yours, Marcus Hitch.

WORKINGMEN! IF YOU WISH TO BREAK THE CHAINS OF WAGE SLAVERY, VOTE THE SOCIALIST TICKET AT THE COMING ELEC-

To the "Holy Inquisition" of the Permanent Compromise Impossible in the Social Struggle.

Socialists Not Concerned in Schemes fo Present Labor Troubles Produce Scheme Which Menace Political Power of the Working Class.

If any thing, had been heretofore wanting to convince workingmen of the absolute truth of the socialist position upon the nature of the struggle between worker and capitalist, it has been amply supplied in the evidence dustrial Commission which has been inportrayed in the position taken towards trades unions by the employers, that the futility of arbitration to effect any permanent settlement of this question in regard to my candidacy for alderman | must be irresistibly borne in upon the tablishment of public property in the my position towards your platform, the utterances of these representatives. which I herewith return unsigned, I of the ruling class no other conclusion this question is to be attained.

It is a splendid lesson on the necessity of socialism to every workingman which dictates such utterances.

The employers to a man have given unanimous voice to their determination to smash the united forces of organized labor. They assume, and naturally enough the position of ruling class, and look upon the efforts of the workers as rebellion against justly constituted authority.

They have declared amongst other things that the workers are intellectually merely "overgrown boys," who unss controlled and directed by the superior wisdom of their exploiters, would anarchy.

When the capitalist groups known as Republicans and Democrats are en-raged in a struggic between themselves becomes necessary to appeal to these same workers for votes, no talk is then heard of "overgrown boys," "irresponsible and dangerous." At those periods the workingmen are "hardheaded, intelligent, practical American citizens," while a chance remains to induce them to vote into power the class who now do not hesitate to express their contempt in such phrases as the above, and who reiterate their determination to destroy the power of united labor, when their material interests may suffer by its demands.

Some time ago even President Mc-Kinley was so complaisant to organized labor, that he became an honorary member of one of these unions. And now we find that the capitalists in this city, most of whose interests were represented in the election of this man, are loudly proclaiming their intention to overthrow once for all the power of those organizations which McKinley was ready to truckle to, when the sitution demanded such action

There has not been much talk of arbi-The contractors and employers have thoroughly grasped the fact that the their interests are, and must always remain, opposed to those of the workers while present economic conditions en dure. When the workers reach the same conclusion, the conflict will enter on a new phase. It will be withdrawn largely from the purely economic field, and placed on the political; that s, it will be fought out at the ballot

italist classes are alive to this danger is amply proven, by the fact that the attorney for the Illinois Manufacturers' Association, whose legal function as capitalist adviser, is to propose or criticize the "remedies" brought ward, expressed an opinion regarding courts of arbitration and their fitness the two classes, which proves up to The hilt the assertion of socialists, that united political action for their class interests. "The Federal Court." said to deal with these controversies than the State courts, the former being aplife and therefore amenable to the influence and discipline of the voters." follows

trate labor troubles, but I do not want that commission to be amenable to the

This means in other words that if a board of arbitration can be reached through the vote, the capitalists are at disadvantage because the workers can outvote them ten to one.

we see that the will of the mafority is only sacred, so long as it does | flected.

not run counter to the interests of the

"competent," "unblassed" court, the court that can be depended upon to do "justice," is the one which the capitalists alone can appoint, and in whose constitution the working class

Our ruling classes see plainly the nature of the conflict, understand thoroughly the enormous power that can be wielded by the workers on the political field, and also see the necessity of first limiting, and then depriving them of this power. Already this process has begun with the negroes in the Southern states, and their disfranchisement can be used as a precedent for the same purpose as regards white

The latter may prepare themselves for some such attempt as this on the part of their rulers. The capitalist classes will be compelled in self-defense, to endeavor to deprive their given by the various employers of lab-or and their legal retainers, at the in-becomes increasingly evident that the latter are slowly discovering the power vestigating the labor troubles in this that lies therein. And such attempts city. The irreconcilable antagonism be- will convince the workers more and more, that capitalism in its last essent means slavery, and they in turn will find themselves compelled for their own preservation, to unite together for the overthrow of that system, and the esmeans of production, or in other words, the socialist commonwealth.

When the working class see as clearly as their masters, the power which lies I am a socialist, that is, I believe or lute economic change in the relations of in their hands, the "labor" question, rather see so clearly as to be convinced, property is unavoidable, if a solution of will find a rapid and permanent solu-

Engels on Religious Beliefs.

(Translated from his "Anti-Duehring,"

page 342, by Marcus Hitch.) All religion is nothing but the phantastic reflection within men's heads of those outer powers which govern men's every day existence, a reflection in which earthly powers assume the form of extra earthly. In the beginnings of history it is first the powers of nature which undergo this reflection and in the course of further development among different nations pass through the most manifold and varied personifications. For the Indo-European nations this infallibly involve society in chaos and first process has been traced back by comparative mythology to its origin in the Indian Vedas, and has been proved in detail in its growth among the Indians, Persians, Grechs, Romans, Gerfor the empluments of office, when it mans, and, so far as the material is at hand, also among Celts, Lithuanians

> But beside the powers of nature there soon come into activity also social powers, powers which appear to men just as strange, and at first just as unaccountable, and which govern them apparently with the same inevitable necessity as the powers of nature. Thereby, those fanciful images in which at first the secret powers of nature are only reflected, receive social attributes and become representatives of historicvelopment all the natural and social attributes of the many gods are transferred to one all-powerful god, again is only a reflex of the abstract man. Thus arose monothelsm which historically was the last product of the later Greek philosophy, and which found its embodiment in the Jewish national god Jahve.

In this convenient and handy form, adaptable to everything, religion can emotional form of men's behavior towards the strange powers, both natural and social, which govern them, so long as men stand under the dominion of such powers.

But we see that in modern bourgeois society men are dominated by economic relations created by themselves, dominated by their own man-made tools of production, as by a foreign power. ligious reflex-action still continues, and with it the religious reflex itself; and tain insight into the casual connection of this foreign domination, nevertheless this in no wise changes the matter Bourgeois economy can neither wholly prevent industrial crises nor protect the individual capitalist from losses, bad debts and bankruptey, nor the individnal laborer from the loss of employment and consequent suffering. It is still said: Man proposes and God (that is, tic mode of production) disposes.

Mere knowledge, even though it ex tended farther and deeper than that of bourgeois economists, does not suffice to oring the social powers under the control of society. For this purpose there And when this act has been accomplished, when society, by taking hold of, and methodically using all the mean of production, has freed itself and all was expressed by another speaker, as its members from the subjection in which they are now held by these instruments, which though creatures of their own production, nevertheless confront men as a strange superhuman power: in short, when man no longer will disappear the last strange power which is still reflected in religion; effexion itself, for the simple reason hat there will be nothing left to be re-

business proposition.

. It is a wise working man who can

The socialist who is ashamed of the party name is not to cut much figure in the coming revolution.

The democratic platform will be the one which the writers thereof think will capture the most votes.

A good vote rolled up at the spring election is the best kind of a start for the summer campaign.

The only way a laboring man can throw his vote away is by casting it in the interests of the other fellow.

The socialist parties set the example of getting together and the capitalist parties will follow in a few years.

A socialist paper sent for a few months to a friend is often the means

of bringing in one more recruit. The owner of the machine can sit back and walt for the laboring man to starve. The machine eats no food.

The capitalists are setting up the usual number of windmills for the laboring men to fight during the campaign.

There is not a single congressional district in which the lawyers are in the majority, yet they get all of the best

Democrats and republicans very thoughtfully divided responsibility at Wardner so that it could not be made a campaign issue.

It is surprising the number of great and good philantropists who have appeared on the ground ready to advise the socialist party. The worship of DeLeon might be

made a religion, perhaps, but there is no excuse for attempting to make it the basis of a political party. The democratic party will certainly

smash the trusts unless the latter should be thoughtful enough to contribute to the campaign fund. It is a strange thing but it is often hard to make the hod carrier believe he

in this free and equal country. Poor, suffering Porto Rico is to be plundered in the name of the American workingman. The tariff is for the spe-

is in a different class from the banker

cial purpose of protecting him. Do the reformers who think many of the things advocated by socialists ar good, ever expect to get a single one of

them from the capitalist parties? Otis should get some Filipino testimony to show that it is easier to die from the bullet of a republic than one

fired under the orders of a monarchy.

Locked out men can console themelves with the thought that they will have more time to ride around in their automobiles and enjoy the beauties of

When the socialists of Germany have doubled their vote once more Emperor Willie will quit building navies and digging canals and will begin hustling for a living.

The democrats and republicans will fight each other with great bitterness this summer except in the districts that the socialists threaten to carry. There they will unite.

Socialism is not sentiment; it is a figure out the difference it makes to him whether a street car franchise is given away by a republican or a democratic council.

The trouble Mark Hanna is having to collect a campaign fund shows that the capitalists are confident they have pulled the stinger of the democratic party if it ever had one.

Danver democratic council elected on a municipal ownership platform has voted a street car franchise; and, no doubt, the members were all honest men before they were elected.

WORKINGMEN! IF YOU WISH TO BREAK THE CHAINS OF WAGE SLAVERY, VOTE THE SOCIALIST TICKET AT THE COMING ELEC-

It is rumored that General Otis is to be appointed as military commander of the Department of the Lakes, with Chicago as headquarters. His experience in Manila in suppressing the national aspirations of the Filipinos, no doubt determines the powers that be to pending conflict between capitalist and laborer wil probably find its storm center in Chicago. Well, let him come. We fear him not.

Your slavery rests on your neighbors ce. Give him a Workers' Call to help break your fetters.

The Socialist Vote. UNITED STATES.

"TO BE OR NOT TO BE." conspicuous part now being played by the labor unions in this city during the present troubles has led its opponents and uphelders alike to indulge in wild speculations as to what enight be "if" the said unions did not exist. The consensus of opinion amongst the employing classes regarding the union seems to be, that were it made impossible, an era of commercial prosperity would be at once inaugurated, peace and contentment would smile upon the inhabitants of Chicago. every obstacle removed which might stand in the way of this city becoming the "greatest manufacturing centre in the world." They are careful, however, to avoid stating just how this latter ambition when realized, would benefit the workers. The "greatest manufacturing centre in the world," whatever locality may be entitled to that honor, would no doubt be found to possess a quantum of want, misery and poverty, quite commensurate with its manufacturing supremacy, and it would not be found devoid of labor unions When the employing classes urge the abolition of the unions on these grounds they are only stating in other words what they consider the "right" of capitalism to appropriate the largest amount of the product of labor possible consistent with keeping the laborer in a position to produce and perpetuate his species, or to speak plainly, free and unrestricted power to rob the working class. On the other hand the champlons of the union draw startling pictures of the condition to which the workers would be reduced in case the unions did not exist. These who reason from the individualistic standpont, and who constantly look upon the different factors in our modern civilization as isolated, unconnected entities, can easily make abstractions of this sort and speculate upon the results which might be supposed to happen were any eliminated. The capitalist sees in the extinction or neutralization of the union, a vista which opens up the possibility of attaining the highest pinnacle of commercial success, forgetting that the very existence and mode of appropriation of the capitalist class to which he belongs, is directly responsible for the creation and development of the tabor union. The union champion, by the same mode of reasoning sees better material conditions for the whole work ing class, in the spread of organized labor, and denounces the greed and ranacity of the employing classes who constantly endeavor to prevent or destroy such organization, forgetting that this action is necessary if the capitalist is to remain capitalist. To the socialist, however, who looks upon society as one great whole, who sees in the economic structure the development of opposing interests which are based upon and inherent in that structure, the elimination of either factor in this struggle is unthinkable. In no part of the earth where modern industry is highly developed, does the labor union fail to appear, and conversely, where it does not exist, the modern system of capitalist production is not in evidence. Both are necessary complements of each-other, and the attempt to consider them separately and unconnected, while it may afford a sort of mental exercise. can never by any possibility find a method of solving permanently what is

known as the "labor problem." The labor union is part of the economic sys-

tem and was called into being by the development of that system. It will only disappear with the disappearance co. III.

Intered at the postoffice at Chicago, III., as mail of the present economic regime. as it is the discovery Cell is buildished for and under a control of Section blicago of the Socialist Poor Party of Illinois, a corporation without that stock, the whole revenue of which must expended for sectials propagands. ist production remains unchallenged by them. Those who fendly suppose that any standing compromise can be reached in this struggle, those who dream of commercial conquest unimpeded by interference of labor unions, equally with those who imagine organized labor permanently dictating terms to the employing classes, are reasoning from false premises. The conflict will ultimately be fought out on the political field; victory or defeat on either side in the preliminary struggles can only have the effect of bringing into prominence the necessity of political action to determine economic supremacy. The control of the means of prodution is dependent upon the control of the political power, and when the work ers have grasped this fact, the antagonistic interests of laborer and capitalist will be merged in the final solution of the social question-the establishment of socialist industrial society, in which classes having disappeared, their relative expressions such as "Manufacturers' Association" and "Labor Union" will share the same fate.

THE ELECTION AS A TEST. The result of the pending local elec-

tions may perhaps be fairly considererd as determining how far the working class of this city are cognizant of their distinct interests, as workers. An in creased vote for socialism would certainly be the most fitting answer from organized workingmen, to those capitalist employers and their hirelings who have for the last few weeks been hurling their venomous spite through the columns of the press, against those combinations of producers who find themselves forced to unite for defense against the cheapening and degrading of the laborer, which is a necessary outcome of capitalist production. Workingmen will do well to bear in mind on election day that their exploiters, who have lately become their slanderers and traducers, will be equally satis fied whether Republican or Democratic officials are elected, and that both of these parties represent not the interest of the worker, but that of the capitalist. A socialist ticket is in the field, so that no workingman need commit the folly of throwing his vote to those who make use of it for his economic suppression. At the industrial commission inquiry regarding the present troubles, it is significant that not one of the employers in their remarks ever dared breathe one word of the possibility of the workers taking a distinct political stand for themselves. That was the only thing they feared, for in such action they recognize the finish to their supremacy. They have on the contrary been appealing to that bogey "Public Opinion," and are now engaged in circulating the evidence of alleged victims as "horrible examples" of the tyranny of the unions. These men who have expressed their hatred, contempt and detestation of organized labor have not yet completely thrown off the mask. They will not do so until the election is over and capitalist candidates safely returned. Then when the workers have of procedure when the interests of the foolishly armed their enemies with nower they will find that the torrent of abuse, vilification and contempt, will Lion of an armory for the Chicago Huspour forth at an immensely increased sars is a matter which admits of no de rate, and the position of the organized workers weakened accordingly. The best antidote against this upon their part, is the recognition of class interests that will be expressed in an increased being privileged to buy. There will b socialist vote at this election. The capitalist candidates seeing that in spite of their efforts, socialism is becoming a power which they must reckon with in the near future have already in some wards taken steps to have the names of opposing socialist candidates removed from the ballot by a palpable trick. They have succeeded in three instances. but no class conscious workman need be debarred from entering his protest against capitalist class rule and wage slavery. By writing the name of the socialist candidate on the ballot, the voter can still cast his vote for socialunderstood that the socialists of this city ask no personal vote for their candigates as is the custom in capitalist politics. A vote for the principle inan increase in this, will be the most potent factor to make the exploiters ing."

form of organized labor.

SNAP SHOTS BY THE WAYSIDE.

The improved tenement house rack et which is now being played in the capitalist press can be best answered by the action of the landlord section of the capitalist class, who are creating the congestion that makes the slum tenement possible, by raising the rents and thereby compelling the workers to huddle closer together.

It seems strange that the mouthpieces of organized labor should use the olumns of the Daily News, upon which they have declared a boycott, to answer the hostile statements of Mr. Chaimers, of the firm of Fraser & Chalmers. And only the other week the Typographical Union was expelled from the Federation of Labor for attempting to lift that identical boycott. So now if the union workingmen wish to see low their champions and leaders attempt to turn the tables on Chalmers they will have to purchase the boycotted organ, in whose columns the desired information appears.

For instance, Chalmers in his tirade against organized labor, speaks of the monstrous outrage of leaving his \$3,000,000 plant idle one-tenth of the time, as the demand for a nine hour day would if acceded to, compel. If Chalmers could, he would run it twenty-four hours instead of nine, as he will be compelled to run it by the union. But no union leader threw this in his teeth. Then the other capitalist, Board, with his direful threats to leave the country with his capital in order to escape the "tyranny" of the unions. Let him go! And everywhere he will meet workingmen who are not only trades unionists, but class conscious socialists also. And he will find that they waste no time in appealing to "Public Opinion" either.

And this "turning of the tables" on the capitalist employer, how woefully weak it appears. The so-called champions of labor always fail miserably when they attempt to placate that harlot, "Public Opinion," instead of appealing to the class instincts and interests of the workers. The statements of the bosses before the Industrial Commision were remarkably weak and silly, and the "leaders" of the unions had an easy task in crushing their arguments to pieces, but the necessity of justifying their political interests, prevented them from using the material furnished by the bosses.

The Chicago Tribune publishes a dispatch from Vienna reporting the assasination of a workman in the streets of Warsaw. The victim was supposed to have been slain in revenge for his betraying the whereabouts of a secre printing press used for the publication of a socialist paper. Anarchists and socialists are coupled together in the dis patch as perpetrators of this deed. That ld trick of purposely confusing anarchsm and socialism in the capitalist press, s about played out now, although it has done good service in its time. Were this paper to asesrt that the individual who about a week ago sho Lyman in a saloen row over the odorous Major Sampson, was also a socialist it would be about as true as the matter contained in the Tribune dispatch.

The ownership of the enormous amount of the horse-power_generated by the new drainage canal is; now a bone of contention between different groups of capitalists, representing different interests, who see in its control, a dazzling vision of profits to be gained therefrom. It can be applied in many ways, and we suggest that the prosecutors of Banker Dreyer might invoke its aid in dragging the latter to Jeliet seeing that the law has apparently to accomplish this stupendous falled

ruling class require immediate attention. The workingmen in this city are plainly growing rebellious, and the erec lay. Consequently the site has already been purchased for \$90,000, and the new building will be completed within The stock will be confined to year. members of the troop alone, no odesider. a drill hall large enough for two troop of cavairy, with club and reception rooms. So while the reform element i still engaged in "alming" at their pro spective model tenement, the stock hold ers element of which the Chicago Hus sars are composed will be putting them selves in a position to "aim spective tenants of the "Model" should any of the latter dare to assert their class interests as against their masters Business always moves to action more

politicians, and the "common people" to no small degree. But as soon as it was discovered that such occupation would and did result in the French Shylock who held Egyptian stocks and bonds, getting with certainty the "pound of

"Mr Chamberlain will do his best to obtain protection for the private prop-erty of foreigners also, and even the most anti-British amongst them will hardly repudiate such a service at his hands."

In spite of the palpable nature of this capitalist war, the British government dare not tamper with the basis upon which present society rests, viz.: the "sacredness" of "private property." Any attack upon such rights would make intervention not only possible but very probable, therefore they give notice beforehand, that this sacred fetish, the corperstone of capitalist civilization, is to be respected.

An English paper speaking of the fighting qualities of the Boers remarks that after the republics have been properly "pacified" the young Boers have any desire for military life can find plenty of opportunities in the British army, and hopes that "some future Cronje or Jouhert may perhaps lead British troops on the battlefield." This seems hard to believe, but the resource of capitalism in this direction are unlimited. If thousands of Irishmen can be induced to fight for the British, why may they not expect recruits from the Boers? While the workers can be induced to uphold capitalism, "food for powder" will always be forthcoming. Capitalism and militarism are inseparable, and socialism only by destroying the former will abolish the latter.

Real work for the papid transit tunnel had its beginning at 8:05 o'clock this morning in the middle of Bleecker street, twenty feet east of Greene street. As early as 6 o'clock CROWDS OF LABORERS—MEN WHO SHOWED AN ALMOST SAVAGE EAGERNESS FOR WORK—began to assemble along FOR WORK-began to assemble along Bleecker street. THE CROWD IN-CREASED RAPIDLY. THERE WERE THOUSANDS IN IT!

THOUSANDS IN IT:

W. R. Parsons, engineer of the rapid transit tunnel, took a pick and loosened the first cobblestone, and then kept the pick. Many men struggled to get the first stone taken out.

HUNDREDS OF MEN APPLIED TO SUBCONTRACTOR PILKINGTON FOR WORK. After he had been beset until his patience was exhausted Contractor Pilkington yelled out that he was only lowering a sewer and did not was only idwering a sewer and did not want any more men.—Chicago Tribune, 27th March.

Have you read the above clipping felworkframen? Well, how does this ontrast with the statement of the "advance agent of (capitalist) prosperity" that "lobs are looking for men." etc. 'hicago, the "hot-bed of trade unions." Oh! no, fellow workingmen, this hapapitalist peace. But nevertheless there s peace there-such as it is. Read and think, fellow workers.

LETTER BOX.

On the Political Battlefield.

To Editor Workers' Call:—
On March 17th we were called before
the Board of Election Commissioners
to answer objections filed against the
petitions of the S. L. P. We found that
the objectors were the De Leonite's who
claimed the sole right to the party Business always moves to action more rapidly than sentiment.

Business always moves to action more rapidly than sentiment.

The "slums" are to be abolished against capitalist class rule and wage slavery. By writing the name of the solid in "social reform" can succeed in persuading the slum land-lords of the financial advantages of putting their social advantages of putting their property in a sanitary condition. These "reformers" held a meeting as the custom in capitalist in the Art Institute and have aligned as is the custom in capitalist. These "reformers" held to reform the figure to name a commission to determine the method by which the slums are to be abolished. This is very rapid pointed, the supremacy of the working lass and the overthrow of the system of mage slavery is the genuine, vote, and an increase in this, will be the most potter factor to make the exploiters pause and think twice over their decided to prove that they also make a commission to determine the method by which the slums are to be abolished. This is very rapid potters the sale and the supremacy of the working lass and the overthrow of the system of porcess considering that capitalist all stress are not in any himmediate danger of the mineral potent factor to make the exploiters pause and think twice over their de-mains are to be abolished. The slume are to be abolished. This is very rapid potent factor to make the exploiters pause and think twice over their de-mains and solids have in its first over the declaims of our contents and colors, which would have a society it is said "asias at a model to mitted to the end of the country to the said to the country to the co

of the party name was declared to be long to Section Chicago and was ordered to be placed at the head of our nominees on the official ballot. On the 24th we were called again before the election commissioners to answer objections filed against our aldermanic nominees in the 31st, 19th and 8th wards. The objectors were Alderman Bade-

and did result in the French Shylock who held Egyptian stocks and bonds, getting with certainty the "pound of fiesh" as interest on his investments. The anger of the French people became impotent, and gradually subsided, being only occasionally spurred into activity again by political wild geese of the "Billy Mason", type in that country, The French capitalist now pockets his "patriotiam" with his dividends, quite content that the British occupation of Egypt remain undisturbed, so long as he can appropriate his "legitimate" of Egypt remain undisturbed so long as he can appropriate his "legitimate" share of the labor product of the Egyptian workers.

The British rulling classes know perfectly well that the "sympathy" and "sentiment" of "public opinion" in Europe and America that expresses itself in "resolutions" and denunciations of British greed are in themselves mere waste of breath But the endding with the material interests of foreign investors is another matter altogether, which might result seriously for them, and therefore the settlement is to be conducted on a strictly "business" basis. In this respect "Tommy 'Atkins' may be said to be fightling the ba ifes of international capitalism in the Transvania a process which is generally alluded to as "carrying the light of civilization" and the "blessings of British liberty" into foreign lands.

Perhaps the following declaration in the London Times, regarding the immediate future of the South African republics may have had some influence in deciding other capitalistic communities to pursue a policy of non-intervention during the war:

"Mr Chamberlain will do his best to obtain protection for the private property of foreigners also, and even the communities to pursue a policy of non-intervention during the war:

"Mr Chamberlain will do his best to obtain protection for the private property of foreigners also, and even the communities to pursue a policy of non-intervention during the war:

"Mr Chamberlain will do his best to obtain protection for the private pre

opinion of the attorney of the board and also County Judge Carter to whom all disputed questions are referred), that all petitions for nominations to be placed on the official ballot of town officers, village trustees, aldermen and officers of cities having a population of 5,000 or less must contain signatures equal to 5 per cent of the total vote cast in the preceding general election. As there is no appeal from this decision this ruling will remain in force-as long as the present law remains unchanged in that respect. So henceforth until the Socialist Labor party polls a vote equal to 2 per cent of the total vote cast in gach respective district, their future petitions must contain the full 5 per cent of genulne signatures. We had the legal assistance of Comrade Sissman in these contests, and the aid of a number of the party membecs.

Fraternally,
Thomas J. Morgan.

BOOK REVIEWS.

THE CIVIL WAR IN FRANCE. By Karl Marx, with an introduction by Frederick Engels, Published by International Library Publish ing Co., 23 Duane St., New York. Price, 25 cents.

The reputation of the great nineteenth century economist, Karl Mark, is so inseparably bound up with that which is acknowledged upon all hands to be his masterpiece, the "Critical Analysis of Capitalist Production," or as it is more familiarly known, "Capital," that the fact that Marx was perhaps one of the keenest observers and expositors of bourgeols politics in different countries, has very often been lost sight of or overlooked. The little work before us deals with that stirring period in the history of France beginning with the establishment of the Republic, after Sedan, on the 4th of September, 1870, and ending with the fall of the Commune. As the great "International Workingmens' Association" played a conspicuous part in the remarkable scenes enacted during that period, this production of Marx, takes the form of an address from the General Council to the members of that association in Europe and in the United States. Those w are acquainted with other works of Marx, will in this volume easily recognize the powerful and incisive literary ful writer. Eighteen years of what is known in French history as the the other. A narrow plank breed of bourgeois politicians, whose incredible baseness, corruption and cow-Inderstand this did not take place in ardice remains to this day the only mark of distinction which entitles them to notice. After the disaster of Sedan of these political vultures, or was rather usurped by them in the confusion and chaos resulting from the great reverses to the arms of the Empire. . The defense of Paris, during the siege which followed the overthrow of the French armies, was entrusted to these men, and true to the base instincts of their nature, they permitted for months, all the rigors of sword and famine to fall upon the heads of the patriotic inhabi tants of that city, knowing all the while that the defense was hopeless. After the fall of Paris they found themselves face to face with an outraged

and scheming of two most conspicuo characters in this period. Thiers and Favre, 's also exposed in minute detail. Some sketches of incidents pertaining to the defense of the commune, some tefutation of the most common charges brought against it, and a bold avowal of its identity with the ultimate objects of the revolutionary proletariat oring this work to a close a work which in itself is of the utmost interest to every student of the socialist movement, more particularly because of the knowledge of the motives and workings of the political tools of capitalism, which are here laid open for the inspection and consideration of the reader.

A SOCIAL CONTRAST.

How the Gambling Table Is Supported on the Shoulders of Wage Slave

W. K. Vanderbilt, smiling good-nauredly, admitted to the reporter that he Had lost \$100,000 at the Monto Carlo tables.

The gambling casino at Monto Carlo commands a beautiful view of the Mediterranean. Palm trees, roses, women with big dark eyes and big dark paste, polite crouplers, a well-conducted opera-house in one corner, warm sunlight, smooth roads, fine restaurants, 6,000 france "limit" on the roulette tables, 12,000 francs "limit" at the "trente et quarante" tables, politeness, polished vice from every country, dissipation, suicide, and gossip make it difficult for any one to get bored there.

"Rien ne va plus," drones out the croupier. The small white ball starts on its journey, slows up, strikes, bounds and settles down.

"Deux, noir, pair et manque" (two black, even, and under 18). So sings the croupler. The fat, greasy money-lender from London rakes in his pile of "plaques"-hundred-franc gold pieces coined especially for the tables. The consumptive woman who has left Montone for the day coughs a little harder and looks a little whiter-her money is gone. The foolish little English bride goes out of doors to burst into tears. The hard-faced woman from Paris, remarking "Ne me parlez plus de systemes," resumes there and then her trade-her money was on the red.

Up strolls a laughing party, and languid interest stirs the gambling crowd. The smooth, pale American face, the nasal American accent, the huge American fortune are recognized. With a parasite on each side the great fortune on two legs comes slowly up.

The croupler, about to start the ball on another of its journeys, pauses for a second. One of the eight gambling servants at the table listens to an order given in lame French and answers obsequiously:

"Three hundred Louis on the redyes, Monsieur Vahn-der-beelt. hundred Louis on the first dozen-yes, Monsieur Vahn-der-beelt. Five Louis on the Zero-parfaltement, Monsieur Vahn-der-beelt.

Monsieur W. K. Van-der-beelt, looking vaguely around, drops one soft piece of paper with a picture of French liberty engraved on it. No other money is taken there. The soft piece of paper suffices for all the bets.

The holder of the little white ball looks up and down the table and sets the ball spinning with his "rien ne va plus." His seven fellow crouplers watch the many piles of money, each a monument to some gambler's hopes. Click click goes the ball and settles into number 22. Says the croupler: Vingt deux, noir, pair et passe."

Mon. Vahn-der-beelt on that turn of the wheel has lost \$1,620. Chatting still in that rich American accent, he walks on smiling to try another table.

Have you that little picture in your . It's accurate, drawn by one mind? who has seen it.

Quite different from Monte Carlo is the top of a New York Central freight car. It's a sleety, dismal night. The style which is characteristic of this cars roll along through the darkness, the Hudson on one s "Second Empire," had generated a slippery, stretches along the top of the car, and a man-brakeman number so and so-walks toward the engine.

As he walks, string of short ropes, knotted at the ends and made hard by heavy sleet, strikes him in the face. pened in New York, where peace reigns, the control of France fell into the hands That means the approach of a low bridge or tunnel. The man drops to the roof of the car, lies close until the tunnel is past.

The engine puffs monotonously. Seven more hours of the night and of his 11hour "trick" ahead of him. One dollar and a half per day and an uncertain job

-that is his short story. He does not complain of that so much. But he thinks of a wife and some children "at home," and wishes the end of his work did not land him so far from them. He wishes he could he man enough to save more of his pay for them. He reflects with a sense shame that he has no right, even in his wet clothes, to be thinking of a drink at the end of his run when he knows the children need shoes. He is bound to confess that better men have done better by their families. He thinks he win turn over a new leaf. He continues his walk along the narrow plank on top of

The engine grinds along, throwing up clouds of heavy smoke towards the black .cloudy sky, and the miles and the hours slowly pass by. The stars shine Eternal Justice reigns back of thost heavy black clouds-a long way back of them.

Twenty-two, black, even, and over

The difference between what that brakeman earns and what he gets is a tiny part of Mons. Vahn-der-beelt's single lost bet of 405 Louis.-New York

Governor Lee on Trusts.

Address Delivered at the Anti-Trust Conference by the Governor of South Dakota

problem of dealing with full grown capital. It is a problem of dealing with big power of big money over men without money. It appears serious to us now, because, for the first time in our history, the awful power of capital is fully

The trust is not a new thing in its elemental make-up. It is not the growth of a day. It is the product of a century's growth of money. Its sudden consolidation into business masses leads many to think that it is a new creation, come suddenly into life to enslave the people. It is, on the contrary, the simple organization into solid force of the capital which our workers' have been creating for a hundred years. In its old form, unorganized and at war with itself, it appeared in a more harmles guise; indeed it was welcomed as a blessing; it was sought with brass bands and courted with banquets and fawning. Now it looms into view as a devourer of the people and a robber of their substance as well as their political liberties. Its changed form has been wrought by organizing capital and cap-

Big men with big money have got together.

They have quit fighting, each other and gone to co-operate to rob the unorganized people, who are still fighting.

But this new force, old in its constituent parts and modern in its aspect and purpose, makes a vast problem which is new. We are confronted with the knowledge which they possess. forces and facts, which become clear as we see the true nature of capital. We are face to face with conditions, not theories. Time spent in talking of 'trust" evils is valuable only to awaken the people and teach them the historic growth of capital and the historic outcome of a system which disclosed itself first in the rich man, then in the corporation composed of rich-men, then in combinations of incorporated companies, and finally in single monopolies joining the forces of all the rest in one

It must be understood that the socalled "trust" of today Which is to be feared is not a mere combination of the machines! Why would you discr companies; it is a giant corporation ganize the scientific methods by which monopoly, the product of multiplication and then addition of the several capitals of many companies. It is the con-centrated cream of the country's labor, of which labor has been robbed! It is the piled-up surplus of the hard work You would not contend against the savof millions of toflers which small capitalists and corporations, being unable to waste in riotous living and commer- improved methods for directing and adcial strife as fast as it was created, ministering human energy? What is have finally massed in the hands of a few men for the further robbery of trusts?" Is it the voice of reason, or is

of industry, controlling everything in its has been hit but don't know who hit own line and reaching out to many oth- him or how to escape being hit again? For instance, the Standard Oil company is the leading power in steel and iron, coal, whisky and numerous other industries aside from oil. It dictates the operations on the Wall street stock market and draws on the United States treasury for that purpose.

history of trust making, without are to be fewer in number, and that the "trust" of the future is to be a single monopoly, the Trust of Trusts, owning and operating every line of production and distribution and dominating, abso-Intely, the entire commercial and political life of the republic. We are face to face then, with a state of universal and tools of wealth production, by monopoly, supplemented with the univerargue that our future is the most hope-Need I remind you, that viewed simply as a prospect whose scientific reason is not generally understood, and whose logical and I may say inevitable outcome is not yet seen, there is reason for the fear which is instinctively felt by the people.

The groping after remedles and the per and platform talk since this quesdisputants are either wholly lost or natural accumulation of wealth in the ficed everything to the cause of moneybe able to find a simple, logical and orderly means of turning all these conditions to the 'advantage of the whole people without disarrangement or destruction of wealth or methods of wealth-making. It is plain to me that nopoly until doomsday, but so long as having permitted a few men to take all we do not deprive these institutions of (a), until the few find themselves over- tain no hope that they will cease to tormoney-making and the many find them-selves with no money and no means of The remedy will be found in an attack making a living, there is but one way upon the system of which these monop out of the difficulty, and that lies in olies are the fruit. Revolutionize the of mines, machines and means of trans- Make it democratic. It is now an im

The trust problem is first and last a l portation and distribution from the few to the many. Of one thing I am certajn: We shall never go back over the money and men fully aware of the past to get out. Monopoly's fort can never be taken by flank movements. They can never be reduced by compromise. They must be taken by a forward movement based on common ense and justice.

Some ergue that our future lies in a retreat to the days which preceded private monopoly. Various clumsy and impractical devices are put forward to modify our burdens and make them easier. Some men are continually looking backward, demanding the re-establishment of the little rich man, and the small corporation. They cry out for the re-establishment of competition, out of which and because of which the present system of combination-has come. They seem disposed to demand whatever benefits there may have been or may be in themselves in the competition of other men, but they are unwilling to accept the fruits of that competition seen in the organization and combination of those who refuse longer to waste money by a perpetual business war, All this puttering is waste of time and brain power. We shall not return to the stage coach, nor to the little rich man, nor to the srub railroad, nor to any of the institutions of thirty years ago. We shall go ahead. ould not go backward if we would, and we would not if we could, once the people understand the promise of plenty and liberty involved in a proper use of The workmen of England one

smashed the machines in their frenzy

to be rid of an invention which dis-

placed the most arduous hand labor. It is only within recent years that labor has given up hope of escaping the results of invention in its application to the production of goods. We should be considered insane if we proposed to destroy the labor-displacing machines of the country and return to the handlcraft method of producing goods. Nobody would listen to such nonsense, yet the trust is no less a labor-displacing machine, because a flesh and blood or ganization. You would not knock down machines have been mobilized to save time, muscle and waste? You would not rob the race of its knowledge of mechanics. Why should you place a bar to the organization of mechanics ing of time and energy. Why should you contend for the breaking up of our meant by the wild cry: "smash the it a destructive wall having origin in the wounded man who knows that he We agree that the private monopoly is a robber of labor, a breeder of want and a killer of conscience, and that, run

whole system of robbery. When that is

perial system. Substitute public for private ownership. Throw off private for public monopoly. Crush the rule of money and establish the rule of men. Do not destroy the machines, nor blot out the details for swift and perfect handling of commodities, but make things for people to use, not to fight over, and maybe die later for want of Produce and distribute wealth far the enrichment of the race; for the gratification of needs and the satisfaction of worthy aspirations; not for private profit and plunder. Such a policy can be squared with the Declaration of Independence and the Golden Rule. Such a policy will destroy public and private rascality and give birth to a new social life of which the people are capable when they are delivered from the dread of starvation and death.

How are the detalls to be arranged I do not propose to go into that No system ever had a fixed line of unchangeable details. Fit details will be supplied as the requirements of the sys tem dictate. Detalls will come fast enough when the principle has been agreed to. The details of the present system are good enough, if the engines of capital were reversed, and put to work for the whole people. Details are matter of experience. No man could have predicted fifty years ago the details of the present business system? no man can forstell now the details of any system fifty years hence. Details change every day, but one thing is settled: a set of details which enriches per cent of the population at the expense of 95 per cent ought to be put to work in behalf of the great masses as speedly as possible. There is only one question involved: "Shall the bisssings of God and the ingenuity or man be monopolized for the benefit of a constantly narrowing column of plutocrats. or shall those blessings be appropriated to the use of the whole people?" that question is answered in the interest of the majority-as it certainly will be -the details of our new life will adjust themselves to harmonize with the principle of equity upon which the system is built.

These propositions are met with the that 'this is socialism." Granted. That does not disprove, but rather confirms the truth. The trust is ocialistic. It is private socialism. It is unregulated socialism-run for the few at the expense of the marty. / Our purpose is to change the scope of socialism, broaden it out; destroy socialized piracy and erect a system of fraternal co-operation in its place. dissenters do not go further than to declare that "this is socialism," as though that were sufficient to forever put it aside, "You are a Christian" was once considered a sufficient answer to the claims of Jesus' followers. It did not disprove the teachings of Christ, "You are an abolitionist" was-ones a powerful argument against the abolition of Every three weeks the men have 24 chattel slavery. The sail boat twitted the steam boat; the ox cart ridiculed the stage coach; the stage coach made fun of the locomotive, but the facts were not changed. The best will survive, as it HAS survived. Socialism must succeed capitalism n the natural ing one strong party. order of progress, and if you will not ecognize it now I shall not quarrel with you. Time wil furnish the argument.

These changes are not within the limit of an ordinary day's work. The conversion of production for privateprofit to production for the general welfare cannot be brought about till the Trusts of Trusts, the all-absorbing, alldominating, all-owning monopolist has taken possession of the country and forced the people, in self-defense, to expel him as this monopolist has in turn expelled from commercial existence all with whom he has been at war. The people are slow to move and patient in bearing burdens, but there is evidence that they are commencing to see the hopelessness of any attempt to regenerate the middle classes of society. Pub. lie ownership, already a well-defined political issue, must soon give birth to

The process of political and economic evolution through which the country must go before the crisis really comes. will be marked by brutal exhibitions of trust practices. It will be marked by the smashing of laws, the mixing of endless anti-trust nostrums swiftly followed by their judicial overthrow. The period will be red with a continued policy of foreign conquest and an attempt to substitute a political empire, with its army and tinseled institutions of force, for the republic of Jefferson and Lincoln.

This is the logical outcome of the con centration of wealth and the diffusion of want. An empire of money must have an empire in government to sur tain its power over the people. The history of this period will be famous for the degradation of the American working people to the level of our newly acquired Asiatic brethren, and for a waste of wealth by the trlumphant plu tocracy such as history does not equal. But in good time, when they have reached the forksof the road, where on route leads to the death of freedom and with considerable apprehension. the other to liberation, the American people will rise to the call as they have risen to meet every past crisis. They will-exterminate the empire of capital, expel the capital lords and erect on this continent a system of life at once natural in its growth and in perfect harmony with the teachings of Christ.

AUSTRIA

The socialist deputy Yerkauf has presented a bill in the Austrian reichsrath isking for an eight-hour day in mines. An attempt is now being made, at the instance of the notorious Dr. Lueger, the burgomaster of Vienna, to change the method of voting for members of the municipality in that town. The proposed measure would practically give the control of the whole affairs of the town into the hands of the rich. The Social-Democrats of Vienna are organizing public meetings to protest against this measure, and last Sunday they had a great procession through the streets. Should the measure pass there will be,

I fear, a popular rising. 'Freiheit," of Tiplitz, appears as it was amalgamated socialist movement. The printed—that is, with no blank spaces will probably be in the minority, and where the censor has prohibited certain will hardly be able to stampede the remarks. The editor evidently does not know what has happened to the censor, they will formally announce their disand hopes that he is not ill. Probably the fact that the Austrian reichsrath and bid adieu to the Peoples party is sitting may have something to do and go where they belong.

BELGIUM.

Demblon is to be prosecuted by order of the government on account of the scene which lately took place in the chamber. The government is very illadvised in ordering this prosecution, as it will not get any good from the facts

The anniversary of the Comumne is to be celebrated by a dinner at the paid. Maison du Peuple and Vandervelde will give a lecture at the same place.

FRANCE.

A history of France from 1789 to 1900, edited by Jaures, and to which the chief ocialist writers in France will contribute, is to appear shortly. .

A bill has passed the chamber allowng women who have qualified to practice at the bar and it is soon expected to become law. At present they may take degrees in law but they cannot practice!

GERMAY.

Several women's associations have seen petitioning the government to indomestic servants among workmen who are insured against accidents. A congress of the local socialists will be held at Dresden on March 17 and 18 The chief subject for discussion will be the new municipal programme.

HOLLAND.

At Dordrecht and Arnheim an eighthour day has been introduced into the gasworks instead of a twelve-hour day but the wages have not been reduced hours off duty.

The congress of Social-Democrats is to be held on April 15 and 16 at-Rotterdam, and the agenda is published in "De Sociaal Demokraat." The proceedings should have a useful result in form-

LABOR ITEMS.

Notes From Trades Union Journals and Exchanges, Throughout the United States.

News.)

Municipal election in Exeter, N. H., resulted: Republican ticket, 289; Democratic, 46; Social Democrats, 130.

The Brewers' Journal, official organ of the national union of brewery workers, published in Cincinnati, has come out for Debs and Harriman. St. Louis socialists are so thoroughly

pleased at the outcome of the amalgamation of the two parties that they are talking of starting a daily paper. Capitalist politics bring plenty to the

labor unions must protect their kind at the ballot box. The Toller, of Terre Haute, Ind., the fficial organ of four central labor

bodies in the foregoing city and neighboring towns, has run up the flag of Debs and Harriman. The general election in Belgium has been set for May 27. The systematic

campaign of the socialists is being watched by the capitalistic politicians All the laws made are for the capital-

sts. Thus we have a possessed and a dispossessed class. Which class are you in? If in the latter, vote your own party and for your own interests a represented by the Social Democratic party.-Milwaukee Social Democrat.

Columns and columns of favorable comment appear in the socialist and progressive labor press regarding the successful outcome of the Indianapolis Social Democratic convention, and the nomination of Debs and Harriman as the presidential ticket.

The Social Democrats are making a splendid fight in the Milwaukee municipal campaign. In one night they or ganized three branches with a total of 57 members. The progressive trade unions are lending their support. Fred erick Heath, a well-known newspape man and author of the "Red Book" and other important works, is the candidat for mayor.

When the union sends its agents to lobby in the halis of legislation, is the union in politics or out of politics? And does this kind of politics paw? Do we get anything by begging? - The only thing the capitalists give us, is a fat job now and then for the fakir who tells us to keep out of politics. Rather selfish to be in politics up to your neck and advise us to keep out, ch?-Milwaukee So cial Democrat.

There is a grawing feeling that the mid-road. Populist convention in Cincinnati, on May 9, will have troubles of its own. There are some socialists mong the "roaders" who think the lime is ripe to dump the middle class tinan cial panaceas overboard and boldly rec ognize the class struggle by joining the convention, but there is a chance that satisfaction with present-day populism

The end is near. On Monday Justice Fruax, of the Supreme Court of New York, handed down a decision finding Henry Kuhu, Lucien Sanial, Patrick Murphy and J. J. Kinneally guilty of using the name of The People for a pub lication issued in Beckman street, New York, contrary to the orders of court, and each defendant was fined \$250 or imprisonment until said sum was

This is the finale of the attempt of Daniel DeLeon to steal the New York People, the official organ of the Social ist Labor Party. It developed in the hearing of the case that none of the defendants claimed ownership of the Beckman street organ, either as individuals or officers of the party. Deleon swore that he was owner of the paper, and merely used the names of Kuhn and others to distinguish his organ from the paper published by an incorporated body. In other words, he stooped to the owest form of faking.

It is probable that the fines will not be paid out of the so-called "Daily Peo-ple Fund," which is being scraped to gether by hypnotized followers of the dethroned boss, with the expectation that they will be equal owners of the contemplated daily organ. Not long ago when decisions were favorable, the courts were held up as paragons of virtue. Now they will be damned as being corrupt to the core. However, the race of the would-be union destroyer is about run .- Cleveland Citizen.

Comrade Klenke spoke in Germar and Comrade Collins in English before the Tannery workers at the Polish Central committee headquarters, Wednesday, March 28th, with a view to organizing them into a union.

Delegates to Central Committee take notice! There will be no meeting of the Central Committee on account of the election. Tuesday, April 3rd. Every comrade should be at the polls to watch the counting of the ballots.

The meeting of the 13th ward at Neison's hall, corner Robey and Chicago avenue, was well-attended. Comrade Morgan spoke on the "Rights of Man Under the Law." A lively discussion took place after the lecture.

A mass meeting will be held by the 14th war branch at Schoenhofen's hall corner Ashland and Milwaukee avenues at 3 o'clock, Sunsay. Comrade Marcus Hitch, the candidate for alderman for the ward, and Comrade Sissman will address the meeting.

The Polish comrades will hold an agitation meeting at 800 S. Ashland avenue, at 3 p. m. Sunday, at which Comrade Levison will give an address in English. Also a mass meeting at o'clock in the evening at their hall, at number 484 Noble street. Comrade Knox will speak in English at the latter meeting.

dermen in the 8th, 19th and 31st wards dermen in the 8th, 19th and 31st ward; were thrown out on account of objections being raised by the capitalist candidates, 'demanding 5 per cent instead of 2 per cent as heretofore. The voters of these wards will have to write the name of the aldermanic candidate in the column headed Socialist Labor party.

The socialists of South Chicago are The socialists of South Chicago are making an aggressive campaign, and a large vote is expected next Thesday. Agitation meetings are being held in the different sections of the ward on Saturday evening, March Ilst, there will be a mass meeting at Nelson Morrischall. 194 92nd street, and on Sunday at 3 o'clock there will be an open-air meeting at 19th street and Avenue L. in the rear of the Chicago Ship yards. Able speakers will be at both meetings.

It is satisfactory to note that trades Nelson Morris

speakers will be at both meetings.

It is satisfactory to note that trades union journals are beginning to give more prominence in their columns to the socialist movement than herefore. We notice that the Painters and Paperhangers' Jöurnal for this month contains an excellent article devoted to proving that the whole of the preduct of labor MUST (not should) go to those who produce. This is straight social-who produce. cho produce. This is straight social-sm and a sign that the organizations f workers are waking up to the knowldge of what constitutes their true inerests as a class.

The same journal also devotes almost

The same journal also devotes almost a column to the nomination at Indianapolis of Debs and Harriman as presidential candidates on the socialist ticket at the next election. A considerable space is also devoted to the publication of short pointed socialist epigrams calculated to make the workingman who reads them do some thinking. Another twelve months and the Painters and Paperhangers' Journal will have pienty of imitators in this respect.

The 33rd ward branch has gotten out 5,000 copies of the following address which will be distributed to the voters before election day:

TO THE WORKINGMEN OF THE THIRTY-THIRD WARD: Do You Want to Throw Away Your Vote?

If you do, vote for the old par-ties. Vote to keep in power the same class that has brought you "prosperity" with its strikes and leckouts.

Do You Want Your Vote to Count? Then vote with the working-mans party. The Socialist La-bor party demands that the means of production: the milis, workshops, factories, shall be-long to the people and not to a class. A vote for that party now is a shot fired in the great fight of the working class are the of the working class against the capitalist class now going on throughout the world. Capital-ism unites for its interests; let labor do the same

LOOK OUT FOR THE "BOSS!" A Saintly Labor Skinner Taunts His Anonymous Correspondents With "Moral Cowardice."

That eminent socialist and pillar of the church J. V. Farwell has again broken into print and in a lengthy leter to the Record, which was published March 16, in commenting on several semi-anarchistic letters addressed to him, signed "The man with the hoe," etc. He says:

No wonder that these writers-could not sign their names to such letters, from which I have quoted only a few sentences to give the scope of the research and thought of men who are in our day endeavoring to lead the populace into wrong-doing through falsification of history and the renewed crucification of Christ on the cross of agnosticism and infidelity! Moral cowardice is quite consistent with such allegations in the presence of the living and historical facts, which show that these 2,000 years of Christendom have gone very far to realize the first rainbow promise of God that "the seed of the woman should bruise the serpent's head." Rome ruled the world when Christ was born. A small fraction of her people owned all the rest as slaves; infanticide was no cgime and human life was worth no more than a dog's.

What do we now see? No slave breathes the free air of heaven where the Christ of God, who came to this earth in the zenith of Rome's power, has planted His religion. The rights of

earth in the zenith of Rome's power, has planted His religion. The rights of women and their offspring are as sacred before the law as those of the lawmak-ers, human life is sacred and thousands ers, human life is sacred and thousands of hospitals and other benevolent institutions for the care of suffering humanity have grown up under the sunfight of that religion, while agnosticism and infidelity can point to nothing but the French revolutions their historical monument of infacty and shame.

Let us see about this moral coward-

Mr. Farwell belongs to a class dis inct from those who have addressed him. He belongs to the capitalist class, of production and distribution and by the grace of whose permission to emposite class, the non-owners, the laborclass stop producing and thereby drive them into starvation. A fact that this eminent pillar of the church overlooked is that the very writers of these communications may be some of the various men or women whom he employs either in his office or his sweat shops, who come from the same class that Christ did and from the product of whose toll

Mr. Farwell may call it moral cowardice that these writers did not sign their names but the socialist simply calls it material interests, which they were following, the same as Mr. Farwell followed material interests when he did not have the moral courage to publish the whole of these letters but simply quoted a few lines from them, to suit his interests and attempted to mould public opinion thereby.

J. V. Farwell lives and thrives.

The writers of these letters well knew that the class Mr. Farwell belongs to is thoroughly alive and conscious as to their interests, and that once the identity of the writers of these letters were established, whether they worked for

Mr. Farwelpor some of his brother capitalists, they would be told not to stand on the order of their going but to go at They being free men, not slaves Mr. Farwell said so, they preferred not to take the liberty of starving and so came moral cowards? and forgot for the moment their right names.

Something this eminent Christian philosopher (?) overleoked when he wrote in his wonderful letter "Rome ruled the world when Christ was born small fraction of her people owned all the rest as slaves, infanticide was no crime and human life was worth no more than a dog's. What do we see now? No slave breathes the free air of heaven where the Christ of God, who came to this earth in the zenith of Rome's power, has planted His religion' -is not that exactly the same conditions which exist today. A very small fraction of our popu lation own all the rest of people and Mr. Farwell is one of that small fraction. They may nominally be free, that is have the right to choos their own masters and breathe the free air of heaven, that being all that is free, and not owned by the Farwell class today, but as long as the Far-wells and their kind own the means of life of the rest of the people every in dividual not being an owner must necessarily sell themselves piecemeal to these owners so that they may get wherewithal to eke out their existence The laboring class are the slaves of capital so long as it is the private property of Farwell and his class; for they are bound to capital, being compelled to obtain access to-it in order to produce to live.

He throws up his hands in horror at the French Revolution forgetting that this revolution was the culmination of the movement which put his class in power to exploit the laborers.

Christ did not come on earth to establish nor did he establish a religion. He came from the same class that today is the source of income for Mr. Farwell Christ was a carpenter, a nominal free laborer. This grade of laborers large-ly came from those slaves had be-come freedmen through various ways. He saw that under the then existing system free labor was rapidly being driven to the wall through organized slave labor. 'He also saw that a syswhich depended on the private ownership of the greater part of the population by a very small fraction of the population must sooner or later fall owing to the opposing interests and the greater interests of the large slave class be free, as opposed to the small owner class to retain their ownership of the slaves. Consequently he followed the material interests of the slave and free labor classes and preached re volt against the existing system, and thereby attempted to hasten the downfall of that system. In doing so, whom did he go to? To the ruling, owning class? By no means, but he preached to the very class he belonged to, and the Farwells of those days promptly put him to death. Nevertheless the revolt went en and finally the slave system fell.

Mr. Farwell were a more careful student of history he might have seen that history portrays a series of class his class passed through such a struggle to obtain its present position of exploiting the laboring class. When as traders they made their first appearance during the feudal system in the middle ages they were constantly harrassed and, persecuted by the nobility whose interests were opposed to the rising commercial class. of the nobility demanded that the laborer as a serf be bound to the land which they owned. The interests of the commercial class demanded that they be free to produce for them. This clash of interests brought on an intense struggle which ended in the French Revolution (for which Mr. F. has such a horror), and through this revolution the concluding paragraphs in the plat- day. As this sort of thing calls many the class Mr. Farwell belongs to rode form of the Socialist Labor party, as foreigners to the city, the little merinto power, having accomplished their follows: object of making free laborers out of serfs (which meant they were free to compete amongst themselves for a master). But (and here the saintly gentleman may get the chills) this vicstruggles down to the last and final one, the struggle between the actual exploiters and exploited, capitalist and laborer. This struggle cannot be finished without and for all time abolishing all class struggles and abolishing exploiters and exploited, in short, drive the Farwell class of philanthro-pists out of existence. This intelligent revolt of the working class has already made giant headway, and all Mr. Far well may do no matter how many letters he may write, he nor his class of useless functionaries cannot stop it. The same as Christ, the day laborer, the carpenter, he headed the revolt of the free laborers and the slaves and showed them their material interests, so now the intelligent laborers are heading the revolt of their class, and by sounding the slogan "Workers of the world united You have nothing to jose but your chains, and a world to gain," and by gulding them through their material interests, are showing them that they must subjugate for their own use and class, all the political powers which to-day their masters are holding. Well may the Farwells tremble and try to stop the victorious onward march of the class-conscious proletarian army, for all the signs at home and abroad tell them their hour of reckoning is at hand and that as useless functionaries in society they are doomed to disappear and-make way for the working class who will then organize society.

Just keep the fact before your mind that we are still offering three months trial subscriptions in clubs of ten at ten cents each.

AN ADDRESS TO VOTERS.

By Section Chicago, S. L. P., on Measures to Be Supported by Socialist Candi-dates in Coming Election.

In view of the fact that the municipal lections in Chicago are to take place in April, the Socialist Labor party in presenting their candidates upon town and aldermanic tickets, once more affirm their allegiance to the principles of revolutionary socialism, as adopted at the late national convention held at Rochester, N. Y.

In calling upon the working class to rally to the support of the principles of socialism, the socialists wish to emphasize the fact so often reiterated, that until the complete triumph of the works ing class, which can only find expression in the total overthrow of the capitalist- system, be accomplished, any temporary palliatives must of necessity be partial, and insuffcient. Therefore with this distinct understanding we present the following immediate measures, which our candidates will enforce according to the amount of power conferred upon them, for the consideration workingmen who desire to achieve the emancipation of their class by means of the ballot:

The employment of all unemployed citizens by the mum-ipality, at the best possible wages.

2d. That the municipality shall furnish support and assistance to all workmen upon strike, and aid them with every public power which can be used to help them accomplish their object.

Regarding the first point, the employment of the unemployed, we propose that those who receive the benefits of our present capitalist system, shall bear the expense of the maintenance of those men and their families, whose present destitution is a direct effect of the system by which the laborer is deprived of the product of his toll.

On the second point, we call attention to the fact that workingmen do not strike except to better their material onditions, and satisfy their wants. Living under a system of legalized plunder, this want sometimes becomes unbearable, and the workers are often forced to submit to the terms upon which their employers are willing to receive them. Therefore in order to make possible their success in these struggles, the public powers when captured by the working class, must be used in their interests, to achieve victory in such struggles, as it is now used in the same manner by the capitalist classes, to coerce and overpower the workers in the conflicts which are forced upon the latter.

The example of our fellow workingmen in Europe, and especially France on this matter, has been often pointed out in the columns of The Workers' Call and other socialist papers. Workingmen who through their trades unions have expressed their dissatisfaction with their conditions of life, and resorted to strikes to emphasize such dissatisfaction, have in this city, often felt the heavy hand of capitalism, which has never scrupled to use the police, militia, and the machinery of law as alds to enforce the submission of the strikers. In France, on the contrary, where the workers have captured the local powers, such powers have been used to encourage, aid and support the striking workmen, and have made their victory more certain by supplying food, clothing and shelter during such perlods, and giving adequate legal protec-

What is possible in France is also possible in the United States.

It is to be remembered, however, that such palliatives are limited in effect proportionately to the power conferred upon the representatives of the working class. The object of the socialist movement in all lands being the establishment of the Co-operative Commonwealth through the political supremacy of the working class, the above meas-

"Pending the accomplishment of this, "Pending the accomplishment of this, our ultimate purpose, we pledge every effort of the Socialist Labor party for the immediate improvement of the condition of labor, and also for the securing of its progressive demands.
"Workingmen of all countries, unite! You have nothing to lose but your chains, and have a world to gain!"

fantastic costumes. Thousands of people have been going up and down in erunken enjoyment with clown-like outfits and silly masks, pelting every passer-by with colored paper cut up into little round circles. Some idea of the extent of this celebration is gained from the fact that so much of this stuff was thrown on one day that some of the streets were covered with it to the 80,000 pounds of it were removed by the ures are submitted in accordance with street cleaning department the next very much while the great capitalist now that it affords a good thing to keep the workers amused as much as possible. For these several reasons the sotalists oppose the Carnival. They do not, however, in any way make it an "Issue" or carry on any propaganda against it. Perhaps the following extract from a statement of the parsy issued at the time of the Carnival of 1897 at Ghent will give a good idea of their position:

'It is said that the Carnival is old blder than the centuries. Yes it is old -very old; it goes back to the time when man was a slave. Then, once a year, the master permitted the slave for a single day or for some few hours to be master in his turn. He then acted like his master, imitated his vices, caroused and drank and then returned to his work on the morrow, more embrused than before. Slavery has disappeared but the tradition and the custom remains, corresponding to analogous social conditions. Rejoice, they say to the serf and the proletarian, colohe yourself for one day as a solder or a general; give yourself whatever this in the project of the serf and the project and horse-tails upon your head and rings in your mose like the savagies drink, sing, and run out upon the streets. Go on During this time you will not be attending socialist meetings, you will be sahausting your bergies, your minds will not be invaded by the spirit of revoit; go my friend, and since it is your pleasure to be a brute I shall henceforth treat you as one."

On this present occasion the Maison du Peuple has simply set about offering series, of Intertainments during the time of the Carnival that would serve as a profitable and helpful alternative to the carousing of the followers of the Carnival. It also passed a rule providing that no one in Carnival cestume would be allowed within the building during the days of the Carnival.

SOCIALISM AT-WORK

Belgian Comrades Have Passed Belgian peasant life that is peculiar in the Theoretic Stage.

THE PRACTICAL PROPAGANDA.

Chicago Comrades Depict Socialist Activity in Every Phase of Industry

There is one point in the Belgian soclalist movement that might well be imitated in America. The most of the special features to be found here would be unworkable in the more intricate and further developed capitalism of the United States, but in their methods of propaganda and education there is very much that could be easily and profitably copied. As was said in a low previous letter, the Belgian comrades tion are little disturbed by questions of theory. When we asked for the works that there were none-that they were not interested in fundamental questions ested in discovering the best method of teaching them.

This is a fundamental point. The discussion of theory is good for the education of party members, but for propaganda purposes some method must be found to teach the unconverted those theories. This problem is purely one of pedagogics. It is simply one of finding the best way of presenting the truths which it is desired to inculcate, to the would-be convert. Now it is a well-established principle of pedagogica course of thought which "hitches on,

The Belgian socialists have taken advantage of this principle to a very extent. They have especial pamphlets appealing to almost every class of laborers and explaining the relation of socialism to their particular point of view. They have pamphlets written especially for the different trades, pamphlets for the Flemish, pamphlets for the Walloons, and so on indefinitely, until it is possible at any time to give to any given worker an argument that fits right into his dally life and shows the relation of socialism to him and his work. Yet through them all run the same philosophy and all lead to the same conclusion.

This is particularly true of the agricultural workers. Until within the last few years it was the fashionable thing with dilletanti critics of socalism to point out that agriculture constituted an inseparable obstacle to socialism. Indeed many who were otherwise quite thorough observers of socialism,, including no less personalities than Schaeffle and R. T. Ely were caught in this delusion. The line of argument was generally something like this: In the first place agriculture did not obey the law of the concentration of industry and hence socialization of the land would be impracticable even if it could be "adopted." In the second place the farm laborer was naturally isolated, ignorant and individualistic and socialist propaganda could never make any progress among them. Hence it was quite the wise thing to point out that socialism could only grow a little more than it had already done in several countries and then it must simply die from lack of further meat to feed upon.

The events of the last few years havshown how strikingly false this position is. Almost all socialists know some thing of the way in which the agrarian movement of Germany has become so cialist and are familiar, at least indirectly and in a general way with the fact of the great amount of literature that the German comrades have developed along these lines. But many do not know that this same movement is found in every European country. very rapid spread of socialism among the reasants and in both France and Belgium, the question of the agrarian propaganda is one of the most pressing problems discussed at each recurring congress of the party. In France Jsu res has especially identified himself with this side of the movement and has pub-But it is in Belgium that this phase has reached its highest development the last few months, with the co operation of a large number of socialist the most extensive investigations ever on by non-governmental in Belgium. In this he has shown a number of very interesting features. He has demonstrated that the farfamed peacant proprietorship of Belgium is largely a myth, as a large perentage of those who had been reoned in the official statistics as indeore than a few feet of ground for a garden and were in every sense of the industrial proletarians. He then ed that aside from these who were

owners only in name the tendency was toward concentration and rented farms in so far as the really essential portion

of the soil is concerned.

a large degree at least, to that country but which is exerting a wide influence Owing to the extreme smallness of the country and dense population practically every portion is easily accessible to the great industrial centers. Then the railroads of Belgium being owned by the state the fares for workingmen have been made ridiculously low in some cases but a small fraction of a cent a mile, and consequently the work ers are enabled to live upon their little patch of ground and work in the city ome miles away. Thus it has come about that a very large portion of the Belgian peasantry have become converted into city proletarians without changing their actual residence. Incidentally this shows how state-owned industry under capitalism is but another instrument to the exploitation of the worker, who gains nothing by the low fares but a more rapid proletariza-

All this contributes to make the agrarian propaganda particularly essential of their great theorists we were told and particularly fruitful. There is a weekly paper devoted exclusively to the agrarian movement that is of especial of principle or tactics, but had long ago interest. It is most ably edited and agreed upon those and were only inter- contains articles of great value to the farmers on matters of agricultural economy and farm management. It also contains all news particularly of interest to the agricultural population. Then, and this of course is the meat in the cocoanut, it contains one or two afticles in each number advocating, explaining and illustrating the principles of socialism. Then the tocation of the farmers' houses in Belgium is of such a nature as to make propaganda among them much more easy than in America They generally live in little groups that that we learn best associated facts, are really diminutive villages and thus That is we can best understand a it is possible for a speaker to reach quite a number of them by outdoor so to speak, to something we already meetings. But here another obstacle know. The peasant population of Belgium are almost abjectly under the heel of the established church In each such little group there is a poor half-starved parish priest who is a part of the great clerical machine that makes up so large a part of all European politics. These priests, acting under orders from Brussels are the con stant and continuous enemies of social-As they generally are able tto control the local authorities they are often able to secure from them orders preventing the socialist agitators from speaking. But as there is a large numer of formalities to be gone through with before such an order can be enforced, and the socialist agitators have ecome adepts in the art of springing surprises on the village population and then getting away before they can be legally ordered to stop. The usual order of proceeding is some thing like this: The place of meeting having been previously determined upon the speaker takes a train on some Sunday morning to the designated village. Arriving there he keeps himself in the background until church is dismissed. Then as the people are coming from church they are surprised to see in the little open space which is before each church a socialist speaker mounted on a stone or a box talking to them. At the instigation of the priest the officials order him to desist. He points out that the terms of the law have not yet been complied with and by the time that the which should lead the rest of the world. as slaves or bondsmen. They are no roper amount of official red tape has been unwaund the speech has been finished and the good seed sown. But the next time that the speaker comes the clericals are prepared for him. All the formalities have been gone through with and he is at once forbidden to speak in the streets. But in the meantime some socialist converts have been made in the village and one of these offers the use of his house to the speaker. Whereupon the socialist oraor stands at the open window or door and talks to the assembled crowd, often standing almost exactly upon the same ground from which he has just

> agrarian population is becoming impregnated with socialism, In very many little towns the social been able to capture the local administration and are able to speak when and where they please Finally under the influence of the Abbe Daens very many of the priests are themselves in sympathy with the socialists although to announce themselves as such is for them to lose the little pittance that they are now receiving and in many cases to suffer all the horrors of excommunication. So at very point the influence of socialism is in the ascendancy and is pushing on

audience nor yet had any influence to This argument seemed to Prof. dampen their enthusiasm. The speeches Struckenberg to be sufficient ground upwere preceded by a musical perform- on, which to declare that the Social ance which gave great pleasure to all Democrats of Germany had discarded present. The chairman, G. Lansbury, the iron law of wages, and yet most after a few preliminary remarks called marvelous to relate they still remain upon Com. J. Jones for an address, who staunch advocates of the Marxian was followed by A. S. Headingley who school, which is supported only upon gave an account of his own experiences the basic operation of the wages sysduring the Paris Commune in which he tem-I must assume that the Professor was personally engaged. He was fol-lowed by Martin Judge, and then the tion of the laws that govern the ecochairman introduced to the meeting pomic relations of men under the pres-Call, who said he came from a country evident fairness and good spirit pre-which as yet was only beginning to cludes the possibility of assuming hy-make its roll of sociclist martyrs. But poorisy to be the motive spring of his it was beginning, and at Homestead action and elsewhere they could trace the thin ed line which ran through the history of the working class movement of other countries. He brought to the meeting the greetings of American socialists, the fraternal sentiment which united the ciate that sentiment the better since his ecent travels on the continent of Europe had shown him how capitalism had welded the world's workers into one compact mass of misery in which language, nationality and religion were of little account. The problem of Chicago was also the problem of Birmingham in England and Essen in Germany. The development of capitalism in the United States had been more rapid than else-Cuba's cry for help had fallen on deafened ears for half a century, but the need of foreign markets unstopped those ears and then an American fleet was placed in Hongkong harbor so that 'the white mans' burden' (in the Philppines) should fall upon American choulders directly they kicked the locks from under it. There was not a strong socialist movement in America as yet, but the idea of socialism was orn of the iron conditions which capibelieved that the American trust was the beginning of the end, and perhaps free men? Yes, as the producers of it might be after all from his country that there would come the movement

arwick and F Jones were the next speakers, and the losing address was made by Henry H. Hyndman. Cheers for the Social Revo- guilds. lution closed the meeting, and the audience dispersed singing the "Marselllaise,"-Condensed from London "Just-

Here is a puzzle. Read it first and then try to discover the author. It was written fifty years also. No it Abraham Lincoln or Wendell'Phillipsbut there-you'll never be able to guess the author of this production

"Tis true that England has been formany years the unrivaled nation of the earth, but the United States has been like a soaring eagle, gradually but rapidly mounting on their upward flight to the earth of the earth idly mounting on their upward flight to fame, and now she has reached an exalted position in the eyes of the world she gazes with indifference upon her mighty rival. In England, the land is held by wealthy lords and nobles, who spend their time and money to satisfy their selfsh desires, while hundreds of the poorer classes are struggling hard to gain a living and enduring all the privations that poverty can inflict. Not so in a land of liberty. Here every man is free and all enjoy equal rights and privileges, and every honest and industrious man can gain a comfortable livelihood. Why is it that so many of the subjects of England are flocking to American shores? It is because they are forced to seek shelter from the iron grasp of despotism and continual life of bondage and suffering, and knowing that America is an asylum for the oppressed they hasten to place themselves under its protecting care."

Who was the patriot that penned th hove immortal lines? Who was the author of this magnificent apostrophe to liberty? Did the writer of these soul-stirring words die for his beloved country on any of the mighty battle-fields of our civil war? Not at all. He is very much alive yet as the working "brave words" were written at the age of 18 by Mark Hanna, union wrecker. labor skinner, plutocrat and owner of

er such a consummation? No, no, dear friends, the trend of wages is down, down, down, to fit the servile relationships of master and man. The more than 2,000,000 socialis oters of Germany, as do all other so cialists, know this, and for this reason we declare for the uprooting of the wages system to make place for the

Martha Moore Avery.

FROM DAVENPORT, IOWA. Socialist Ticket and Platform-Clear Call to Action.

PLATFORM.

Workingmen, consider the value of our vote; election is at hand; think beore you vote. The Socialist Labor party of Davenport declares its unfaltering allegiance to the principles set forth in the national platform. Its ominees for the several offices to be filled at the municipal election on April are pledged to support the following principles:

I. The abolition of all contract labor that all city work be given directly to the laborers without the intervention of contractors or middlemen; that all material used by the city be purchased from parties who employ union labor, wherever possible; that eight hours onstitute a day's work, and union wages to be paid.

II. That the city take possession of the street rallway system, the lighting plants and all industries requiring mudelipal franchises. No new franchises to be granted, and immediate revocation of all franchises the condition of which have not been complied with. The employes to operate the same cooperatively under the control of the municipal administration, the employes to elect their own superior officers; no employe to be discharged for political reasons. The utilization of the water power of the Mississippi for the benefit f the city.

III. Since the working class needs all possible knowledge and training, we therefore imperatively demand that no pains be spared in giving a thorough, free and universal education in the public schools; we also demand the estab-lishment of free night schools. That the laws against child labor be strictly enforced; that provision be made for feeding and clothing school children where necessary, and that school books furnished free to all.

IV. We demand that the factories enement houses, business blocks and public buildings be subjected to rigid inspection periodically, and such sanitary improvements as are necessary to the public health be compelled from the wners of the premises.

V. That provision be enade for the relief of the unemployed, without subtecting them to the insults of so-called charity. Poverty should not be treated as a crime as it now is under the vagrancy laws, and the organized charities should not be used as they now are, for the purpose of supplying chesp labor to unfair employers.

VI. The people to have the right to propose laws and vote upon all measures of importance according to the referendum principle. All public officers to be subject to recall by their re-

spective constituencies. The abelition of the poll tax.

This, fellow citizens, is our local program and ticket for your thoughtful usideration, for you workingmen, to study the problem of society, to understand why such great msery fail to the lot of the vast mafority of mankind. It is for you to study our national declaration of principles and platform. It is for you to study and understand socialism.

defends his master's whip does not de serve freedom. We ask you to make an attempt to free yourselves from conditions which enslave you. Will you support, at the coming city election, men who stand for the principles of justice by voting the Socialist Labor ticket Or will you continue to vote for your lot in favor of, your masters as heretoguarantee the abolition of the "livery barn" council chamber.

Remember that the emancipation of the working class from capitalist exploitation must be the work of the

working class itself. Remember that we do not buy votes We have no free rides to offer, no beer nor free lunches to distribute. Vote for

UNITED STATES.

THE ELECTION RETURNS

The summing up of the showing of the socialist movement in this city, as measured by the late election, is still incomplete, but as we go to press we have sufficient data to show that NEARLY 5,000 VOTES have already been polled for the cause of the emancipation of the wage earner. This means an increase of nearly ONE HUNDRED PER CENT OVER THE HIGHEST VOTE heretofore polled in Chicago and is a striking proof that the working class are rapidly waking up to a clear perception of their class interests, and the only method of expressing such interests. This remarkable increase will satisfy the carnest workers in the cause, that their efforts have not been in vain, and will act as a strong incentive for still more energetic action on their part. In our next issue we will publish in detail the results in each ward and town, and we have no doubt that the figures above given will have to be considerably increased when the official count is known. In the teeth of the most bitter and unscrupulous opposition the socialist vote has ever grown stronger, and the latest results in this city will go far to convince many a doubting Thomas, that the future of society lies in the hands of the class-conscious workers.

FOR SOCIALIST UNITY.

to the account given upon the third page, of the work of the joint comin New York City, looking towards the one united socialist party. Of the final any doubt whatever, and the cause of socialism will be incalculably furthered by such union. The old capitalist parties will find in the coalized forces of tion of the 'labor question' is about to pas out of their jurisdiction into that of scious workers of these United States.

SMALL RESULTS.

That victory will be made more pro-The machinists' strike is ended we nonneed in the near future when the are told, and while it is difficult to see strength of a united, determined and just what has been gained according to the published accounts of the agreeit useless and dangerous to attempt the ment, the promise of a shorter work removal of the chosen representatives day is at least something. The wages will not be materially advanced, and speaking broadly matters are about as they were. Perhaps this is about the best that could possibly be secured by a struggle in the economic field where the workers are so heavily handicapped. It is useless to talk in this case of corruption upon the part of the labor leaders, as the agreement was acceded to by an overwhelming majority of the rank and file of the members. But when that rank and file begin to think soberly of the unsatisfactory results of this matter. The Paris exposition will their protracted struggle, and inquire into the causes which render them powerless to enforce their reasonable demands, they cannot fail to recognize the inadequacy of the economic weapons upon which they depended for vicetory. They will also recognize that the agreement which has been made is in reality only a formality which can b violated with impunity whenever their economic musters see fit to do so. That

will take place about that time. These SNAP SHOTS BY THE WAYSIDE. craftsmen will begin to see that powe is necessary to enforce the terms of any agreement, and that lacking this, such terms cannot be binding upon those who can violate them at pleasure. The strike will at least have taught some that the use of the political weapon as the expression of their class interests is an absolute necessity. In this manner the strike becomes the expositor of socialism.

SOCIALISM, OR "THE GANG." WHICH?

That the placing in the field of socialist candidates in local elections is a thorn in the flesh of the capitalist parties is well attested by the action of the latter in the 8th, 19th and 31st wards in this city, where strengous and successful efforts were made to have the names of the socialist candidates stricken off the hallot. In these three wards only one representative of the great capitalist parties was put forward as a candidate, it being considered useless to contest wards where the population was apparently either definitely republican or democratic. Consequently the socialist candidates were alone left in the field, and represented the only opposition in such wards. It may be asked why it was considered necessary to effect the removal of the names of the socialist candidates. The answer is easily found and merely gives added proof, if that were needed, of the classconsciousness of the capitalist parties. There was no opposition which means there was nothing upon which to divide the workers, but if the socialists were left in the field it would infallibly draw the attention of many voters and cause them to think for themselves, a process which capitalist interests will move move heaven and earth to obstruct. The voters do not yet clearly understand that principles, not bersons, are involved in the act of voting, and it is the bounden duty of their exploiters to see that nothing shall occur which themselves. Fick may perhaps be unwould tend to bring that knowledge home to them. The shrewd knowledge of class interests which these exploiters have always exhibited, their hypocritical pretences of morality, and their desperate fear of socialism is perhaps more clearly illustrated in the decision of the election commissioners regarding the removal of the socialist candidate in the Nineteenth ward at the behest of the notorious "Johnny" Powers. The latter who has been represented by the 'respectable' element as the incarnation of all that is vile and evil, found no difficulty whatever in persuading his sham enemies that it would be to their interest to give him a clear field in the Nineteenth ward, and they were quick enough to perceive the 'justice" of his request. While we make no complaint we call the attention of our readers about the decision, knowing well that capitalist law is the creature of capitalist interests, it is well to expose the mittees of the S. D. P. and the S. L. P. fact that those who are interested in maintaining the present system of leamalgamation of the two bodies into galized robbery of the workers will not hesitate for a moment to make their unity of the two bodies there is hardly choice between what they themselves brand as a most vile and notorious corruptionist, and the representative of the class-conscious workers. Against socialism the interests of capitalism are socialism an opponent that can be no always a unit, and if it becomes neces longer ignored, and the part played by sary, its upholders will be always found the working class movement in the ready to swallow the most nauseous identical. On the contrary he prophenext presidential election will prove to and disgusting creations of their own the exploiters of labor, that the solu- system with seemingly good grace. > of the coming social order. A New York politician asserts that the Republican party will lose between 15,000 and 20,000 votes on account of the Paris exposition. But the great canitalist system is not in the least endangered by this occurrence. It depends rather for its existence upon those to whom a visit to Paris is impossible, those who stupidly toll and suffer all their lives in order that this select 20,000 may enjoy the results of the labor of the workers of the world. There is, however, one redeeming feature about not affect the socialist vote in this country to any appreciable extent.

class-conscious proletariat will render

A public debase will be held on Sunday, April 8th at 3 p. m. at 103 E. Chicago avenue, under the auspices of the Twenty-third ward branch, S. L. P. The subject under-discussion will be "The Political Wilderness, and the Way Out." Debaters: Evans L. Williams and Thomas, J. Morgan. Admission free. Everyhody invited.

Do you value your freedom a dollar's worth? Then send it in with ten names it will last for six months is probable like to have a socialist talk given to seeing that the presidential elections

Mr. Debs will now proceed to throw upon the screen a lifelike picture entitled "The Suffering Country in the Grasp of the Money Power." Little boys in the audience are requested not to shoot beans at the canvass.—Chicago Tribune.

If the capitalist class for whom the Tribune speaks, anticipate any pantomime as the above, we can assure them that they will be disappointed, Mr. Debs will not "proceed" to deal in this discredited blatherskite, no matter how ardently the plunderers of the land Mr. Debs will rather "throw upon lutionary proletariat-"Workingmen your chains; you have a world to gain." We cannot stop to consider the disapsentiment has no place.

The Tribune need not feel anxious about the conduct of the little boys. If they derive any amusement from the spectacle, they will be so much ahead therefrom. The beans which the little batteries of capitalism.

which this candidate stands for are by Voters' League. As usual they are he soundly deserves. seeking to deceive the voters, and at the same time make a small reputation for generosity and non-partisanship for man." He is a socialist.

The crusade undertaken by the city beauties of the competitive system, as per well illustrates. A little "business man" (coal dealer) is being inter-

"Anyone can see that ain't a bushel basket," he said. "We may call it a bushel, but it ain't." "Why don't you sell by the bushel?"

If it wasn't for the "fellow across the street" who cuts prices how lovely everything would be? But then what would become of "competition?"Under capitalism it may be safely affirmed that those who have labor power to sell but the selling of the product of labor evidently obeys another law.

Mr. A. W. Bonner, member of the waste any time in declaring that the sled that the end of all these things will to his insight into the nature of the struggle. Revolution there will cersocial revolution, and this not alone because of the events trans piring in Chicago, as he seems to think, The struggle which will end in the social revolution is world-wide, and its every development tends nearer and nearer to that end.

. . . So Mr. Bonner is not altogether correct in his deductions from this state-He says "We (meaning the capitalist class) can take care of our-We can move out of this country and ply our trades elsewhere." This phrase "plying our trades" means the fleecing of those who do actually ply a trade, and is the convenient capitalist cloak for disguising the nature of the robbery of labor. But where can Mr. Bonner and his class go? Is there a spot on this earth where they won't find a revolting, discontented working class, where the same sort of struggle is not going on? If there were such a place, the entrance of the capitalist mode of production would generate the same struggle. You can't avoid the revolution, Mr. Bonner, for your class create it.

Mr. Bonner, however, has one last hope the use of the military. Well, that is a rather precarious weapon and not at all satisfactory, for you see Mr. Bonner, that it is not possible to shoot all the working class, and those that survive will be infallibly driven to take measures so that your class will not be able to use the military for such purposes. They will seek to control the governmental power of the country. which your class now possesses, and when that is done your class will be helpless. That is what comprises the

real revolution, Mr. Bonner, and any eans you may take to stop its progress will merely help it along. working class have votes, Mr. Bonner, and when they learn to use them for their own interests it will be-exit capitalism-enter socialism.

Lke most men Mr. Benner has done man would demand the punishment of do so. As the accredited representative plains that it was "TO THE VITAL he should do so, that he signed the bare the method of wealth accumulathe screan," the watchword of the revo- agreement for "self-preservation." Just tion which enables him to act as tutor so, Mr. Bonner. Exactly the same ex- to the young "Hopeful" for whose you to sign. It was for the "vital interests of their business," for their "self- bery and plunder of the working classes dicting revolution.

Mr. Sheldon's recent newspaper venture together with a pamphlet issued humorous. The conditions of existence movement, has aroused the ire of the but when it is considered that such conment and of which the above is no imagine. by the socialists in the Italian parlia-"Why don't you sell by the bushel?" he was asked.

"Can't afford to. People won't pay enough to get full measure. That fellow across the street cut prices and we cut cur measure to meet his cut. Yes; we may call it a bushel, but it ain't, and that's all there is to it."

This man was selling chestnut coal at \$14 at on, but most of his trade was done in soft. coal at about double the market prices by the ton.

ment determined that Signor Colombo should no longer preside in that assembly. He made several attempts to exercise the function of his office and at have a whole effect. Copi and the struggle has recommenced. The socialists are camped on his trail and they will get him yet, even if the "business" of the country remains neglected. Only two years ago the ruling IE. ment determined that Signor Colombo lected. Only two years ago the ruling class in Italy did not hesitate to massacre the workers by thousands in the streets of Milan and Turin, but it now seems as if they doubt their ability to repeat that performance wthout danger to themselves, and this is no doubt will be compelled to give full measure, the explanation for Sig. Colombo's ready resignation.

The Tribune of the 31st ult. speaks of Bonner, member of the a "manly" workingman, by which is Council, in his evidence meant one who does not kick at \$9 per before the Industrial Commission didn't week, but lives in the hope that his meekness will be rewarded by the appreciainterests of capitalist and laborer were tive capitalist-or in the sweet by and

The union man who tries to better be revolution, which is very creditable his condition by uniting with his fellow craftsmen (a preliminary to uniting with his class) is, according to the Tribune, an infamous wretch who sacrifices his family out of pure deviltry. Nine dollars per week is enough for any workingman the Tribune thinks, but just the same that paper has to pay the union scale to its printers and pressmen. These men want more than \$9 per week. That's what hurts. It re per- Weekt.
duces dividends.

Listen to the fellowing tale of we from Mayor Harrison in regard to the Twenty-third ward. It is needless to say that the statesman alluded to is not

Tonight I speak for an independent candidate, because he is the only man on the ticket for whom anyone can have any respect. The democratic machine in the Twenty-third ward is so rotten that it has nominated a man who is a confessed shell worker and whom I would not allow within several feet of me unless his hands were tied in his pockets. If he should be elected and the council should not throw him out of his seat, I would move out of the Twenty-third ward if I lived in it rather than be in a place represented by such a rascal.—Daily News.

.This unsavory gentleman whose very presence is an abomination to our respectable mayor, has been for the pas twenty years an indefatigable worker for democratic success in this city, and has no doubt in his time contributed largely to the election of the present mayor and his father before him, and during this period no special attention was called to his misdeeds. But his presence in the council chamber migh contaminate such innocents as Culler-Powers, Coughlin and therefore to avoid such a catastrophe the mayor promptly turns him down.

Campaign literature was distributed and several applications for membership in the section were received. This is the first time Comrade Harriman eyer met the Kansas City comrades, but he will long be remembered. Should he come again it will certainly tax them to take care of the crowd. The Monday morning editions of the local press contained interviews or alleged interviews with our candidate. One paper commented that "he did not look like the ordinary reformer." We know he is not in any "he did not look like the ordinary reformer;" we know he is not in any way like the ordinary reformer either, and others have found out also. There will be some trouble here about getting our licket on the official ballot. The section decided to test the law requiring signers to the petition to take oath that they were bona fide supporters of the party, as being in conflict with the Australian ballot law which prescribes secreey of ballot; and it likely we will have to take the matter to court and apply for an order to the election commissioners. Of course we may fall, but even so we will not have lost much and can make good advertising out of it. can make good advertising out of it. We cannot get official standing at this election anyway, as the law prescribes that the percentage must be made at the general election, for state officers.

-Kansas City, Mo., March 23.

To Hear All Sides.

Editor Workers' Call:—
My attention has been called to the fact that "Vorwaerts," the New York organ of our German comrades, predicts failure for our Socialist Review, because in our prospectus we use the following language:
"Editorially the attitude of the Socialist Review will be strictly in according to the socialist Review will be strictly in according to the socialist Review will be strictly in according to the socialist Review will be strictly in according to the socialist Review will be strictly in according to the socialist Review will be strictly in according to the socialist Review will be strictly in according to the socialist Review will be strictly in according to the socialist Review will be strictly in according to the socialist Review will be strictly in according to the social strictly in accor

with the recognized principles of international socialism. Signed articles will however, be welcomed from writers of all schools and parties who accept the socialist Ideal, however they may differ as to methods and tactics. We are convinced that a free and full discussion is the shortest and best road to the general acceptance of the methods and tactics of international socialism by all who aim at the establishment of the co-operative commonwealth. To this end we shall gladly open the pages of the Socialist Review to those who held it advisable to work through one of the old parties; to those who held the advisable to work through one of the old parties; to those who held that all political action should be non-partisan to those who believe in working for socialistic legislation 'a step at a time,' to those who believe in adding the growth og co-operative colunies,—in short, to the advocates of all measures looking toward socialism that are worthy of the serious consideration of thinkers."

Now for this language T am alone responsible, but the policy here ogtilined was proposed in the first place by Comrade Simons, who is to edit the review, and was heartily aproved by all the comrades we consulted before the prospectus was issued. I would like to ask our critic how he would draw the line as to what articles shall be accepted. Is socialism a complete system which has already reached absolute perfection, and which must be jeaiously guarded from heresy as Presbyter-line series the second the second to the prospection, and which must be jeaiously guarded from heresy as Presbyter-line series consideration and which must be jeaiously

cepted. Is socialism a complete system which has already reached absolute perfection, and which must be jealously guarded from hereny as Presbyterians guard their theology? If so what is our Bible? If Marx and Engels were living I can imagine their disgust at the idea of treating their own writings as such. No, socialism is not an absolute system, it is a growing science, and if we refuse a hearing to all who dissent from the majority of us in its various applications we are unjust to the heretics by depriving them of the criticism they propably need, and we are unjust to ourselves because we are shutting ourselves out from new ideas that may possibly be of service. To anyone who knows A. M. Simons, the idea of a reourselves out from new ideas that may possibly be of service. To anyone who knows A. M. Simons, the idea of a review under his editorship being used to switch off the socialist movement from straight scientific socialism is simply funny. His hope as well as my own is to bring all the leading pseudo-socialist theories out into the daylight of clear, exact, scientific discussion, and if the socialist comrades help, as I believe ocialist comrades help, as I believe hey will, the result will be that the they will, the result will thousands who are now amusing the theories will thousands who are now amusing them-selves with such theories will be brought into the main current of the socialist movement. In conclusion let me point out the well-known fact that the policy of admitting articles by those outside the socialist movement is adopted by all the leading socialist re-views of Europe, and notably by the "Neue Zeit" of Leipzig, edited by Karl Kautsky.

Fraternally, Charles H. Kerr.

Work of the Joint Committee of Eighteen From the Two Socialist Bodies.

Laber party and Social Democratic party convened at the Labor Lyceum, 64 E. 4th street. New York City, at 10:30 a. m., Sundey, March 25, 1900.

The delegates elected by the Rochester (S. L. P.) convention were:

J. Mahlon Barnes, Philadelphia, Pa.; G. H. Benham, San Francisco, Cal.; C. Fenner, Woroester, Mass.; Max S. Los Angles, Cal.: Morris Hillquit, New York City; N. I. Stone, New York City; F. J. Sleverman, of Rochester, N. Y., and W. E. White, New Haven, Conn.

apolis (S. D. P.) convention were:

Wm. Butscher, Brooklyn, N. Y.; Vic-Chase, Haverhill, Mass.; Jas. F. Carey, Haverhill, Mass.; Margaret Haile, Roxmour Stedman, Chicago, Ill. Victor Berger did not attend.

Job Harriman was elected chairman, John C. Chase, vice-chairman for the committee. Margaret Haile was secretary for the S. D. P. delegation, and N. I. Stone secretary for the S. L. P. dele-

gation. was decided to take up the matters consideration, to take a vote upon the arrangement for the bringing

The subjects were taken up as fol-Name, constitution, party press, candidates platform.

Adjourned at 12:30 to reconvene at

The question of name taken up in the afternoon session, was argued upon

argument for the name, Social Demo- that purpose (to contain only news best cratic party, pointing to its prestige in suited for the membership), and that Germany and the victories already won it be supported directly by the funds of by the party under that name in the United States during the past eighteen months.

Benham presented an argument against the name. Attention was paganda purposes, but to be left upon called to the fact that the name was the ordinary basis of subscriptions remeaningless from the socialist standpoint; that the name was misleading and that the name lost its significance when translated into English. Definiwere given and, it was shown that the socialist conventions in the United States in 1877 and 1884, although composed almost entirely of Germans. had discarded the name as inappropriate for the political party in this coun-The prospect of its being contested by the Democratic party in any or all states was, in addition to many other objections, alluded to in this statement made in opposition to the name.

Nearly all the delegates took part in this discussion, and many interesting facts were developed, although the chief arguments in favor of the name were made on its behalf because of the hold it had made upon the people and the success that had attended its career in this country. -Margaret Haile gave some light on the word "social" from an etymological standpoint. Stedman, Butscher and Chase particularly de-sired the name Social Democratic retained during the present campaign. Carey did not particularly like the name, but declared its necessity for the present campaign.

Hillquit, Sleverman and Harriman all pointed out the necessity of a new name, one that would indicate not only the character of the movement, but the unification of forces. Fenner said many Social Democrats had requested of him to vote against the name Social Democratic.

History, etymplogy and philology were all made basis for arguments after 20 minutes for caucus the S. L. P. against the name. Stone regarded the retention of the name S. D. P. as a mistake, as a new name would gather new material and dissolve all prejudice that might exist.

The debate was heated, and the qualifications of the debaters were well dis-

Shortly after 6 p. m. Frederick Heath said he desired to speak, but for the benefit of the S. L. P. delegates could only speak in executive session. In accordance with this, the public were excluded from the room and the conference went into executive session.

Heath made charges against some the members of the sub-committee that attended the Indianapolis convention. Heath stated that the S. L. P. delegate had broken falth in regard to the support of the name, Social Democratic, pletely false, and all the S. D. P. delegates so recognized them, except Heath, who had seemed but slightly interested in the proceedings and withdrew from the sessions, only Wednesday morning sitting with the S. D. P. delegation for a few moments and voting on one proposition. The episode developed the fact that it had been stated by some newspapers that the Social Democratic party had absorbed the S. L. P., evidently with the end.in view to make the g. L. P. membership dissatisfied and to prevent union if possible.

MONDAY MORNING.

Committee met at 9:30 a. m., Monday,

Chase, speaking for the S. D. P. delégation, said that after full consideration, it was decided that in the interest of the movement two names be sub-mitted to the referendum. This stateof satisfaction by the S. L. P. delega-

The matter of the National Executive

The Unity committee of the Socialist Committee was now taken up. Stedman desired a national council of two members from each state, this council to select a national executive committee, and proposed Chicago as

the seat of the committee. Benham stated that accessibility to should be considered. That no one city E. Fenner. Worcester, Mass.; Max S. should select, nor could the National Hayes, Cleveland, O.; Job Harriman, Executive committee be brought from localities long distances apart. By se-lecting a city within reach of Massachusetts and New York all said results could be attained; advocated New The delegates elected by the Indian- Haven as the seat and that a provisional committee of 14 be elected, 6 from New York, 2 from Connecticut, and 6 tor Berger, Milwaukee, Wis.; John C. from Massachusetts, half the delegation of each state to come from each party as now constituted. A discussion bury, Mass.; Frederic Heath, Milwau- of considerable length now took place kee, Wis.; G. A. Hoehn, St. Louis, Mo.; on seat of national executive committee. W. P. Lonergan, Rockville, Conn.; Sey- Carey presented the name of Springfield as the seat of the national executive committee. Hayes and Sieverman spoke for New York City. Heehn advocated Cleveland. Haile advocated Chicago. Chase opposed Chicago. One of the arguments in favor of the latter city was that it was to be the home of E. V. Debs, who would like to be in close touch with the national executive committee during the campaign. Stone of importance, and after their general spoke for New York. Hillquit suggested that a campaign committee could be located in Chicago. The fact developed about of unity upon satisfactory terms. that there was a feeling on both sides that if either of the old seats of the national executive committees be selected it might not be best for the movement

The party press now came up for con-sideration. Haile, Carey and Stedman vigorously advocated the establishment of an official organ, the Social Hoehn opened the debate with a brief Democratic Herald to be selected for the party, each party member to re ceive the official organ regularly.

The People of New York was also to be regarded as an official organ for progarding its support. Benham wished to place every paper on equality of opportunity; if the party wished to furnish a paper to each member let the member select his paper and the party get a special rate and pay for all such Harriman and others supported the latter proposition. Stedman, Haile and Carey spoke against it,

AFTERNOON SESSION.

Stone moved that two names for the united party be submitted to referen-Carried. Also that there be a question asked of each member in the ballot: Are you willing to agree to the result of this vote, the vote of both parties to be counted as a whole? Carried unanimously. Names to be submitted:

Social Democratic party.

United Socialist party. Nominations for seat of national excutive committee were now in order. Hillquit for prudential reasons wa against New York City and in favor of New Haven. Harriman favored Springfield, because of the particularly friendly feeling between the Springfield S. D. P. and S. L. P. membership. Haile favored Chicago, for many reasons, par ticularly geographical. New Haven, Springfield, New York and Chicago were put up for informal ballot, lowes to be dropped out in each successive ballot. Fnally but New York and Springfield remained. The S. D. P. de sired a delegation caucus, and rotired The S. L. P. likewise. On reconvening Barnes gation, through themselves willing to adopt the choice of the S. D. P. delegation of eithe Springfield or New York. The S. D. P. reported that they had decided to submit three cities to the referendum-Chicago, New York and Springfield. This again involved Chicago, which had been left out of the S. L. P. calculations, having been dropped in informal ballot. The S. D. P. again retired and decided upon Springfield, which was

For provisional national executive, Benham then proposed four from Massachusetts, two from Connecticut, four from New, York; each party as now constituted to elect in the unity referrepresentaendum vote, one-half the tion. After a lengthy debate a list of wice as many names as number of epresentatives desired was finally de cided upon. The committee to have ower to fill vacancies. Each state to have right to send another delegate expense of the state. Adopted. Halle and Stedman only against it.

declared adopted, Stedman and Halle

voting for Chicago

Julius Gerber, organizer of Section New York, announced that New York desired to entertain the delegates When the committee adjourned at 7:30 thy proceeded to the dining room where substantial refreshments and speechmaking were indulged in. Comrade Lisseur, of New York, was toastmaster and received the guests with an eulogistic address, and commenting favorably upon the work of the Roches er and Indianapolis conventions and that of the conference committee. Chase, Harriman, Hayes, Carey, Siev rman, Hillquit, Stedman, Halle, Benham, and Barnes spoke. All the speak ers were met. with manifestations of great delight whenever the subject and sureness of unity of socialist forces vere touched upon. This mark of hos

splendid movement in New York.

TUESDAY

On Barnes' motion, each delegation then nominated four names from Mossachusetts, four from New York and two from Connecticut, to be selected from by the membership by referendum The names were as follows: S. L. P. Massachusetts-Kaplan, Oliver, Fenner and Wrenn; Connecticut-White and Bartels; New York- Hillquit, Slobodin, Stone of New York City, Sieverman of Rochester. The S. D. P. nominees were: Benham stated that accessibility to Massachusetts—Halle, Jones, Chase membership and expense of meeting McCartney: Connecticut—Lonergan and Sweetland: New York-Butscher, Guyer, Gordon, Phillips,

Stedman moved that the national ouncil be composed of two delegates from each state; the council to elect a national executive committee of 11, the latter to be removable by council, the latter's members to be removable by state membership electing them. This was finally modified and adopted as follows: One of the council to be elected from each state: they to nominste not less than 15 members, this fist to be submitted to referendum, seven to be selected for a national executive committee. Harriman, Benham and wo others voted and spoke against the roposition.

The Rochester platform and the S. D. P. demands were adopted as a platform for the united party.

Eugene V. Debs and Job Harriman were endorsed as the national nominees of the united parties.

Constitution was taken up. Boards of appeals abolished. Word local to be used instead of either branch or section as now used in the parties' organizaion. National council to meet yearly On motion of Hoehn, stamp system o iues adopted, and many other alteraions, changes and abbreviations made, both S. L. P. and S. D. P. constitutions eing considered. Party press taken up. Carey pro-

osed two party organs, one for official news, one for propagantla. Hochn saw mpracticability. Benham wanted national executive reports and other official matters furnished to any paper hat wanted them. Stedman declared that in the open field the S. D. Heraid could not exist, as it had been used as propaganda sheet and sent to every party member. It was finally decided o have the united party pay any decit on the S. D. Herald not exceeding 360 per week for six months following the union of the parties, the S. D. Herald to be furnished to all members that might request it sent, and that every member pay ten cents per quarter and elect (from a list to be furnished by the national executive), one of the party papers. It was considered unwise to withdraw the Herald from the membership of the S. D. P., from whence the paper had been supported and as the dues now went into the general funds of the united party, it was equitable to see that the Herald was put open a footing until adjustment to changed conditions was made. It was decided that Chicago should elect a ampaign committee for the conduct of the presidential campaign.

Eugene Dietzgen was unanimously chosen as the united party representative at the Paris congress.

No local or state organization can use or compromise with any capitalist political party.

Provisional executive committee auhorized to make proper arrangements for the organization in American colo-

The S. D. P.'s voluntary offering to submit two names was an evidence of their sincerity in union and confidence membership. The S. L. P. also signified the proper spirit when it deided to stand by the choice of the S. D. P. as to the seat of the national executive committee.

It was a conference that will have great historical significance and one that not only reflects credit upon the organizations represented, but upon the ising socialist movement of the United States. The proceedings of the conference were carried out with dignity and precision. No actions, except those tha they believed to be for the good of the movement were performed by those members who sat through its sessions

The early deliberations of the confernce were marked by decisive and logcal debating, and the presentation of arguments brought out a considerable tary ability. The latter part of the pro seedings was a strenuous effort by all canization could be turned over to the referendum. The vote in favor of units eems a foregone conclusion.

That the result will be received with joy by the membership is already sure The future of socialism is brought near er, and the success of the new party assured by the result of the conference of the committee of eighteen

G. B. Benham. -In The People.

To the Reader.

Did you order and pay for the paper you hold before you? No! Then it wa oald for by some friend, who seeing the light: desires you also to see it. If you trine, that the toiler, under a rationa system is chtitled to the full product of his toll, and that this he can neve secure, while another owns the tools with which he toils, then seek out a few of your friends who are still in that deep sleep from which you may have recently awakened, and arouse them by ending each one a three month's sub scription to The Workers' Call.

Have you asked all your shop mate to subscribe to The Workers' Call? If you are not willing to do that much now long do you think it will be before pitality is one of many evidences of the lyou are free?

Chicago Typographical union has re seinded its action declaring the boycot off on the News-Record, which cause its expulsion from the central body

The executive council of the A. F. o L. decided to issue an appeal calling on organized labor to arrange mass meet ngs on May Day, July 4 and Labor Day to preach the propaganda of labor.

Plumbers of Indianapolis have struck for an increase to \$3.50 per day. Hosse are unwilling to accede to this demand and the harmony which "should" exist between capital and labor has sustained a severe fracture.

"The plasterers of Minneapolis have en locked out by their benevolent em ployers, owing to a dispute over the ength of the working day. The ideal vorkingday according to capitalisi principles is somewhere about 25 hours

The Whitaker iron works at Wheel ng. W. Va., has shut down throwing 280 Amalgamated Ironworkers out of employment. Differences between the employes in the tin plate department are alleged as the cause of the shut

Between 25,00 and 30,000 coal mine struck at Pittsburgh on April 2d and 19,000 more were expected to be out next day. In the Irwin field 10,000 miners ar on strike for 76 cents per ton, for thre quarter inch screen coal. The interests of capitalst and laborer are of course identical but-

Two thousand painters and fifteen nundred carpenters have gone on strike at St. Louis, Mo. Painters want an in rease from \$2.50 to \$3.00 per day, and carpenters demand 45 cents per hou instead of 35. Both demands have been refused by the bosses, and the struggle

Union painters and carpenters Newark and Orange, N. J., quit work. About a thousand of each trade are out. They demanded more pay and shorte hors, but the bosses couldn't see how their interests would be furthered by assenting to this proposition. Henc the strike.

The employment of non-union car penters upon some houses in Nev Brighton, Staten Island, was the caus of 260 union workmen dropping their tools. The non-union men were work ing for George Vanderbilt, who of ourse purchases his workers as cheap'y as posible according to the laws of the present capitalistic system

In Cleveland, Ohio, about 2,000 building trades workmen have quit work The advance of wages which they de manded, the bosses did not see fit to grant alleging that objectionable rules were coupled with the demand. During their period of enforced leisure the workmen will have time to study out how to make their demands imposible of rejection.

Upland, Ind., March 31,-The window glass blowers at the Butler Window the bay of one of the blowers The factory closed down and the matter has een referred to President Barnes of ocal assembly No. 300, Many of the en were opposed to a strike, but the Belgian members were in the majority and voted to quit.

Secretary Duncan of the Granite Cuters is hopeful of success in getting the sight-hour day and a minimum rate-o 13 a Way, which has been the demand o the workers in the New England quar ries. More than 6,000 men are involved in the strike which now enters upon its cond month. Should the dispute no be settled it is claimed that the granite for the Chicago postoffice will not be eady when wanted.

"When the 25,000 minets of Illinois omorrow take up their picks and enter the 600 coal shafts, starting in on th ew agreement," said a mine manager they will begin work upon the highes rate of wages prevailing in coal minir since' 1892. With such an understanding in the various competitive fields as will maintain prices for the year, and supply a foundation to the trade, it is natural to expect that 1900 will be notable year of coal production."

Hartford City, Ind., March 31 .- The esult of the second ballot for the presi ncy of the National Window Gias Blowers' association was announced to day and President Simon Burns of Gas City was re-elected for the sixth con secutive time, defeating Joseph Armstrong of Jeanette, Pa. The resolution providing for building three large tank window glass factories b ythe organiza-

AUSTRIA.

The strike among the coal miners in Bohemia and Silesia has now spread to Galicia, where 3,000 miners at Zaworzno have gone on strike. They ask for an some share in the management of benofit societies to which they contribute. Most of the mines in this district beong to two people, a Jewish banker alled Guimann and a very plous Cathlie called Potecki-a pair of precious gentlemen who pay men from is. Id. to is. and women Sd., a day for cleven hours' work.

BELGIUM.

The Abbe Pottier, of Liege, is the eader of the French speaking Christian ocialists o' Belgiom and was going to tand as a candidate for Liege. But he wealthy Gatholics of the districts breatened in that case to withhold heir subscriptions from the party funds, and the abbe did not stand. It is difficult to quite understand the aims of he Christian Socialists. They are probably Clericals under another name.

in Mr. Whiteing's novel, "John Street," a bishop found great comfort then he heard that New York had its lums as well as London, "it made us gel such brothers." . There are slums in cussels too, and, from statistics just ublished. It amears that there are 6.978 'amilies which each' only have one The mean death rate is 19 per ,000, but in some of the slums it rises rom 30 to 60 per 1,000, and in one case o 142 per 1,000. Perhaps when the Belgian sovernment has some time to spare from "civilizing" the Congo, it will look o its slums, but I doubt it.

FRANCE.

Gaston Moch has published as a pamphlet the articles on a citizen army which appeared in "Le Petite Repub ique," and of which a translation will e found in the "Social Democrat."

The president of the French Chamber of Deputies, M. Paul Deschanel, has een rebuking the French jingees who want to go to war with everybody, and with England in particular. Jaures ipproves of this part of the speech, but goes on to say, "Why does M. Deschanel go on to provoke Germany? Why hould statesmen, give vent to such a mania of attacks. There are two classes of them now, Some wish France to quarrel with Germany, and ome wish her to quarrel with England. he first want a continental war, the others wish for a maritime war. And perhaps if they go on we shall have both. Let us try to form, in opposition to these madmen, the great party of peace.

GERMANY.

Another socialist has been elected a member of the Berlin municipal council and there are now 22 socialists in that bedy.

Munich, has just celebrated his fiftieth birthday.

Arons-a privat decent (that is to say lecturer) at the University of Berlin -has been dismissed because he beonged to the Socialist party. This has been done by the ministers, though the university authorities condemned the And the case is more harsh because Arons was a lecturer in mathespatics and it is not contended that he ntroduced socialism into his subject. He has now been chosen by the Sacialist party as a candidate for the next acant seat in the Reichstag. So the petty prosecution will only lead to his being a member of Parliament and becoming. I hope, a real nuisance to the government.

HOLLAND.

The new daily, the organ of the Soriel-Democrats, is to appear on April 1. ng on account of a dispute over will be edited under the direction of b double * Care will be taken to provide attractive paper as popular as possible.

F. Van der Goes has been appointed coturer at the University of Amsterlam, and his first introductory lecture on the power of labor has just been "Jastice."

LOCAL NEWS AND NOTES.

The Seventh ward club at their business meeting took the initiative for helding a Mayday celebration. A committee of six was elected to visit the various branches seeking their co-operation for this purpose. Comrade Maration for this purpose. Comrade Marmittee.

At Schosnhofen's hall, Ashland and Milwaukee avenues, the Fourteenth ward branch held a well-attended meeting on last Sunday. Comrade Hitch the candidate for the Socialist Labor party in this ward, save an able outline of the socialist position on municipal affairs.

The Fifth ward branch held a crowd-ed meeting on last Saturday night at their hall, 2229 Wentworth avenue. Comrade Saunders addressed the meet-ing on "The Future of Socialism," and his remarks were well received. Much lively discussion ensued before the meting adjourned.

tion, costing \$30,000, and to be raised by a 5-cent assessment on the workers' earnings, was defeated.

All comrades holding Commune Festival tickets are requested to return them to the committee within ten days.

sion took place, in which many doubtful points were cleared up.

Comrade Becker addressed the Twenty-fourth ward branch last Sun-day at 2 p m. at 65 N. Clark street. A fair-sized audience was present and listened attentively to the speaker's de-lineation of the "Class Struggle." A spirited discussion ensued in which many questions were analyzed, the presence of Comrade Becker being generally a sure guarantee of a lively bate.

A meeting was held at the home of Wm. Bartels, 918 N. Washtenaw ave-nue, last Saturday evening. The organ-izer who was present, was called upon to give an outline of the principles of to give an outline of the principles of socialism, after which an interesting decussion fook place. Before adjourning the audience decided to hold another meeting next Saturday, April 7th, at 8 p. m., in the same place, in order to organize a branch of the 8 L. P. Invitations are extended to sill who wish to join the 8. L. P. to attend this meeting.

The Twenty-third ward branch will give an entertainment in which the Socialist Sangerbund will participate, on Sunday the 15th of April at 5 p. m. at Sven hall. Larabee street and Chicago avenue. This ward has held successful meetings every evening last week at 193 E. Chicago avenue. Different speakers of the party addressed the audiences and much interest was shown by those present. The energy and perse-verance of our Swedish comrades is be-yond all praise, and we hope their en-terrainment will prove an unqualified

A meeting of the Thicty-dirst ward branch S. L. P., was held at Elike's hail, 1188 W. 63rd street on Sunday at-ternoon. The hall was well filled, and ternoon. The hall was well filled, and the audience listened with marked at-tention to the address of Comrada Glambeck, the speaker of the evening. Slambeck, the speaker interesting expo-who gave an able and interesting exposition of the nature and object of the socialist movement. The action of the election commissioners in striking the name of our Comrade Rasmussen from the ballot as aldermanic candidate was also discussed, and the reasons there-for made plain to the audience, who seemingly were much interested in the proceedings. Last Saturday the Pattern Makers'

Last Saturday the Pattern Makers' League of Chicago held a mass meeting at Sam T. Jack's hall. Madison street, for the purpose of admitting new members, of whom between 30 and 40 were accepted. About 300 members were present who were addressed by L. R. Thomas of Pittsburg, president of the League. He gave a general view of the conditions of the craftsmen all over the country, and wound up by stating that while under the present existing conditions the union was the natural defence of the grouped workingmen, yet ultimately the political action by the means of the ballot would become imperative upon the working class in upholding their distinct interests as workers. He gloried in the fact that the clause protheir distinct interests as workers. He gloried in the fact that the clause prohibiting discussion of politics in the unions had been stricken out of the constitution and by-laws of the Pattern Makers' League. The address was received with much applause. Comrade J. W. Saunders addressed the meeting after the president had concluded. He showed the necessity for united political action on the part of the working class, in order that they might own and control the means and tools of produccontrol the means and tools of produc-tion, the present individual ownership tion, the present individual ownership of which was the direct cause of all the poverty, misery and evil conditions by which the workers were surrounded; called the attention of his audience to the coming local election and urged them to consider to which class they belonged and vote accordingly. Altogether Comrade Saunders made an able and powerful appeal to his hearers for the cause of socialism which he demonstrated to be the cause of all the working class. His remarks were well received, and he was cordially invited to address the League again at a future date.

STANDS ON BED-ROCK.

Pittsburg Socialist Strikes From the Shoulder for the Interests of Wage-workers.

You having invited correspondence. help and assistance of socialists, it is the giving of such help solely that prompts these lines.

First, let me state that there is no nulling of the heart strings, no sentimental emotion in mine, when in a political discussion. Political propositions are business propositions. Decemenating questions in this sense, there can be absolutely no difference between a political boss giving an office to some one and then levying assessments on It will be called "Het Volk" (The Peo- him to maintain his-the political boss' Glass factory were ordered out this ple), the organ of the labor party, and superior standing, and a factory or Van Troelstra, the Deputy. On Sunday and then levying on a portion of his number will be published, product to maintain his the factory boss'-superior standing, and we cerreading for women, so as to make the tainly ought to give them equal credit for making the best of a system which absolutely prescribes the paying of a premium on crime. The swindler and forger, the gambler and the stockbroker, the speculator and the land sublished by the Socialist party.-Lon- shark, the franchise grabber and the labor skinner, they all play their metler in order to receive such a premium. Anomaly and logic: These premiums consisting in dollars and such dollars being erroneously called capital and capital being today the standard measure of the type of men, the incentive to become manly-by unmanly acts-is all absorbing.

be his brother's keeper, performs useful and necessary labor in order to The Polish comrader measurement of the Polish comrader measurement of life to himself and enjoymeetings were well attended both in the
afternoon and evening. Comrades Barkowski and Sielinski, Levison and
Knox were the speakers, in Polish and
Populish. present competitive system such is utterly impossible, and as the mountain will not go to Mohammed, Mohammed must go to the mountain-the system must be changed.

Individual production has been superded by collective production, and individual ownership of the tools of production must be superseded by collective (public) ownership of said tools. Like you, my friend, I am a Democrat to the core, but without industrial democracy political democracy is a hair-brained vision.Palliative reforms will never accomplish a change. All the eading reformers of the past twentyfive years have returned to the capitalistic Democratic-Republican parties each the party of their class. Democrats of '96 have stolen the w

est plank of the Populist platform and English concerning the American move they will not hesitate in the future to steal the weakest plank in the socialist platform. Municipal ownership, . or even state socialism, will never be the working class one jots. It will at best reduce taxation for the middle class, but the middle class will in the near future simply be a nom de plume. That class cannot in anyway concern our attention as it is fast disappearing.

The trusts by scientific production and distribution, by means of their ownership of the gigantic tools thereof will drive even the millionaire into the fold of the already augmented fanks of surplus labor, Under socialism everybody would be guaranteed work; in fact if able would have to work in order to exist. Under it the incentives for inventions would be unlimited, for such being collective property every new mawould shorten manual labor. Under it there would be production for use, not for profit as is the case with our present planless production and social disorder.

Our social material and moral degen erations are the result of condittions and environments, and any writer who dodges this point will commit a ludi crous blunder. I refer to "J. E." in your issue of the 3d inst., and quote: That our social relations are governed by 'eternal laws of God' is no longer a mooted question among men," and further, "But a few men according to the fashion of hogs have secured a menopoly of the seats at His table and thereby disinherited the mass of His children. THIS explains the poverty among men and THAT has made the man with the hoe a brother to the ox. Go thou and sin no more. It is rather surprising that the Popu

list county chairman (he constitutes the whole party), should steal his thunder from his friend the enemy, Col Stone. It is, however, less surprising that, holding the bloody dirk with which he assassinated the Populis party by his vote for Arthur Sewall still in his hand, that in his letter in your last issue he should find it complaisan pastime to rattle dry bones in the Popu-Hst graveyard. Friend Stevenson you are true to your class.

Now as to the "Demograt;" I have had more success in socialist propa ganda work in two years than I have had on reform in eight-years. A clean scientific and logical exposition of the wage workers' interests will always gethe fair-minded support. Socialist papers from one to two years old have from 10,000 to 75,000 subscribers. Pitts burg would make an excellent field for a class-conscious socialist paper. Your for the Co-operative Commonwealth. Wm. S. Tuescher, in Pittsburg Demo

SOCIALISM AT WORK

(Continued from page L)

soldier and a special organization of young men who put their main energy into this form of propaganda work Besides this, as was pointed out in a previous letter, they make use of all special occasions to "inoculate the populace with their deadly virus," as the capitalist organs put it. The result of this has been that a goodly portion of the soldiers coming from the hours trial portions of Belgium are socialist and can no longer be "relied upon" to shoot down their fellow workers when occasion requires. Indeed, as nearly every one knows, at the time of the disturbances a year ago when it was endeavored to use the army against the socialists the soldiers fraternized with workers and added to the demon stration. This conditions of things has given rise to a situation that is keeping many an army officer awake nights. That is the problem as to where to put the socialist regiments. If they are left in the neighborhood from which they were taken they are of no use to capid are liable in case of a armed revolt to be on the side of the laborers. They most certainly would not fire on their own fathers, brothers talist state. . Hence it has been the uni versal custom in all European countries locate each regiment as far as possible from the place in which it was raised. It with the socialist regi-ments a new danger to capitalism appeared in this policy. If a strong se cialist regiment is sent to a non-socialist locality the result is that the "deadly polson" of socialism is spread still further. So what is to be done. There is a good soft snap open to the man who can solve this dilemma.

It would perhaps interest the people at home to knew something of the way the socialist movement in America is regarded here. As might be expected there are few or none who have any use for De Leon, for his "People" has been such a "give away", that wherever it has gone it has exposed his utter ignerance. We have been very often asked to explain some of his remarkable argument of the mud-slinging style but have invariably declined on the ground that it had no connection with socialism and we were no longer interested in his antics. As a matter of kindness to the old man we would advise him if he desires to retain a reputation for sanity, now that about everything else is gone, he should certainly crop all his European exchanges or subscriptions. At the very least he movement, and reviews of all new eco should cut out those letters of Frank MacDonald's as the aggregation of socialists or anti-socialists, words and dime novel illusions that he Financially the Review w words and dime novel filusions that he F nancially the Review will be identi-strings together has just enough of the fied with our co-operative publishing appearance of English to delude one appearance of Eaglish to delude one company, which is already issuing the not extremely familiar with the lan-guage into the idea that they really works of Engels. Liebknecht and other

These remarks are suggested by the fact that De Leon has just taken a new tack over here that is so amusing as to be really worthy of preservation. great and only Keinard is now in Paris. Impressed with the idea that the Euro pean socialist movement was something like a backwoods section in the wilds of Colorado he has been sent a la Hickey to "fix" it up. Judge of his onsternation to find himself in a place where the name of De Leon had no onger any power to conjure and where the merits (?) of a Tammany ward celer were not even interesting to say nothing of being effective. He is telling a fairy story here that would make excellent material for a cheap minstrel show if one is amused by the grotesque He has gravely informed the comrades iin Paris that De Leon, Kuhn and Vogt have all been appointed delegates from the S. L. P. to the international conference to be held this fall. We though of cabling this news back so that by its early publication in America the De Leonites might know that their delegates have been already chosen for them and thus save themselves the trouble of a referendum but finally concluded not to do so as it probably imuses them to think that they are using their own minds and certainly inures no one.

We have now been in London for couple of days and leave here in about week for a lecture tour through England under the auspices of the L. L. P and S. D. F. We shall hope in this way to learn as much as possible of the methods of the English comrades and vill, we trust, be able to pick up many things of interest and value for our ow movement. In our next letter we shall have something more to say concerning the Belgian movement, more especially of the wonderful work that they are doing in co-operation and a discussion of its possibility in the developed capitalism of the United States.

> Yours fraternally. A. M. Simons. May Wood Simons.

The Socialist Review.

Early in the summer of 1900 we hope issue the first number of a monthly view under the editorship of A. M. mons, until lately editor of the Workers' Call, who is now studying socia onditions in Europe. It is Mr. Simons desire to associate with himself as coeditors a number of socialist writers epresenting various shades of opinion and to open the review to the freest discussion of all questions related to ocialism. It is evident to all thoughtful workers in the socialist movement that there is urgent need of a medium for the exchange of ideas on the many serious problems which are incident to the transition from capitalism to s cialism. The existing socialist periodials in this country are either the official organs of political organizations or are propaganda sheets which serve the useful and necessary purpose of explaining the basic principles of socialism to the millions who are ready for it yet do not know it. Periodicals of both of these kinds must perforce rule out any lengthy discussions of questions on which socialists differ among themselves, yet such public discussions are vitally necessary for the working out of an intelligent political program.

Here is the field of our proposed So ialist Review. It competes with no existing publication. It will, we trust, prove itself indispensable to every hon st student of social problems, whether als sympathies be for socialism of exainst it.

Editorially the Socialist Review will e strictly in accord with the recognized principles of international social sm. Signed articles, will however, be welcomed from writers of all schools and parties who accept the socialist ideal, however they may differ as to methods and tactics. We are convinced hat a free and full dis shortest and best road to the general acceptance of the methods and tactics of international socialism by all who aim at the establishment of the coperative commonwealth. To this end we shall gladly open the pages of the Socialist Review to those who hold i advisable to work through one of the old parties; to those who hold that al olitical action should be non-partisan to those who hold that religion must be the main factor in social regeneration to those who believe, in working for so-cialistic legislation "a step at a time:" to those who believe in alding the growth of co-operative colonies-in short, to the advocates of all measures looking toward 'socialism that ar worthy of the serious consideration of

thinkers. The size of the Review will be limited to 64 pages in order that the price may be kept down to ten cents a copy, or a dollar a year. The importance of th subjects treated and the necessity of giving each writer room for an adequate expression of his views will make it im possible to introduce any matter not specifically related to socialism; readers will look to the Review for informa tion rather than for entertainment.

In the editorial departments the Review will give each month a running comments on such current events as bear on the problems of social reorgani zation together with notes on the progress of the international socialist nomic works of importance, whether by

have a meaning and when they are un-able to find any connection in it the incident to the founding of the Review foreign comrades are discouraged in a special stock subscription to the ex-

Socialist Labor Party of the United States. SOCIALIST BOOKS Directory of Section

PLATFORM.

The Socialist Labor party of the United States, in Convention assembled resultings its allegiance to the revolutionary principles of international socialism and declares the suppreme political issue in America today to be the context between the working class and the capitalist class for the possession of the power of government. We affirm our steadfast purpose to use those powers, once a chieved, to destroy wage slavery, abolish the institution of private property in the means of production and distribution of private property in the means of production from the United States, as in all other divilized countries, the natural order of conomic development has separated society into two antagonistic classes—the capitalists, a comparatively small class, the possessors of all the modern means of production.

This economic supremacy has secured to the dominant class the full control of the government, the pulpit, the schools, and the public press, thereby making them the arbiters of the fate of the dominant class, while it is reducing it to a condition of dependence conomically exploited and oppressed intellectually and physically cripped and degraded, and its political equality rendered a bitter mockery, and the working class, while it is reducing it to a condition of dependence and the exploit of the modern means of production.

This economic supremacy has secured to the dominant class the full control of the government, the pulpit, the contest between the security of the working class, while it is reducing it to a condition of dependence and degraded, and its political equality rendered a bitter mockery, and the wage workers and of the unemployed, and ever fire the security of the contest between these two classes grows ever sharper, Hand in hand the exploited, the capitalistic production are intensified by the recurring industrial crises, continually production are intensified by the recurring the interests of the tolling of the contest between these two classes and the working class. In the production are inten

oncertain, which amply proves that the of its progressive demands.

"Workingmen of all countries, unite! "Workingmen of all countries, unite! your nown the existing social order based you have nothing to lose but your than production for profit.

CRUELTYTOANIMALS

Howling of a Political "Dog" Who Can't Slip His Collar.

TIED UP IN LORIMER'S KENNEL.

He's Not At All Dangerous-Barks Loudly, but Won't Bite-Will Do His Master's Bidding After All.

Chicago, April 7.—[Editor of The Tribune.]—I am a county employe. I purchased tickets for my wife and self for the theater tonisht, but this morning I got orders from the Tenth ward ing I got orders from the Tenth ward this city in the last election. The official count is given in each ward for the Thirty-second ward. Now, I must lose the price of my tickets, leave my wife aione and travel ten miles to swell the covod of tax-eaters that will be the crowd of tax-eaters that will be there. But having put on the collar, I suppose I must follow wherever led. Yours in disgust.

To describe the Belgian co-operative movement in the space of a single letation movement in the space of a single letation movement in the space of a single letation whereast in the last election. The official count is given in each ward for the aldermanic candidates, and also in all the iterature published upon the towns, with the exception of Hyde the account of the socialist vote polled in movement in the space of a single letation movement in the space of a single letation movement in the space of a single letation in the case is an overgrown boy, who needs weeks in its midst, even if one has read the literature published upon the towns, with the exception of Hyde the official returns were confess at the beginning will be a difficult in the confess of the space of a single letation movement in the space of Yours in disgust.
One of Lorimer's Dogs.

And so my Republican friend and

county employe, you're kicking, ch? And what about? 'Because'the "boss' told you what HE wanted you to do? Who are you? What are you?

County employe, you say! Well, how comes it you have a job as a "tax-eater?" Got it yourself? No. The 'boss' got it for you in return for your vote, and the votes of many others like you. The boss of the "boss" is at Washington, looking out for the interests of the capitalists of this country; the class to which he belongs, and you well, you are according to your own confession-a collar-wearing dog. who has to come when he is whistled for. Boss No. 2 whistled--you have to drop your bone, (the theater tickets), and now you whine about it; but you'll answer the whistle just the same. If you can't bite, for heaven's sake stop whiming; it is the height of ingratitude. Besides, if Mr. John V. Farwell hears you, you may run the risk of being charged with "moral cowardice," in not signing your proper name.

See the "great boss?" He permits you to live. He furnishes yourself and wife with something to eat, clothes to put on your backs, and a home to sleep in, and now when you, who live by the grace of this boss, are needed to boom his constituent and candidate, you are ungrateful enough to snarl and whine, because you have to attend a meeting And are you silly enough to think that you will get any sympathy or help from the Tribune on such a piea?

Who feeds you? Who clothes you?" Who made it possible for you to have a wife? Who made it possible for you to keep this wife in food, clothing and shelter? And who still permits you the pleasure of going to the theater; not only yourself, but your wife also?

Yes, the Boss, my good friends Are you not proud of it? Surely you ought swell yourself, throw out your chest and look your neighbors straight in the face, so that they may know that you live, not because you are a man willing and able to produce all you want to keep you alive, but because you live by permission of another.

Bigger man than you? Stronger man than you?

Does he work harder than you?

No! He does nothing; absolutely nothing; and why should he? He don't have to. What are you for?What does You surely don't want him to work!

You complain you must "lose the price of the tickets."

Pshaw, that's nothing, my boy; nothing! Why don't you try to be a "free ing to the meeting? Go to the theater instead. True, you'll look for another job. You know the boss can say by discharging you. "That from this day yourselves. I say so." And unless you other common mongrel.

strikes them. Do you?

You seem to be able to bark, anyhow, can't you bite? Or has the boss drawn

man can tell you what to eat, what to wear, where to live and whether you have a wife, dictate the time when you can enjoy her company?

Remember you are still in luck. Thoumen, who have not as yet become "collar-wearing dogs," vote as you do, this spring and expect a large increase think as you do, and don't have a job in the vote. paying as good wages as yours, and tion is not large numerically, we are they and their wives never go to the informed by a Terre Haute conrade and their class produces unlimited conscious and fully aware of the sig-quantities of wealth, in fact all that is nificance of the movement. With a produced, and it is from this wealth neucleus like this the comrades of

Now, my boy, I want to ask you a plain question:

In the name of common sense, will you ever have the manhood and decency to vote for the overthrow of a system which actually makes you confess, that you are a "collar-wearing" dog, that must follow wherever led? While you consider yourself a dog, the boss will lead you where he wishes; but your manhood, if you have any left, will lead you to the ballot box with a

Dog Catcher.

THE VOTE IN DETAIL. Over 5,000 Chicago Workingmen Vote for Their Class Interests.

and in consequence the police report for total vote amounts to 5,152, which is almost double that of the highest heretofore cast, and the comrades and They are "Nothing venture, nothing

The haps explain our attitude as well as adays), and the more I thought, the volumes. The first is offered as an encouragement, the second as a warning. workers in the socialist cause are to be gain," and "Fools rush in where angels congratulated on the splendid success fear to tread." We will leave it to our of their efforts. The following is the readers to decide which is the more applicable to our present attempt. .

tempt anything in the way either of neighbor's potato patch, while he a history or a statistical description of reaped all the benefit. the co-operative movement. Either or both of these can be obtained from when the "overgrown boys" are invited works accessible to the average Eng- to attend the democratic or republican lish reading socialists and have already been given in the columns of The ers," "the backbone of the nation" and discontented union workingmen, and Workers' Call. But there are certain features which are of especial interest and that are seldom noticed in the and their welfare is of such immense poverty of the workers of one country general descriptions that are sent out. It is often objected by the socialists either side spend time and money and that the co-operative movement being use every "honest" effort to save the taken from the Chicago Record is cora piecemeal effort within the competitive system tends to divert the strength ing for the other fellows! of the workers and thus to prolong capitalism. It is also held that it tends to create a privileged class within the ranks of the laborers and thus to de- to which he belongs. stroy that class-consciousness upon

which the whole movement depends. Like so many other theoretical ques tions these never have been practical problems for the Belgian comrade, From the very start the co-operative movement has been organized and directed by the socialists who never themselves. looked upon it in any other light than as a temporary expedient to keep certain members of the working class in better condition until they could strike Hyde Park.'—
Supervisor—Knudson 684
Collector—Gorecki 715
Clerk—Depew 684 a final blow at capitalism, and indeed the main object was simply to increase falling. Hence the idea of any con-

ooked upon as a sort of "war-chest" for the socialist army and it is always that always go through without objection are those for propaganda purposes. If there is a strike anywhere nish the bread and the relief funds to be carried on it is from the treasury of the co-operative that the funds will generally come. And at every election the socialist campaign fund.

Some idea of the advantages secured we may be pardoned if reference is once more made to some of the somewhat "subsidiary" phases of co-operaclety of the best and cheapest kind, providing the best of medical attendance medical care that prescribes beefsteak when the patient is out of work and pensive prescriptions for starving chilessary food as well as medicine. time until he is again employed, al-

It is of course in the baking trade that they have had the most remarkable results. Here they have succeeded bread down at least 20 per cent, but at the same time they have raised the doubt that the working class of Belgium have the best bread in th world at the lowest prices. A lost of and their hirelings before the commis twice the weight of the loaf ordinarcan cities, is sold everywhere at 25 centimes (5 cents); while at the time we vere in Brussels the quarterly rebate tors, and it amounted to 3 centimes a loaf on all the bread purchased during means that there will soon be another eduction in the regular retail price at the co-operative stores, and hence a corresponding reduction in the private

nean that a large number of these lat-

the "Average Workman."

"Men" Will Secure This Wealth for Their Own Use.

more it dawned on me, that the statement contains a very profound although very unpleasant truth.

Boys, you know, are very active, especially "evergrown boys." I used to be an overgrown boy myself once and remember how I used to think it heaps In the first place we shall not at- of fun to help spade our next door

Of course just before the election meetings, they are called "honest tollcomplimented on belonging to the class "that produce all the wealth." etc., etc., importance, that the politicians on workers from being beguiled into vot-

But under normal conditions they are "overgrown boys" who need "directors," such as Mr. Board and the class

Now it is perfectly true, that boys need somebody to direct them, until they are able to manage themselves; but it strikes me as though it is about time for the American workmen to realize, that they have outgrown their

Wonder how it strikes the average union man, to whom the term was especially directed?

These same "overgrown boys" have dug the wealth out of our mines, they have built the railroads, shops the force of that blow and hasten its factories, they have invented all machinery, they have built all our houses. flict or "side-tracking" has never risen. skyscrapers and warehouses, they have Ladeed the co-operative is always made our clothing, shoes and furniture -in fact, these same boys have pro duced all our wealth-a wonderful remarked that the only appropriations achievement for a lot of "overgrown boys," but nevertheless a fact.

But it is also a fact, that all this time they have had "directors," who not only have directed the work, but also managed to "direct" the wealth, so that only a small portion of it was left for the boys, for as a rule a laboring man secures, out of the wealth which he produces, simply sufficient to enable him to live and propagate other "boys," who in turn are to be directed by other

What I want to know is this: will the average workingmen-union men class, or will they "turn loose" and prove that they are indeed men, who no

If they only would "turn loose" by using the ballot to capture the political power and enact laws in their own in terest, they could do "a great deal of harm"-to the capitalist class. They could in fact abolish the capitalist sys tem altogether and keep the wealth produced for themselves.

Too long have the producing clasacted as I did, while a boy-worked hard spading potatoes for glory, and fun. It is time to wake up to the that all the wealth produced not only should belong to those who produce it, but also that THE POWER TO MAKE IT STAY THERE cests with the workers, if they only will use the ballot intelligently.

Let us learn a lesson from the capitalist class. They are "class-conscious. They belong to the possessing class and KNOW It, and use their knowledge in their own interest. Witness the unanimons testimony of the capitalists sion, summed up in Mr. Board's furthe statement, that "IN ORDER THAT THERE MAY BE PEACE IN ALL LINES OF TRADE THE UNIONS MUST BE ABOLISHED."

the peace, where "I can tell the man what I can pay him" and the utter helplessness of the laborer to protest sclous, and show it by voting them

means of production and distribution, and consequently, all the wealth pro duced , less the amount it takes to keep the workers alive, through con trol of the political power, legislative, executive and judicial, and the Repub lican and Democratic parties are mere-iy tools used to keep the capitalist class

The working people could change all this if instead of being a lot of "overgrown boys" they would act as men vote with the party that represents their interest, gain political power and then pass laws declaring all the means of production and distribution to be long in common to all the people-in other words, to inaugurate the Cooperative Commonwealth, where each man would receive the full social value of what he produced and where there would be no "capitalists" to "direct" the surplus wealth into their own pock

Then indeed will peace come; not the peace of abject helplessness, such as our capitalist friend wants, but the peace of plenty and justice.

If the laborers of Chicago and America are MEN, they will vote the social ist ticket, if they still are nothing but 'overgrown boys" they will vote to continue the old system, and must expect to be treated as "boys" until they show themselves to be men.

TO WAKE THE UNION MEN. Capitalists Say Imported Cheap Labo "Will Cause "Some People to Open Their Eyes."

The ruling classes in this city are about to spring a new surprise upon the incidentally emphasize the beauties of can be used as a club to compel the surrender of others. If the following,

ect, it will be interesting to see what measures the unions will be able to take in order to counteract its effect: It is said that the steamship com-It is said that the steamship com-panies have sent copies of Chicago wage rate cards, which were posted in the street cars and elevated trains, to all parts of Europe where their vessels touch, and have caused them to be dis-played where mechanics live. W. S. Behel said yesterday.

"The arrival of the next three or four steamers will cause some people to

steamers will cause some people to open their eyes," and another contract-

"Yes, and the men who come cannot be turned back if they have \$5 in their pockets."

There is good business in all this for he transportation companies. The captalist clases will search every nook and corner of the earth for cheap labor, and if this latest move upon their part will only justify the triumphant remark of Mr. Behel, that "some people will have cause to open their eyes" over this matter, it will be a lesson in social ism to the union workingmen that will pear good results in the future. The 'men can't be turned back if they have \$5 in their pocket. Union men may rest assured that they can't be turned back even if they had only five cents their pocket. When capitalism is on the hunt for cheap labor a little thing like that won't be allowed to stand in the way of their securing it. The immigration laws are not made in the interest of the working class but in that of their masters and the enforcement of such laws is also in the hands of the latter. It is theirs to loose and to bind. to receive or reject as their interests dictate, and they are now about to give proof of the results of folly at the bal-

The " people,' that vague and abstract quantity which the ridiculous Municipal Voters' League claim to represent, seemed to have been fooled again. Said "people," according to self-constituted mouthpiece. wanted a "non-partizan organization of the council" but now that the elections are over and the Republicans firmly in the saddle, it seems they won't get it after all. The Republicans, who like their opponents, are not in politics for their health, refused to allow the vanquished to co-operate in making up the new Council Committee. Consequently the cause of municipal reform has re ceived a most serious blow" 'people have been betrayed" if the Republicans persist in their present attitude. . One consolation, however, remains. There is now a Republican "gang" to be inveighed against, which will give the Municipal Voters' League an excuse for continued existence, and the opportunity of dealing out chunks of cheap advice for the guidance of the "people" at the next election.

The published accounts of the evidence taken before the Industrial Commission was more noteworthy for what was suppressed than for what was pubcretary Thompson of the Certainly. the odium which they have managed to

heap upon socialism by deliberately and

falsely linking it with evil names, rep-

resenting chaos, anarchy, bloodshed

The Iroqueis Club of Chicago held a neeting last week, when a discussion on the best definition of "Democracy" The choice of a name under which the took place. Various members gave exunited and class-conscious workingpression to their definition of the word and its meaning, but as no two were nen of this country are to appear in alike, each member persisted that the "people" would not accept the definithe political field for the struggle with the unholders of the present economic ion given by the other fellow. Yet system, will occupy the attention of the these people are all good "Democrats." It would not be difficult to find a comnembers of the amalgamating bodies mon definition which would distinguish for such time until the matter is setsuch "democracy." Call it "capitalism" tled permanently by a referendum vote. and let it go at that. While the mere name itself may not be

Now that the elections are over we taken in the matter of strikes and lathe votes of the workers have delivered the control of the police. The attack on the Building Trades' Council will be pushed with redoubled vigor, and we would advise union workingmen to keep an eye on those in their ranks fore the "wise" politicians look for a who would counsel them to commit economic suicide by surrendering theh cohesive power, the Building Trades falling fortunes of the small middle Council. Even if the fight be lost, it is slass. better lose like men than allow division at the behest of the bosses.

Some time ago we called the attention n the capitalist press, that Honore Palmer went to work as messenger press at the time made much ado about this occurrence, we commented upon it point of view.

The whole business has, as we predicted, turned out to be assham. After twelve weeks the young man in guestion has quit his job and gone to the Berkshire hills in Massachusetts to resuperate his exhausted frame after the arduous toll of three months. When he s thoroughly rested he will proceed to Europe and take in the sights of the Paris exposition. This occurrence would furnish a splendid text for John V. Farwell, or some other canting labor skinner of the same type, to expatiate upon the "reward of industry" which this industrious bank employe carned by strict attention to "business" for twelve long and weary weeks.

A resident of Chicago has framed bill, which he hopes to have made law, providing that every man who has a vote and does not cast it shall be fined two dollars for such ommission. This. it is expected will bring the "good citizen" to time, that same "good citizen" whom the capitalist press, during the ew days preceding an election, constantly urge to do his duty at the polls. But the framer of this bill will find himself disappointed in his expectations of it ever becoming law. He does not know that capitalist class rule has now arrived at that point when an opposite course, the restriction of the franchise seems more necessary. There now exsts a rapidly growing number of voters. whom our economic rulers would gladly see exhibit the same indifference, as to oting, that they now lament in the good citizen." The growth of the so rialist vote, which is not unnoticed by he capitalist class, will forever destroy any hope that such a bill as this may become law. Its framer may have overlooked this, but it is safe to assert that those upon whom he depends for its passage are not so unobservant.

Last week a workingman who had been engaged by the month, sued his performed, relying upon the legal eighthour day bill which has been passed in this state: He was promptly nonexploitation, without redress, for any number of hours which his employer saw fit to work him. Quite correct; are not elected to serve the interest of the working class, so when the eighthour law comes into court, it is promptwhich in turn will express itself in an leaders call "laws enacted for the benincreased socialist vote. Those who efit of the working classes." Get more understand the importance and signifi- laws enacted? Why certainly, my hard working friend. You can have bushels of 'em. Get them enforced? on the part of the working class at that's another matter, which you will

But it is not the eight-hour law alone interests are concerned. Every otherlaw passed estensibly in the interest of door is overlooked, for the interests of lar cases. Here is a law which was most probably begged as a favor by a rag to their name. The blessings alleged labor leaders in Ohio, and no the efforts of a comparatively small doubt was considered a great victory it received legal approval. note how it fared when it went up in the shape of clothes. against the real thing:

Toledo, O., April 6.—Judge Pugsley, n the Common Pleas court today, de-clared that provision in the Ohio statutes unconstitutional which prohibits an employer from discharging a work-man because the employe is a member of a labor union

Unconstitutional! Of course, Knocked out in the first round! Let it be understood that the employer has the "inalienable right" of discharging an employe for any reason or no reason. The former holds as individual property the means of production by which the latter alone can live. The "commodity." called "workingman," is certainly getting many valuable lessons on that etorious institution, "freedom of contract."

The "wisdom" of the democratic capitalist politicians promises to put a stopper on the aspirations of Admiret

Dewey for the presidential nomination. And only a few months ago these same centry were filling the public press with assertions that Dewey was a Democrat. The following extract from the daily press, shows how the Admiral has de-

preciated in political value: Said another wise old democratic polk itician: "If Dewey had intimated that itician: "If Dewey had intimaged that he would accept a nomination as a presidential candidate when he first arrived at New York it would have been an easy thing to put him at the top of the demecratic ticket, but now, merciful heavens, he couldn't get a nomination from the Socialist Labor party—Curtis, in Chicago Record.

A few months ago when the Admiral was at the height of his popularity, will be able to see what course will be when the nation was in the throes of Deweymania, this "wise' politician adbor troubles, by those into whose hands mits that it would have been easy to to the ordinary citizen. They pass on place the hero at the head of the democratic ticket for president. Now, however, when the fit of hero-worship has passed, it is conceded that Dewey has lost his power as a vote catcher, theremore attractive balt to gull the workers into attempting to bolster up the

Regarding the assertion that Dewey ould not "secure a nomination from the Socialist Labor party," it must be of our readers to a statement published admitted that such is the case. And if like the partisan boodlers, know the this politician deserves in any sense the epithet of "wise," he must know bank at \$6 per week. As the capitalist that even when the Democratic party would have been overjoyed at the chance of nominating Dewey as their in these columns from the socialist candidate, when thousands of knaves and millions of idiots were making night hideous with their laudators howlings over this unsophisticated seaman, when 'wise" politicians were attempting to sound the Admiral as to his political leanings in order to use him if possible as a lure to draw the votes of the unthinking, the attitude of the Socialist Labor party towards Dewey was then precisely as it is today, an attitude of absolute indifference. Dewey as an individual, Dewey as a politician comes not within the range of socialist activity. When the socialists imitate wire-pullers, by seeking out gaudy and meaningless attractions as bait votes, 'then the taunt of this "wise" Democrat will have some basjs. Dewey was a democratic possibility-and in not now, and this admission places its maker somewhat in the position of the fox who lost his tail. Socialists don't want, and never did want, Dewey. With the Democrats it is different.

> A few weeks ago 500 of the fortunate inhabitants of Porto Rico, exhibited their appreciation of the blessings of American capitalist civilization which had been thrust upon them, by parading the streets of San Juan bearing a banner upon which was inscribed:

WE WORKINGMEN DEMAND FIVE CENTS AN HOUR."

The report continues thus:

"The present rate of pay is three cents an hour, and the men complain that they are compelled to work from sun-rise to sunset for 30 cents."

"Compelled?" Why certainly not, They need not work unless they wish. They have "freedom of contract." They are "free men" with the free man's privilege of starving, if the terms of the boss are not acceptable. And no doubt the bosses in San Juan following the example of the "civilized" bosses in America, were loud in their denuncia tions of the unreasonable attitude and exorbitant demands of the men who were actually unsatisfied with three cents an hour, and had the audacity to ask for five.

And now comes. Correspondent Creelman writing from San Juan, date March 21st, and he completes the picture as follows:

"It is almost incredible, but, from one district comes a message that more than 1,000 women in that neighborhood can not leave their huts because they have no clothes. The same reports com no clothes. from other districts. There are proba-bly 30,000naked women in the mountain

usands of children cannot attend school because the teachers refuse t-receive them stark naked, as they pre-bent themselves. These are not sava ges, but gentle, loyal, civilized people.

Sheldon wants corn sent to India to feed the starving millions of that land. The woes of the Transvaal burghers will yet draw immense crowds of "sympathizers" who with their money will that becomes a farce when capitalist help a lost cause. But the festering mass of poverty and shame at our own "labor" becomes null and vold in simi- capitalists and capitalism must be subserved, if the Porto Ricans never have which were to descend upon Porto Ricans from their connection with this for the organized workingmen, when land, may have arrived all right, but But just it is certain that they didn't materialize

In the meantime schemes of capitalist exploitation, expressed in Porto Rico Tariff Bills, are being concocted -at Capitalism having divested its victims of their clothing can now proceed to take ther hide with less difficulty. We don't need a special correspondent to inform us that the Ports Ricana are not savages. The savages can be found amongst those who consciously or unconsciously uphold the economic system through which these things are possible.

It is lonesome being the only socialist at your shop or in your block. If you want company spend a dollar for ten three months subscriptions to The Workers' Call and you will soon find that everybody is talking socialism.

Are you still hustling for subscribers?

MUNICIPAL REFORM.

Workingman's View of the Annua Appeal for an "Honest" Council.

So much of error here
So much of doubt and fear,
Like mists becloud our light;
So much of fallacy, So much of sophistry, We cannot see aright.

—J. A. Edgerson.

Before the winter's ice began to melt way the citizens of Chicago were again besieged by our self-appointed "Municipal Guards? pleading the cause of a business administration, an honest city council. They appeal to the citizen to lay aside his party fealty, and let patriotism guide his action. They furnish the voter with information inaccessible the merits and demerits of every aspirant for office: they sort and label them, placing them in the "reform" or "gang" element, or place them on the "doubtful" list. The voter is advised to reward the civic virtue of one alderman and relegate into political oblivion the other.

The workingmen are especially appealed to to follow the example set by our "better classes" and free themselves from their political bosses. (How about their economic masters, good reformer?) The non-partisan reformers, value of the labor vote, and the danger to their capitalist class interests, should the workers make an intelligent use of it, so they try to play their best card, "patriotlsm." It worked wonders in the past, as a soothing syrup for social unrest.

That the wage workers have it in their power to accomplish municipal reform, real, not ficticious, is an admitted fact. For in spite of our tendency to outgrow our (childish notions) govenrment, as yet, exists by the consent of the governed. The wage workers are a majority of the nation, and an overwhelming majority of every large city. The power of the workingmen to withold the necessary consent, places on them the responsibility of our government. Let us see then what is the the action of the capitalist political duty of the werkingmen in the coming municipal election.

It is a truism fast gaining recognition that a political party, whether it be under a limited monarchy or a republic, is based on, and takes its birth certificate, from the material interest of a portion or a class of society, and these interests find expression in the party declaration or platform, and are made the issues of their campaign; for the control of government means that their interests will be best advanced and protected. Protection vs. free trade, is but a different form of expressing manufacturers vs. importers; gold vs. silver, means bondholding large capitalist vs. indebted farmers or middle man. The wage workers, stripped of all property, forced to ask permission of the owners of the means of production and distribution for a chance to apply their labor power to the natural resources to main tain life, and robbed thereby of the lion's share of their product, have no interest in these issues. Yet they are appealed to, to help "save the country," to bring "prosperity" to the nation. when in fact they are but helping one or the other portion of the master class in getting a bigger share of the wealth of which they are robbed. The true interest of the workingman is to put an end of the system that robs him of the lion's share of his product, by assum ing ownership of the means of production and distribution, which under a system of collective production must be collectively owned.

We see then that the law of self-pres ervation dictates to the worker to organize with the others of his class, into a political party independent of all oth-

munities so that our trade may follow, respond to.

our universities and churches and build us museums and observatories. Do tell us, if you know, what truth there is in this rumor. Indeed, it is questionable whether our private business affairs are more honestly conducted than our pub lic affairs. I'll admit it is sometimes more economical, to the owner. government is but a reflex of the dom inating business principles. Rob or be robbed-"do others or others will do you," is the golden rule of our competitive capitalist system. Is there perhaps a political alchemy that can con- vote in 1898.

vert our dishonest social conduct into onest municipal government?

He not disheartened good reform riends, political corruption will give way to honest administration, but it will be the work of those whose historic mission is to abolish dishonesty in our economic life. The intelligent classconscous worker, will, not through a non-partisan polity, but through a partizan socialist ballot accomplish this grand mission.

LETTER BOX.

Wants the Name "Socialist Party." Editor Workers' Call:

Editor Workers' Cali:

To lessen ridicule and guying by such enemies of socialism as the 'New York Mail and Express, who informs its readers that there is a Social DEMOCRAT. It's party and put an end to this 'Socialist party,' and put an end to this port of ridicule. What do you say comrades? Are we not all of us opposed to the principles of the two old parties? Why then adorn our party name with such an unsavory word as "Democrat." or any other such name as might turn away from us many people who cannot overcome their haired and repugnance of a political name, and will not affiliate with a movement that bears it no matter how good its purpose or meaning? Let us adopt the plain name of 'Socialist party,' if for nothing else but convenience and ease of speech. Fraternally, etc.

E. P. Hassinger.

Brookhead, Wis., April 2, 1900.

Gives Reasons for Adopting the Name "Social Democratic."

To the Editor of The Workers' Call:

Two names are to be submitted for a referendum vote. The question then arises which is the more appropriate of the two; the Social Democratic party or the United Socialist party. In arguing for the former will say that the name is now extensively known throughout the country on account of our vigorous agitation, our successes in Masachusetts, our tolerant spirit and our friendliness toward the trade union movement. Many thousands of workingmen have learned to know the S. D. P. as the friend of the working class. Further that name is dear to 5,000 comrades in the united movement, who, if To the Editor of The Workers' Call: P. as the friend of the working class. Further that name is dear to 5,000 comrades in the united movement who, if deprived of it, may to a degree lose their enthusiasm and refrain from doing their best for the cause. In addition the name Social Democratic exemplifies exactly what the socialists are striving for, and plainly demonstrates that our ultimate aim is a Social Democracy. Therefore if anname is to be chosen according to what it defines, no better one than Social Democratic party can be found if you hunt through all the dictionaries in the land. On the other Mand we have the name United Socialist party. What does it represent? A united socialist movement? Oh no! for there are the De Leonites, the Jones non-partisan, the Socialist party of Oklahoma, the municipal socialists, the Christian socialists and many other kinds and creeds who are not with us and have their own hobbies about ushering in the co-operative commonwealth. Therefore the name would be erroneous as long as all men and women who believe in socialism are not in one organization. Further won't we look pretty being abbreviated as the U. S. party. People will think we are an adjunct to Uncle Sam or some other old uncle and a lot of explanation will have to be done to satisfy the inquisitive. Now, comrades the question narrows itself, down to these two names which have been submitted; one is a recognized factor with a history, the other is erroneous in the first place, and secondly is entirely unknown and must begin to build up a reputation. Also secondly is entirely unknown and must begin to build up a reputation. Also two names having been submitted, no one can say you were forced to accept, but of your own free will you decided to adopt the best one which I am convinced is the S. D. P. Furthermore if that name is adopted I am confident the union will be cemented closer and better than if the other one prevails and our union will be as perfect and harmonious as can possibly be expected. Therefore it is to be hoped that all comrades will look at this question of name econdly is entirely unknown and must rades will look at this question of name from the broadest possible view and vote for the S. D. P. so as to accomplish greatest good for the socialist movement. Wm. Butscher.

-Brooklyn, N. Y.

Capitalist Trickery.

ers, and based upon their class interests, which should find expression in a demand for collective ownership of all the means of production and distribution.

"But this is rank materialism, extreme selfishness, void of all patriotic treme selfishness t treme selfishness, void of all 'patriotic and son and one other voter, the only sentiment,'" says our reformer and good-government patriot. Perhaps it is, but let us see. To send our missionaries and our bibles, our civilization, and our whisky, our soldiers and our flag, into the territories of weaker communities so that our trade may follow munities so that our trade may follow the second to No such which we had failed to the above address, which we had failed to the above address, which we had failed to the above address, which we had failed to the above address. No such patriotic war remunities so that our trade may follow, is this not rank materialism, selfishness, yet you good citizen approve of it, and denounce all who can't see the beauty of it as traitors. To exploit the helpless child, the unprotected woman: to rob the laborer of his product and deprive him of the right of a family life; is this patriotic? Yet you, have no objection to it, you patriotic reformers. But to free labor from bondage, giving the worker economic as well as political liberty, this is unpatriotic.

"Well," say the reformers, "this is all well as far as national politics are con-No such notice was re-"Well," say the reformers, "this is all well as far as national politics are concerned, but in our municipal affairs there is no need of class division; let us elect responsible honest business men, and our municipal probims are solved." But be kind dear reformer, and tell us, who is responsible for our municipal corruption? have the workers or the corner store butchers and grocers bribed our alderman, have they any interest in corruption? Some have traced-it to our better classes, to the successful business men, who donate to our universities and churches and build by which are now busy devising ways and means are now ousy devising ways and means by which under cover of the law (crooked) they can deprive suspected voters of their legal rights. It is suffi-ciently evident that the challenging in this case was done with deliberate in-tent to defraud and prevent suspected undesirable voters from casting their hallots.

Yours fraternally, Jacob Kuffenkam.

The Social Democratic Party in Milwankee at the last election polled 2,500 votes out of a total vote of 50,251, a gain of 1,000 votes over the average

The Name Question.

Argument Before the Unity Conference by Com. G. B Benham

parties are to vote, along with other questions, upon that of name, choosing between "Social Democratic party" and 'United Socialist party," it is deemed proper to present here the argument made upon this point by Comrade Ben ham in the Unity Conference. He said in effect:

The question of the name to be adopted in case of a union of the S. L. P. and the S. D. P. is a most important consideration.

In some of the Social Democratic party papers of the issues succeeding the Indianapolis convention, statements have been made indicating that the S. D. P. convention had taken in the S. L. P., and that all important affairs were settled as to name, etc.

Of course, if this were so, no discussion of the name would be in place here, because everything would have been settled within the Social Democratic party.

But, on the contrary, the appointment of a committee of nine of the S. D. P. convention, who are not bound to the name Social Democratic shows that that "assimilation" did not, in fact, take place.

It has been left for us to arrange a hasis that will, in our judgment, not only be satisfactory to this committee and the conventions, but a basis that can and will be freely and conscientiously endorsed by the referendum votes of both parties.

To gain these ends, it is necessary that all propositions that go forth as the sense of this committee be so stated d'Alenes. that criticism may be myited from either members or opponents of the socialist movement; the propositions must be such that arguments against them can be easily refuted; and they must endure every test as to appropriateness and legality that can be brought to bear upon them.

The legality of the name, before the laws of the various states, must be as fully assured as is its propriety in use, and its representation of the principles of the united organizations.

should not be governed by the tions handed down to us from the past. Our only duty is to seek the truth, and to be governed by facts.

It is upon the question of name alone that I now desire to address you, and that whatever the methods of this committee's work, and whatever the result submitted to the referendum, it may be done with a full view of the facts in connection with the subject of the name, and that names here considered may be looked upon solely from the in the United States. standpoint of honorable and legal This, as well as t

The name "Social Democratic" (taking the words separately, or the name as a whole), if analyzed has nothing in it indicating to the ordinary mind anything regarding socialsm.

"Social," according to Webster, has various meanings, none of which carry ideas of economic beliefs of any kind. On the contrary, its meaning is purely of immediate friendly relationship under any circumstances, carrying no thought or desire for change or advance. "Social" relations may exist in restraint or in freedom, in the open fields or among the inmates of a prison, in capitalism or in socialism. It is indefinite. It carries no strong and distinctive idea to the human mind. Its vagueness is best illustrated by its common usage and those words which are synonymous with it.

'social interests,' 'social pleasures,' 'so-cial duties;' disposed to mix in friendly 1877 and of 1884 knew that the laws union or mutual converse." As synonymous it gives: "Sociable, companionable, friendly, familiar, convivial,

The ordinary use of the word "social" today brings only these dictionary meanings into operation.

The "social" clubs, church "socials." "social" dances (gatherings of any kind, having no aim but friendly interdances (gatherings of any course) are all based on and bear out the dictionary definition and disavow any connection with a progressive desire, or of economic emancipation for the working class. This emancipation is the only end for, which we strike when we proplaim ourselves socialists, and unite to advance the program of socialism. In every city we find that "social" reform, "social" settlements, etc., have become titles synonymous with charity schemes and bourgeois reading clubs and middle class ladies

associations. Socialism has nothing in this sense gain from using the word "social." These also carry out the reactionary ideas of the Democratic party, except in a more petty manner.

Our name should bear in its wording something of the intent or desire of our movement. To place the first word before the public as a in our name mere mark without economic or politthe organizations a wrong.

Again, we do not desire to gain votes by misrepresentation, which is what e should do, if we take the name "democratic" in the United States. We are not an adjunct of the Democratic party of the United States, and we hould not adopt the name or make it a part of the name of the Socialist political party of America.

On Lorimer street, in Breeklyn, may

As the members of the two socialist be seen a great signt "Social Demo-arties are to vote, along with other cratic Club." On investigation it will be found to be a place of merrymaking carried on by the members of the Bour-Democratic organizations. members of this club have no concep-tion of the term "social" otherwise than in its ordinary meaning, and no interpretation of "democratic" except

as a means to gain office and its spoils. word "democratic" indicates simply government by the people . The people in this country elect the lawnakers, and, thus do-govern themselves politically. The execution of the laws s put into the hands of men of their own selection. In no sense does the word "democratic" carry to the ordinary mind anything but the aims and desires of the Democratic party, recognized by us as the upholder of reacflonary theories and undestrable legislation, in so far as it affects the working class.

Not only are the two words "Social" ind "Democratic" meaningless from the standpoint of socialist intent, but the first carries with it, under present conditions, a mere idea of festivities. there was a desire for harmony, and The word "Democratic" has all the sins of many decades heaped upon it as the name and symbol of the political party of Croaker, Cleveland and Steunenberg. Cleveland made his name infamous by throwing U. S. troops into Chicago in opposition to the law and the desires of the then governor during the Pullman strike. notorious for his calling for United Pen' and a reign of terror in the Couer

> If we go before the voters with the tive part of our name, we encounter the prejudices of those who have in the past been Republicans and who naturally dislike the Democratic name; of those who have been Democrats, but have left that party in complete disgust; and of those who have never belonged to either old party, but who know the odious record of the Demooratic party.

The words "democratic" and "republican" have orginally exactly the same "hellefs" of individuals or by supersti- meaning. Today they have both lost the original meaning and have become firmly associated in the people's minds with the records of two capitalist par-

> The fact that the political organiza tion in Germany, representing the principles which both the Social Democratic party and the Socialist Labor party in America upheld is called the "Sozialdemokratische Partel" has been used as an-argument in favor of this name

> This, as well as the reasons given above, were all discussed at the first political convention held under socialist auspices in the United States, at Newark, N. J., in 1877. And the result was, that, although the convention was almost exclusively made up of German socialists who had fought and suffered under the flag of the Social Democratic party in Germany, the reasons advanced above and others of a still graver character caused the defeat of the name "Social Democratic party."

In 1884, at Cincinnati, O., was held another convention of the socialists under the name of the Socialistic Labor party. Here again almost the entire representation was made up of Germans, the name "Social Democratic party" was again put to one side. though presented and vigorously advocated in the desire of a common name for all the socialist movements The dictionary defines the word as throughout the world, and though apmeaning "pertaining to society; re- peals were made to the love of the lating to man living in society, or to name that had won endearing fame the public as an aggregate body; as and lasting prestige in the fatherland.

converse, companionable; consisting in of Germany were different from those of this country. They knew that the word "Democratic" carried with it the demand for suffrage, a demand which even now it not merely as fully satisfied in Germany as in the United name "Social Democratic' was taken in Germany it was not only in an attempt to socialize the means of production, but was also a demand for the political means by which the change could be accomplished. Lasalle particularly urged the need of suffrage. Hence "democratic" was proper and necessary in Germany at that time while wholly useless here and now, with the political power in the hands of the people.

is it, that at the time of the taking of this name in Germany there was certhe German socialists would have been brought in direct and open conflict over the wording of the name. taken the name "Social Liberal Party" in Germany they would have been only working along the same lines of seeking legal difficulties that we shall now seek if we take the name of "Social Democratic party" here. further, that this name in Germany represents something altogether different from the meaning it now has, when translated and transplanted. In fact ical significance, is to knowingly to do it has lost its strength in this process. No German will translate "sozial" as "social," and insist that they mean the same thing. The German word has in it a revolutionary and progressive inThe anniversary of the Commune was
tent, while in English "social" is an not only celebrated in Paris and in entirely meaningless word in any such many French towns, but also in Bel-

> lished in every state in the union. It the men who fell as soldiers on the field will dispute the right of any party to of battle; they did not die in vain, and dies. D'Annunaio, who is said to be use "democratio" either as the whole but fer them the reactionary Assembly "fattered by men and worshipped by

or as a part of its name. In Massachuetts this has already been successfully done, and the name turned around to "Democratic Social party." But, say the ardent supporters of the name, Social Democratic, did not the gold pallot for being contested by the regular Democratic party?

Yes, it did. The gold democracy got a place on the ballot because when contested its members were put upon the witness stand and testified that they were a part of the Democratic party. still upholding its principles except upon the money- question. When the Social Democratic name is contested, before capitalist judges, can il get a place on the ticket upon such evidence or upon any evidence?

The prospect that presents itself to us, if we take the name "Social Democratic party." is that we will take up a name, to begin with, that is meaningless for a socialist party; a name that clouded with the disgrace of the old Democratic party; and, last and overshadowing all, its adoption will involve the party into endless litigation, forcing upon us an immense and useless expenditure of energy, and a constant Irain upon our finances. This condition of affairs, brought upon the party with a full knowledge of these facts, would be a decided and unpardonable error in party procedure and method, involving wasted time, wasted energy, vasted funds and an ultimate change of name for the national party, for the suits in the various states would probably bring different decisions, necessitating the taking of temporary and temporizing names in the various local-

For instance, in Massachusetts, the only place where a state ticket was put in the field by the Social Democratic States troops to inaugurate the "Bull party, it was obliged to change to Democratic Social party." The result of the considerations of these or some of these arguments, has already been word "Democratic" as the substan- manifested in the taking of names other than "Social Democratic" by many of the newer state and local organizations not affiliated with the S. L.P.

In Maine, the name taken was simply "Socialist party;" so it was in Cleveland and Cincinnati, O., and in Oklahoma territory. In several states we have kept the name of "Socialist Labor party," even after legal conflicts with the De Leonites; in others we have lost it; in some it is undivided.

In the light of these facts, here advanced in the spirit of true unity, I ask all here present to lay aside all sentimentality, all past or prospective triumphs under this name, taking only into consideration the facts regarding the name; and to apply the facts to the est interests of the united socialists of the United States of America.

If we label this grand movement with a meaningless name; if, in addition, we thoroughly organize the trade, saddle upon it the taints of the democracy; and again in addition, if we involve the movement in the meshes of the law, disheartening, discouraging. and impoverishing the comrades, we will be greatly in error. All comrades now depend upon us to give them the best basis, both in organization and in name, upon which to carry on our battle with the capitalist class. If we fail he will support Debs for president. in our mission, the membership will hold us responsible. The truth harms no one. Let the statements here be disproven or let the name be presented as it is., with the facts concerning it, to the membership.

The word "Social To recapitulate: meaningless in the socialist propaganda, as an emblem; symbol, or indication of our work, our intention, or ur political movement. The word it had as its original only the politica! signification; this has been carried on until today; to take this word, means to take upon our shoulders the sins of the Democratic party, or by using that 10 cents per week per member for the name to mislead a few ignorant people into voting our ticket.

The name "Social Democratic" has been repeatedly rejected by national socialist conventions in the United States, and recently by state and local against the Tobacco Trust, on which it socialist organizations. The name "Social Democratic" will involve any party bearing it in endless litigation in both local and state courts.

In the view of the meaningless wording of the name; of the political significance fastened upon the name Democratic; of the sureness of legal complications, is it the part of intelligence of expediency, or of principle to adopt or ecommend the name of "Social Demo cratic party" for the united socialist

Puttee, who has just beer elected to the Canadian Parliament by a labor-socialist combine in the Winni peg district, regrets that he does no live in the United States, so that h might vote for Debs and Harriman In an article addressed "to the tellers of the United States," Mr. Puttee says among other things: "Your dawn o triumphaut deliverance from industrial bondage has broken; strain nerve, every faculty to attain the vic tory measurably within your grast before the shades of eventide envelope your domain on the next presidentia election day. The opportunity is yours and your co-workers in other expect that levery man will that day do his duty." -- Cleveland Citizen.

A very elaborate official report bring-

ng British trade union statistics down to the beginning of 1899 has recently been published, and presents much tha is of value to those interested in the international labor movement. In the seven years from 1892 to 1899 18 per cent of the total expenditures of Britsh trade unions was devoted to running expenses. The figures are based on re ports from the 100 principal unions, con alning 1.043.476 members, or 63 per cent of the total membership of all the un ons. In that \$53,636,820 was spent by the 100 unions. In addition to the 18 per cent expended for running expenses, 23 per cent was expended for strike beneits and 39 for friendly benefits-unemployment, sickness and accident, funeral, etc. During the year 1898 the number of separate unions increased by forty, but the membership increased by per cent, a slower increase than in 1897. The report is compiled by the British Board of Trade,-Indianapolis Press.

Of course Frick and Carnegie kissed and made up. It would never do to let the world know how those fortunes were made. That would spoil all the editorials about the "just reward of ability," and the sermons on "industry, integrity and intelligence," that have been fed to the public anent Carnegie, Rockefeller, et al. We take it that much time will elapse before one of the great trust magnates will allow the practices of his class to be ventilated in court. Those people fear the righteous wrath of the public too greatly to ever permit of the light shining apon their transactions. Though de prived of an actual exhibition of the methods of modern capitalism, it need not be forgotten that it is possible fo a capital of \$20,000,000 to earn \$40,000,000 'honest," court-protected, pulpit-eulogized "profit" in one year. Nor is the public compelled to overlook the fact that a \$160,000,000 corporation can rise in a few years from nothing. And it can still ponder on the number of people who were robbed and murdered to give this handful of men so much wealth.-Typographical Journal.

A splendid musical program is provided and refreshments will be served. An address by Miss Jane Addams and a debate between John Collins and Wm. E. Kellet, will provide the instructive part of the evening's entertainment.

GUARD THE BALLOT.

Both Capitalist Parties See a Menace in the Voting Power of the Proletariat.

There is a current saying the words o not come readily to mind, that when gues quarrel interesting disclosures ensue, to the edification of the public. It is equally true that when two regues who have long quarreled begin to patch up their differences a careful consideration of their motives will be instructve. The following editorial is taken from a recent issue of the Savannah

At last the Republican party has come to the conclusion that there are people living under the American flag who are not qualified for the ballot in the bill providing a government for Hawaii, pending in the senate, the ballot is denied to all of the people in those islands except those who have certain property and educational qualifications. The percentage of those who will have

property and educational qualifications. The percentage of those who will have the right to vote, if this bill becomes a law, is small.

While there is nothing in the bill which refers in the remotest way to the negroes of the South, there are reasons for thinking that it has a very important bearing upon their political future. They were given the ballot because the Republican party thought that it would be able to control the Southern states through them. It has falled to do so. The South is solidly democratic, and is likely to remain so as long as the negro has the ballot.

The Republican party therefore does

has the ballot.

The Republican party therefore does not care as much for the negro from the standpoint of politics as it once did. That this is true is evident from the fact that it has taken no steps, in response to appears from the fact that it has taken no steps, in response to appears from the fact. se to appeals from the negro, to the amendment to the constitution Lousiana disfranchising ignorant

have the amendment to the constitution of Lousiana disfranchising ignorant voters, set aside as being unconstitutional. A similar amendment will be adopted in North Carolina, and in all probability, in next August. Mississippi and South Carolina have practically disfranchised ignorant negro voters. The Republican party has said nothing against these efforts to get rid of the class of voters aimed at in the constitutional amendments adopted in the foregoing states.

And it is probable that it would take no steps in behalf of the negro if, in all of the other Southern states, ignorant negroes should be disfranchised. It is difficult to see how it could consistently do so in the fact of the declaration it virtually makes in the bill for the admissions of. Hawaii. If the natives in those islands are not fit to have the hallot the ignorant portion of the negro population of this country is not fit to have it. If the Republican party intended to raise the question of the right of the Southern states to disfranchise ignorant negro voters it would hardly have taken the position it has relative to the ignorant portion of the population of the Hawaiian islands. By denying the ballot to ignorant people of these islands it practically says that in

tion of the Hawaiian islands. By denying the ballot to ignorant people of
those islands it practically says that in
order to have good government the control of the ballot box must be kept. In
the hands of the most intelligent portion of the people.

On this question of the ballot the Republican party has changed its attitude
since the days of reconstruction. Then
it was willing, and even anxious, that the
most ignorant part of the population
of the South should have absolute control of public affairs. No doubt the
changed attitude of the Republican
party on the question of the importance
of keeping ignorance away from the
ballot box will be the subject of an interesting discussion in the senate while
the Hawaiian bill is under consideration.

The Republican party has not refrained from interfering with the question of negro disfranchisement from any indifference to the question of the ballot, but because as the "News" suggests its attitude is rapidly becoming unconditionally in favor of a restricted All members of the Fifth Ward ballot. This tendency has been disconscious hair-brained dilletante republicans, frightened out of their wits by the spectre of populism, and remembering the heroic efforts of and the enormous sums of money expended by the ingmen into line, began a hue and cry about the danger of allowing ignorant foreigners and workingmen the unrestricted ballot. The real class-conscious leaders of the Republican party have no fear of populism or free silver, but they are none the less vitally interested. They see that in a RESTRICTED BAL-LOT MES THEIR ONLY HOPE OF CONTINUED POWER.

The editorial quoted is interesting because it sheds light upon the attitude of the Democrate party towards this question. It shows clearly that these two great political parties stand logically upon the same platform. The great bulk of the democratic power coming from the South, it is inevitable that any test of strength within its councils on the franchise question must result in favor of a restricted ballot.

relative to the former's official appoint-

The young men of the South are

ble, than the old men. But they are wise enough to see the trend of the republican party and realize that the one paramount issue in the South is rapidly forcing itself as the paramount issue in

The interests of the two parties being identical, the question may be asked, what do they fear? It may be confidenter said that the vote of the unlettered foreigner does not cause the capitalist leaders a moment's uneasiness What they feaf is the growing number of class-conscious, intelligent and zealous workingmen united under the banner of socialism. It is these votes that are shaking the capitalist thrones. It is this growing power the capitalst must suppress. His kingdom of special privileges is at stake. The ignorant voter can be bought, but the class-conscious proletarian knows that in accepting such a bribe he is being paid for riveting his own fetters.

The socalist does not fear a ballot re stricted by an educational qualification; he fears only the execution of such a law by his economic masters. Experience has taught him only too well what the result would be.

The infamy can only be accomplished by dividing the workingmen. This in turn can only be done by diverting their minds to some question upon which they will divide, that is, which is very remotely or not at all concerned with their own interests. Appeals to racial prejudice promises to be one of the sur-

Workingmen, we can prevent the infamy, if we will. We can prevent its being attempted. There are no We are all workingmen "foreigners." -in chains. The chains are all we have to lose. Unite-there is a world to gain.

ITS CHIEF PURPOSE

(Continued from page 1.)

ter will fail and the business of the co-operatives extend still further, and so on ad infinitum. Indeed, they have for several years been much the largest bakers in Belgium, and now practically dominate the bakery trade.

For the last few years they have been extending the field of their operations. They have gone into the meat business and have their own slaughter houses and are beginning to force up the standard of meats sold. At the present time the contrast between the quality of the meats handled by them and those handled in the ordinary sheps is strikingly evident even to the casual observer. In Brussels, as in Ghent and some other cities, they have also erected a large department store in the Maison du Peuple, where the prices are very much lower than in most of the competitive establishments. At the same time the quality of the ds as a whole is much higher, and

indeed no inferior goods are kept. In this line they have not as yet achieved the success that they have in other lines, and this is partly owing to the fact that in a small way, at least, private owned department store had already entered that field. 'Again, there has been a reluctance on the part of the co-operatives to push the competitive principle to its fullest extent even in dealing with the outside They, of course, and rightly. pay the best union wages, but in other fields they have not shown the alertness that mark the private industry. No one who goes into the store in the Maison du Peuple can but notice the fact that there is a very great waste of energy. This appears in three points. In the first place the time of the employes is not by any means utilized to the best advantage. As almost all the customers are workers there is very little done in the store during the day. and the most of the business takes place in the evening. In the second place, there is a great waste of room. All articles are kept on shelves. The aisles are very wide and the shelving is seldom much higher than the employes' head. In the third place there is a waste of capital in that all funds are tied up in large stocks of slowselling staple goods, and there are none of the "quick sales, and small profits" gimeracks that make up the partment store. But already our reader is probably saying, "Do you call those objections? I would be glad to see the same features prevail every-It is undoubtedly true that these are the features that distinguish the competitive business and are among its drawbacks, but the co-operative business has two sides, and one of these and it seems in many respects its most important side, is a competifive side. It was because they were the strongest competitors in the field that the pakeries have been able to do what they have. The co-operative depariment store could do much more. There is not the slightest doubt but what any good manager of a compet

a finish as soon as possible.

Within the last year there has been a further step taken in the consolidation of the different co-operative insti-tutions of Belgium for the purpose of

this anyhow or else the co-operative business must go down before the pri-

vately owned industry, and therefore is

would seem well to force the battle to

methods that today prevail in the com

of a comparatively short time until they will be able to control prices in of the functions, on a comparatively small scale, of the American trust.

This brings us to the ever important question as to the lesson which Amerca can learn from this great move nent of the Belgian workers. Perhaps some idea of the difficulty of comparison is conveyed by the fact that America is practically in another industrial stage. Belgium is still largely in the early competitive stage. America is in the last stages of monopoly. It seemed to us that even if one could take the perfectly formed co-operative system of Belgium and transplant it full fledged with all its strength to any would be crushed like an eggchell be neath a mighty steam hammer. Belgium co-operation started at stage when the small business still reigned. Indeed, it is by no means yet dethroned there to the extent to which it was in the United States even ten years ago. It entered into the com-petitive field at the time these small ousinesses were strugling for supremacy. In such a struggle and with such rivals it had unmistakable advantages. Its fixed clientele of customers its abolition of many subsidiary expenses, its union with existing labor organizations, all gave it an advantage in the competitive world compared with the rivals against which it struggled. And today it has become in many lines the dominant economic force. It is, so to speak, the most de veloped form of capitalism to be found in Belgium. Let us explain. As was stated above, Belgian industry is very very far from being as highly beveloped in capitalism as is America. The majority of its industries do not use as perfect machines as those of America. All things are much more determined by custom. Division of

labor is not carried so far. The mar-

kets reached by individual firms, are

not so extensive. Now in .all these

lines the co-operative industry is fur-

ther advanced than almost any other

in the country. They use the latest

mixing machines and mechanical ovens

in their bakeries. They have the most improved electrically run sewing ma-

son du Peuple was more like a Chicago

building than any other in Brussels

in that its accesories, arrangements.

and conveniences were of the most

modern type. But even then they are

far behind the great privately owned industries of the United States as to

competing power. Bearing these facts

chines in their clothing factory

in mind it will be at once apparent that so far from we in America being able to inaugurate the Belgian co-operative system, we could not today keep it alive if we had one only equally as strong already established. And on this point we found that every Belgian socialist agreed with us. We found that many of them understood the American situation quite well, better indeed than many who live in its midst, and they all agreed that for us there was but one thing to do and that was to organize in a clear class-conscious body for the capture of the powers of public control, and

that all measures short of that were

useless and hopeless.

Yours fraternally, A. M. Simons May Wood Simons.

The "Fair," said to be the "largest store in the world," has just celebrated its silver jubilee. Only twenty-five years ago we are told it was a small one-story building with 16 feet frontage and a total capital of less than \$1,000; and at the present day its transactions amount to many millions. And all this is due to "typical Chicago push, pluck and energy." Yes, but whose? The owner's? Hardly, That individual, lately deceased, has been for many fact has necessarily widened the scope years incapable of taking any part whatever in the business of the "Fair," yet it was precisely in those years that the most gigantic growth took place, The elements upon which this success. ful enterprise was based, was and is main stock in trade of the ordinary de- the social labor of many thousands of workers . producing co-operatively, workers who were and are still bought in the cheapest market, workers whose abor power has created surplus value to the extent of ten million dolars which appears as the private property of the late E. J. Lehmann, a hopeless mental wreck for the last ten years. Let us speak the truth; that business like all other accumulations of capital. is the result of unpaid labor. who have really created the value embodied in the "Fair" have received wages—the cost of their production, the rest is the property of the owners of

The public press exhibits much inilenation over the fact that at the reent South Town meeting "the gang" a name by which those holding office are generally designated) were so ut-terly lost so all sense of decemby as to atify their own proposal of high salaries for themselves. The fellows on the butempel the entire distributive trade of side call this proceeding , a "salary grab," and declare that their opponents Now sooner or later it must come to are "ward heelers." "levee" characters and "thugs.". One indignant "property owner" asserts that there was not a tax-payer amongst the whole gang, but the spur of the moment. When it is necessary to part the working class assiduously preach the doctrine that we are all faxpayers and that the subcommon buying. Although this has by ject of taxation is one of mighty imno means reached the point where all port to the working class. Whether the buying is done through a common cen- "gang" alluded to were "property own-

SECOND YEAR .- WHOLE NO. 59.

CHICAGO, ILL., APRIL 21, 1900.

PRICE TWO CENTS

SOCIALIST UNITY

Decided Stand. .

ADDRESS TO ALL COMRADES.

Urge Prompt and Decisive Action to Be Taken Looking to the Union of Socialist Forces.

To the members of the S. D. P. and the S. L. P .:-

Comrade Socialists:-The manifesto pression of opinion on our part as well

We have read this manifesto with unby the Rochester and Indianapolls concompletion harmoniously and satisfactorily. It was apparent to everyone shove remarks: that the time had come for the union of socialist forces and necessity demanded that such a union should be accomplished, in order that the cause of socialism should be advanced and accelerated. In view of existing conditions we therefore hold:

First. That union is a necessity. Second. That the overwhelming sen timent among socialists for union demanded that such union be accomplished as speedily and equitably as

Third. That the negotiation for union should be conducted regardless of the acts and wishes of any individuals. The action of the National Executive Board of the Social Democratic party has presented a new phase in the situation and it is our purpose to outline what in our opinion is the best course for all socialists interested, to pursue

in the premises. The manifesto in question charges that the Social Democratic committee union violated their instructions in falling to preserve the right of a concurrent vote on the question of party ne, and also that certain members of Socialist Labor party committee on union, failed to fulfil pledges said to have been given at an informal meeting of certain delegates held at Indianapolis during the convention.

In answer to the first charge we call attention to the fact that the members of both parties, in case of a failure to decide upon one of the two names by concurrent vote, have the choice of declaring whether or not they will accept the name which receives a majority of the votes cast on the question of name This proposition also requires a concurrent vote, thus leaving the entire matter in the hands of the membership of both parties.

Consequently the first charge falls to the ground. In reply to the second charge we insist that the failure of individuals to fulfil piedges, even if "the public," will withdraw our apa union of those wishing for the inauguration of socialism.

It will be plain that if any conference was entirely unofficial, and for the National Executive Board to base their action against union upon the results of that conference is unjustifiable, because any action taken by the confer ence was an usurpation of power and not binding upon either party, and while we deny the right of the National Executive Board to submit such a propoeltion as embedied in their manifesto. yet taking all the circumstances apparent at this time into account and also realizing our inability to fully state our position, we urge and call upon all the members of the Social Democratic party, not in our name, but in the name of the working class movement for so cialism, to vote "yes" upon the prop rition submitted by the National Executive Board in their manifests, be Heving this action will best avert the struction of a unified movement.

Further, we call upon the members of the Social Democratic party to vote for the name "Social Democratic" as the name of the united party, and also in favor of the other propositions submitted by the joint committees on union, to the end that unity may be effected. Believing it to be the purpose of the present National Executive Board to maintain a separate organization, we therefore urge upon the mem bers of both parties the distinct ne ecusity of voting for the name "Social Democratio" as the name of the united party, so that such purpose of the Board if attempted in case the name "Social Democratic" is not adopted be Social Democratic" you, will prevent the use of the name unduly, and thus

hands of the provisional committee of

the united party.

Prompt and decisive action is neces sary at this critical time, and we trust every socialist will act with but the Social Democrats of Haverhill Take best interests of the great cause of socialism as their guide.

C. A. Fraser. Chairman. George A. Keene, Secretary.

Massachusetts Branch 16, Social Dem ocratic party. -Haverhill, Mass., April 11, 1900.

THE WORKING DAY.

timentalists Condenn the Action of the Chicago City Railway Co. in the Twelve-hour Matter.

The determination of the directors of the Chicago City Railway company to issued by the National Executive Board of the Social Democratic party and published in the Social Democratic Herald of April 7, 1900, justifies an exaction, "sympathy" with the victims, as on the part of all other organized doubt as to the reality of our "freesocialists, and because of that we feel dom," and vague threats as to the disto be our duty as a portion of the pleasure of the "people" and its possi Social Democratic party to issue this ble effects upon the company. All of which is not only a mere waste of ink and paper which might be put to far feigned regret and surprise. It was better use, but serves also a generator our hope that the plans inaugurated of confusion in the minds of those by the Rochester and Indianapolis con- whose righteous indignation upon this ventions and practically consummated subject appears from day to day in the at the conference on socialist union held | public press. The following portion of at New York, would have reached a letter which appeared in one of our

> It is the happy privilege of every American to speak of his country as the land of the free and the brave. But is it the land of the free? Is it freedom for men to be compelled to work twelve hours a day before the terrible heat of those furnaces? In the old slavery days it was not so bad as that, but at the present time machinery is of more value than human lives, and to save the wear and tear of the machinery a man must and tear of the machinery a man must on the control of the control of the machinery a man must of the machinery a man must of the control of

> To all this a objector might answer that this is the "land of the free," that these men are not compelled to work twelve hours per day, they can refuse to do so if they wish. And such retort is unanswerable by those who hold that total vote cast be adopted; and that freedom and the present economic sys- for the N. E. B. to object to the memtem can exist side by side. It may be true that the new slavery is more irksome than the old, that machinery is when all this is conceded the writer has Committee reached the Board; that it said nothing, made no point whatever, was evidently issued without careful It never occurs to him to ask himself why these things are so.. He has no out even hearing from four of the suspicion whatever that the freedom he members present at the caucus. speaks of is but an empty form, that an never become a reality while capitalist conditions remain. In conclusion he brings forward a remedy which harmonizes admirably in its abstract emptiness with the rest of his meaningless paragraphs. Here it is. In the face of to vote on the questions submitted by such a terrible threat as this the di-rectors of the Chicago City Railway Berger did not attend the meetings of company will surely hasten to comply with this request:

We have always considered the Chiwe have always considered the Chi-cago City Railway a reasonable com-pany, but this act has shown it to be a tyrant. Do the directors of the com-pany uphold this action? If not, let them call a meeting and rescind it and the public will be with them as of yore.

Here the same old bogey which is always employed in similar cases is again exhibited. If the directors do not re-scind their action, "we," "the people," 5. That to refuse to unite now, (even proval from them. Nobody knows bet-to the socialist movement during the reason why thousands of others should ter than the group of capitalist exploit-coming campaign and will afford the refuse to work together? The alleged ers referred to, the value of such a lic." man in the abstract, man who belongs to no class, has no existence so far as they are concerned, they knowing well that such designation does not imply the expression of any distinct material interest and is therefore a matter of indifference to them. They have no them as of yore. They own and control a social utility, transportation, and they need have no fear that the "public who cannot help themselves, will with-draw their patronage. "As of yore" the "public" will do business with them at he rate of 5 cents a person,"as of yore." The twelve hour wage slaves have only the medium of socialism.

graph operators on the Southern Railway a correspondent from Macon, Ga., sends us the following:

Note the two circumstances in this atrike that would "strike" a third-class diot as peculiar. (1) The train dispatchers do not appear to have struck, but are still(?) at their keys. (2) One of the demands of the strikers is or advance of the salaries of train dispatchers. Could anything be more insane? The train dispatchers either don't belong to G. R. T. or else they are no called upon to engage in the strike. A lot of babes and sucklings could have managed better.

This opinion is confirmed by the divion superintendent who is quoted as

The fellows who struck will be simply out of a job, and somebody else will be put in their places. That will be the rad of it.

That's all. The solution of the trou nie is as "simple" as the strikers have shown themselves to be.

ST. LOUIS FOR UNION NOT TO BALK UNION Democratic Herald of April 7th, signed by four members of the National Executive Board of the S. D. P. This ne-

Binding Force.

DIS-UNION] MEANS DISASTER, REASONS GIVEN IN DETAIL.

~ Unity With Other Socialists Without Delay.

Resolutions adopted by the St. Louis ranches of the Social Democratic party in joint meeting, April 10th, 1900: Whereas, The socialists of America. having striven for many weeks to bring about a union of the two socialist parties, are about to see their hopes fully realized through the work of the joint onference committee appointed by the Rochester and Indianapolis conven-

Whereas, Four members of the Naional Executive Board of the Social emocratic party have issued an unjustifiable and malicious manifesto calling upon the members to vote

Resolved, That the Social Democrats of St. Louis vigorously protest against the manifesto and call the attention of the comrades throughout the country calculated to prejudice the comrades in to the following facts:

I. That the private caucus to which the manifesto refers was unauthorized by the convention, had no binding force, and was held in secret only seven delegates being invited; that no mention of this caucus (the agreements of which the N. E. B. now attempts to folst upon us), was ever made in the Herald's report of the convention; and that the N. E. B. is virtually trying to place the the instructions of the convention.

2. That the Committee of Nine was acting within the instructions of the convention when it agreed to submit to a referendum, a recommendation that the name receiving a majority of the bers voting upon this proposition themselves is decidedly suspicious.

3. That the manifesto was issued bevaluable than human lives, but fore the majority report of the Joint consideration; that it was issued with-

> 4. That the National Executive Board is manifestly opposed to unlon upon any terms, except such as may redound to the glory of the four sign ers of the manifesto; that the Board seems afraid to allow the membership the Joint Committee, and failed to notify the delegate entitled to act as his alternate, (Chas. R. Martin of Ohio who is enthusiastic for union); that Jesse Cox declared himself against the union, in private conversation, at Indianapolis; that Berger is using abusivlanguage in his paper, the "Wahrheit," against Comrade Carey, whom all good socialists respect and admire, referring to him as "the ward politician, Jim

capitalist press the very opportunity threat as this. The "people," the "pub- it is seeking to discourage the supporters of our candidate, Eugene V. Debs;

> Resolved. That the Social Democrats of St. Louis hereby pledge themselves to use every effort to bring about a unification of the socialist forces of America; and that we extend fraternal greetings to our comrades of the Socialist Labor party, and assure them that, in our opinion, the action of the National Executive Board will be repudiated by the members of our party; and he it further.

Resolved, That the St. Louis branche of the Social Democratic party stand ready to unite with the other socialists relief which can only arrive through that a committee be elected to communicate with the other branches of both parties in Missouri and call a joint state convention for the purpose of effecting a union, so far as Missouri is concerned, without further ceremony.

Val. Putnam, Sec'y City Central Committee

In the "Painters' and Paperhangers Journal" for the present month appears an article by Daniel Lynch on "Social of the most valuable information for the craftsmen who receive that journal trade union is ably portrayed and many misunderstandings and prejudicles as regards socialism cleared up. ers of the "Journal" cannot do better than study carefully the exposition give Lynch. It will be to their material interests as workingmen to do so. The rticle will be concluded in next month's

Don't forget it. In clube of ten three

Declares Private Caucus Has No Seattle Socialists Repudiate the " Manifesto."

St. Louis Branches Pledge Themselves to Condemned as Premature, Undemocratic Unauthorized, Impertment, Unfair, and Petty

Resolutions of Branch No. 2, S. D. P.,

Whereas. We have watched the recent progress among American socialists toward organic union with the greatest gratification and hope, and Whereas, We have read with astonshment and grief the manifesto published in the S. D. Herald of April 7th, by four members of our National Executive Board, declaring their purpose to prevent said union

Therefore, Be it resolved by Branch No. 2. S. D. P., State of Washington, City of Seattle, that we disapprove and condemn the said manfesto,

First, as Premature: The report of not yet received when the manifesto was issued. The manifesto is therefore advance against the Conference committee's report.

Second, as Undemocratic: It is ob viously an attempt by four members of the National Executive Board to influence and control the entire party by means of the national organ, not allowing the comrades to decide for them selves in an unprejudiced manner.

Third, as Unfair: Only one side is given. We do not know what defense Messrs, Harriman and Hillquit may make. The fair way would have been to give these gentlemen an opportunity to print their statements, fogether with the charges, for the benefit of the comrades who are called upon to vote or the referendum.

Fourth, as Impertinent and Unau thorized? This whole matter of a ref erendum for the purposes of union was placed by a national convention of the S. D. P. in the hands of a special com mittee of nine. This committee was to confer with a like committee of the Rochester convention and then submit certain questions of names, etc., to a referendum vote. Now before this naional committee of nine, having special authority for a special purpose, has had a change to complete its work, the Excutive Board steps in and proposes a referendum calculated to defeat the whole national movement toward unification. This action is certainly uncalled for and discourteous, if not a echnical usurpation of authority by the Board.

Fifth, as Based on a Petty Reason The only reason given for defeating a national union of socialists is that two men pledged themselves in a private conference at Indianapolis to support the S. D. P. name, and afterwards falled in the New York conference to do so. We have not yet heard from their side, but, even if the charge be true, is that fact an adequate reason that harmonious relations and co-operative action for the great cause of socialism 5. That to refuse to unite now, (even in the United States should be defead under another name), means disaster ed? If two men have erred, is that any reason appears so pitiably absurd that we think our comrades on the Executive Board at Chicago must have lost their heads temporarily.

Resolved, also, That we therefore most heartily commend the wisdom and moderation of Comrade Eugene V. Debs in withholding his signature from the manifesto until he could read the report of the New York committee, and that we urge all comrades everywhere to cast their full vote in favor of union in the referendum submitted by said manifesto of April 7th, to the end that the purpose of the manifeste to defeat

union may be thwarted at the start. Resolved, finally, That a copy of these resolutions be sent to the socialist press and to all branches of the S D. P., whose add esses can be obtained. Adopted, with only one negative vote, in the largest meeting ever held. April

> Alongo G. Seibert, Chairman Jas. D. Curtis, Secretary.

STANDS FOR UNITED PARTY. 'Public Ownership" of Eric, Pa., Speaks With No Uncertain Sound.

That, the determination of the rank nd file of the socialist workingmen in this country for unity, is not likely to be thwarted by the machinations of diminution of their individual influ- of buildings are being torn down manifesto which appears in the Social the statements in the press.

farious attempt at disruption is handled in a masterly style, it's fallacies and charges being fully exposed and refuted. We much regret that space forbids us reproducing the argument in full in these columns, but the conluding paragraphs will give our readers some idea of how clearly and deisively the organ in question repudiites this extraordinary manifesto: "The executive board is in contempt

of the national convention. It has unlericken, in an unwarranted and treasonable manner to forestall the action of our supreme authority. It demands vote on the question of union, while that matter is in the hands of a committee of the whole party. It accompanles the demand for such vote-with a series of charges and insinuations calculated to prejudice the judgment of all members unacquainted with all the facts and secure a vote adverse to our interests and desires. It drags the name of our leader into the mire of squabble that the selfish purpose of its nembers may be accomplished. impugns the integrity and besmirches the honor of our candidate for vice president, than whom no one is neare

and dearer to every leval socialist. It stultifies the leaders of the Socialist Labor party, our comrades in everything but name. It maligns our comrades to whom was entrusted the negotiation of terms of union, It has made the official organ of the party s personal circular letter and has dis-seminated at the expense of the party the most infamous and treasonable utterapoes against it and its candidates, against its welfare and its aspirations For all of which reasons we demand its immediate recall and urge every branch to forthwith formulate charges incorporating the foregoing specifications of malfeasance preferred against the members signing the manifesto, sign and forward them to the chairman of the executive board in such ar overwhelming flood as will sweep the offending members out without formality of a count and establish a precedent for the future conduct of that body that will be as lasting as the

"Socialists, stand firm for union Let no self-seeking politicians thwart your purpose! Never mind the historical associations of a name, unite and we will make historical associa tions for any name!

"Unite for socialism in our time! Unite! Unite! Unite!"

Public Ownership also speaks with the same decided tone in its editorial upon this subject, which we here re

"Nothing has happened in the history of the Social Democratic party more fraught with portent of disaster than the recent action of the National Executive Board in issuing its pronunciamento against union with the So-cialist Labor party. The late national convention, the sovereign authority of the party, delegated the negotiation of union to a committee of nine and that ommittee has all but discharged its trust. Its work requires only the clercal services of systematically arranging the propositions to be submitted to the referendary, and while substan-tially all that was done is known, there

has been as yet, no official report. "The National Executive Board, owever, being represented at the con ference, has had advance reports of its action and finding that its representatives were unable in the conference, as vent the much-desired union, has undertaken, in a most unwarranted man ner, to forestall it by an appeal to prejudice and passion, trusting to compass its purpose before the membership shall be in possession of the facts. To this end the Executive Board has impressed the official organ of the party nto its personal service and promulcated its manifesto.

The manifesto comes as a thunderbolt out of a clear sky and recalls the situation which preceded the split of the Social Democracy and placed the life of Eugene V. Debs in despair. That this action will place that life beyond all possibility of hope is the fear of many comrades, and the prayers of the loyal members will be offered that i may not be.

"So infamous is the act of the board in riding rough shod over the so ereign authority of the party that words fall to properly characterize it. of ita.like has been known in the history of political parties and if the Social Democratic party can weather it no storm hereafter will have terror.

"The sinister charge that Comrade Debs is a party to it and the atroclous charges against our candidate, Job Harriman, ought to bring down about the ears of this treasonable clique its house of cards and forever stiffe the spirit of self-aggrandizement."

AN EXPLANATION

Owing to the fact that it is deemed of the utmost importance that the peculiar nature of the matter which has arisen, regarding the contemplated unity of socialist forces, should be laid counce be filled later than the date before our readers, and as such decision requires that a large amount of space be devoted to this subject, The SNAP SHOTS BY THE WAYSIDE. Workers' Call of this issue necessarily takes on a form somewhat different from its usual typographical appearance Some of the matter, which in ordinary circumstances appears in a stated part of our columns from week to week; is therefore omitted, condensed, or transposed. Correspondents who have sent copy for publication which does not appear in this issue, will therefore understand the necessity which compels us to hold their cohtributions over for the present. The Workers' Call will resume its normal appearance when the question under consideration is satisfactorily settled, or becomes superfluous, a proceeding which we do not anticipate will require much time.

THE UNITY QUESTION.

That there is a sincere desire for a unity of socialist forces throughout set the desired opportunity-if he car this country amongst the bulk of the members comprising the converging parties, we confidently believe that the events of the next few weeks will demonstrate. That there are still some who yet place the importance of the social revolution secondary to other objects, whether these be the results of personal ambition or a mere talent for mischtef-making, we are also reluctantly forced to believe, judging by the effects that are now being made to destroy that unity to which thousands of socialists have been eagerly looking forward, and which seemed almost on the point of completion. While it is true that the columns of this paper have always been and will chn. fact evident to many besides M: tinue to be used mainly for socialist the movement for unity for which the majority of both parties have labored so long and earnestly, cannot be passed over in slience. A manifesto has been issued by the National Executive Board of the Social Democratic party. which, if it voices the sentiments and wishes of the bulk of that party proves clearly that the time for units has not yet arrived. The repudiation of this manifesto by various branches of the party, as well as by many S. D. P. delegates and officials, would however, lead us to believe that the document in question represents only the views of the individuals who have attached their names to it, and who for reasons best known to themselves have concluded that unity shall not prevail. if by any effort of theirs it can be prevented. If the avowed socialist parties in this land are still the hotbeds of distrust, recrimination and personal axe grinding which a perusal of this manifesto would infer, if the importance and welfare of the socialist movement is to be subordinated to the schemes of individuals, it were well that the eighty odd thousand socialist voters in this country should be acquainted with the fact at once; that political action be temperarily left in abeyance, and a more vigorous and clear cut propaganda of socialist truth be at once inaugurated, out of which may develop a political organization which cannot be endangered by the caprices

orlously accomplished by the united efforts of the party. But we do not apprehend that the work for socialism which has been done in the past has only succeeded in producing an unclear and confused multitude who can be thrown off their mental balance by the antics of a handful of mischievous malcontents. On the contrary we have good reason for believing that the strength of the movement lies in the clalism does not appear as a plaything for personal ambition, but as a power ful weapon for the emancipation of their class, which must be deliberately used for that purpose alone. The want and misery engendered by the system of capitalist exploitation has also helped bring into existence that class. conscious proletariat, who will assuredly know how to deal with those in their own ranks, who dare attempt to prevent the political unity amongst workingmen which is a necessity in the struggle with capitalism, and which must ultimately become a fact. We want to realize socialism. For such realization it is necessary to unite Comrades of the S. D. P., the decision rasts with you.

Notice.

The May Day Issue of the "Workers" Call" will contain a choice collection of articles on the socialist movement, by many of the best writers in the United States. Those who desire to secure extra copies of the May Day issue must notify this office before the 25th inst Orders must be accompanied with cash in all cases, and applications for o above mentioned.

Mr. Carl Schurz the apostle of aim ess discontent, and divinely appointed critic on all matters pertaining to these United States, hopes that for the coming political battle a third party will be placed in the field, which will be the corperstone of a new independent party:

But it is useless to conceal the facthat this party is not the object of Mr. Schurz's solicitude at present The party he wants is one that "will make the outcome of the Boer war a factor," that is, one that will diverthe attention of its dupes from the present struggle between capitalist and working class, by concentrating their gaze upon battles faught in anothe land many thousand miles away. But there is no need of a third party to do this. Either of the old capitalist parties will work this matter for all it is worth if they find it to their interest to do so. If Mr. Schurz will control his impatience for a few years, he may make anything out of it. A few years from now there will be two parties only in the field, the socialist and capitalist parties. Mr. Schurz may get his chance them; what that chance may be worth is another matter.

If Mr. Schurz were only sufficiently awake to perceive that his hopes have been anticipated to the full in this respect he would probably not have wasted a telegram to inform the Milwaukee "Germania" of his wisher There is a third party in the field al ready, and Mr. Schurz may probably find out that it is perhaps more "in dependent" than is agreeable to him After the presidential election is over Mr. Schurz will perhaps be willing to admit that its existence is undentable as the Socialist party will make that Schurz.

Admiral Dewey has been asked to explain his position on trusts by Commercial Travelers and Hote Mens' Anti-Trust League," to which the former replied that he would make a statement to the public in a few days. The Admiral is no doubt a great fighter, but he will make a mistake ; he gives the answer that his question desire. The modern trust battle ship bears no analogy to the antiquate offection of scrap fron which Dewe sed of in the Philippines, and i the Admiral consents to be used by th reactionaries, to play the part of Spanard in a political sense, in fighting against the improved machine of production he will find that on the politi al battlefield the conditions of Manilla bay have been reversed. The demcrats have been boasting that they ion't want him as a candidate, but i come as if straggling groups of tha eactionary party would not disdain to ise him if possible. Any port in

Although the machinists' strike has been "settled" for some time, yet it ems Mr. W. J. Chaimers of the firm of Fraser and Chalmers, is still in-deer doom. He says that "conditions ! this city are discouraging." Some pecole are never satisfied. We workingmen, at least some five thousand of us have striven to relieve the situation omewhat by polling about the sam number of socialist votes a few weeks ago, yet Mr. Chalmers still mourns and efuses to be comferted. He says that "all we can do is to wait and hope that an era of good feeling will follow this unsettled condition," which it certainly g. L. P. All those interested in the will, when the cause of this unsettled condition is removed by socialism. Mr. to be present at this meeting Chalmers will then have a good job of individuals and groups who may at- and will be able to secure to himself

tempt to overthrow what has been la- the whole product of his labor, but he must not be discouraged if prevented from appropriating that of other pec

> Mr. Levy Mayer, the legal gentleman, who before the late industrial ommission advocated the formation of wards of arbitration which should be placed outside the influence of the workingman's vote, has just received fee of half a million dollars for his services in welding together two great capitalist corporations into one gigantic exploting machine. This may seem an extraordinary fee, but it is only a trile compared with what the capitalists are prepared to part with, for an effective scheme whereby to neutralize the votes of the workers, in order to main. tain the present regime of capitalist robbery. One million socialist votës for the candidacy, of Debs and Harriman. if polled next November, would enable Mr. Levy Mayer and a few other "eminent" parasites of property interests. to mulct their frightened clients in far greater sums than the above. The Levy Mayer's will make hay while the capitalist sun still shines but they are too shrewd to allow themselves to be crushed under the wheels of the social revolution, whose coming most of them clearly see.

Work therefore, gentlemen, while it yet day, for the night cometh in which no man can "work"-the other There is no reason why the industrial exploiter should not become the temporary prey of the legal exploiter, upon whose ability to prop up the tottering edifice of capitalist property, the life of the robber system de pends. Work them therefore, for all there's in it. The approaching terror of ociansm will induce them to part with many/\$500,000 fees in return for your aluable services. There is a rich harvest to be reaped by men of shrewd ability who recognize that here is an opportunity that will certainly not ccur again, and who know enough to stand from under when the whole damnable structure comes down with a rash.

A new machine in the shape of a mechanical ore unloader has been installed by the Carnegie company at Conneaut, Ohio, A gigantic "clamshell" of steel descends into the hold of the vessel and scoops up the ore at the rate of ten tons per scoop. It can be operated by five hands, two on the machine, and three in the hold, and performs the same work for which fifts men were formerly required. This machinery will be a source of temporary profit to the Carnegie company, and a ermanent exponent of the necessity of ocialism to each group of forty-five vage carners displaced by it. They will see in spite of themselves that the only, hope of their class lies in "scoop ing" the machine which has "scooped" their jobs. That is, in making it colective property, so that the benefits acruing from its use may be enjoyed ly all, instead of as now being appropriated by the Carnegie company alone

It will be comforting information to he thousands of povertystricken worknen in this city and the millions broughout the country, that "we" are cell in the lead of all the foreign exhibitors at the Paris exposition. Our masters in exhibiting the products of our labor for the admiration and envy f foreign capitalist plunderers, are in eality making an exhibition of the olly and stundity of the wageslaves whom they exploit Their praise of the roductive ability of the American cerkingmen, utrally translated would un something as follows: "Behold, we are in possession of millions of the most ractable, easily duped, tireless, and industrious slaves the world has ever known. . Slaves who can and do produce n a given time greater amounts of commodities than any other, and who re ceive as wages, relatively to their productive capacity, less than any people on earth. The wealth which they proand which is here exhibited beongs to us, and is in itself a testimonial to their industrial skill and economic folly, and to our plundering ingenuity, and political class-consciousness."

States, (for instance Germany, France, delgium, Italy), where the workers are o foolish as to send their own repreentatives into the legislative bodies they would ask why the work was not ceded with.

But who is there in congress to v bor's interests. Who! Who? But then we are so practical!

With the present labor troubles in hicago the workers can receive able instruction in the matter of class interest. To hear the "leetle pessnessnen" denounce the struggling workers or daring to resist the bosses is inter sting, and we hope the workers will emember on election day that they have class interests of their own, distinct from the middle class.

A meeting will be held Sunday, 22d of April, 2,30 p. m. at Wentworth hall, southwest corner of 44th place and Wentworth avenue, for the purpose of organizing a 29th ward branch of the socialist cause are urgently requested

LETTER BOX.

Necessity of Union Necessity of Union

To the Editor of The Workers Call:
The socialist parties of the United States have been drawing together and a union seems almost at hand. Whether it shall be effected resis now with the members of the Social Democratic party. The Socialist Labor party affirms heartily the declaration of its national convention and stands ready for union on the terms arranged for by the joint committee of the two parties. It is unfortunate that the Executive Beard of the Social Democratic party has made an effort to defeat the plan of union by preventing the taking of the referendum vote. The executive of a socialist party should avoid even the the referendum vote. The executive of a socialist party should avoid even the suspiction of dictatorship. Such a suspiction can hardly fall to arise from the Board late action. If, as the Board supposes, the feeling in the party is strongly against union on the ferms proposed, the matter might have been safely left to the referendum. Union would be decisively voted down and the matter would be settled without the matter would be settled without the necessity of any interference by the party executive. A negative vote on party executive. A negative vote party executive. A negative yote on question number seven ("Shall the name receiving the majority of the total vote be adopted"), would settle the the manifesto issued by the Board question. It is also unfortunate that it deals in personal charges of bad faith. Socialists should not employ such child-lish tactics. It is to be noped that the manifesto has not falled into the hands of non-socialists; it must excits refluence of non-socialists: it must excits ridicules imong the unconverted. De Leon used to write that way and disgraced the cause. If the sentlemen have taken the time to reflect they are doubtless heartily ashamed of having so hastly rashed into print. If they had walted to hear from the accused all would doubtless have been explained. It is quite likely that, in the hurry of the consultations at Indianapolls and with the changed outlook caused by the unf non-socialists; it must excits ridies the changed outlook caused by the usexpected acceptance of the nomination Mr. Debs, some mutual misunde y Mr. Debs, some mutual misor tandings may have occurred. He nan, Hayes, Hillquit and Benham nown to socialists throughout the s men of principle and integrity, acks on such men can intue. such men can injure, only nose who make them. A minor un-ortunate feature of the matter is that supposedly socialist paper is given u almost entirely to personal bickeris and quarrels with socialists. We hoped that this sort of jornalism(?) had disappeared with De Leon, but his spirit seems to have inspired the recent issues of the Social Democratic national organ. There are those who appear to fear a union with the Socialist Labor party. The place for such is among the defenders of the capitalist system. They can have little faith in a workingman's movement. We are told that ngman's movement. We are told that ingman's movement. We are told that the party has made mistakes; none know that better than we. We have taken for leaders men who betrayed us and became tylants; but we-rose in our might and cast them off. The mistakes we have made have been those that we have made have been those that workingmen could scarcely hav avoided. No sane man can question honesty or our devotion to the ruse of socialism. Can one who e pects the workingmen of the world to unite to give battle to the common for self-righteously hold himself-aloot from the men of the Socialist Labor party? The socialist party of the fu-ture will not come-from a union of the socialist parties of today; it will come from a union of the great working from a union of the great working class. Forces mightier than those of

class. Forces mightier than those of our combined agitation are making for the cause. Let no one stand in the way of the great movement. He who does so must at last be crushed though it may be, not before he has greatly retarded its progress. The time for the ferward march is at hand. Let us not spend it in fruitless personal duarries. Let the dead must bury its dead. We it the dead past bury its dead. We the Socialist Labor party stand read; of the Socialist Labor party stand ready to give up a name that represents the "toil and hardship," not of some twenty menths only, but of ten years. We save it up gladly. We rejoice that we can become a part of a vaster movement than it can signify. Will our comrades of the Social Democratic party do the same? Will they recognize that the workingmen do not need to be kept in leadings strings? that they will find their own leaders and need no bosses nor dictators? Will they unite with us in preparing the way for a ith us in preparing the way great political party in which all cialists, all workingmen, can unite the great contest of the working of

against the capitalist class already begun throughout -Chicago, April 14, 1900.

To Be Settled by S. D. P. Members. omrades of the S. D. P. and S. L. P. While there may be a tendency to exaggerate the crisis in which we are now in and to overrate the importance of the disturbing individuals, still there is no doubt but what there is a situation that demands and added to the control of the control tion that demands cool heads. It is no time to talk of personalities and any attempt, to do so can only tend to con-fuse matters. As a whole the question between the N. E. B. and the rank ahi-file of the S. D. P. is one in which we of the S. L. P. have no right to int In connection with the lockout it is interesting to see the post-office building standing idle, when at least 1,900 men ought to be at work on it. But Brother McKinley, of the Bricklayers' Union, seems to be on the side of the contractors.

In countries where the workers are not so "practical" as in the United But the great FACT is this. The great FACT is this. The great interested in which these individuals may take in the future course of the movement. But there is one phase of which those individuals may take in the future course of the movement. But the great PACT is this: The great body of socialists who had previously been divided into two camps wished to unite their forces against the common enemy of capitalism. Certain individuals were selected by each side as the servants of the party to carry out this unity. This was the only thing these servants were supposed to do. If instead of so doing they fell to bickering among themselves it simply showed that they were incompetent to the task before them and in no way altered the fact of the desirability of union. But fact of the desirability of union. Bu there is a still more fundamental postion that we of the S. L. P. are forced to take. The S. D. P. comrades gave us to understand that they were arbitust-astirally in favor of unling forces. Acting upon that supposition we allowed a rearrangement of our ticket religibling to second place our first choice upon the ticket transforming our platform and remedeline our constitution in order to suit the changed conditions. All this meant a more or less disorganization of our ranks and an uncertainty which could not help the injure our propagands. But all this we-were willing and glad to do because we were met with what seemed to us a tion that we of the S. L. P. are force to take. The S. D. P. comrades gave u we were met with what seemed to us sincere effort upon the part of the D. P. comrades to formulate such union. New when all this is done by

the matter fairly and squarely is not of capitalist supremacy, and while svery voice so east a breach of faith with all the S. L. P. comrades? Is it to simply a reputation of all the promises and pledges that their previous position has implied. Can they afford to commit their whole party to such a colossal broken pledge? I have not the slightest doubt as to their position if the whole question is once put fairly before them and they understand the positions involved. I believe that fairly before them and they understand
the positions involved. I believe that
they are men enough and socialists
enough to vote down with overwhelming emphasis the proposition to Goceive
and break faith with the whole rank
and file of the S. L. P. membershi;
which is practically what the question
put to them by the N. E. B. amounts to.
Yours fracternally.
A. M. Simons.

FOREIGN NEWS.

Glimpses of the World-wide Struggle of the Proletarian Army for Its Liberty.

FRANCE.

The president has pardoned Baron Christiani. This is the "gentleman" who, on June 31st last, struck M. Loubet, who was the guest of a club to which his aggressor belonged, and was sentenced to four years' imprisonment. If he deserved to be let out it would be well if the president exercised his prerogative of mercy in favor of those young people who were imprisoned for the alleged piliaging of a church. It is not at all clear that they were guilty, and in any case the sentences were very severe.

GERMANY.

The Upper House in Bavaria have truck out the clause in the Mines Regulation bill which granted an eight hour be firm

The carpenters in Berlin who here on strike have gone back to work. They have adopted a program very sinrilar to that of the general body of German socialists.

HOLLAND.

"Het Volk," the new socialist daily, has appeared. It is published at Amsterdam, the editor being P., J. Troelstra. The newspaper is well printed, full of varied and interesting matter; there is not only news, but a feuilleton, a woman's column and many features which should make it a success.

ITALY.

Gabriele d'Annunzio, the Italian novhis intention of voting in future with ery poor country, and the insane atempt of her rulers to follow the bad examples of other great powers by havng a large army and navy is simply uining the country. "United" Italy has not been a success. I do not mean to say that it was a good thing when Austrians ruled over part of the country. but it has been a mistake to have the south ruled by the north. What is wanted is a "federated" Italy; there are almost necessary antagonisms be-rand the failures more numerous, just tween Sicily and Piedmont, and if there were several small states in the penistsula instead of one, things would go on

POLAND.

The daily published at Cracow, by the i Polish, Scialistic party in Galicia appeared on April 1st, and is called "Napr-. zod" (Forward). The chief editor of this first socialistic daily, in the polish language, is Daszynski, the deputy .-London "Justice,"

WHY IS THIS THUS?

A Capitalist Pointer Upon What the Law decides. Whose Law Is It?

"Employes working more than eight hours per day in violation of a statute are heid, in Short vs. Bullion, Beck & Co. Mining company (Utah), 45 'L. R. A. 682, to have no right of action for the extra services, either on the conract or on a quantum merult."

the Daily News as to "what the law changes wrought by commercialism decides," and it is now up to the work- within these professions. This element ingman who believes in an eight-hour which is already a most potent factor day, to decide why the law decides after this fashion.

This is the situation: A statute making eight hours a legal day's work, has If a workman's labor een passed. power is used for a longer space of time in the same day, he, the workman. has no claim for remuneration for extra service. Why is this thus?

Is it because the law wishes to pun sh the workman for violation of the statute? Hardly. If the workman preented no claim for remuneration for unneticed.

valueless, meaningless, and absurd. The only reason for their passage is that such apparent efforts to "safeguard" the worker, earn a reputation or capitalist politicians as "friends of labor" and help to keep the working class ignorant of the fact that their true interests lie utterly outside of the

present economic system The judges declare such laws are "unnstitutional," whenever any attemp s made to use them as what they pur port to be. The judges are quite right upon so-called "freedom of contract," upon the ground that labor is a con modity to be sold by the "free" indi ciduals who own nothing else besides and that such Transaction concerns only the two parties engaged in it-the buy er and seller of the commodity-lab power. The constitution is framed to union. Now when all this is done by us we are suddenly told by the N. E. B. of the S. D. P. that owing to the actions of certain individuals in the S. L. P. it has been decided that union is not de sirable and this N. E. B. ask their members to vote against union. Now laying aside all prejudice and meeting of contract is one of the corneratonce. suit the demands of capitalist society

working classes remain convinced the freedom, so long will their economit of the employer to an unlimited ex plottation of the labor power of the

A new economic society, with a new constitution framed to subserve the interesis of the workers is an absolute necessity. It can be obtained only by united intelligent action upon the part of those workers. It can be attained only by the abolition of the capitalist system, and the "freedom of contract" which goes with it. It can be attained only by the establishment of socialist industrial society, the Co-operative Commonwealth.

Remember that you can get The Class Struggle with The Workers' Call for 80 cents a year,

DIVISION OF LABOR.

Specialization" in the Learned Profes-"No Future for the Multitude."

That the so-called "learned profesdons," have been no more able to escare the minute division of labor which is always a feature of capitalist society, than the handicrafts which have been subjected to the same process, is amply attested by the statements made recently at the Sunset club in this city by respective representatives of law, medicine and the ministry. Each speaker agreed that the profession of which he was a member tended more and more day; the bill has been returned to the to subdivision of its various parts, and andtdag, which it is to be-hoped will that no professional might hope to achieve success unless as a specialist, devoting his time and ability to some one particular phase of the profession. The theological representative declared that the old type of minister is passing away and is being supplanted by workers who undertake as a specialty some one of the pastoral duties which had formerly been considered as forming but one part of the functions of a dergyman of the old type. The medical representative assured his hearers that, "the day of the general practitioner had gone," and had given way to the era of the specialist in certain diseases, while the legal representative advised young men entering the profession "to specialize," as therelist, who is a deputy, has announced in lay their sole chance of success. This testimony is significant, as showthe socialists. Affairs are not flourishing that the same forces which reduced ing in the peninsula. Italy is really a the handicraftsman, proud of his complete ability to produce some finished commodity from the raw material, to a mere link in a long series of proesses, by which the same end was attained quicker and more cheaply, is also at work in occupations which to the superficial observer might seem to be outside their influence. That this process tends to minimize the importance of the individual, render the competition still more keen, the prizes fewer, as it does amongst the manual workers, was not overlooked by the different speakers, the lawyer specially emphasizing this in his concluding remarks. He said:

"For a great part of the multitude which is flocking to the law I see no future, but for the few who have this ability and can learn the fundamental principles of the law and select and absorb all that belongs to their specialties under it I see a great future."

The same economic processes which

deprive the masses of the workers of any hope of the future, are evidently at 'work in the "professions." latter as, in the industrial pursuits, success" is measured by the individual ecumulation of wealth, which involves n its turn the same unscrupulous competition between individuals, and it will be readily seen that the creation of an "intellectual proletariat" consisting of the "multitude for whom there is no This is one of the pointers given in future," is a necessary result of the in the socialist movement in Germany and France, is being created here on a still larger scale numerically, and may be depended upon to make its existence felt in the near future. The fact that, seen through the spectacles of capitalsm, there is no future for the "multitude," will assuredly result in an investigation by the 'most intellectual' nembers of said "multitude" of a system of society in which a few alone an restize the object for which all have been carefully trained and eduextra time, such violation would pass cated. Such phrases as the "survival of the fittest" and the "reward of speial ability," etc., and other capitalist are well-understood beforehand to be sophistries of similar nature, cannot e relied upon to convince the multiude that their future is hopeless and that this condition must be accepted with resignation upon their part. And he growth of revolt amongst the tellectual proletariat, will bring to their otice that there is at present in existnce a similar revolt amongst the industrial proletariat against the same conditions, which will ultimately result in a recognition of the ommon interests of both, and the neessity of united action. Even now our universities and colleges are turning Why? Because the constitution rests out thousands upon thousands of young men and women, equipped and educated for professions by which they hope at the very least to obtain a comfortable subsistence. A short period spent in the competitive capitalist world outside of the walls of these institutions will quickly dispet these illusions, and form the basis for a political union with the exploited industrial proletariat for whom the future under capitalism is equally dark. And from these united efforts will spring the socialist form of

society, the only hopeful future for the

Work of the Conference.

Basis of Amalgamation of Socialist Forces to Be Submitted to Referendum Vote of Both Parties.

TAXABLE SALES OF THE SALES OF T

S. D. P.;-

Comrades: The respective national conventions of our parties having instructed us to devise a basis for the union of our parties, we herewith submit for your approval the result of our

In doing this we are well aware of the fact that the treaties submitted by us are not perfect in all respects and that many provisions of the same could be improved upon. We beg the comrades to bear in mind how difficul it is to satisfy every member of both parties on all details in preparing a plan of organization and action involving so many propositions as the one

The provisions, moreover, are but temporary in nature, and our parties, once united, will have ample opportunity to modify the same at the next national convention, or in the manner provided by the proposed constitution If a modification should at any time seem advisable.

The desire uppermost in the minds of your committees during their joint deliberations was to devise a plan to its principal features satisfactory to both parties and one by which we could, once formally united, start on the great work of propaganda and organization involved in the approaching national campaign, without further

With this end in view we have pro posed a provisional party administra tion, to be elected while the vote is be ing taken on this treaty, and to be constituted as soon as the result of the vote is ascertained.

The only point on which two propositions have been submitted to the voters is that of the party name. We have no recommendations to make on the subject, but leave this important matter entirely in the hands of the membership for such decision as they may think best.

The committee has submitted to you the question as to whether you will abide by the decision of the majority of both parties on a joint count with respect to the name, if such procedure becomes necessary. An affirmative vote their form of organization in accordon this question will secure union, as negative may become fatal to union With these few explanations we leave the matter to the wisdom and good sense of the comrades in both parties, trusting that they will successfully accomplish the great work to which we have contributed to the best of our

Respectfully submitted, For the Conference on Unity: N. I. Stone,

Question'I: Are you in favor of the following constitution? Vote yes or no.

from payment of dues. ernment. The party affirms its stead- QUESTION III. fast purpose to use those powers, once

achieved, to destroy wage slavery, abolish the institution of private property in the means of production, and establish the Co-operative Commonwealth.

In the United States, as in all other civilized countries, the natural order of economic development has separated society into two antagonistic classesthe capitalist, a comparatively small class, the possessors of all modern means of production and distribution fland, mines, machinery and means of transportation and communication), and the large and ever increasing class of wage workers possessing no mean of production.

This economic supremacy has secure o the dominant class the full contro of the government, the pulpit, the chools and the public press, thereby naking them the arbiters of the fat of the working class, while it is reducng it to a condition of dependence mically exploited and oppresse and degraded, and its political equality sendered a bitter mockery; and the ontest between these grows ever sharper. Hand in hand with the growth of monopolies goes the inmhilation of small industries and the middle class depending upon them ver larger grows the multitude of des titute wage workers and of the unem ployed, and ever fiercer the struggle setween the class of the exploiter and the exploited, the capitalists and the

don are intensified by the recurring ndustrial crises continually rendering the existence of the greater part of the population more precarious and uncer tain, which amply proves that the mod ern means of production have outgrown the existing social order based on profuction for profit.

Human energy and natural resources re wasted for individual gain.

Ignorance is fostered that wage slavery may be perpetuated. Science and invention are perverted to the exploitation of men, women and children.

The lives and the liberties of the working class are recklessly sacrificed for profit.

Wars are fomented between nations: ndiscriminate slaughter is encouraged; the destruction of whole races is sanc ioned in order that the capitalist class may extend its commercial dominion abroad and enhance its supremacy a iome.

The introduction of a new and higher order of society is the historic mission of the working class. All other classe lespite their apparent or actual con flicts are interested in the upholding of the system of private ownership of the neans of production. We therefor charge that in this country the Demo cratic, Republican and all other parties which do not stand for the complet overthrow of the capitalist system of production are alike the tools of the

The working class cannot however act as a class in its struggle against the collective power of the capitalist class except by constituting itself into a political party, distinct and opposed to all parties formed by the propertied

We, therefore, call upon the wage workers of the United States, withou distinction of color, race or sex, and upon all citizens in sympathy with the nistoric enission of the working class to organize under the banner of the party truly representing the interests of the toiling masses and uncompromisingly waging war upon the exploiting class, until the system of slavery shall be abolished and the Cooperative Commonwealth shall be es-

Pending the accomplishment of this. ur ultimate purpose, we piedge every effort of the party for the immediate improvement of the condition of labor, and also for the se-

curing of 'ts progressive demands. "Workingmen of all countries, unite! ou have nothing to lose but your chains, and a world to gain!"

As steps in that direction, we make the following demands:

LABOR ITEMS.

Notes From Trades Union Journals and Exchanges, Throughout the United States.

For further Labor Items see 'Foreign Social Democrats, of Saginaw, Mich.,

olled over 600 votes, treble the number of last election.

Social Democrats of Cincinnati polled an average of 1,625 votes. S. L. P. combined with them. A splendid beginning for the new movement. Ex-Attorney-General Griggs is to be

appointed to the United States supreme ourt bench. Griggs is controlled by the Standard Oil company. In Walthamstown, England, the Soial Democrats carried the day in school

board election, polling 2.538 votes against 925 three years ago. Alderman Perry, Social Democrat, of Brockton, Mass., who voted in favor of granting a telephone company a fran-

hise, was fired out of the party. The granite cutters' strike in the east is not yet settled, though many firms have granted the eight-hour day. Both sides are standing firm at present. Joint meeting between S. L. P. and

tions of the country to ratify amaigamation and the nomination of Debs and Harriman. Cigarmakers are still on strike against the Kerbs, Werthelm concern in New York, and nearly all employes in the Lancaster, Pa., branch factory have

also gone out. The firm is now buying

S. D. P. members are held in many sec-

up sweatshop goods, which are palmed off on the trade. The Enterprise, populist paper of Stoddard county, Mo., says the People's party belongs to the past and is sinking into its grave, and that it is the duty of, all progressive reformers to go forward into the new socialist party if they are really in favor of doing something for

the people. The Freemen's Labor Journal, of Spokane, Wash., an independent paper, says that when Debs comes to that state this summer he will draw larger crowds than either Bryan or McKinley could. It is also stated that there are now seven papers in the state that support Debs and Harriman; and a ticket will be put up in every county .- Cleve-

land Citizen. The Texas Republic, published at Paris, Tex., by Sim R. Carothers, and oldtime populist agitator, has hoisted the flag of Debs and Harriman. The Republic says: "Socialism is the rising sun that is to warm liberty into life. No backward step now. We have all to gain, nothing to lose but the galling chains of slavery riveted on us by the old parties. No modification of existing the iniquities. The mention of Debs' name at Waco (state conference) re-

newed the '103' enthusiasm of '96." The eminently "practical" trades unonists are receiving a lesson through the "logic of events" which will compel them to adopt the "Impracticable" policy advocated by the socialists. They are learning that a fight against the bosses with the public powers on the side of the latter is a losing game.

The lockout of the workers in the building trades by the united contractors, which has been enforced for the avowed purpose of breaking up the ultimate object of breaking up all the unions, illustrates some startling phases. That demagogue and corrupt politician occupyng the mayoral chair, Carter H. Harrison, pretends friendliness to the strikers. See how it is done.

On the 11th inst. he is conveniently absent from his office. Corporation Counsel Walker is acting mayor in his absence. He gives Kipley instructions in regards to dealing with pickets, which are all against the strikers. Then on the 12th the political fakir returns and unbosoms himself as in sympathy with the strikers, and declares the contractors are to blame for all the trou-

But mark you the instructions of the Acting-Mayor Walker to Chief of Police contractors will be assisted by Harrison's police, but he will sympathize with the strikers. "What fools ye workers be!"

Do you not think that 100 copies of suits of this vote and transmit the The Workers Call coming to your town same with the original returns to the every week would help your cause members of the committee elected for that purpose at the conference in New York, to-wit: N. I. Stone of the S. L. and get to work.

AS TO THE "MANIFESTO."

Comrade Max Hayes Refutes the Charge of Broken Piedges.

A thunderclap from a clear sky could not have surprised me more than did the issue of The Herald of this date. I am not only astonished, bu pained and chagrined at the "manifesto" premulgated by the Social Democratic party executive board. Your board accuses me, among others, in many words, of double dealing and trickery. I plead not guilty, and as a socialist and an American citizen I emand the right to be heard in my own defense, as well as in defense of my colleagues and comrades, feeling confident that the fair-minded and tolerant members of your party will judge impartially and render a verdict in accordance with the facts.

This is no time for hysteria and wild insinuations!

The "manifesto" says: "Mr. Max Hayes, on the floor of the convention Thursday afternoon, announced his personal choice of the name Social Democratic, and in strong pledged himself and his paper, the Cleveland Citisen, to the name.'

Correct. Again, in reporting action of New York conference: "It must be noted also that while Mr. Max Hayes, heretofore described, had pledged himself to work for the name, nevertheless he evaded the responsibility by ab senting himself from the conference while the question of name-was under He promised Comrade Leonard D. Abbott in New York that would attend a session and speak in favor of the name. This he failed to do."

This implies trickery, cowardice and a breaking of pledges on my part. It is a jumble of half-truths. When I returned to Cleveland, and reported the action of the Indianapolis convention at a large meeting of local socialists as Social Democratic party comrades will testify, I declared in favor of accepting the Social Democratic name Several Socialist Labor party comrade: announced that they would vote for another name, which, according to socialist ethics as I understand them they had a right to do. In the Citizen of March 17 the following was printed in a leading editorial on the question of amalgamation:

"The Social Democratic party will urge that its name, be accepted by the united movement rather than that a new name be selected, and thus increase the confusion. It is pointed out that no stigma is attached to the title that it is international in scope, and that it expresses perfectly what the labor movement stands for. The writer believes that the arguments are good enes, and that, if legal difficulties do not stand in the way, the easiest and most satisfactory manner to set tle that question is to adopt the name Social Democratic party. We are not felish-worshippers. A principle under any name is still the principle."

As regards the various meetings and onferences, I did not dodge anything. When the so-called "peace confer-ence" took place in the Indianapolis botel, I was addressing a Social Democratic mass meeting in the criminal court room. When the name question was being discussed in New York, I attended the weekly meeting of the Central Federated union and addressed that body, having been pressed by, a number of socialist delegates to do so. and Monday morning I addressed the striking eigarmakers. Questioned by Comrade Abbott, Saturday evening, whether I favored the Social Demo cratic party name, & I replied that I did. I do yet, and will vote for it.

But I did not believe, and do not be lieve row, in making of the name greater issue than of principles, platform, ticket, tactics, unification and everything else combined, as a few-of our hysterical and excited friends are it was nothing of the kind. It was ; were wrangling over this insignifjeant question-like a lot of schoolboys would over the momentous question whether a red marble is as pretty as a yellow one and would roll as well and as far-I was, to the best of my ability, attempting to make a few more converts to our common cause.

It is gross unfairness to charge our sople with duplicity, and to harbor all sorts of senseless suspicion. I-believe that Comrades Harriman, Hillquit and the others, who have sacrificed so nobly and have worked so hard in overthrowing bossism, are deserving of great credit for what they have done. The membership of our party demands that two names be submitted to a general vote, and it looks to a man up a tree as though your executive board is not in favor of one of the fundamental doctrines of socialism -i. e., majority rule. If the name should fall to receive the concurrent majority of both parties, what then? Continue to vote all summer? should the majority lay down to the minority? Who said DeLeanism! the name on the ground that the nem Again, we are accused of being but a mation of Harriman and Hayes would are you afraid of then?

Many other absurd charges and in-simuations appear in the "manifesto" that I have neither the time nor the nctination to reply to. I am sure that conference, except with the provise the Social Democratic party member- that such course was necessary to en ship will not allow itself to be influ- able Berger to 'ase his influence for enced by a display of I-won't-play-in- two hours." Berger did not even se your-yard spirit. I don't believe that Debs before the latter's acceptance was Comrades Carey, Chase, Hoshn, But, made public; therefore, there could not cher and Lonergan will claim that possibly be any continuance of a con they were tricked or treated unfairly; tingent pledge, as the contingency was in fact, all expressed the greatest absent pleasure at the happy termination of No. 8. That Max Hayes over by word of the "giants" of today. They will negotiations in New York and I believe or act in New York or elsewhere, either none of them be so tall that they caneven Comrades Stedman and Halle attacked or declined to support the were satisfied as a whole.

There are some people in this world

in even the most infaute particulars. They will rule or rulp, being incapable of real leadership, a welding together of homogeneous elements. Such a man is Daniel De Leon. There are others Nevertheless hurran for socialism in our time!

Max Hayes. Cleveland, April 7.

The Manifesto Against Unity.

To the Editor of The Workers 'Call: The Social Democratic Herald of April 7 contains a "Manifesto" in which four of the S. D. P. National Executive Committee arraign all the S. L. P. delegates (from the Rochester Conventio to the Indianapolis Convention) as mer who in the conference committee broke oledges made in Indianapolis, Manifesto also distinctly avows that the S. D. P. delegates to the conference ere false to the interests of the S.

The manifesto is blased, illogical and intrue: It bears evidence in almost every line that all information that was furnished as its base, came not from the majority of the S. D. P. committee or from anyone who wished to make known facts, but from a minority, who went to the conference with cut and dried plans (perhaps instructions), to practically absorb the S. L. P. or to do what has been attempted by this manifesto-to tear down the reputation of all who were foremost or active in the movement for unity. As I have been included(paragraph 4), in the list of those who broke their pledges I send this to you for publication. Almost the ntire front page was used by the four ligners in an attempt to blacken the character of all concerned in the con-It is evident that the four signers had rather place any obstacle in the way of the socialist movement than to see local power and interest made smaller, as the socialist movenent grew larger by the unification of political organizations

Many weeks ago I pointed out in the lass Struggle, that the opposition to would come only from those indiiduals holding high or salaried post ions. The unexpected has not oc-But that the method should b that of De Leon-ruthless and reckless character assassination-no one could well expect from those who profess the high principles of socialism. Yet such is the case.

I shall not attempt i nor could I in twice the space occupied by the mani festo), to call attention to all the errors and untruths in the manifesto. It is one huge black daub, hurled with but one intent, to besmirch the reputaign of those who have served the socibitst cause honorably, faithfully and to the best of their ability. A great majority of the Conference Committee were for many years working and struggling to advance the socialist movement when the signers of this nanifesto were advocating the reac tionary doctrines of the middle class

I shall here only partially refer to the absolute falsehoods of the manifesto The accusation by intimation and attacks by invendo; the blunders and contradictions cannot at all be attend ed to here.

The falsehoods in part are:

No. 1. That the Herald was open to discussion regarding unity. It was no 'open." It was closed to many that I

No. 2. That Benham broke any

No. 2. That Benham ever agreed to "aggressively" support the name S. D P. I was known to be opposed to the name S. D. P., but said I would with draw opposition if Harriman and Hayes were nominated. They were not nominated. I opposed the name in the conference but broke no pledge in so doing No. 4. That the Indianapolis Conven

tion was essentially a mass convention convention in which onsetoneth of the delegates had a majority of the voting power in their pockets. Though dez ens of questions were decided, the delegates voted but twice by recording the votes of the signers of their credentials No. 5. That Harriman has eve agreed to support the name S. D. P. without reservation, is untrue. When Harriman and Hillquit (with so much mystery) were charged by Heath in th Conference Committee, the matter was shown to be so absurd that no one ex copt Heath showed any signs of the lieving a word of it, and Heath put in his time explaining how he had been misled into the belief, etc. Stedman and Margaret Haile afterwards inslated on Hillquit being a candidate for Pro visional Committee, and both said h was the best man New York could for nish, all S. D. P. delegates concurring except Heath, who sulked.

No. 4. That Benham ever used the word "acceptable" in connection with the words Social Democratic. No such word as acceptable was ever used, in timated or implied. I only here with "few hundred kangarooa" Well, what make its application to the united party possible. (Edward's affidavit.)

No. 7. That Harriman and Hillqui ever obligated themselves in any man her to support the name S. D. P. in the

name S. D. P.

No. 8. That the name was discussed who were bound to have their own way for one whole day. It was discussed

Sunday, March 25. No. 10. That the Committee on Conerence voted for or proposed to submit we names until the S. D. P. delegation through Chase, made the proposition on

No. 11. Stedman did not state at the inference that Harriman had no conditions upon his statement regarding name, Stedman said "he did not re member anything of that kind in that onversation on the street,"

No. 12. It is false that the Indian apolis Convention did (or could) "instruct" the Joint Committee. It might instruct the S. D. P. delegates, but not the Joint Committee.

No. 13. That the S. L. P. has stirdiously avoided giving information re garding its membership. Information as never been asked for, except once and that was in the Conference Committe, at New York. The S. L. P. National Secretary replied, giving approxmately the membership. This was evdently satisfactory. If it had not been, request for inspection of the books would have been cheerfully complied

No. 14. That the S. L. P. does not know its membership. If the S. L. P. authorities do not know their memberbly, how could they 'studiously evade giving definite information (which they do not" have)? The four signers say they" do not knr w, and then find fault with them for not telling. They do know and have been and are now willing to give any information on proper

SOME OTHER THINGS.

There is no doubt in the mind of all who are acquainted with the facts regarding the Wednesday night confernce in Indianapolis, that Berger knew Dobs was to accept. The fact that Berger insisted, and argued and took up so nuch time/in order to get a qualified pledge from some of the S. L. P. dele gates, and that he at first refused to go ind see Debs, unless Benham would also yield, shows, with the other cirtind closed doors to make the S. L. P. lelegates personally pledge themselves to the name S. D. P. Hayes was not here; they did not care for him. was already openly pledged. Only for he imprudence of one S. D. P. delegate, the had been talking with Debs, and let the matter out by mistake, the trick yould have succeeded. There are several others implicated in the trick, unoubtedly Gordon, and others higher up the S. D. P. ladder. Their names it does not seem to me necessary to an-

BROKEN PLEDGES.

On Monday Berger pledged himself o Benham to "use his great personal influence with Debs" previous to the presentation of Mr. Debs' name for nomination. "At the conference Wednesday evening, after Debs had been ominated and had declined, Berger aid he HAD NOT used his influence. If not, why not? The fact is not to be oubted that he had, and knew the renit of the efforts in that direction.

On Thursday morning Berger promsed Harriman and Hillquit that he culd not present the name of Harrioan for vice-president. Berger went lirectly from the hotel (where he left farriman and Hillquit) to the convenion and placed Harriman in nomina ion. Was that because he was so enhusiastic for Harriman? Was it beause Berger leved him so? 'No. was another trick with a double puree. First, to get Harriman before the cople in a secondary, yet, prominent osition; second, to be able through his sing in this position to force him from he S. D. P. ticket, and thus prevent the ontinuance of the friendly basis upor chich the relationship between the onrties then existed.

ANOTHER VICTIM SOUGHT. In the Conference Committee when the S. L. P. brought in the list of Your tames for candidates from New York. name was not there. Sted nan and Haile immediately protested. Both insisted that he must be a candi date as he would be the most valuable man that New York could send. A the solicitation of Halle and Stedman Hillquit was made a candidate. I enteerd protest then and there, knowing the characteristics and desires of the two who most strenuously insisted. It was my opinion then, since made an abcolute fact, that Hillquit was set up as candidate that he might be knifed in full public view, as he has been by those who insisted upon his candidacy for the Provisional Committee. When I made the protest, every member of the Joint Committee pooh poohed the idea of the charges ever being mentioned again. Hillquit's name was the only recomsendation made from either party.

As for the purport of the manifesto, t is in keeping with the facts above

I may yet be obliged to acknowledge hat in my weal for union and in the ope of its accomplishment. T verestimated both the wisdom and sinerity of the Social Democratic party. If the membership can be driven from he plain duty to the socialist movement by the cry of "stop thief" set up y the Chicago imitators of De Leon then I shall be forced to the conclusion that there are yet men professing so halism, but who still yearn for the hand or usurpation and the lash of party masters.

There are some other matters of inerest in connection with the unity matter, and I shall in the future be pleased to make some comments upon the diosyncrasies and weaknesses of some their peculiarities are made known to

I see that Edwards and Gordon, con-

scieus of how lightly their ordinary statements are regarded by their party membership, have sought to make impressive their statements in this case by apearing before a notary and swear- Telephone Main 3701.

I still have an unconquerable desire for a united socialist movement in the United States. And union will come, and soon, in spite of all interfering of-Acials and their 'aggressive tactics' of personal vilification and wholesale re-

While thoroughly cognizant of the enstable character and unsavery acts of some individuals in the S. D. P., the delegates and members of the S. L. P have no disposition to allow the miseeds of a few individuals to stand in the way of unification of the socialist forces in the United States. The ne essities of uniting the socialist organizations (representing the same principles) are above the acts of individuals, or the personal desires for con-To all acquainted with the facts in the 79 Dearborn St., rooms 228-330, CHICAGO. matter, it is apparent that the charges nade and reasons given in support of the manifesto, are simply filmsy ex-

uses to block the road to unification. Jesse Cax, V. Berger, Seymour Stedman and F. Heath by promulgating this manifesto, have vilified those foremost in the work of unification in both parties; they have scandalously attacked Harriman, the unanimous choice of the Indianapolis Convention for vice-president; they have disowned and repudiated the majority of the Social Democratic Conference Committee; they have refused to accept the work of manded it. the Joint Committee.

Will the membership of the S. D. F. llow a few individuals to everthrow or hamper the work of the Indianapolis Convention, the work of its delegates to the Conference, and the work of the Conference Committee?

Incidentally, would it not be very adantageous for the Republican party o have as many Democratic parties in the field as possible? And might not the Republican party so "interest" the four signers of the manifesto that they would make the stand they have for "Democratic" as against anything and everything? "Under such conditions ing that "extremes meet," and at this expression of the manifesto) that such is the case, "yet we contend that" it might be so.

In any event the action of the four ecutive Committee is a sweet morsel any practical significance to the workfor every enemy of the socialist move-) ingman. Who are the "we," "us" and mnt. All or any opposed to socialism "our," that the speaker alludes to? If mnt. All or any opposed to socialism could afford to pay almost any price the average wage earner can yet ident. for such a service for the cause of ify himself as being included in the

G. B. Benham.

"WE TOLD YOU SO."

When Capitalists Speak Truth, They Endorse the Socialist Positio

The events, which within the last two years have launched the United States into the full tide of international capitalism, to stand side by side with other capitalist national groups, who previously were denounced by the public press as grabbers and plunderers of or neonlo's territory these events their causes and significance, have been onstantly insisted upon by the socialist press to be the natural and logical outcome of the system of capitalist production, which in its development must inevitably burst the national boundaries in which it had been confined during its earlier stages; that such process was not and could not be attributed to the ambition, greed or other qualities of individual politicians, but to the inherent forces developed by the economic system of the present. To those reasoning power- was confined within the narrow bounds of the socalled "individualism" of capitalist so ciety, this explanation seemed incom prehensible. But if we can add to it the straight testimony of a prominen capitalist statesman, it may perhaps be ensidered worthy of further inquiry by those who at first rejected it as imsatble and visionary.

Below we give some extracts from the Emory Smith before the Commercial club of St. Louis, which, agreeing as it the subject will perhaps be of interest to those for whom the name "socialist causes distrust and alarm. The speaker commenced as follows:

"Our pathway is determined by our requirements. The country has grown up to this step, and its growth cannot be stopped. Commercial development is the inevitable necessity of our agricultural and manufacturing supremacy. The demands of our industrial position compet us to enter upon commercial expansion."

It will be borne in mind that the speaker was addressing an audience of point "business men," commercialists, men to Some ver year: 25 cents for six months whom the upholding of the system whom the upholding of the system which compels expansion, is of the very highest importance. Such utterances would be absolutely unfit and unwise as a political speech addressed to a

reason-they are true. The speaker

"Had there been no war with Spain, had the new and glorjous May morn of American liberty never shed its lustre over the Bay of Manila, had no victory Ambrican Books, and the victory over the Bay of Mamila, had ne victory at Santiago brought a brilliant triumph of peace charmed with greet ferponsatibilities, we should still have been compelled to look beyond our contingnations bounds. It was inevitable that we should advance out of our isolation and turn our faces outward to the world our transcendant industrial growth and its imperative need of outlets demanded it."

Territorial expansion has not been and is not now the object of American and its rect now the object of American and the rect now the rect now the object of American and the rect now the rect needs to rect now the rect needs to rect needs t

and its imperative need of outlets demanded it."

"Territorial expansion has not been and is not now the object of American ambition. What we have done has been the inescapable, overmastering logic of events, and not the deliberate aim of any policy. It has been enough to give us such a position and the opportunity in the east as 100 years of ordinary history would not have brought, and there is no need of more. But even had there been no such glittering chapter, our continued material advancement would have required us to extend the arms of our commerce across the seas, and commerce means a navy and outposts and defense."

Comment upon the above is entirely unnecessary. It is a well-known saywe do not claim" (to use the elegant point, capitalism and socialism touch and agree. It is only necessary to say that the sense and meaning of the above are in thorough accord with the socialist conception. There is but one unbers of the S. D. P. National Ex. faise note in this address, which is of above, the conditions of his material existence may be ultimately depended upon to show him his true position in present society, and that the "we, 'us" and "our," refer to his economimasters, the capitalist class alone. When he has acquired this knowledge ocialism will have gained another re-

A base attempt has been made to steal away the reputation of the 'hero" Rocsevelt, by another "hero" called Baron, who it seems is colonel of the Seventy-first New York regi- Mil ment. The latter accuses Hoosevelt of cowardice at Santiago during the Fortunately Teddy has had a splendid opportunity to refute this unfounded charge, which he has not been slow to avail himself of. A number of Italian workingmen at the Croton dam, have had the audscity to strike for higher wages, and Roosevelt rose to the situation by ordering out the state cavalry for the purpose of to the "stronuous life" which low wages involves. You can't keep a "good man"

Socialism the Only Message of Hope for the Vast Army of the World's Toilers.

intelligent workingman of the soundthe other. Our quarrel is not with a rious obstacle to our progress lies in first, with the knowledge that all other the notion that our struggle is against interests will naturally follow. MEN. So long as we imagine that the capitalist is to blame for the conditions which exist and that there is any use appealing to him for the righting of our ngs, so long shall we move round and round in a circle and never get anywhere. HE CANNOT DO ANYTHING FOR US, NO MATTER HOW MUCH HE MIGHT DESIRE TO.

I do not question the value of labor unions-they are one of the steps toward the emancipation of labor. But they are in no sense an end in themselves. To think of them as a means of securing higher wages is to miss their real meaning. That man who thinks that what he wants, is higher IS JUST WHAT EVERY LABORER THE WORLD OVER SHOULD BE SYSTEM IS ABSOLUTELY SYNONY-MOUS WITH SLAVERY-not with African slavery, but with a far more hopeless and hideous sort. The maintenance of the wage system would mean appointment of humanity's highest and

The labor union is a sign-board pointing to something better. It means that the interests of all laborers are one, and it also means that the interests of employers and employees are diametrically hostile to each other. There is no harmony between the two and to pretend that there is, is to trifle with the facts The interests of capitalism are served by the making of profits. Abolish profits, and the system of capitalism immediately goes out of existence. But the interests of the laborer are not served by profits, because he does not receive them, and he cannot receive them. They could have no meaning to him. All he can possibly receive is the equivalent of the product of his labor, that which shall enable him to buy back all that he has produced. And that is not profit. It has a better name, a name which does not occur in the vocabulary of capitalism-

The labor union also means that the fight, they must stand together as a bids equality of opportunity. It means class. And something more than this a system of injustice from base to dome. they want. They must be united for a that all the laws are made in its interdefinite purpose. The trouble has been thus far that they have either concentrated their efforts upon a purpose that fighting a battle that ought never to be won. On the one side, they have fought for an advance in wages or against s reduction-in either case it means the maintenance of the wage system, and therefore slavery. Slaves fighting for the defence of slavery! On the other side, we have the spectacle of the trade unions contenting themselves with trying to limit the number of apprentices species of tyranny to which the Ameri can people never will and never ought to submit. I deny the right of any trades union on earth to say how many men shall work in a certain trade or Let the workingmen of this country learn at the earliest possible moment that unless their claims appeal trans parently to every good man's sense of justice, their cause is lost to begin with No cause that has not in it, so that al can see, the claim of justice, ever 'ought to succeed, or in the long run can

But apart from the impertinent in cannot be effective. No trade union no all of them together can bring all the laborers into their membership. Fewer and fewer are the great industries that unions. That weapon has lost its effectiveness, if it ever had any. When tod great a strain on human nature to expect them not to take the place of right and duty to work rather than see his wife and children starve. All the too, will defend a man in that

gitimate course for workingmen to pursue. And that course is indicated in socialism. The socialist political move ment has come into existence purely to give the proletariat an opportunity to Abolition of Economic Masters gain their freedom. Think, working men, what that movement means. It is nothing under heaven but a workingnens' movement. It is devoted abso lutely to your interests. It has no other WAGE SYSTEM AND SLAVERY, interests to serve. It does not afford an opportunity for the fulfillment of personal ambitions. No man or set of men can ride into any sort of supremacy above their fellows on the crest of the socialist political tide. It is not a movement for the offices or to build up a great political machine to repeat the tyrannies of past times. It means the Here is a practical motto for the abolition of the springs of political corawakening proletariat of the world this ruption. It means the wiping out of the May Day anniversary: "Abolish the existing political parties. It proposes to tyranny of the Middle Man!" A moment's thought will convince any proposes to make a return to slavery intelligent workingman of the sound-impossible. It proposes to bring free-ness of the principle involved in that dom and health and happiness and We ought to know, of course, plenty within reach of every human that our struggle for individual freedom being that comes into the world. It is not a fight against this man or that proposes to make it impossible for any man to climb to any sort of eminence Vanderbilt or a Rockefeller or any other on the shoulders of his brother men. man that may be named. The most It proposes to make human interests

The system of capitalism under which we are living subjects the masses to the demination of a comparatively few. Economically speaking, we are all consumers. We must all have food and clothing and shelter, if we are even to exist. And if we are really to LIVEf we are to have anything worthy to e called LIFE-we must have a great deal more than food and clothing and We must have good food, clothing which gratifies our tastes, and shelter which is at once healthful and beautiful. We are more than a pack of animals, the theory of capitalism to the contrary notwithstanding-we are men and women. We have something more wages needs enlightenment. WAGES than stomachs, something more than physical perves and sensibilities. We have capacities for countless other and EAGER TO ABOLISH. A WAGE higher things. We love the beautiful or would if we had the chance. want to educate ourselves. We want to see and create beautiful things, hear and compose beautiful music, have leisure for travel and recreation. I hold the defeat of civilization and the dis- that these are all our natural rights And one man is just as much entitled to them as another. No man was ever meant to be the slave or the drudge of another-nor was any woman so meant -no matter how high the price paid for that slavery or drudgery. To attempt to maintain any such hideous doctrine is to nullify all morality and make one's self a beast.

The message of socialism to the vast army of toilers the world over is the only sane, hopeful, cheering, brotherly message that is being spoken to day. It has an insight into the present and a vision of the future such as no prophet of all the past has had. It declares that the earth belongs to all the people, that every human being that comes into the world bears stamped on his nature in its manifold capacities the certificate of his Socialism rests securely upon the well-supported conviction that life therty, and the pursuit of happiness are a universal possibility. Experience has only painfully proven that they are not a possibility under the regime of capitalism, indeed, that they are not thinkinterests of all laborers are absolutely able under that regime. And why is identical. If they are ever to win their that the case? Because capitalism foris necessary. They must know what It could not exist a day, but for the fact ests and the further fact that as yet the masses are ignorant of the power

The truth is, we are consenting to live under the tyranny of middle men. We are all consumers, and the mass of u are producers. It was perfectly natural that a class of men should be produced which should stand between producer and consumer at first to the great conmiddle men has become the MASTER CLASS, and both producers and consumers are absolutely at their mercy. They are the profit-mongers. Neither producers nor consumers, as a class, reelve profits. But this class of middle men is absolutely supported and maintained by profits. And they hold in their hands the government, the press, the church, society, everything. Are they morally worse than other men! all of them, and none of them at the beginning. If they have become posessed of the nature of tyrants, it is the inevitable result of their position. So long as we tolerate such a class, we are esponsible for them. Whether or not they are to continue depends entirely upon-us. We can abolish that tyranny nomic class. And there is every reason why we should do so.

The world has suffered from the tyr anny of the ecclesiastical middle man, and it still tolerates him to some ex But society as a whole has abolshed that tyranny in this country. We have no established church or religion. No priesthood has any legal right to nand our obedience or support Was this ecclesiastical tyranny represystem was and is the very essence of comocality, and its influence has no

Reform" Deals with Externals Upon Which Side Will It Stand in the Pending Campaign?

The Solution of the Labor Problem to Be Found Only in an Intelligent Use of the Ballot.

What is the duty of trade unionists

The writer is of the opinion that trade reason and that they are loyal to the A clear understanding of the principle declaration of principles of the great combined economic movement.

What is that mission? The abolition of the wage system. Why? Because been introduced, and from its prolific womb spring all the social lils of which we complain.

Under the capitalistic wage system abor is so successfully robbed of the fruits of its toll that an insignificant percentage of the population of this country has succeeded in getting control of all the natural opportunities and harn contrast of an arrogant, cruel and despotic plutocracy on the one side and a plundered and oppressed army of tolles on the other side

When we organize the capitalists apworkers; when we strike, the policeman's club and the militiaman's bayochanges will take care of themselves. slightest compunction; when we boycott a brutal labor-crushing concern, the courts are ready with their injune tions; when we demand labor legislation, the politicians sneer at us, pigeonhole our wills, or, even if they pass most unimportant ones, the courts declare them unconstitutional.

'Has not the time come to act? It has Today it is no longer rich and independent, which was their ambition in the past. The tools of procontrolled by the capitalist class, which tionized by the introduction of labor-

With the continuous introduction of ormers scheme of nationalization would the, and proportionately to that produc to enjoy for little more than mere rations. The labor class, according to the census reports, is propertyless, and with the capitalist class and gain control of the industrial situation through economic effort. That is settled beyond

This is so, because as already stated, the employers already possess the tools of production, the labor-saving machin the proletariat point of view, and has ery, and they are now entrenching themselves in capitalistic unions known as trusts and monopolles. There are Socialism, then, is not a reform but a today no less than 600 trusts and monopolies in existence in this country, this fact would save the reform-socialist capitalized at upwards of \$5,000,009,000, from many mistaken efforts. It would or over a billion dollars more than was invested in production in the census year of 1890. In other words, all the live capital of the nation has become restified or monopolized. It is now beng used co-operatively by the many for

stage of the evolution of capitalism; namely, the combination or trustifica yndicates, which are more or less close-ly connected, and which work together unanimously. These syndicates are and mining combines ,and they have

trusts are making a similar move. The Standard Oil trust, for example, already controls over thirty subsidiary trusts, and with their immense income each year the Rockefellers are able to gobble up the choicest "industrials" on the market, and each new trust added to their string means still greater profit and power. Thus the Rockefellers dominate largely in oil, leather, lead, copper, rubber, tobacco, whisky, cotton oll, sugar, gas and electric lighting and power, steamships and railroad transportation, iron mining, natural gas, barbed wire, fertilizer, salt, glucose, bricks, linseed oil, silver mining, auto-mobiles, etc., etc. Thus it is not diffi-

cult to see what the end will be. Owing to the fact that wage workers of this country, who are the consumers as well as the producers, receive less than one-fifth of the wealth they produce, consumption cannot keep pace with production, and so the warehouse are again filling up with surplus products for which there are no buyers. Signs point to another industrial stag nation and panic in the near future. It will be welcomed with joy by the great wind and, water out of many of the trusts, dump the owners "common" stock-the middle class-overboard (and at the same time reduce wages), and own everything themselves. The trust of trusts will be complete. . The holders of preferred stock and bonds will be in clover and can fraternize beautifully.

Meanwhile, what will be labor's pe tion in this great game of life? Will it weakly continue to follow the Judases and betraying politicians of the capitalistic parties? Labor will do no such thing if it is intelligent enough to understand its own class interests. trade unionists are now resisting the capitalist class upon the industrial field, and henceforth it becomes the duty of the trade unionists to likewise resist the same class upon the political-field, and become leaders in the labor army. In a word, they must be LOYAL to the fundamental principles of their organizations!

At the last convention of the American Federation of Labor, in Detroit, December 11-20, it was officially declared that no legislation would be seoured from the state and federal govmended that local and central bodies of labor take independent political action along the lines enunciated in the Federation's declaration of principles It was likewise declared that the trusts and ly good at figures. nonopolies cannot be destroyed by demagogical politicians, but, on the contrary, were the logical evolution of the capitalist system. The Federation. thereupon clearly pointed the way out of the wilderness of capitalism as fel-

And, furthermore, that this conven-tion call upon the trade unionists of the United States, and workingmen gener-ally, to study the development of trusts nopolies with a view to nationalzing the same.

Here is the solution of the labor probem. The nationalization or socialization of trusts and monopolles is now the pattle-cry of the loyal trade unionists of the United States (as in other countries as well, by the way). The time has come to bury past prejudices and animosities and to rally to the standard carried by Debs and Harriman.

"Turn from the past; it is ionsly.
And barren and bleak to the view.
It's fires are cold, it's stories are old,
Turn, turn from the past to the new.
Today leads you up to the hill-tops.
That are kissed by the radiant sun.
Today has no temb. life's hopes are in Today has no tumb, life's hopes are in And today has a prize to be won."

And that prize is the Co-operative Commonwealth. Socialism in our time!

Quid Pro Quo.

M. S. Haves.

"In discussing the spirit of the S. L. P., I am struck by the exhibition of it which appears in Comrade Benham's letter, which I wish everyone of our comrades to read with care, especially the paragraph in which he charges our executive board in "innuendo" so direct that specific averment could add nothing to list force, with being in the pay of capitalism."—Eugene V. Debs in Social Democratic Herald, April 21st.

ROUND I, S. D. P. COUNTER. (Not

ROUND I, S. D. P. COUNTER. (Not at all "innuendo"):

"The S. L. P. does not know its membership, and has studiously evaded giving any definite information concerning it. With these facts confronting us, it will be seen that their vote would depend upon the returns made by the secretaries of local, sections. Under such conditions, while WE DO NOT CLAIM that the returns would be fictitious. YET WE CONTEND THAT said returns MIGHT BE SO in the case of the S. L. P. Hence a majority of both parties, voting as one, might be a fictitious majority sô far as the S. L. P. is concerned."—Berger, Cox, Heath and Stedamn in the "Manifesto," S. D. Herald, April 7th.

S. L. P. CROSS-COUNTER. ("Innu-

"Might not the Republican party so interest the four signers of the manifesto that they would make the stand they have for Democratic as against anyfiling and everything? UNDER SUCH CONDITIONS, WE DO NOT CLAIM that such is the case, YET WE CONTEND THAT It MIGHT BE SO."—G. B. Benham in Workers' Call, April

onors about even. You should have been present at the beginning of the the power, and use it, too, to crush inde-pendant concerns. We are informed that after election the twelve great iron and steel trusts will combine, and the coal ism. WORKINGMEN, unitel

Let us save our fighting blood for the purpose of attacking the enemy.

The politicians are now fixing up platforms to catch votes; will they catch

Socialists have a large chance just now to exercise the beautiful virtue known as charity. There is no occasion to become ex-

cited; no man nor set of men can stay the march of evolution. The battle-cry "Workingmen of all

countries unite," applies also to workingmen of the United States. Socialists will have a much better use

for May 1 than to put it in shouting for Dewey or any other military man. Suppose the rumor that Croker was

dead were true? The system by which he got sich still goes marching on. The federal constitution will be called

on to do some surprising contortions the first time the socialists capture a state,

The workingman must be contented with the prosperity that is left over from what the other fellows cannot use. No good will be accomplished by turn-

ing out Senator Clark as long as a system is left whereby he can buy his way One of the vested rights of the poor

man is to go hungry; the police and the regular army will see that it is preserved to him. Unless the socialists nominate, work-

The Socialist Vote.

"LEST WE FORGET!

There is one side of the trouble with in the party that most of the comrades forget and that it is just the forgetting that is causing a lot of trouble-that is the effect upon the party press. When the comrades are using their time and energy to fight each other, the propaganda suffers, and while meetings and pamphlets can be recommended at any time with greater energy, a paper must be kept going continuously to be of any

Now the point of this is that The Workers' Call is in need of more subscribers and additional support of all kinds, and we hope that this hint will the state of be sufficient to bring them in.

THE SIGNIFICANCE OF MAY DAY. It is universally recognized through

out the capitalist world that the first Day of May is closely associated with the interests of the revolutionary proletariat, and in many European countries that date is looked forward to with doubt and alarm by the exploiting Let freedom's banner be unfuried. To right and justice cling: letariat, and in many European counclasses, who recognize that the great body of wage earners by whom the day And fear no earthly king.

—J. E. Nash is celebrated, represent distinct class interests whose supremacy means the overthrow of the capitalist system. The fact that the initiative in setting this day apart, came from the wage working classes themselves, carries with it also a significance that the ruling classes de not overlook. Before the workers had attained to the knowledge of the international solidarity and common interests of their class, before that knowledge had become sufficiently clear to abolish all national boundaries, and labor, the days set apart as labor holidays were in a large measure prescribed by the ruling classes, and the majority of the workers meekly accepted the dic tum of their' masters, more perhaps from the fact that a short respite from toll was given thereby, than from any other cause. Such days as a rule were king, queen, or other prominent representative of the ruling class, or as marking the date of some political event by which the scowing strength of capitalist development achieved victory over their reactionary enemies the feudal classes. But the establishment of the first of May as a day devoted to the aspirations of the proletariat and inaugurated directly by them, is a different problem entirely, as it clearly marks the entrance of a new power on the economic and political field, a power that can make no truce or hold no compromise with the supporters of the present economic system, a power whose realization means the passing away of the old forms of society, and the establishment of a new economic system based upon the broadest principles of justice and freedom. Though formally inaugurated by the International Congress held at Paris in 1889, the class-conscious workingmen of the United States may the energy of the toiler. justly claim that they were largely instrumental in having the 1st of May sejected as the International Labor day, turn the great international holiday of that day having been used in this country for several years previously as an initial day for different trades unions to attempt to obtain shorter hours and better conditions generally, in their respective trades, and that this fact to a farge extent determined the action of the International Congress in 1889 in

the material interests of the projetariat

of all countries, is shighly probable.

Since that period the economic force that have been steadily making for se peculiar significance It has become a day of inspiration for the workers and of terror for their masters. It is also a protest against the attempts to popuarize militarism, territorial aggrandize ment, and that sham patriotic sentiment by which the exploiting class hope to perpetuate the system of capitalist supremacy. The first day of May is in its final essence a clear expression of the class struggle, the conflict between the upholders of the system of private property in the means of production, and the disinherited tollers who create present ruling class, and the establishment of the new economic era, in which man becomes master of the means of production instead of their slave.

TRUTHS FOR TRADES UNIONISTS.

Tis said that eighty-five per cent, That labor now produces;
Becomes the prey of wealthy men,
Through legalized abuses.
Though few in numbers, they project,
The laws that rule the nation;
And all the claims of wealth protect,
The LAW is their salvation.

They own the daily press, and plan They own the daily press, and plan To govern each election;
And fool the honest workingman.
To vote his own subjection.
All honest toil these men evade,
Yet live in kingly splendor;
And manage so that courts are made,
To be the thieves defender.

One thing alone the rascals dread, From this alone are shrinking: They'd rather see their workmen dead Than do some honest thinking. Grown desperate with want and care, The workmen congregated; To gain a little larger share, Of that which they created.

In wondrous haste the daily press, Sought out a close communion; All economic truth suppress. Within the labor union. Our congress shows how well they plan; Behold those labor shirkers. With not a single workingman, To represent the workers.

The union throws its time away.

Good common sense would bid us think Till all became united;
Old party ties would quickly sink,
And labors' wrongs be righted.
Then think, discuss ideas, and then
Be never more contented;
Till in our congress, workingmen
Are fully represented.

Wake up, wake up, Oh! workingman,

SOCIALISM. A Definition (with Apologies) by Eugene V. Brewster.

Socialism is a system not to be appalled, corrupted or compromised. knows no baseness, it cowers to no langer, it oppresses no-weakness. Fearless, generous and humane, it rebukes the arrogant, cherishes honor and sympathizes with the humble. It asks nothing but what it concedes; it concedes nothing but what it demands Destructive only of despotism, it is the sole conservator of liberty, labor and proclaim the universal brotherhood of justice. It is the ripe fruit of democracy, the law of nature pervading the land. It droppeth like the gentle rain from heaven upon the place beneath. equalizing opportunity, dispelling inequality, and restoring to every person his natural manhood. . It breathes into the soul of labor the new life of the world and raises it from the level of the heast. It restores to the producer his stolen implements of production, equitably distributes his products and trans forms the lowly slave into ripe and beauteous manhood. 'It not only appeals to selfish materialism but to th highest moral and intellectual attributes known to our nature, yielding bread in abundance to the starving moral food for the idealistic and the highest conception of justice to all. The ignorant, the vulgar, the base in spirit may denounce it as a dangerous thing, but in the social and industrial evolution socialism shall show to all the world that its principles are eternal, its laws immutable and its consummation inevitable. It is an actual dream of the future paradise and sees in the present only a hideous nightmare. It seeks no to remedy or reform, but demands a peaceful revolution from slavery to equality, from tyranny to justice, from base and ignoble degradation to com mon happiness and contentment. It is noble, it is sublime-the perfection of human endeavor, that, recognizing the mutuality of all true human interests, quickens the pulse of the statesman erves the pen of the scholar, invigorates the voice of the orator and doubles

> Where else save in America would the capitalist class have thought to labor into a celebration of a victory in a plundering expedition for gain. same competition that produced the trust is driving its, defenders to every possible, device to keep the workers from realizing their slavery and trying to break their chains.

Up to the present no "reformer" ha attributed the poverty of the workers to the fact that the porch climbers have abstracted their diamonds and jewelry. Inventive genius is seemingly at a low ebb amongst them just now.

"Well-dressed pedestrians whom no would mistake for pickets were pushed and shoved and told that they were blocking the sidewalk," says ar ndignant "Board of Trade" man who was hustled by the police round the Merchants' Loan and Trust building This account which appears in the Tribune of of April 22nd, gives a pointer by which the workers can be identified. A well-dressed man cannot be mistaken all wealth, the conflict that can for a picket. "By their rags shall ye mark of the stock gambler, the laborskinner, the politician and the parasitical hangers on of capitalism.

> The closing down of the American Steel and Wire mills has evoked much some of it so significant that if the brains of the working class were in anythe cause of the evils from which they suffer.

With remarkable unanimity the capownership of these mills enables the in dividuals who control them, to take away the means of subsistence from the ladies' society, they will also "prom the thousands who must work there or ise radical, reform" on anything else

But what is the difference between the power of J. W. Gates as representacan Steel and Wire company and the proprietor of any single factory, mill or mine? It is a difference of degree, not of kind.

In both cases the same power presents the workman from exercising his labor power on the means of production; the individual ownership of the tools and materials by and on which labor power must be expended to create a product. In both cases the same result is reached. Wage slavery stands so palpably condemned, that even the upholders of the system itself, cannot, in the face of this latest demonstration, find an excuse for its existence.

But in a few months, these same pa pers which have written so boldly, and shown so plainly, the frightful results of the system of private ownership of the means of production, and the abject slavery of the dependent propertyless class, will give forth an utterly different note. What will they say?

What will they say? As the presidential election draws near they will tell the workers over and over again that they are free men, and that their interests are identical with those of the cossessors of the power that makes them starving tramps, whenever the desire for increased profits makes "closing down" necessary.

What remedies are offered. Listen ye workingmen! Laws are being demanded for the protection of the stock gambler and labor skinner, but not one proposition for the protection of your class

And why not? Because you have not yet sense enough to unite for your own interests and elect, your own representatives into the law-making bodies. That would be socialism, and therefore not to se entertained for a moment, you say? Well, time will show you that you will have to chose between socialism on the one side and starvation and slavery an the other. And it won't take a very long time either.

The strike in the building trades has reached a critical point. The "friends" of labor are trying to make a "settlement' 'and during the negotiations it were well to watch them closely. That political fakir, Harrison, is attempting to induce the workers to surrender th ceystone of their united strength, that is the Building Trades council. that bond of unity is broken the whole fabric of local trades unionism falls to pieces like a house of cards, and the rapacity of the contractors be left to work its will unchekeed. The enemies of the organized workers are those who advise a settlement of the conflict by dealing with single trades.

The same men who decry unity at the ballot box, are the ones who are now attempting in this manner to disrup the ranks of organized labor. Workingmen, watch your leaders, even if you consider them faithful, watch them!

Did you notice that most of the houses that were being pulled down as unsanitary, are those which are unoccupled or for which no rent is being paid All "reforms" which do not threaten rent, interest, or profit, are easily carried through.

The steel skeleton of the Chicago post office still remains as it has been for nonths. Work there is at a standstill. And yet there are workingmen, ployed, who feel proud that McKinley s a member of the Bricklayers' union.

Owing to alleged injuries inflicted on some of those pioneers of capitalist civilization called missionaries. has been decided to hold up the Turks or \$100,000. If the victim cannot produce this amount "we" are going to the port of Smyrna. The Turk should call to mind the Kiaou-Chiaou episode some time ago in China where Kaiser Wilhelm's fleet seized the port and nearly 3,000 square miles of land for

SNAP SHOTS BY THE WAYSIDE, the same alleged reason and still holds on to it with the "mailed fist."

> He should also be informed that although "we" don't use the expression "mailed fist," which figure of speech is the exclusive property of Bill Hohenzollern, yet there is amongst us an understanding that once the American flag is holsted upon a foreign shore it must not be hauled down again. Also that the idea of expansion is not likely to be abandoned while the supply of missionaries holds out. Taking these facts into consideration it would seem that the best policy for the "unspeakable one" to pursue in this case, would be to follow Kipling's advice, and "pay,

A "crusade for vocal sweetness" is being undertaken by some New York women who would probably die of inanity if the opportunity for dabbling in "reform" was denied them. These ladies are now forming a society whose object is "to make speech agreeable to the ears." This society "appeals to women all over the country and promises radical reform in the tones of American womanpood from the platform and in the home." These ladies evidently think that similar organizations for work among men are unnecessary. They are correct in this supposition. Their husbands, fathers, whose speciality is making speech agreeable to the ears of the proletariar, and their organizations get particularly active around election time. Like the ladies' society, they will also "prøm". Fraternally, etc. A "crusade for vocal sweetness" is emarkable comment in the daily press. ises radical reform in the tones of way active, they would not need to evidently think that similar organizalisten to socialist speakers to find out tions for work among men are unnecesitalist press deplores the fact that the agreeable to the ears of the proletariat. ly active around election time. Like ise radical reform" on anything else. for the purpose of keeping their class in power. When they fail to do this, the bottom will drop out of the "Society for improving the speaking voice," the tive of the stockholders of the Amer- ladies composing it may have to do some real work, and "reform" will get a much needed rest.

A Suggestion As to Party Name.

A Suggestion As to Party Name.

To Editor Workers' Call:

Dear Sir:—

Will you permit me to suggest the idea that in the coming referendum vote, the opportunity be also given to vote upon the question of dropping all qualifying terms and voting simply for the term SOCIALIST PARTY. Briefly stated, the reasons I would offer are these: We now have the Socialist Labor party, Social Democratic party and Christian socialists. Socialism is, in its very nature, intended first to elevate the laborer; second, it is pure democracy; third, it is essentially Christian; and in fact the highest ideal both of Christ. in fact the highest ideal both of Christianity and humanity. Now there are a vast number of people who are being rapidly educated up to the idea of so cialism, but not having leisure or disposition to thoroughly investigate the claims of all the different factions are apt to unite with one or the other, thus dividing our strength. I know many myself who have so long opposed the Democrats they could hardly be induced to vote a ticket that reminded them in any manner of their old prejudent. in fact the highest ideal both of Christ them in any manner of their old preju them in any manner of their old preju-dice. Then there are the Christian ao-cialists, which I have good reason to think are multiplying more rapidly than most of us think. The simple term "So-cialist" will suit all, whether fully edu-cated upon its different phases or not, while some qualifying term, though per-fectly proper to one thoroughly posted, might cost a large number of votes. We can all see that votes are most es-sential; as there are many (partly in-formed), that hesitate to vote where they know they will be outvoted, who they will be outvoted, who will gladly join us as soon as our vote climbs up into the millions. Since writ-ing the above my attention has been called to a communication of E. F. Hassinger in the last Issue of the Call, and I would most sincerely second his recommendations. I enclose fifty cents to renew my subscription which has been sent heretofore in the name of my son. Geo. S. Nash, having become thosoughly convinced that socialism is the ONLY solution of the labor problem and of justice and equality. I have decided to throw my whole life into the work, consequently you may in future send it in my own name. alled to a communication send it in my own name. Respectfully,

E. Nash -Minneapolis, Minn., April 17,1900.

A Sample of "Justice" for Socialists.

Editor of The Workers' Call: I am a native-born American citizen I have been living in Chicago fifteer years. I am a horse-collar maker by irade. My employer will tell you that I am a hard worker and a peaceable man. Tonight I was going down town when I met Elmer Vandervoort on Madison street. He stopped me and asked me where I was going. I answered that I was going to get a shave and was then going down to State street. He said he was coming right back and asked me to come with him. I said all right. We had gone only about twenty-five yards or so when a policeman put his hand on my compan I am a horse-collar maker

socked us to the amount of \$8.40 and the end is not yet as we have to go to the justice shop mill Monday morning to be skinned a second time and lose a half a Further comment is un-

recessary.

Yours truly,
John T Gamble.

P. S. I protest that it is an abomniable outrage that I should be arrested. Imprisoned in a fifthy hole and robbed in the above manner. The only plausible reason that I can give for the action of the police is that my companion sells socialist literature and the ruling class do not like it. This occurred about 6:30 p. m.

J. T. G. p. m. -Chicago, April 21,1900.

Editor Workers' Call:

Dear Comrade:—Since there is no basic principle involved in slightly altering the name of the party, but that some comrades are fibrely protesting whicher or no against a referendum vote to settle the matter, savors strong-

if not footisting in our ranks.

As to Methods. Editor Workers' Call: The time is fast approaching when the

Editor Workers' Call:

The time is fast approaching when the socialist workers will be out on the streets, in the halls holding meetings, calling the workers together and making plain to them the existence of the class struggle and its inevitable trumph by the overthrow of the capitalist class through the unity of the workers for the conquest of public power at the polls. One thing is necessary, that the speaker in the hall and on the stump, and the literature which is distributed should be in harmony. One thing is certain: in the work of educating the masses the socialist agitator will find the most potent factor to awaken the workers to be the fact that our methods as well as our principles are entirely different from those used by the eapitalist parties; that while in a political campaign of the capitalist party the personality of the candidates is pushed in the foreground and they avoid as much as possible to discuss their alleged principles. They look upon the mass of the voters as a lot of fools and mules, and therefore they in make a great deal of noise about the fact that this political heeler has flooped from Bryan to McKinley, or that political heeler has flooped from Bryan to McKinley, or that political inverse the mules by sounding the bell. The socialist agitation can never take that form one thing must be insisted upon, that the candidate subordinates himself to the principles of socialist maye, we want the amajority, and we will get that majority, and we will get that majority work sooner by insisting that we want the amajority, and we will get that majority much sooner by insisting that we have developed from Eryan to those who are different should be looked upon with susplicion.

We want a large socialist tote for the workers, and those who act different should be looked upon with susplicion.

We should keep an eye on those who make a personal canvass. They may be all right, but the election of no one man can help the working class. When a man runs away ahead of his ticket the circumstances sho nan can help the working class. When man runs away ahead of his ticket he circumstances should be looked the circumstances should be looked into. There are exceptional cases, like that of Comrade Marcus in the Seventh ward in this city. He was in no wise responsible, and stood straight for the principles, but we know the spill in the party was largely brought about by giving undue prominence to men who concentrated on their person double the vote that the party got, and there is good reason to believe that such results are obtained by dickering with the enemy. Our methods must be clean for principle.

B. Berlyn

BOOK REVIEWS.

THE PEOPLE'S MARX. A popular epitome of Carl Marx's "Capital," lishing Co., 23 Duane St., New York. Cioth, \$1.50; paper, 75 cents.

Although it has to a great extent

become the fashlon to present the public with alleged condensations of the whole circle of human knowledge comprised in the space of one or two small volumes, in deference to the supposed "busy" man whose time is too valuable to be spent in study, it must not be supposed that the work before us is to be included in this category. M. Gabriel Deville does not pretend to give the reading public a simplification of Marx's great work, a comprehension of which will always demand close application, and an average reasoning power on the part of the economic student. The remark of the ancient mathematician to his kingly patren, "Sire there is no royal road to geometry" is equally applicable to economics, and he would understand the complex social structure which exists today, cannot hope to attain that knowledge with small effort. The about twenty-five yards or so when a policeman put his hand on my companion's shoulder and arrested him. They started across the street and just before reaching the opposite curb Vander-twoort turned around and beckoned to me—he wanted to send me to friends of his for assistance. I started towards him when an officer in plain clothes arrested me also. The officer said, "You were going to help him (Vandervoort) give the policeman a beating were you?" I protested at being arrested and assured the officer that I was entirely innocent of any evil intentions. But he said "we do not believe anything you say." At the station we were put to the indignity of being searched. The fifteer read our private letters, counted our money, and when the officer goin hrough he asked me how I liked the JOKE. I said "this is no joke but a limed outrage." It was after 2 p. m. when we got out. The court officials of the purpose of this work is omitted. The purpose of this work is work upon our desk is neither more or

to give the reader a complete outline of the nature of capitalist production according to the Marxian theory, in the hope that said reader may be induced to apply to the original work itself in order to complete the details which are necessarily lacking in this abridgment, and we are of the opinion that M. Deville's work will completely fulfil this purpose. The author has succeeded not only in presenting the outline as a complete whole, but also in compressing it into less than 300 printed pages. and when the moderate price of this work is considered it must be admitted that those who desire to make themselves familiar with the Marxian philosophy have been given an in-creased opportunity of so doing, by the publication of this excellent epitome.

"LET THERE BE LIGHT."

Comrade Johnson of the S. D. P. Clears Up Some Tangled Ideas.

Comrades:

[A copy of this letter is sent to The Workers' Call in the fear that the large number of letters received by the Social Democratic Herald may delay its publication there. It is hoped that, by being printed in this week's issue of The Workers' Call it may reach some of the S. D. P. branches before the vote is taken on the union referendum.]

I regret very much the stand taken by Comrade Debs, for I feel that his intuitions for wisest action in behalf of the working class are unfortunate. In particular I regret that errors of factoccur in his letter, due to misinformation, especially as regards the situation in Chicago.

Concerning name, conditions have changed since Comrade Debs wrote his letter. Comrades Wiltshire of Los

headquarters.

Concerning what is said of the relations between the parties here in Chicago in particular, I must protest. The fact that many S. L. P. comrades have not called at headquarters is no indication of ill-feeling. But a few even know where it is. One could not expect more to have appeared, for all knew the hostile attitude entertained there for union. Aside from a few who did not call the great body of the S. L. P. are workingmen who have no opporfunity to come even if they would. How many of our members called at their headquarters?

The Chicago movement has been put by Gabriel Deville. Translated to Comrade Debs in a bad and prejulished by the International Pub- S. L. P. "at heart have no use for our comrades." Branch 9 and the branch in the 13th ward met with the S. on the most cordial terms several during the recent aldermanic campaign. The 23rd, 33rd and 34th ward branches of the S. L. P. have been addressed by our comrades or have advertised speeches by them.

Lastly, I am obliged to differ with Comrade Debs as to the possibility of moving forward on parallel against the common enemy. To be sure Newark, Cincinnati, Milwaukee, Cleveland and other places have shown the spectacle of two socialist parties cooperating, but that is well known to be the result of the pending movement for socialist unity. The very nature of competition, as we socialists surely know, makes it almost impossible to pull together. As separate parties we will inevitably try to wrest away each other's conquests, with a great waste

Let us BE socialists in our politics. Let us co-operate rather than continue the disgraceful fight between ourselves which we have had in the past.

The S. L. P. is just the same as it was two months ago, except that now they will take name. We cheered for union then. Are we to turn from it now? We have our candidate for president and our name. Is it that we don't want union but will only try to "swallow" them?

> Yours for socialism Roswell H. Johnson.

Workingmen of the world do not unite, you might lose a name even if

)When you hear the workers call for ocialism during the coming election, it may remind you that this paper is still

SOCIALIST UNITY.

Haverhill Social Democrat" Swells the Universal Chorus for Unity of Socialist Forces.

The question of union with the Social ist Labor party is again before the membership of the Social Democratic party. This has come about through the submission by the national executiv board of a manifesto against union and calling for a referendum vote of the party upon whether union is desirable of This action of the board has cre ated surprise and consternation among the socialists of the country It is safe to say that the issuance of the manifesto will bring down upon the few who promulgated it the disapproval of the great majority of the party members.

It was believed that the union of the two parties had been practically ac complished, the only thing remaining being the referendum vote to be taken by each party upon the results of the New York conference of the committees on union. That there would be different opinions as to those results was a fore gone conclusion. The matters of a name for the united party, headquarters, party press, etc., were expected to bring forth a general discussion, but it was beyond the calculations of all socialists that anything would arise that would prevent, hinder or hamper the final and complete unification of the great socialist parties of the United States. In this belief, socialists in all parts of the country had become electrified into new life. Plans were formulated and prepara tions made for a campaign that would startle the country. Old workers who had rested for years were returning and recruits were breaking old party affiliations to join the great crusade Labor papers were opening their colto the socialist propaganda and ympathetic words were being printed there none could find access before Even the capitalist press had been comcelled to give a mite of recognition, and the portraits and biographies of the two ncomparable candidates for president and vice-president, Eugene V. Debs and Job Harriman, were appearing in the leading and most widely circulated magazines and reviews. , Altogether, the reception accorded the actions of the chester and Indianapolis conventions and the New York conference demonstrated conclusively that the union was desirable and more than that, that it had become a necessity. . Suddenly, like a bolt from the blue,

come this manifesto attempting to reopen the question by asking if union is "desirable." If the situation were not such a serious one, if there were not so much at stake, this action of the national executive board would partake of the nature of opera bouffe and would But the future only excite laughter. course and progress of a great cause is at stake. A tragedy, not a burlesque, confronts us. Shall the movement for a united party of socialists, agreeing in principles, tactics and methods, go forward or be sidetracked at the behest of a few individuals who seem to be dissatisfied because things were not going their way?

To the first proposition, we answer: YES! To the second: NO!

Union IS desirable.

Union is desirable because the Socialist Labor party is composed, first of all, of socialists who have everything in common with the Social Demoratic party: and second, because the never-ceasing battle with the capitalist class and its emissaries demands a solid front of all socialists worthy of the name; and third, because the time for quarreling over things of little consequence to the general movement has gone by, and the time for grappling with things of great consequence to the movement has come.

The Socialist Labor party with which we deal is a rejuvenated organization, free from the obnoxious characteristics which formerly cursed its career and blocked its progress. Its members have civilization. Think of it. One has the cleared themselves of the barnacles socialism; they have renounced the misdeeds committed by those in authority in the past and they have pledged themselves to the same tactics that have distinguished the Social Democratic party since its existence Both organizations are identical in everything except name.

The economic and political conditions prevailing in the United States speak eloquently for a union of socialists. The ownership of the means of wealth production continues to gravitate rapidly into the hands of the small capitalist class, the middle class is being swept away, and the working class becomes numerous, poorly paid and discontent. The industrial arena seethes strikes, labor outrages and conflicts. The Republican party is gathering within its folds the capitalists who formerly worked" the Democratic party, which, in turn, is preparing to make a last despairing stand against the inexorable fate which hugs and crushes the middle class for which it appeals. The awaken ing working class turns to that political movement winch best speaks of their aspirations and their destiny, and the socialists of the land owe it the human ity of today and tomorrow, that the movement be ready to receive them and m encouragement and hope, instead of disappointment and disgust.

The manifesto of the national execu tive board is an illegal document. The one thing properly before the member ship of the Social Democratic party is the report of the New York cop on union. Neither the members at large nor the convention gave the board authority to submit such a referendum nor had the official report reached the board had had a good speaker the vote would. when they drew up and published the have been still higher. Our correspondmanifesto. They have been guilty of ent reports that the comrades are an act which lays them open to the nevertheless fairly satisfied with the charge of autocracy and "bossism." results which show that socialism is str of the country have had growing steadily. th of this sort of thing in the past; they want none of it now, nor will they | Subscribe to the Call for your neighbr.

olerate it again in the future. The few individuals who believe they can con duct the Social Democratic party or the ocialist movement according to their special wishes and desires are making a huge mistake. Did they but understand those who constitute the move ment, they would know any rule but a democratic one would bring disaster to those who practised it. The very spirit of the movement demands democracy, and a democracy of a pure and enduring type. Sooner or later the dictator in the ranks of socialists is overthrown, and this is inevitable in the very nature of things. The vast majority of the membership of both parties are longing for a union of socialists. That union will come, and those who attempt open-

ly or secretly, to prevent it will meet

defeat in the progress of its coming. .The report of the New York confer ence is before the membership of both parties. The actions of the conference must be ratified by a concurrent vote of each party before they become effecive. This is democracy. In order to be able to vote on the conference's actions the social democrats must first vote for union and against the usurpation of power by the national executive board. In view of all the circumstances it b the duty of every member of the Social Democratic party who desires progress harmony and democracy in the social ist movement to protest against the manifesto issued illegally by the national executive board by voting "Yes" on the proposition, "Is union between the Social Democratic party and the Socialist Labor party desirable?

DO THIS AND VOTE THE MANL FESTO DOWN! - Haverhill "Social Democrat.

CANNOT BE EVADED.

Reality of the Doctrine of Personal Re sponsibility.

Among the numerous cases of destitution during the year 1900 were two in Chicago which should shock the selfcontent of civilized communities to its rotten core. One was the case of a little baby dead from want of food found by the side of its starving mother, the direct cause of want of employment by

father willing to work, but over ooked by Providence; the other was also a case of starvation-that of a boy found praying that God would send food to his mother, who was lying dead before him, in a house without food or fuel and in the depths of winter

Those who deny the destitution of the humbler classes of society, or satisfy their consciences by quoting the script ural text "the poor ye shall always have with ye" fill the definition of scoundrels to a nicety. They have no remedy to propose save the occasional charity that disgraces both the giver and receiver. Drink, idleness, criminal inclination are the trinity of excuses used by the pious hypocrite who is on ignorance, crime and misery. By our faced with the problem of economic regeneration, and his conscience is completely lulled.

The woman of the poets, refined, ele gant and beautiful is content to play the part of a lovely siren and crush all the finer feelings and sentiments of Na ture's peerless work. She absolutely refuses to come in contact with misery and only treats with indifference or disgust the conditions of life under which the majority of human beings are foreed to exist. Suicide, murder, crime and poverty to her are the elements out of which novels are made for her pleas ure, and the causes which produce these phenomena are unknown to her and from choice. Why should she condemn herself and her class by an inquiry into the simplest elements of economic justice? Why should she trace the rents nterest and profits that feed, clothe and house her, to the levy of private taxation of legitimate production and ex change? She is happier without, but she is a criminal worse than the most brutal murderer that ever disgraced ich retarded them in their fight for and passes by on the other side, or doles out a charitable gift that possibly reaches the object, but leaves the mass unchanged.

> our social system is unjust needs only a superficial examination. Not to the as the capitalist class remain in power worker, but to the person privileged to tax him goes the benefits of civilization; not to the thinker but to the exploiter is the reward of intellectual exertion; and only the most radical changes in the so cial organization will eradicate the terrible consequences.

The doctrine of personal responsibility is the lesson that must be flung into the faces of society women, church habitues, retail philanthropists and other enemies of society who refuse to recog nize the evil or the remedy, and who are engaged in the unholy attempt to quell the-desire for change by an alleviation of suffering which will only prevent actual revolution.

A Helen Gould though infinitely superior to her fellow sisters is far as the oles from being a good woman, because she is content to leave the vital she plays the part of the Almighty her- that number. self, towards the victims whose spollation has made her a wealthy woman,

LABOR ITEMS.

Notes From Trades Union Journals and Exchanges, Throughout the United States.

Another socialist mayor has been lected—this time at Hoxie, Kan.

Socialists elected mayor in Thayer Kan. This is becoming infectious.

Social Democrats elected an alderman at Sheboygan, Wis., and increased vote from 106 votes two years ago to 782. Social Democrats issued charters to

new branches at Lawson, Col.; Aurora, Mo., and two in Milwaukee, Wis. Prof. John Graham Brooks, the econmist, educator and lecturer, is reported

to have declared his intention of supporting Debs and Harriman.

h!m. Election of officers of International Typografical union will take place on May 16th. Votes will be cast in more than 200 cities and towns, and are expected to reach a total of 25,000.

New York butchers are on strike against the introduction of the Chicago stockyards wage scale of Swift & Co This means a rejuction from \$6 to \$2.80 per day, and in consequence a boycott against the Swift company is now being planned.

The Socialist Republican party of Ireand has notified the middle class Fabian Society of England that its confusing propaganda is not wanted on "the ould sod." The Irish are pounding along for straight democratic socialism -Cleveland Citizen.

A western silver organ whines that the Standard Oil crowd is getting control of all the dividend-paying property in Montana. A New York daily estimates that by 1910 John D. Rockefeller will control fully one-half the wealth of the United States.

A strike of 300 weavers employed by the Lowell Manufacturing company has taken place, on account of intensity of ork, the company having a pace maker employed who persists in turning out nore work, than is permitted by the ules of the Carpet Weavers union

Three rod mills belonging to the Illinois Steel company closed down on the 23d throwing between 600 and 700 men out of employment. It is rumored that the entire plant at Jollet will shortly close down. Enforced leisure of this sort always gains recruits for socialism.

The workers are crushed under foot by a system which they themselves maintain. By our votes we maintain a hell on earth, by our votes in favor of the/two old parties we place a premium votes we might have a paradise on earth.-Brauer Zeltung

Cigar makers in New York are putting up a good fight and are getting solid support from the cigar makers throughout the country who are liberally contributing financial aid. Victory in New York is well worth fighting for as it would mean a doubling of the membership of the C. M. I. U.

The financial report of the Boot and Shoe Workers' National Union shows that organization to be in splendid condition. Owing to the introduction of the new benefit system, the income last month was double that of the previous month, and a big fund is rapidly accumulating. New shops also continue to apply for the union stamp.

There are 7,000 employes on the pay oll at Pullman at present. There is evidently not much opportunity for ompetition in the car building business. Competition is getting played out as regards the masters, and is being supplanted by combination. The working class will have to take a leaf out of the same book in the future.

Over 4,000 Japanese laborers have landed at Pacific ports within ten days and thousands more are expected. They are superior in one great essential to Every man or woman must bear his American workmen, that is they are or her share of responsibility for the so- cheaper, and capitalists want cheap lacial state in which they live and that hor. Restrictive immigration laws sound well, but of what effect are they so long

> A sequel to the great national strike of engineers, machinists, blacksmiths etc., all included in the International Amalgamated Society of Engineers, in Denmark, last year, is not only th large increase in the socialist vote, as shown in the municipal electors, but the employers are now practically or their knees begging that the unions sign the agreements that they rejected with contempt a few months ago.

Already 120 trade union and socialist organizations have declared their intention of participating in the mammot? May Day celebration in New York and many more societies will doubtless vote to join the great affair before it takes place. It is estimated that no less than place. 50,000 men and women will be in line when the word is given to march, and the number may be increased to double There will be no less than twenty brass bands in the parade and they will join together in playing 'Marsellaise" in Madison Square. Ben Hanford, Morris Hilquit, Charles Socialists in Davenport, Iowa, polled H. Matchett and other trades unionists and socialists will make addresses .-

> Socialists often say there is nothing that makes socialists so fast as capitalism when it flays the workers with the whips of hunger, cold and nakedness. But unless the socialist is there to point the way he is as apt to be scourged down the black road of Depair as into the beautiful highway that

BALLOTS AND BRICKBATS.

The Story of "John Sobieski," the Mar Who "Doesn't Know Why.".

You workingman look here! faithful narrative is for you especially. It is the story of "John Sobleski," "the man with no show," and that "doesn't know" why he hasn't got any. For the last year or so this paper has been preaching the same nort of thing to you and perhaps you've got a little tired of being preached at. We will therefore avoid preaching, and fust reprint this true tale for your instruction and enlightcament. It didn't come from a so cialist paper either, but appeared in the Chicago Journal of Tuesday, 18th inst You may have actually bought that copy of the Journal, but perhaps you didn't give it much attention or possibly Ex-Gov. Altgeld, it appears, is not didn't read it at all. Anyhow we take out for Debs and Harriman. He is the liberty of reproducing it here and making Democratic speeches in the if your "vision" is not quite so "limited" East and kisses the hard that smote as that of the subject of the story, perhaps you may see a great light. And in case you don't see anything in it, I may not be out of place to add a triffing omment which will make the matter plainer still:

John Sebieski, we shall call him, is John Sebieski, we shall call him is a laborer in the wire works at Joliei. His ware is \$1.50 a day. On this he supports his wife and children, gets drunk, buys clothing, gambles, and contributes to the church. With what remains he gets drunk again.

John Sobieski was happy last week happy because he had work to do Strange now slenderly hangs the happiness of mortals. John Sobieski's EM-piness of mortals. John Sobieski's EM-

piness of mortals. John Sobieski's EM-PLOYERS ARE HAPPY IN ROBBING OTHER PEOPLE AND EACH OTHER. But that is getting ahead of the story. Besides it is libelous John Sobieski's vision is limited. It

John Sobjeski's vision is limited, it takes in the reeking factory yard, the high board fence, two or three blocks of unpaved street, a corner saloon, it house painted brown. John Sobjeski's contented. God has given him work to de the blocks. intented. God has given him work to b. He thinks so, Yesterday he lumbered down the ur

aved street, from the house painted own to the recking factory yard; mut the American artisan from Poland go the American artisan from Poland goes to his day's labor A crowd of his fellow-workingmen were gathered around the gate scanning a placard. One of them chanced to understand English. He was reading the notice slowly. The others were listening dumbly, trying to put the words together in a form that ultimately night convey a meaning. What was it? Great heavens! A book from the blue! The works are shut downf WHY? John Sobieski DOESN'T KNOW, No more did he know why KNOW, No more did he know wh they were started up. He only know that the mysterious and supernature that the mysterious and supernatura agency that sent the wheels spinning round has decreed that the wheels shall cease to spin. The same awful lips that warmed his heart with the promise of food enough and drink red undant, now chill that organ with despair. What difference dows it make to him, who of what this power may be? The gods of Gates, it is all the same to John Sobleski. Juniter rollink tengins on Clymeski. eeki. Jupiter rolling tenpins on Olym-pus or a fat man gambling in Wall ALL HE KNOWS, all it is ting he should know, indeed, ALL IT SAFE HE SHOULD KNOW, is that when the factory door is open he works and eats; when it closed he idles and starves. He cannot even guess what hand it is that draws the bolt, much less can he surmise! the purposes that control the band is the bolt of the purposes. ontrol the hand.
This is well. We trust, while such

arge part of our efficient army is in th Philippines, John Sobieski will not kno the trick that legislation and "natural able balance of trade theory, proving economic conditions" have played upon thereby, if his statistics can be relied the balance of trade theory, proving the balance of trade the balan

Well, friend, what do you think of it. eh? Lots of truth in it, isn't there. Yes there is, certainly. More than is the protection party par excellence, alusually given in your daily press. It falls short only in that it doesn't tell you what John Sobieski "doesn't know" and fetish, this article of course is meant for why he doesn't know it. That will be our task even if we have to repeat what gument, since the protectionist claim, has been said a thousand times in these columns. And it also tells you what John might possibly accomplish with a brick, in the way of "reform." then you surely know that the brickbat method of reform is sternly discouraged mean a jail sentence for "John Sohl- of \$914,000,000 for gold and \$536,000,000 for your name is not "Sobleski" and that you never saw Poland or even Europe moreover states, that, so far from us in your life. You may have been born here and your grandfather before you. are really today in debt to the foreigner. but you must admit that if you had He then goes on to point out the various one for \$1.50 per day, and a shut-down took place, you would have to take the that protection can be advantageous to same dose that Mr Sobieski gets in the story. So therefore it concerns you

just as much as him. doubtedly an ignorant man, yet he has works close down, he is idle and stary, ing. But he doesn't know why they favor of free trade, were it not for one close, and if he did he would see the folly of trying to open them by cracking Gates or the head with a brick derlying cause of this strange hallucina. Just look at the words in the story which we have put in capitals. John 'D'OESN'T KNOW." WHY? Because ie doesn't know that his "EMPLOY-ERS ARE HAPPY IN ROBBING OTHER PEOPLE," and that he is one of the "OTHER PEOPLE."

He is not aware that their busines himself for \$1.50 per day, and then extracting labor power from such com-\$1.50. That dollar and half is the cost ling so? Surely others have access to of the reproduction of Sobieski, and a these statistics as well as the editor of small broad of Sobieski's who must go the "Public;" they can find figures just through the same process as himself as well as he can. Then why should drunk, which serves to keep him in the the Republican party point with pride the church to preach contentment to knows anything about is able to prove him and fasten his gaze on another the fallacy of, if he has access to the ata Gates' Steel and Wire company have shadowing cause which until it is re finished with him in this one. He moved prevents all who come under its doesn't know that his class alone have produced not only the steel and wire, really are? And finally: Why does not

but clothing, food, houses and shelter, and every other useful thing which mankind needs. He doesn't know in fact that he belongs to a distinct class no value, for the absurdity of the proat all, as the crowd that Gates belongs are no classes here and that he is a again and again, without result "free" man. All of which he has bethe term better). And believing this he which Gates is enabled to rob him of the to starve when he (Gates) decides that such action will bring increased profit for the Steel and Wire-company.

There are a vast number of working-men who imitate John Sobieski in this Poland either, but when locked out they come just as hungry as John, bemany of them are too indifferent tovant to know.

it is in the power of one man or a group of men to decree that he shall it for the privilege. But as importation starve for a while because he has produced too much, is in itself an educational influence that in the end will enlighten him, and those who still act as he does. And when John discovers this, he will himself become an educational force, and tell others, who are arill as stupid as he once was, the reason why the "works shut down," and when they see it they in turn will do the is lost sight of. .The producer, no mat-

The truth is that John Sobieski and show in the near future, but they are now in the school of experience learning a bitter lesson.

When they have learned it they will tions to discharge Gates Instead of breaking his head with a brick.

They will vote their class into power and make collective property of the steel and wire and all other means of production. They will secure to themselves by such action the whole product of their labor, and give Gates the same opportunity to secure his, (not their's, as at present).

And as a weapon to accomplish this change they will find that the socialist ballot is infinitely superior to all the ammunition that could be gathered in a dózen brick yards.

When this change is accomplished, Jupiter may continue playing tenpins on Mount Olympus, as that will probably be as much a matter of indifference then as it is now, but it is altogether likely that the fat man in Wall street will forsake his pastime when the Sobieskis' decline to allow him the use o their backs as a gambling table.

EXPOSING A FRAUD.

The True Significance of the "Favorable Balance of Trade" Theory. In a lengthy article in the "Public,"

under date of March 31, the editor of

that paper reviews the so-called favorhim, the kind of genius that has been substituted for Divine Providence. We are glad he has never seen Mr. John W. Gates. Otherwise he might not take his misery so meekly. He might stop on his way home. He might put a brick in his pocket and go back.

States as a nation have given away in the last sixty-five years wealth of every description to the amount of \$3,600,000. upon, that it is a fallacy in every way 00, nearly, for that is the so-called "balance of trade" in our favor in that time. Now, as the Republican party, ways boasts that this favorable balance. is due almost solely, to this their party a first class democratic free trade arthat whatever amount of merchandise we export in excess of what we import must be paid for by the foreigner in either gold or silver or both, is met in this article by proof taken from the treasury statistics, that a larger portion Now it may very well be that silver, footing up the total to the amount stated above. The article having a credit due to us abroad, we working in that mill or a similar causes that have led to this result, thereby entirely disproving the claim this country since the net result is the giving away of nearly \$3,600,000,000 worth of goods, to the foreigner, not in Now the subject of the story is un- charity, but under the mistaken idea that we thereby in some way are the gain mee anough to know that when the ers. Now this is all right as far as ft goes, and would be a great argument in important ommission! He entirely forgets, or else he does not know, the untion. How does it happen that we who boast of being the smartest people or earth for getting the best of a bargain in which there is a great deal of truth for Yankee shrewdness is proverbial af over the world, should yet in this matter, make such a stupendous asinine Why should we give away ensists in buying commodities like year after year, hundreds of million worth of wealth that we have accumu modities, of the value of many times think that we are getting richer by do when he gets worn out. Some portion they overlook such an obvious fact of it also is necessary for an occasional Why should President McKinley and "doesn't know" state, and a trifle for to a policy which any schoolboy that orld which he expects to enter when tistics, were it not for some all over-

influence from seeing things as they

he writer in question, himself try to discover the cause and point it out to us? His statistical argument otherwise is of tection theory that a nation can tax itto, have persistently told him that there, self into prosperity has been pointed out

Let us see if we cannot find the key lieved because it was rather flattering to this strange enigms. Looking at it to his pride. (or ignorance if you like whichever way we may, there is only one rational exception possible. And has persistently voted for the political that is: It is the system itself, the parties which uphold the system by competitive system which is responsible for this folly. You who look at the subproduct of his labor, and lock him out ject through protection spectacles can see the absurdity of the farce in all its bearings. Let me explain: Free traders say international commerce is an exchange of commodities. Yes! But nations as such don't trade to any great respect, and they don't all come from extent. Only individuals do. And individual trade is essentially an exchange of commodities for money. cause, like him, they "don't know" and seller gets for his goods is dollars and cents, if he had to swap goods for goods, he would certainly kick like a But it is not correct to say that John steer if his government should say: sobleski "has no show." The fact that Ere you can bring these goods in here you must give up, say fifty per cent of and exportation are almost always two different transactions, and besides the importer and exporter are usually two different persons, and above all as all transactions of that kind are conducted through the medium of money, and money is the one object all individual traders eventually have in view, the absurdity of the whole serio comic farce ter of what description, does it in order to get money, so does the trader, so does his class have a great show, in fact they the government who taxes him, so in are the only class that will have any fact do all who have anything to do with it. Hence what is more natural than that all should cry out for protection from outside influences in order to get as much money for their come socialists, and will make prepara- modities as possible, and the government that does that most effectually. is the government they will support no matter what the economic effects may be, as far as the nation, as a whole is concerned. .The effect may be just what the editor of the "Public" states it ist Yet as long as the masses believe that they as individuals are better off for it financially they will never desert that policy.

Here lies the fundamental defect of the competitive system. It is entirely dependent on a medium of exchange, or in other words money, for its successful peration. It consequently makes the ndividual likewise, entirely dependent on getting money. Get money! No matter how, as long as you steer clear of the law, and all else will follow. Be a fool, a brute, a tyrant, a miserable contemptible atom of humanity, or be addicted to all the vices under the sun. nothing will count much against you as ong as you have money.

But if that fails then God help you; you may be as wise, as good and as virtuous as the best in the land and yet you may die in a ditch, and beyond a passing notice in the papers no one will care. That is the reason why neither free trade nor single tax nor prohibition nor any other reform is of any avail as long as it has the competitive system as its basis.

But some one may ask: How does it ome to pass that England should have recognized the advantage of free trade, for there can be no doubt but what she is the chief beneficiary of that wealth, that, we are throwing away so lavishly all the time? The answer is easily found: England is essentially a commercial nation. That is to say she does not produce her raw materials, out of which she manufactures her finished goods, which she exports all over the world wherever she can get a market, to any great extent, but must import them, hence it is her best policy to get that raw material as cheap as possible, which an import duty would certainly prevent to that extent. Therefore as the commercial portion of the population of England is preponderately in the majority, the best financial interest of in our present society, and that a con-tinued indulgence in it would infallibly sists of both gold and allver, to the tune that her landed interest is as much for protection, as we are over here. They object as strenuously to the reception of these gifts as we are anxious to force it onto them.

If the editor of the "Public" will kindy disprove this explanation of the problem, or falling that, acknowlege truth and point it out to his readers, and so finish his series of articles on the subject in a satisfactory manner, since as it now stands it runs us up against a stone wall, he may do the world some service. Though I fear he will not do that, for it would hoist his single tax creed with its own petard, since singletaxism certainly depends on the competitive system for its successful operation. Who would under a co-operative system be willing to give annually so much of the product of his labor to the community, because that community claimed that it needed the land values? A. D.

Diplomacy.

Did it ever strike you as a rather. emarkable co-incidence that just as Russia seemed on the point of having a little fun with England while the latter was busy with her piratical trip in South Africa, that the United States should suddenly find an excuse to take a whack at Turkey? Of course America- has no interest in the "Eastern Question," but still it is neces thieves to stand together, and if England should find herself checked in Afand the United States did not come to the rescue, why Pierpont Morgan and Rockefeller might call in vain for help in China at some later day. Wonderful thing is diplomacy. But what does the worker get out of all this?

Some of us do set remember the great Homestead strike. At its conclusion-in 1891-the Carnegie Steel Co limited, was organised with a capital of \$25,000,000. The two corporations joining under the new name were valued at \$19,000,000, and \$15,000,000 worth of new stock were issued. Mr. Frick under oath charges that the major portion of this stock is yet unpaid. In less than nine years of its existence the company will, according to Mr Carnegie's estimate, pay about \$42,000,-000 clear profit for the current year. Mr. Frick under oath states that Carnegle said he could, under ordinary good conditions, realize \$590,000,000 for the company's holdings. Mr. Carnegie replies under oath that the actual tangible assets only amount to \$75,000,000. Of course it would not be in accordance with good taste for an American iron or coal king to have the meaning of a Scotch or Swiss oath defined in an American court, so a new agreement on the division of the surplus product of the American voting king was made. The Carnegle Co. was chartered under the laws of New Jersey, and some of the little fishes commenced to squeat, Never! A capitalist Phiaburg daily says:

"The new corporation has a capital stock of \$160,000,000, and bonds to the same amount, thus making their act-ual holdings \$220,000,000. The llon's share is held by: Andrew Carnegie, \$172,758,690; Charles M. Schwab, \$37,-858,000; Henry Phipps, \$84,452,000; H. C. Frick, \$30,558,000. How this was adjusted is not easy to see. Mr. Schwab, who held 2 per cent., comes to hold 11% per cent.; Mr. Lovejoy jumps from % to 5 per cent. The one thing clearly manifest is that the interests of all the stockholders have, as it were, instantaneously appreclated in a fashion which makes the tales of Aladdin and Midas look pale and sickly by compar

Those simpletons! How sickly man of our Pittsburg capitalists will look before they'll know who or what struck

The charter, for a student in sociology, is a remarkable document. If there is anything the new Carnegle Co. cannot do, or any place where it cannot do it, it falls to mention the act

It may mine, transport, manufact-ure, buy and sell fron, steel and other coal, coke, and all the products and by-products. It may build and operate rallways, pipe lines, wharves, canals, water works, gas wells, gas and electrical works, mills, factories, warehouses and transportation lines by land or water. It may hold stocks, bonds, rights, franchises licenses, inventions, patents of any firm, corporation or association, private, public or anunicipal, government of the United States or any state, ter-ritory or colony thereof, or any foreign government. Thus a contracting agent may assume the airs of an envoy extraordinary. The firm will return their ore cars from northwest filled with coal at their own price with the railroad rates as a secondary consid-

At all this the little one-horse shops and even larger capitalists stand aghast, terrified, while from the face of the well-grounded socialist it extracts but a complacent smile, for he knows full well that it is the result of economic evolution.

The Carnegie Co. is simply practicing a little private socialism, and having killed competition in various lines. they are doing fairly well. How has "octopus" acquired its holdings?

During the panicky times of '93-'98brought about by the Carnegies, Hannas, Rockefellers and Morgans as a means to the end-they were able to inal flat been tenfold enhanced in commercial value. Having abolished competition, they proceeded to vote congress, and then robbed the American people of exorbitant charges for their products. Inventions and labor-saving machinery being in their possession, used for their individual material gain, created a surplus in the labor market, thus making competition "to get a job" still flercer; this condition allowing them to pocket a surplus of the production of their workmen of about 90 per cent.

And yet, lo and beholdt a "reform" sheet, lately started in Pittsburg in the interest of Bryanism, says that the Carnegie Co. is absolutely essential to the well being of Allegheny county. But then, since Mr. Carneg called Mr. Bryan to New York, and since they jointly published a book against the Phillipine policy, it may readily be seen why Bryan wants to license (legalize) the trusts.

Wageworkers of America, don't blame Mr. Carnegie, there are hosts of worse men than he; he only makes the est of a system which is maintained by, of and for his class. No. don't! But DO blame yourselves. Investigate, read, study your own class interest, and then act-vote-for that interest, if you don't, just as sure as April sun brings new life into this grand universe, just as sure will an ever-growing American proletariat some day act, and act witht a vehgeance. In this fear let us tremble for our children and children's children. Socialism alone will prevent this.

Wm. S. Tuescher,

A call for the Workers' Call will always receive prompt attention, which is an invitation to call again.

Does the man beside you in the shop read a socialist paper?

The Middle Man

(Continued from page L)

We have suffered, too, from the tyranny of middle men, and we have not fully eradicated it. But in this country we have decided that we do not need any political middle men to do our governing for us We choose our servants not our rulers-at least in theory. And we are fast finding that our representative system is not very effective for the

abelition of political tyranny.

But it is the economic middle man that is the keystone in the arch of oppression. That is the tyranny to which we must now direct our attention. We shall abolish it in one way, and that is the way indicated by socialism. It is the way of freedom and happiness, not only for the working class, but for all the people. Make the means of produc tion and distribution the property of all -as they ought to be-and the tyranny of the economic middle man ceases to be. Who is to perform this task? Can it be entrusted to the hands of capitalists? That is what every laborer be lieves who supports by his vote the Republican or Democratic party. Have FREE ADMISSION. we a right to expect the men who profit by the existing system to abolish 112

Who then can be expected to do so Surely, those whose interests are to be served most immediately and beneficently by the process-the working class. How are they to effect this needed change? Political and economic changes are to be effected in this corntry peaceably only at the ballot box. They can be effected there only by united political action. United political action can be had through a party. And the only party in this country that is pledged to the overthrow of the wage system and the establishment of the Co-operative Commonwealth is the party that stands for socialism.

William Thurston Brown.

Makes No Change

(Continued from page 1.)

class organization of society no measure can be introduced that touches the citadel of vested rights. Capitalists frequently permit reforms that do not interfere with their privileges, but the noment some measure is proposed that threatens their interests the tables are turned. Can we expect it to be other vise, so long as the government is in the hands of the master class?. For one to imagine that he can curtail the power of the privileged class so long as that lass is in the possession of the mathinery of government, is the height of absurdity.

It is true, socialism cannot spring at once full fledged info existence. But the first step toward that end is the overthrow of the present ruling class through mastery of the public powers When socialists are in control of the government they will then proceed to put their ideals into practice. It may not all be accomplished at once, but as rapidly as possible industry after industry will be socialized until all busi-nesses are brought under collective con-

. Of course, before socialists have captured the national government, they will gain control of municipalities and states, and as fast as they gain control they will carry out the principles of socialism as far as possible. But, note. he first step, is to gain control-is politcal supremacy.

The overthrow of the capitalist class government is a revolution, no matter how accomplished. The fact that wi advocate the use of the ballot does not make the movement less revolutionary Socialism, then, is a revolution. It

recognizes that practically nothing of real value to the proletariat can be accomplished until the present class rule buy for a song great competitive en-terprises, which have since by a crimmere reforms, and no change that threatens class, rule can be introduced until class rule itself is overthrown.

The reformer-socialist, then, the so clalist who adopts the reform method, is not doing the most effective work for socialism. His failure to grasp the fundamental principles of socialism has ganized counties by volunteers thereled him to pursue false tactics and methods. The revolutionary socialists point out the only effective way to economic emancipation—the organization of the proletariat into a class-conscious body for the purpose of gaining mastery of the public powers. PRICE TWO CENTS

MAY DAY IN CHICAGO

Monster Meeting at West Twelfth Street Turner Hall.

INDORSE DEBS AND HARRIMAN

Socialists of Chicago Express Their Approval of the Proposed Union of Socialist Forces.

place on Sunday the 29th ult. at West which the necessary transition from Twelfth Street Turner hall. This meeting, in which the comrades of the fected, when the intelligence of the Seventh Ward Branch, S. L. P., took the purpose of celebrating May Day as change. expressing the international brother- close attention of the audience all hood of labor, and at the same time in- through his address, and from the liberdorsing Comrades Eugene V. Debs and ob Harriman as candidates for presient and vice-president respectively, presenting the combined forces of soalism in the United States at the ming presidential election. The auwas large, enthusiastic and enly alive to the necessity of presenta united front to the common eney, the capitalist class, in the coming ditical struggie. The chairman, Comde Peter Sissman, declared the meetng open, and after a few explanatory marks introduced the first speaker, Wanhope, editor of The Workers' Call, who in a short address, pointed out how the necessities of the present political and economic situation, de-manded that socialist workingmen should lay aside all personal differences and other non-essential details, in order to concentrate their entire strength upon the main issue, the objective point of the socialist movement all the world over, the struggle with the ruling classes for the possession of the means of production, in which struggle the victory of the working class must re-sult in the establishment of the Co-

operative Commonwealth. The next speaker, A. M. Simons, well known as a socialist lecturer and writer, followed with an eloquent descriptive address upon some features of the working class movement in France and Belgium, from which countries the speaker had recently returned. An outline of some of the incidents occurring at Paris during the funeral of the Russlan revolutionist Pierre Lavroff, and a description of the schools at Roubaix in which the children of the proletariat are bountifully fed and clothed through the action of the socialist workingmen, was well received by the audience, who were much interested in the graphic picture drawn by the speaker. Comrade Simons concluded his address with a powerful appeal for the support of the party press, which met with a very satisfactory and practical response from those present.

The secretary of the national convention of the Social Democratic party at Indianapolis, Fred'k G. Strickland, followed with an address, during which he made some very telling points which elicited much applause from the audi-Comrade Strickland laid particular stress upon the necessity of enmovement, pointing out that here was a source of strength which had been to a large extent neglected in the past, and which, properly taken advantage of, would mean a decided gain for the

The following resolutions were then read and proposed by Thos. J. Morgan, and seconded by Fred k G. Strickland:

Whereas, The S. L. P. and S. D. P., each assembled in their respective na-tional conventions, selected committees to formulate a plan for the union of all socialists in the United States in one

socialists in the United States in one socialist party, and Whereas, Said committees performed the duty assigned to them and prepared a joint report to be voted on by a referendum vote of the members of both parties; therefore.

Resolved, That this mass meeting of Chicago socialists of both parties, hereby approve of the proposed union of socialists; and Resolved, That, as socialists, we de-

by approve of the proposed union of so-cialists; and

Resolved, That, as socialists, we de-clare for the fullest recognition of the principle of self-government, and the use of the referendum as the best method of ascertaining the individual and collective will of associated social-ists on the question of union; therefore, we declare that all assumption of lead-ership exceeding the limits of proper suggestion, that all claims of individual members, committees or officials to su-perior intelligence, virtue or self-sacri-fice, which are set up as a warrant for forestalling, controlling or defeating the free will of that membership, violates socialist principles and injures the cause, of socialism, and we fraternally suggest that the membership of the several socialist parties, seek for infor-mation in the official reparts of the sev-eral conventions and the report of the Joint Committee and from these legiti-hate sources draw their own conclu-sions and make their judgment known by the referendum; and Resolved. That pending the vote for union, this mass meeting hereby rati-fies the nomination of Eugene V. Debs and Job Harriman as socialist candi-dates for president and vice-presiden-of the United States.

On the motion for adoption being put, t was carried unanimously, not a single insenting voice being heard. Thes. J. Morgan who was listed as

the next speaker, asked the permission of the audience to substitute in his place Mr. Isaac Cowen of Cleveland, O., who is well known in the trades union movement as organizer of the Amalga-mated Society of Engineers and Machinists. Mr. Cowen spoke vigorously, pointing out the increasing influence of socialism in trades union bodies, and citing many instances in proof of his statements; the speaker concluded by urging his hearers to keep up the struggie both on the political and economi field, until victory rewarded their efforts. His remarks were applanded again and again by the audience, who seemed to relish the vigorous and un-compromising method with which this

same time most significant socialist. The closing address was made by same time most significant socialist. Thes. J. Morgan, who in well chosen meetings ever held in this city took language pointed one of the closen place on Sunday the 20th of the contraction. capitalism to socialism could be efworkers had been sufficiently aroused the initiative, was called together for to grasp the nature of the coming Comrade Morgan held the al applause with which his remarks were greeted it was evident that they were well appreciated.

The meeting concluded with a render ing of the Marsellaise which was given by the Sangerbund who were in attend-Much socialist literature was sold and distributed, and a liberal sum collected for the support of the party We believe that from now onward a period of local socialist activity will result, that will best prove that the action of the socialists of both bodies who participated in this meeting, in giving expression to the desire for so lalist unity and indorsing the candidacy of our comrades Eugene V. Debs and Job Harriman, was both judicious best interests of the socialist enovement

When it was discovered that the rental of billboards in some instances pays more than the taxes on the vacant lots where they stand, the bottom was promptly knocked out of the "crusade" which was going to abolish them in the interests of "art."

Mr. Harrison desires the justices to give the strikers the "full limit.", The reason for this is that he has gone the "full limit" himself as a "friend of la-

Capitalism doesn't love the "scab" half as much as it fears and hates the socialist vote.

The "army of the unemployed" is the 'salvation" army of the capitalist class.

Injunction Run Mad.

If the fact of capitalist class rule is following, showing how the powers that he use their authority, when the repellious workers seem likely to curtail profits and disorganize business by goin g out on strike:

Striking cigarmakers today received their strike benefits, notwithstanding Justice Freedman had enjoined union Justice Freedman had enjoined union officers from paying the money. On the application of S. Levy & Co., cigar manufacturers, Justice Freeman of the Supreme court granted a temporary injunction prohibiting the payment of strike benefits by the Cigarmakers' International union to the firm's striking

employes.

Acting on the advice of their counsel the officers of the union today disregarded the injunction and paid each of

the eighty strikers formerly employed by S. Levy & Co. the regular benefit of \$3.a week. Union men say if the injunction is made permament it will endanger the existence of all labor unions.

This occurred in New York a few peared in the capitalist press of this to it that destiny is never allowed to city. It is quite possible, too, that miscarry. workingmen read it, but how many saw in it the lesson that the machinery of law moves solely for the benefit of the ruling class? In this case the judge seems to have attempted thing so glaringly outrageous, that even those against whom it is directed, have felt that it could not be enforced. But it nevertheless serves to show that preside there are merely the puppets

COMING OUR WAY SOOTHING FLATTERY

in May Day Celebration.

at the Ballot Box for Economic Freedom.

New York, April 29, 1900. thirty different trades marched last York. It is estimated that 40,000 men to have noticed many stories in which and women took part in the parade. the colored man in detailing his rembabes in arms making their first protest against industrial slavery. The the master to whom he belonged feel-socialists, S. L. P. and S. D. P. led ing that in so doing some of the disshowing transparencies with such motes as these: "You remember the stead and Pullman and the Coeur d'Alene?" "There were no Spaniards at the Croton dam, so the Seventh regiment was not afraid to go there." "Don't vote for the Bull-pen," and many others.

Then came division after division of trade unions, each with its appropriate banners and mottoes. The greatest in-terest was shown in the striking cigar-ticular owner and the contempt and makers and Typographical union No. 6. The infamy of Judge Freedman's injunction against alding the strikers finuncially, gave zest to the enthusiastic shouts with which this marching protest was greeted. Young men and vomen marching arm in arm, and singing the Marsellaise, fathers and mothers with babes in their arms, refusing to be enjoined was a sight to thrill the multitude, as it did thrill them last night. Typographical Union No. 6 (Big Six), filled the air with tiny dodgers calling on us not to patronize the Sun which locked out 276 men because

they were members of this union. "Boy-boy-boy-cott the Sun" rang through the air as they marched along. A common advertisement in the street cars here reads: "If you see it in the

As the procession wheeled into Union Square, the bands one after the other took up the Marsellaise, and the crowd sang it till they were hoarse. And yet, though the whole plaza was

talist parties, and none that you should order. Short speeches were made by a carpenter and eigarmaker, a tailor, a typesetter and a dentist. Several of the speakers paid their compliments to When the working class get judge Freedland, and declared that hold of all they produce, they will sur- while they would obey laws of legislators they would not obey judge-made laws. A strike at the ballot box was the mark they all aimed at. A ringing set of socialist resolutions was passed. and the meeting broke up with three cheers for international socialism.

HE'S AFTER IT.

Mauser rifles, what a fight the Boers John Bull Hears of a Golden Stool and "Benevolent Assimilation" Is Now in Order.

Last week witnessed fighting between British troops and the natives near Kumassi, the capital of Ashanti now called the British Gold Coast Colony. Kumassi is about 150 miles from the coast. There has been a renewal of the troubles which necessitated the British expedition last year, and several hundred British troops have been despatched overland from Accra, the main ashantian port, to the scene of conflict, Ever since the capture of Kumassi in 1874 the British have been trying to locate the Royal Golden Stool, an enormous nugget of gold which takes the place of a throne in Ashanti. These cf. forts finally provoked the natives to resentment, and there now appears to be a general uprising in the northern part of the colony. In 1896 the last king, descent the British colony of Sierra Leone; he managed to conceal the Golden Stool, and his followers have kept it hidden from the British ever since.—The Outlook. Last week witnessed fighting be-

40,000 IN LINE OF MARCH. GENEROSITY OF CAPITALISM.

Speakers Urge Their Heavers to Strike American Wage Slave Asked to Believe That He Gets Three Times as Much as Other Workmen.

Those who are to some extent fa-The trade unions of not less than miliar through reading or personal observation with the ideas and habits of night in a grand parade arranged and thought peculiar to the negro race in led by the united socialists of New the southern states an hardly fall There were children too, some of them iniscences of the old slavery days was want to extal the good qualities of fliction with which he endowed his owner in some way reflected credit Maine; why don't you remember Home- upon himself. The wealthy planter, who was also possessed of liberality local prestige, and an ancestral record which entitled him-to be considered as one of the "old families," often stood mewhat the same relation to his human property, as what is known as "his country" does to the white workman of the present day. The pride with ticular ewner and the contempt and disdain with which he loked upon "niggers" who belonged to an inferio brand of white master, finds its counterpart today in the wage slave whose "patriotism" consists in a fixed belief in the superiority of his conditions of He when compared with those of wage earners of other lands.

Human nature is much allke after all. This feeling produced a similar effect upon both white and black. It made them overlook the fact that they were slaves, and as such was of the utmost value to the masters.

Chattel slavery being now a thing of the past, the system of wage slavery which now exists is partly supported by this feeling, and as a consequence mparisons tending to prove the superiority of material conditions of the workers of one country over those of another find great favor in the capitalist press, and are greedily swallowed complacently accept the flattery of ates their exploiters in this respect, not understanding the causes which prompt

An instance of this occurs in the daily papers of last week, where a report on wages in Germany by an American consul is enade to imply that American workingmen live over three times beter than Germans.

"American labor," says the report receives treble the wages paid in Germany, although the cost of food is from ten to fifty per cent cheaper in the United States than in that coun-

It is an undeniable fact that a fev weeks idleness brings the greater numher of the American working class face to face with financial want, in volving the possibility of bunger, cold and nakedness. Those who have observed the chronicles of distress among the workers during the winter when wment is scarce or when labor will admit the truth of this statement.

Does the American workman then on the average consume three more than the German, and is it because of his "improvidence" in this re spect that want appears instantly at his door when a period of idleness ensues? It is not necessary to settle this question by an array of figures; a giance at the physical appearance of both workers is sufficient. Does the German workingman show marked signs of hunger or insufficient food in in the American workingman? Would R be possible to judge from the appearfed? We hardly think so. If anything perhaps the German has a shade the better of the comparison.

ingman consumes three times more in the matter of clothing than the ter dressed on the average that he can readily distinguished from the No one who is at all competent to judge will declare that this is so.

Does the average American working man live in a house noticeably superior to that inhabited by the average German workman? Has he more rea leisure? Is he so much better educated? Does he get more real happiness and omfort out of his conditions of life than the other? Has he more pleasures? Does he go to the theater oftener? Does he get more beer to drink? Do his treble wages enable him to enjoy three times the amount of all the

Does the American workingman get is much in proportion to what he proluces as the German? Which of the the intensity of the labor process to which both are subjected? Which of

are some of the questions, the answers to which will give the truest guide to comparison of material conditions While on the whole it may be admitted that the standard of living is somewhat higher in this country, we imagne that taking all things into consideration the difference is not only trifling, but that the trifling advantage may be on the other side.

At any rate, the implication that the material conditions stand in the proportion of three to one in favor of the American workingman is a most de liberate and ridiculous falsehood, devised for the sole purpose of keeping the former in a state of ignorant content, by pointing out in grossly exaggerated press articles, how much better off he is than his fellow wage slaves in other lands.

The fact that more than eighty pe cent of the working class of this country are absolutely without property of any kind (if we except a few miser-

gives the lie direct to the statement. While capitalism can command the ervices of satisticians versed in the art of juggling figures so that misleading conclusions can be inferred from them, the workers will not be permitted to know the truth regarding these comparisons. It is necessary to carefully conceal the fact that under the wage system, the tendency is to wards that point where the worker reeives the cost of his reproduction; that is, sufficient to keep him in a state f normal health and strength, so that apart from natural decay) his labor ower may be reproduced from day to day, and to allow him to reproduce his es, in order to furnish the system with a renewed supply of wage slaves. This point is practically reached in very capitalist country in the world, as well as the United States and Ger-

There are more than two million erman workingmen who understand this, and who cannot be flattered by their masters with specially prepared statistics showing the superior conditions which they enjoy. Those two millions have got through singing the get rid of them and appropriate the whole product of their labor to their

They don't waste time discussing comparisons of their condition of life with those of other wage earners. Whatever those conditions be, one thing they are determined upon is to make them betby the majority of workingmen, who ter, by owning all that their labor cre-

> And the American workingmen are also getting ready to follow their example, as the next socialist vote will

The Socialist Position.

It is at the door of the wage system that the socialist lays the vast majority of the present crimes, industrial wars and social problems. Under the wages system wages is purchased at a price ess than the value of its product. The individual receiving this price (wages) is, therefore, unable to purchase either his own product or its equivalent in value. But since this is the base of the present industrial system, it causes the so-called overproduction and the concentration of capital in the hands of

When capitalists cannot sell their goods, production is stopped and men fourth, to crime,

When the people of a country are arred by such a system from consuming their own products, then the capitalists are compelled to look to other ountries for a market, and thus the expansion issue and other political is-

The socialist would organize and sodalize the industrial system, to the end that each producer should receive an equivalent for his product. The hours of labor would be reduced in proportion to the development of machinery. There vould then be no overproduction, no industrial crises, no men discharged, no unemployed, no expansion issue.

With these principles in view the socialist platform may be easily understood.-Job Harriman, in New York Evening Journal.

It will be remembered that it was asue of the Call that the United States became interested in the "Eastern Question" and began to bully Turkey just as soon as Russia began to bother English claims in India. Events since then have proven the correctness of the Russia is protesting nany is joining in with her. Things seem to lining up for the last great tions, with England, United States and perhaps Japan, upon the one side, representing the most advanced capitalism, and Russia with her allies upon the other representing the more back-ward nations. The laborers of those ward nations. The laborers of those countries are of course but the counters in the game. Will they permit them

ROLL UP YOUR SLEEVES.

We called the attention of the comsort of party trouble always made itself felt on the subscription list of the party papers. When party members are to work for socialism. The result of the long series of internal troubles has been that the call has reached the point where unless it receives assistance at once it must give up. A Yew of the the point where they can no longer sustain the burden without outside assistance. The amount needed to save the paper at this time is not large. There are no heavy debts to meet and the weekly deficit is not large. One hundred dollars from outside the city or from new friends within the next ten days will insure the continuance of the naper-the lack of that sum will mean its disappearance. Never was socialist propaganda than today. The paign the socialists have ever waged is enough to get even one new six month's life from the union men. subscription during the next ten days the paper would be free from all danger. Will you do it?

We believe that you will and to make it easier we are going to make a special while to make an actual fight. campaign offer-not so low as to injuriously compete with other party papers or to destroy all income, but low determination to smash the union. enough to make it easy for you to help The men struck and the present long the paper and socialism at the same struggle was begun. For a little while ten or more from the first of July until the number after election for fifteen time that the campaign is on and just the time during which votes will be divide the workers while they were bemade for socialism. Now if only one of ten and then collect the names later labor. He still objected for he saw Central promises to affect thirty thouought not to be hard to get 10,000 such destroying his union vote. it can be done if every one will take ning of this week. Since then Harrihold. Send in the clubs as fast as son has recognized his real masters. possible and we will be all ready to He has thrown the union men overstart them on the first of July.

The above was put in type last Saturday night. On Sunday was held the laborers, in the laboring districts. He May Day celebration described in another column. The comrades and friends who were there were told the situation of the Call and at once took up a collection netting sixty dollars. This makes it absolutely certain that the pa- class ruled. per will not suspend as there is not the slightest doubt but what the comrades from outside will help out the small amount that still remains. But this is merely to insure existence. Much more than this is needed to secure active life. The intention from now to the election is to make the Call the very best socialist vote-maker in America. For that purpose there will be few long long articles and more short thoughtprovokers. A special feature will be made of the relation of socialism to the trade unions. All the union news will of government through a party of your be printed each week as well as other Items of interest to workers, and a strong effort will be made to make it the ballot box under the banner of soso interesting a paper that all laborers cialism as are the laborers of other will want it whether they are socialists lands and elect members of your own

A subscription list is enclosed with each copy of this issue in order to ena- the wrath of the laborers who have ble you to take advantage of the special campaign offer made above. There is not a single subscriber to the Call

dub between now and the middle of June. If you cannot get the fifteen cents from everyone do you not think tra cents it will take to make up the necessary sum so as to have the paper sent from now until after election to ten of your fellow workers?

To help aroure the interest of every subscriber and give him some reward for his trouble we will give a cloth bound copy of Engel's "Socialism, Utopian and Scientific"- to everyone who sends in such a club of ten. This is the Aveling translation with the introduction complete and is a book that next to "Capital" forms the foundation of the socialist philosophy.

This offer will close promptly on the soth of June and it is hoped that as many as possible of the clubs will be sent in at once so that the mailing list may be set up in the course of the regular work of the office and all extra expense be spared. Now comrades, it is up to you. We have done our share.

To all outward appearances there i little change in the strike situation in rades last week to the fact that any Chicago. But to a close observer the last week has brought some very important changes.

The building trades have been makfighting each other they have no time ing a most noble fight. They have stood together like heroes. They deserve the support of every sympathizer with the cause of labor wherever he may be. They have recognized for many years the point that the socialist has so often preached that the real strength hill fight for it, but they have reached of the capitalist class lies at the polls But they made the fatal mistake of be lieving that the laborers could secure political power through one of the old parties.

They have made a faithful trial of this position. They have with few exceptions solidly supported the Democratic administration of Carter Harrison. On his side let us be fair to him he could to fulfil his share of the bargain. We will suppose for the purpose needed. The City of Chicago has just of this article at least that everything shown that it was never more ready for was done in good faith on both sides. Harrison in return for the influence of entire central and northwestern states the unions appointed a large number of are just waking up. The greatest cam- labor leaders to city offices. He also instructed the police to be lenient with upon us. Comrades, can you afford to atrikers who were trying to prevent see this paper stop at this time? If those traitors of the laboring class, the one subscriber in every ten cared scabs, from taking away the means of

> For a time this has worked fairly well and many small concessions were secured. But at last there came a time when the capitalists thought it worth

They not only refused to make any further concessions but announced their The Call will be sent in clubs of Harrison did his best. But then those who were his real masters spoke. He was informed that he and the Demo That will be just during the cratic party were, like their Republican opponents(?) simply stool pigeons to ing plucked. He was made to see that comrade in each city will AT ONCE the government, police and all were for nd us in the money for one such club the "protection of property" and not of we will have no further trouble. It that in acceding to this demand he was sand men who declare they will accept

> This was the situation at the beginboard, is firing those holding city jobs, has rearranged the police and put "men who could be depended upon" to club was given no choice on this point. It was openly threatened that if he did not act the Federal troops would be called in and he would be made to see that in the last analysis the capitalist

> So he gave up and brought out the police with the battery of artillery, "for use in street riots" and paraded them before the strikers' headquarters to intimidate them and issued his orders to his police magistrates to give strikers the limit as to punishment when they were arrested.

> Strikers and union men of Chicagocan you not see the handwriting on the wall? If you would save your union, win your strikes and gain your liberty you must yourselves possess the powers own and not depend upon your "influence" with existing parties. Unite at class to office who will owe no allegiance to capitalism and will fear only elected them.

Are you still hustling for subscribers?

SNAP SHOTS BY THE WAYSIDE.

been a Republican is quoted as declar ing that the "hope of the people lies in the Democratic party." He says the Republican party will do nothing with the trusts. That's where Pingree is mistaken. With the trusts they will weep away the last vestige of property in the means of production which the small producers (whom Pingree calls 'the people") have still managed to hold on to. They will prepare the road for socialism, but not upon the "potate theory. Pingree don't like the trusts because he can't break into them, and it may be they have already haken his grip on that shoe factory. That in itself is a good and sufficien reason for any Republican turning Democrat, but it won't take Pingree very long to find out the frailty and weakness of what he now considers a

The secretary of war has declared that the United States will within a few years be involved in war for the support of the Monroe doctrine. It eems far more probable though that the next war may more likely result from the capitalist government of this land attempting to smash up the Monroe doctrine (or the idea corresponding to It), amongst other people. The nefor expansion in order to find markets for the enormous product of abor in this land, will not allow any "hands off" doctrine on the part of the ther fellow to stand in the way. Capitalism cares nothing for doctrines un less they have a possible market attached.

Eight, thousand washerwomen Paris have gone on strike for better conditions and altogether 25,000 people engaged in the laundry industry are nvolved. It is said that to such a pass have things arrived that a clean towel is not to be had in Paris. It would be a terrible catastrophe indeed if the French capitalist class were forced to wash their own linen, but on the other hand it might be good practice, in view of the fact that the growth of socialism in France forecasts a period in the near future, when the existence of a privileged class who depend upon the producers for all material necessities, will be brought to an end.

The Chicago Daily News of the 28th ult. gives in its columns a description of a peculiar revolver known as the which is alleged to have been found on a union picket when arrested. This weapon we are informed s of the type commonly used by anarchists, nihillsts and socialists of the old-world when some crowned head or other eminent person is to be removed This weapon may perhaps be cousidered sufficient by the two first mentioned groups, but we hasten to inform the News that the socialists use a far more potent instrument to effect their They know that the capitalist ends. class fear the intelligent vote of the workers more than all the cheap revolvers that were ever manufactured. and acting on this knowledge they use the ballot as a means of emancipation. Nearly 600,000 socialist votes in Belgium attest this fact.

Nearly 1,000 United States soldiers have been sent from the Philippines to the military insane hospital at Washington during the past two years. Eighty-three suicides have also taken place in the army of occupation during that period. Not content with the destruction of the body capitalism destroys the mind in addition. Future generations will be at no loss to account for this epidemic of insanity, see ing clearly that it is merely the reflex of an insane economic system.

no compromise, but will insist upon month. their terms being acceded to. Perhaps the unctuous Chauncey Depew who resigned the presidency of this road for a seat in the Senate could be induced to "con" talks, and thus throw oil on the troubled waters. Chauncey's usefulness in this line will be sadly missed by the railroad bosses, as it was universal ly recognized that this fluent laborskinner was peculiarly adept in hypnotizing the exploited victims of capi talism. However it looks now as if the strikes of the spring of 1900 may not unlikely lead to a big political strike a the ballot box in the fall, by an immense vote for the socialist principle

Siegel, Cooper & Co. have decided to introduce the co-operative plan into their department stores in Chicago and York. The scheme also includes a profit-sharing plan to be operative among employes of more than three years standing and an old-age pension for those who have been ten years in service. This of course enables the employer to add to the threat of dismissal which he now holds over their heads the additional one of the prospect of osing these generous (?) additions to his pay.

Meanwhile the present owners retain majority of the stock and therefore full management of the funds invested by their employes before whose noses are dangled these prospective premums to urge them on to harder toil.

John W. Gates, it is stated, is about to be prosecuted for his unbusiness like conduct in playing ducks and drakes with the interests of the Wall street gamblers through his manipula tion of the Steel and Wire stocks There were also about six thousand human beings who actually produced

steel and wire instead of gambling with iction of Mr. Gates, but the power o prosecution lies not with them. Yes they have a means of forever preventing the class to which Gates belongs from making victims out of them. The ocialist ballot as a remedy against the Gates' method of accumulation will be

The Middle of the Road Pops attempted to hold a convention at Springfield, III. last week. Of 1,200 delegates expected just 30 presented themselves.

more effective than a thousand prose-

cutions under capitalist law.

And the middle of the road seems to have no attraction to the erstwhile re-

When the convention was in session a letter was received from a Mr. Hess, bewailing the fact that the former Pops have been torn apart and have lined up on one side or the other of the coming struggle. He said that "some have gone to McKinley, others are shouting for Bryan, and still others are advocating the terrible socialist doctrine that Uncle Sam shall raise all the oats, corn, etc., etc." As for him he wants to stay in the middle of the road.

As the class struggle becomes mor learly defined the middle of the road will be about the worst place to encamp.

But Mr Hess' conception of socialism that puts Uncle Sam in the business of raising oats, corn, etc., etc., puts him to his wit's end; he wants the surplus value of the farm hand. He (the M. of R.) wants to exploit the industrial workers in the cities. He cannot think himself into a condition in which the function of organized society shall be to secure to each worker the social value of his labor. To think and realize what this signifies is too much for the average middle of the road Populist.

The skeleton of the new postoffice building is still untouched, and Brother Wm. McKinley, honorable member of the Bricklayers' union, who has it in his power to compel the contractors to proceed with the work and give employment to thousands of workmen, still keeps silence. Brother McKinley seems to be aiding the contractors. Bricklayers' union ought to investigate.

Some people will think it strange that the Centrists (church party) in Germany will aid the emperor in voting for the naval bill, but there is really nothing strange about it. The interests of the church and empire are identical. The socialist party is the only peace party in the world. They are opposed to military or any form of domination.

The grand jury of Cook county is to in vestigate the labor troubles in Chicago. We advise the workers to look out. There is something brewing. The capitalist snake is not sleeping; it may strike with fangs at any moment. Workingmen stand by your organizations!

The newspaper trust in this city is at ts wit's end how to harmonize its duty to the capitalist class interest and not break their bargain with their creature Mayor Carter H. Harrison. 'He is trying to keep on both sides of the fence in the present building trades lockout. The situation is an impossible one, and we await coming developments which surely will aid the workers to open their eyes, perhaps through broken heads.

Workingmen, don't get excited about the Boer-British war. The English thieves are trying to make themselves masters of Africa, and the Boers so far as they are masters show how much there is in them for workers to interest themselves in their behalf. They have A threatened strike on the New York issued an order threatening severe punishment to anyone who pays native workers over one pound (\$4.80) per

The evidences of prosperity are as much in evidence as the signs of spring. Every day the papers contain accounts give the strikers one of his celebrated of closing of mills and factories, lockouts and strikes.

> At the Ohio Republican convention Mark Hanna said there must be no change. Just think of four years more of hell. If you want to get out vote the socialist ticket.

The head of the Franklin syndicate who swindled the little business mer in New York with the promise of 520 per cent profit on their investments, has been sentenced to the penitentlary for ten years. A writ was applied for on the ground of "reasonable doubt" which will have the temporary effect of deferring the execution of the sen-There can be no "reasonable doubt" but that Miller is still in posession of some portion of his ill-gotten gains, as this is about the most probe. de explanation of the "law's delay. He may get still another postponement, if when the "reasonable doubt" theory is legally exploded, he can scrape enough of the needful together to secure a "supersedeas," after the manner of Banker Dreyer, for whom the gates of Joliet still yawn in vain.

It is amusing at the present time to ee how interested the capitalist press of Chicago are that the right of the "scab" to labor shall be protected. That is because he is a part of their "property" and without him capitalism could not exist a week.

Involuntary poverty is the result of involuntary idleness. When natural opportunities are free none need or who can and will work.

LETTER BOX.

Union Is Strength.

Union Is Strength.

Editor of The Workers' Call:—
Socialists of America, so long as we are divided, the enemy will triumph. The enemy is united, and therefore continues to hold the workers in servitude. "Amalgamation of all socialists!" that is the watchword of the hour, of all carnest, intelligent, and class-conscious socialists in both parties. Comrades, take advantage of the opportunity, for if we shall be divided much longer it will only prove our little faith in ourselves; as a result we shall undoubtedly lose the confidence of a large number of our present supporters, and prove ourselves incapable of properly carrying on the great class struggle, prove ourselves as unworthy of the trust of the working class who desire a concerted movement to free them from the oppression of capitalism. The Conference Committee decided to submit two names, "S. D. P.," and "U. S. P." for selection by referendum vote. According to the information I have from members and

of life. That is on the control of title. So what matters it to us, by title. So what matters it to us, by which name we are known. It is so insignificant a question that it ought to settled at the nearest opportunity. We socialists want unity of forces and we are going to get it. But this can become an accomplished fact only by the adoption of the "S. D. P." name, for it would be bad policy to go contrary to their almost unanimous wish. I see many things to make us hopeful if we many things to make us hopeful if we are united, hence I carriestly hope to are united, hence I carriestly hope to suits of which bring accumulated dissuits of which otherwise might have are united; hence I earnestly hope to see that name carried by a unanimous vote. The New York state comrades of the S. L. P. and the S. D. P. have held

the S. L. P. and the S. D. P. have held saveral joint meetings which were very gratifying; for the comrades seemed so congenial and really brotherly that all petty quarrels and janglings are forgotten; and it does all good to meet, if for no other reason. An organizer has been secured to agitate in the state from now until election and spread the principles of international socialism.

I think the coming election is a glorious opportunity wherefrom great possious opportunity wherefrom great possions are provided in the standard possion of the principles of the principles of international socialism. ous opportunity wherefrom great t

ious opportunity wherefrom great poss-ibilities may result, for with very few exceptions all trade and labor papers in the country have hoisted the fing of Debs and Harriman, who stand for a principle which will destroy injustice and economic serfdom everywhere. I joyfully sing to the working class: "Lift up your pale faces, you children of sorrow.

of sorrow, The night passes on to glorious mor-

I think I voice the sentiment of the I think I voice the sentiment of the majority when I say that all past grievances among the socialists should be buried forever, and we should meet the common enemy as one solid body and work as such to spread the light of socialism. No man need be afraid or feel ashamed to unite with his fellow worker in the interest of the united movement.

The opportunity now presents itsel The opportunity now presents itself to socialists to show that they have the interest of the cause at heart. We have many more things which should draw us together than we have to thrust us apart. Let us get together and "shout the battle cry for freedom" for the workers' emancipation. Let us take up the good fight with renewed courage, hoping and trusting the election day 1900 will see greater unity, larger fraternity among the tollers of America and of the whole world.

H. Reich. H. Reich.

-New York, April 16.

The Name Question.

The Name Question.

Editor Workers' Call:—
The word "Democracy" conveys to the mind of the average voter the principles and policy of the Democratic party of this country which is tautological with capitalist exploitation. On the contrary the word "Socialist" conveys the very opposite import of either Republican or Democratic vecables, and as the word "Republican" was an earlier name of the Democratic party, it was and is now synonomous with capitalism, to all who are familiar with the political history of the United States. Taking these facts into consideration, it would be sacrificing mary a laborer's vote to capitalism, by adopting a name for the socialist movement that would cause confusion among the illiterate.

-Davenport, Wash., April 23, 1900.

Resolution.

At the regular meeting of the Central Committee of Section Chicago, S. L. P., at 65 N. Clark street on Tuesday, May ist, held for the purpose of discussing the question of unity with the S. D. P., gent, though certainly not the highest and in which all party members were intelligence. The failure to see that invited to participate, the following resolution was passed as expressing the sense of the meeting:

of their party, and Whereas, The united party should be whereas, The united party should be as truly united as possible; therefore, Resolved, By the Central Committee of Section Chicago in regular meeting assembled, that we recommend to the membership of Section Chicago to vote for the name "Social Democratic nearty".

-May 1st, 1900. Jas. S. Smith, Sec.

He Fought the Good Fight.

We regret to announce the death of our old and tried German comrade Adolph Kundt, who passed away on Tuesday the 1st of May, after a week's illness. Comrade Kundt was for a long time active in the socialist movement both in Germany and the Unitetd States, his work for socialism covering a period of over twenty-five years. comrades deplore the loss of a valiant and active companion in the cause of labor, and an old member of the Socialist Sangerbund. The burial will take place on Saturday, May 5th and will proceed from La Salle Turner hall, corner Willow and Orchard streets at 2:30 p. m., to the crematorium at Graceland cemetery. The Socialist Sangerbund will attend and all socialist comrades are invited to be present.

When will the people learn to use their ballots to break their chains, and not as rivets to make the shackles of their slavery more secure?

A CAPITALIST IDEAL.

on of the "Intelligent Un " Who Loves Long Hours and Low Wages.

In our present society with its eco. omic class distinctions, it is interes ing to note that in all discussions the labor problem by those who beion to, or identify their interests with the ruling class, any initiative or action taken by the workers on their own behalf, is continually denounced by such individuals, as injudicious, foolish, and productive of nothing except evil to those who engage in It. These spokesmen of present society are fond of constructing from their own imaginations an ideal workingman, who as an indi-vidual, repudiates the course of action taken by the organization of which he is a member, when such organization

is a member, when such organization by referendum vote. According to the information I have from members and the papers of the S. D. P. I have come to the final conclusion that they are strongly in favor of retaining the name "Social Democratic Party" for the amaignment movement.

Comrades of the S. L. P. let us reason together a little about this. We are socialists first, last and all the time. Our aim is to advocate the collective ownership and control of all necessities of life. That is our principle, and not a title. So what matters it to us, by which name we are known. It is so insignificant a question that it ought to been avoided, upon their foolish

From the standpoint of these gentlemen the only sane, practical and beneficial course of action for in workers to pursue is always that sug

But every individual workingman not at all to be listed in the above cal alogue. The capitalist press cheerfulf admit that there is such a thing in ex istence as an "intelligent" union man But this highly "intelligent" person al ways decides in his own mind that the course pursued by the union is invariably wrong, and that "justice." "right" and "fairness" are as invariably upon the other side. "Individually," says one of these would-be directors of the working class, "the intelligent union man is anxiously hoping that the contractors win out in the present struggle."

Therefore, according to this theory, the worker can only demonstrate his intelligence by hoping for results that would bring him longer hours, more intense labor, and a lower wage. Results that would leave himself and the group or trade to which he belongs, without the slightest means of defense against the merciless exploitation which the union was purposely formed to restat or check as much as possible. If such a course is an expression of intelligence it would be interesting to know how folly is to be demonstrated. But this in itself corroborates the fact so often. put forward by socialists, that in every aspect the interests of the working and capitalist classes stand diametrically opposed, and the ideas by which those interests are expressed also stand in direct contradiction to each other. The capitalist definition of "intelligence, so far as the working man is concerned. is sheer felly to the latter. The workingman who in resisting capitallat exploitation, uses his "intelligence", in furthering his material interests, is regarded as an ignorant fool by the capitalists, or rather, they so pretend to regard him, which amounts to the same thing. A docile, tractable unresisting slave, is the ideal workingman in the conception of the ruling class. One who stands up for what he thinks "hisrights," on the contrary, is fo them an idiot. The definition of intelligence varies with the standpoint of material

interests from which it is viewed. From the socialist point of view, the course pursued by the union is intellionly a very limited success, and then only for certain groups of workers, is the most that can be hoped for, and Whereas. The question of choosing a name for the proposed united party of the S. L. P. and S. D. P. has been submitted to a referendum vote, and Whereas. The members of the S. D. P. carnestly desire the retention of their name to secure harmony in the ranks of their party and of the party of the worker obtaining the whole, instead of a part, of this product, can be realized by the use of political methods, is the point at the possibility of the worker obtaining the whole, instead of a part, of the product, can be realized by the use of political methods, is the point at the party of the worker obtaining the whole, instead of a part, of the product, can be realized by the use of political methods, is the point at the possibility of the worker obtaining the whole, instead of a part, of the product, can be realized by the use of political methods, is the point at the possibility of the worker obtaining the whole, instead of a part, of the product, can be realized by the use of political methods are product. that the possibility of the worker obit cannot be denied that in resisting capitalist robbery, and seeing the necessity for uniting for such purpose. the workers display intelligence which in the end will develope the ideas and methods necessary for putting an end to the wage system once for all.

While it may be said that the actions and tactics of the unions have not been always guided by the highest judgment it may as safely be said that they will never be guilty of the folly of acting upon the advice of those whose only care is the perpetuation of the system by which the workers are plundered of the greater part of what their labor produces. If the idea of securing of the whole product of labor to the prothe capitalist class ducer is "foolish." may expect to see this particular folly grow to amazing proportions in near future, and when the realization of this idea is accomplished, while they may think the world has gone crazy, it will be none the less necessary to find a new definition for "intelligence" as distinguished from that which they now hold.

We have been for a long time trying to make people prosperous by making them temperate. It is time to make them temperate by making them prosperous.

There is always room for more subscriptions.

Socialism Among Quakers.

ddress Delivered by Comrade Oliver Troth, of Branch II., Camden, N. J., Before Friends .- First Day School Conference Held at Moorestown,

N. J., March 31st, 1900.

olving the welfare of humanity?

ing is so severe that the majority are time. ities and saps their moral vitality.

frain from all that tends to cloud or befuddle. Let us endeaver to let the he courage to acknowledge and mainin the convictions it forces upon us. et us call things by their proper imes, so that we can sooner come to better understanding of the subject nd of each other. Let us not shield lar terms. urselves behind superstition, selfishness ignorance, and above everything apathy. I shall endeavor to present the subject, as I see it, in a clear cut, concise manner. I believe in using words to express & ught, not to con ceal it. In considering any question, greatest headway can be made by recognizing certain self-evident truths. In geometry we have "a straight line is the shortest distance between two given points." In mathematics, "one and one make two." In after calculations, no matter how correct or to what untold lengths it may be carried, the re sult will be wrong if these self-evident truths have been ignored in the beginning. So in considering this question, let us start out with some economic axioms that are so plain that the wayfaring man, though a fool, can under-

FIRST. That which nature provides the common property of all God's children.

SECOND. That which the individual creates belongs to the individual. THIRD. That which the community creates belongs to the community. Are the forces at work today calcu lated to make these simple axioms operative? Is the present method of production and distribution in accord with common sense and scriptural teachings? A little examination will reveal the facts. Last year the Standard Oil Company declared dividends to the amount of about \$60,000,000 Dld an allwise providence put the oil in the earth for this purpose or did he make a free gift to, all mankind? In the last thirty years the aggregate wealth of the nation has increased about 230 per cent. In the same period of time the wealth of the Standard Oil Company has increased about 55,000 per cent. The NET PROFITS of this gigantic corpo building up of this vast sum possible are the masses-they burn coal oil. Is this in accord with common sense? There is not a productive mercantile business that you can engage in today that is not controlled by a combination. If you make more money than they think you ought to, or interfere with them in any way, you are squeezed to the wall. Certainly this is a question that involves the welfare of humanity. The trusts are the logical outgrowths of competition. All the "Be it enacted" will not dissolve one of them. The recent steel combination of Messrs. Car-

negie. Frick & Co., have forestalled all possible anti-trust laws by allowing all property to be held by the original own- OF PRODUCTIVE property; in fact its ers and by making provisions for doing business in each state according to the laws of that state. There is but one solution to the problem, and that is the public ownership and management of the means of production and distribu tion. The present system of production is planless, wasteful; a sort of hide and ek game with demand. A heavy crop of cotton sends the price below cost o production and an effort is made next year to diminish quantity to maintain A full crop of wheat everywhere brings the grower in debt. Our present economic order is so full of contradictions that men go without clothes if there is too much cotton grown, and people go hungry because too much grain is raised. When pro duction is carried on to satisfy wants for material things, poverty will have no place among an enlightened people except the earth refuses to give up her cuntles or men refuse to earn their ead by the sweat of their brow

The waste under our competitive mane demand and then endeavorply it-just a planiess, haphagard, junction "Bear ye one another's

nsideration of social questions in- premacy. This certainly involves the law according to the scriptures "thou welfare of humanity. It cannot go on shall love thy neighbor as thyself." They certainly can NOT. No thought. much longer. The trusts have solved Jesus declared the kingdom of heaven cientious person can. I do not the problem for their benefit. RELGIUM

Brussels, April 29.—Thousands of workmen, many accompanied by their wives and children, paraded in the con-tral streets and boulevards of Brussels today, their demonstration being or-ganized in favor of the workmen's old-age pension scheme. The manifestants thusiasm in his work: and, worst of all, it cramps the mind and belittles the man. The separation of the laboring and employing classes, is indeed, one of the most painful and dangerous tendencies in society.

In the competitive system money not man becomes the center and circumference of all trade. Mammon, swallows up humanity. The wage worker is regarded as a commodity subject to the

At the workmen's palace M. Furne mont made an elequent speech. "Th government," he said, "grants old me: government. he said, 'grants old men, of 55 IS centimes (3½ cents) a day. We shall fight to obtain our rights. If the present chamber refuses to grant what we demand the composition of the next parliament will bear witness to our obstinate intention to obtain it."—Chicago Record.

And in the case of Furnemont this threat means something. The Belgian workmen are organized along political lines and Furnement and Vandervelde are their representatives in the Chamber of Deputies and can make their protests heard there where they must be heeded.

DENMARK.

There have just been some elections at Copenhagen to fill vacancies on the create than formerly. In fact they get municipal council. The socialists won them 27 out of 36 seats.

In the call to the comrades to converts a nation of brethren into a rally for the coming fight which is to he found in the columns of Le Socialista tion to the fact that none of the proposed municipal movements are to on the ground that a projetariat must be well-fed to be good fighters and so they place foremost in their demands the feeding of the school children.

GERMANY

The Socialist party has suffered a great loss by the death of Karl Oertel, who was a member of the Reichstag and also a member of the Bayarian local parliament. He was only thirtyfour years of age but had been an a tive member of the party for many years. He was first elected to the Reichstag in 1897. The socialists will contest both seats.

"Vorwarts" publishes the usual against socialists. During March they vere sentenced to four years, seven nonths, four weeks and four days' in prisonment and fines amounting to £65.

ITALY.

Socialist congress is to held at Rome

The Socialist and Radical deputies nave published a manifesto explaining that they have been forced to have reourse to obstruction in order to defeat the tactics of the government.

The Polish socialists of Germany held convention in Berlin last week and hally decided the quesition whether the Pensa nationalistic issue shall re-

main a leading part of the party creed. The "table cloth was cut in two." Af-ter a boisterous session, the imperialistic denunciation that found expression the nationalistic cry was thrown overoard, and the body became an integral part of the Social Democratic party, holding that the economic question was paramount. The government considers this action as of the utmost importance as strengthening and unifying socialsm .- Cleveland Citizen.

The Socialist party is organizing a eries of meetings on May Day. "El socialista," the organ of the party, published the manifesto signed by Pau Iglesias, the president of the Socialist party in Spain.

LABOR ITEMS.

The strike of Italian laborers in Croton Dam, 'N. Y., where the militia has been strempting to defeat the workers, has been greatly misrepresented by the yellow journals. The New York Volksselfung investigated the trouble and found that the rumor of the blowing up of the dam started in the empty head of a sensational reporter, the latter admitting that he dreamed that the blowup would occur, and thereupon he 'faked" the story.

Eighty glass manufacturers of Germany, Austria, England, Norway and other countries assembled in Dresden recently to watch the operation of a new blue-glass blowing machine. The cent and displaces about 50 per cent of labor, while the waste of glass is also materially lessened. The entire glassblowing industry, according to trade journals, is being revolutionized, and they lay much stress upon the fact that capitalists now possess "the advantage of not being dependent exclusively upon skilled workmen." Still they say laborsaving machinery is not a great issue! It is so great, however, that it has raised the question of socialism or slav-
